

Local Railway Items from Area Papers - Ottawa Electric Railway

07/04/1890 *Ottawa Journal* *Ottawa Electric*

Mr. H.L. Cargill of Boston, representing the Thomson and Houston electrical system was in the city on Friday talking up the possibilities of laying and running a street railway in Ottawa by means of electricity. His company has already equipped 100 roads on this continent among the last of which was laid in Victoria B.C. He says that the electricity equipment for a five mile road would cost about \$50,000 and that the road itself could be put in running order for \$80,000. The cars would run on an average ten miles an hour. The difficulties with contending with the winter conditions of the road in Ottawa were pointed out to Mr. Cargill when he referred to the fact that in St. Paul, where they have the system and where the winters are just as severe as here, the cars are kept running all the winter season by means of keeping the track clear of snow by the company's own electric snow plough. During the day Mr. Cargill was about the city interviewing members of the city council and other prominent citizens of the city. His idea is to induce the coneyed [sic] men to form a company for the promotion of the electric system street railway scheme.

Report of council meeting with proposed agreement.

15/07/1890 *Ottawa Citizen* *Ottawa Electric*

City Council accepts Howland offer.--

23/07/1890 *Ottawa Citizen* *Ottawa Electric*

Mr. W.H. Howland, accompanied by Mr. A.W. Jones, engineer of the Thompson-Houston Electric Company, and Ald. MacLean, chairman of the Street Railway Committee, went over and inspected the route of the [proposed electric railway yesterday.

15/08/1890 *Ottawa Journal* *Ottawa Electric*

The long deliberations of the street railway committee were brought to a close last evening and an agreement between themselves and Mr. Gemmill, solicitor for Mr. Howland, arrived at, which will be submitted to the council on Monday night. 20 year charter.

Main line to be in operation by 1 August 1891 east end of Rideau Street to C.P.R. via Elgin and Albert Streets and from Wellington by Elgin to the C.A.R. depot and from Wellington via O'Connor, Albert and Bank to the Exhibition Grounds at Lansdowne Park, also for a branch from Rideau to Sussex via Dalhousie.

Branch lines will also be constructed on Nicholas and other streets in St. Georges ward, through Mount Sherwood and Rochesterville to the experimental farm and in Rideau Ward, to be completed in 1892 and 1893.

Line to be worked by electric power in summer and in winter if possible. If impracticable then sleighs and horses will be used. Will experiment with running a fast car with revolving brushes.

Main line interval - 10 mins in summer and 15 in winter.

18/08/1890 *Ottawa Journal* *Ottawa Electric*

New agreement - change of route.

The main line, to be completed by Aug 1 1891, will be from the east end of Rideau Street at Wurtemberg street to Dufferin Bridge thence via Wellington street to O'Connor, along O'Connor to Albert and thence along Albert, Wellington and Broad Street to the C.P.R. depot, also on Bank street to a point 100 feet beyond the main entrance to the exhibition grounds, and from Wellington via Elgin to Catherine, and via Catherine to Bank; and along either Dalhousie or Cumberland. By June 1st 1895, the line must run along St. Patrick to Creighton and Charles Streets in Rideau ward; up Nicholas and Theodore and to Rochesterville and Mount Sherwood via Preston, Ann, Emily and Bell to the Experimental Farm.

Details of other terms.

Messrs. Ahearn and Soper were informed today that the mayor and city solicitor would require them to sign the contract at 5 o'clock this evening.

05/11/1890 *Ottawa Free Press* *Ottawa Electric*

The long and tiresome negotiations for the construction of an electric street railway terminated this morning, when Messrs. Ahearn and Soper met Mayor Erratt and the city solicitor in the city clerk's office at 11.30 and duly signed the contract. As soon as this was over hearty congratulations with Messrs. Ahearn and Soper were exchanged. A supplementary contract was also prepared embodying the resolutions of the council passed on the 6th October last, by which the Howland company were to be allowed to use the T rail on certain streets and in consideration of this concession asking them to test the storage battery system when it has arrived at a proper state of perfection.

INTERVIEW WITH THE FIRM

To the Free Press this morning, Messrs. Ahearn and Soper said: We have cheerfully signed the supplementary agreement which made important concessions in the matter of the rail which we did not expect to receive and did not ask for. We understand that the mayor will not sign the supplementary agreement without first submitting it to the council for an expression of opinion by that body. You, of course, understand that it means we will be allowed to lay the T rail on the entire line with the exception of a few specified portions of a few streets. If the council directs the mayor to execute the contract which we have already signed it is but natural that we should avail ourselves of the permission to use the T rail wherever we can, although in offering to accept the contract as it stood without this provision we presumed that it would be more acceptable to the city.

