This was done to alleviate objection from Rockland for the necessity for handling heavy freight, the grist and flour mill being built in close proximity to the station and the expense of teaming freight to the business part of town.

		16/03/1915	23418	The use of the crossing of the CNOR of the GTR spur to Edwards Mill is particularly light. No night traffic and only an occasional daylight movement on the GTR. So long as the character of the movements over the crossing shown to exist continues, CNOR and GTR relieved from providing a signalman to operate the crossing; home signals and derails to be set for clear for the CNOR; key to the tower to be left in the custody of, and the interlocking plant to be operated by the crew of the GTR.
