

## **Additional Ontario-chartered railway companies, 1895-1914**

NOTE: The 53 companies identified in this list, all chartered by the Ontario Legislature between 1895 and 1914, were inadvertently omitted from both editions of the book. In some cases initial charters were followed by amending acts, typically to extend a time limit or vary the authorized route, and such amendments are cited following the charter. The corporate history of most of the omitted companies ended with the expiration of the charter or a single time extension.

Of railway companies chartered by Ontario during this period, the great majority did make their way into the book, as well as a large number of amending acts and acts providing for public aid in various forms. For companies that did appear in the book, regardless of when chartered, the record is substantially complete, including amendments enacted between the years in question.

The full text of historical Ontario statutes is available online. Search for “Ontario statutes” and the year for the annual volume, select the first hit at [archive.org](http://archive.org), and consult the index at the back for the page number.
