

Sussex Street - Locations by Mileage

This was originally part of the Bytown and Prescott railway. It became a separate entity when the St. Lawrence and Ottawa Railway built a line from Chaudiere Junction to Broad Street. The Sussex Street subdivision was measured from zero at Chaudiere Junction. With the changes that took place in the Ottawa Terminal in the 1960's the line became known as the Ellwood Spur but mileages remained the same.

Mileage Location

Mileage	Location	
0	Chaudiere Junction	Junction with Prescott sub.