We have arranged with Mr. F.A. Hibberd of the Canada Atlantic railway and other important roads, to act as our engineer during the construction work. An electrical engineer will be in the city in a few days.

05/11/1890 *Ottawa Journal* *Ottawa Electric*

Mr. Noe of the Edison Electric Company and Mr. F.A. Hibbard, engineer for the construction work on the new electric road, were engaged at the City Hall this morning looking over the maps for the purpose of getting the proper distances between the various points. Representatives from the Westinghouse Electric Company of Pittsburgh, and other firms will arrive in the city next week.

Messrs. Rae and Graham have leased the foundry and machine shop known as the Baldwin property from Messrs. Ahearn and Soper. They have been given 25 horsepower for operating the machinery and for driving purposes.

11/11/1890 *Ottawa Free Press* *Ottawa Electric*

Mr. Thos. Ahearn has just returned from inspecting the electric street car works at St. Catharines, Ont. He is very well pleased with the pattern of car manufactured there. The St. Catharines company are fulfilling orders from Victoria, New Westminster, B.C., Winnipeg, St. John, N.B., and may be selected to furnish the plant for the Ottawa road.

18/11/1890 *Ottawa Free Press* *Ottawa Electric*

Messrs. Ahearn and Soper have ordered from Messrs. Pattison and Corbin of St. Catharines, Ont., 12 cars for the electric street railway. Of these, ten will be motor cars, with 16 foot bodies, and able to accommodate 8 more people than the largest cars at present used in Ottawa. The other two will be trail cars intended for use on the Bank street portion of the line during exhibition week or for transportation purposes at other times when there is a rush of people. The whole of the cars are to be finished in polished oak with plush upholstered seats. Each car will be provided with a patent Dean heater, placed under the floor, and will be a facsimile of the Broadway and New York car. The cars will be here by the 1st may next. Messrs. Patterson and Corbin have manufactured cars for Vancouver and New Westminster, B.C., Winnipeg and St. John, N.B. The order from Messrs. Ahearn and Soper is the largest ever placed from any one part of Canada. The firm is also advertising for 14,000 ties.

20/11/1890 *Ottawa Citizen* *Ottawa Electric*

Mr. James A. Rutherford, representing the Westinghouse Electric and Manufacturing Company, was in the city yesterday and inspected the route of the proposed electric street railway. It is probable his company will tender for the supplying of the electrical apparatus.

The Rathbun company have been awarded the contract for supplying 14,000 ties for the new electric street railway. Mr. H.L. Cargill of the Thomson Houston company, was in the city yesterday endeavouring to secure the introduction of his firm's system to the new street railway. He had a long interview with Ahearn and Soper on the subject.

Mr. Patterson of Patterson and Corbin of St. Catharines is in the city on business with Messrs. Ahearn and Soper. His firm have the contract for supplying twelve cars for the electric road. The cars will be most elegant, he states, in appearance. They will be seven feet in height. The ceilings, doors, mouldings, etc. will be pannelled in quarter sawn white oak, like a palace car. The seat panels will be painted in gold and ochre, the roof and lower panels in cream, orange, chrome and black. The seats and backs will be supplied with spring cushions, upholstered in English Wilson carpets. The carpet will be a centre of heather mixture, with wide borders in crimson, orange and black. The cars will be here early in April

Controversy over street railway running along Wellington. Keefer is behind this - will allow the electric line to use his tracks between Sussex and Elgin but not between Elgin and O'Connor and proposes to squeeze the electric line to the back streets.

27/01/1891 Ottawa Free Press Ottawa Electric

Sir Hector Langevin's protest against the laying of tracks for the electric railway upon Wellington street and Dufferin bridge has been referred to the civic board of works. There need be no hurry about meeting the minister's opposition to the route selected by the council for the railway. In the very improbable event of the provincial executive deciding that the track shall not pass on Wellington street, the federal government will have no reason to complain, so that to deal with Sir Hector's objection before the charter has been obtained by the city and the proposed route approved by the Ontario executive, would be "putting the cart before the horse". But how the reference of Sir Hector's letter to the board of works cancelled the appointment of the delegation first chosen to proceed to Toronto is one of those things which nobody seems able to understand.

09/02/1891 Ottawa Journal Ottawa Electric

The Charter Granted

Recent obstacles to the Electric railway overcome

One more meeting of the city council and Messrs. Ahearn and Soper proceed with the road.

Power given to use Wellington Street

Messrs. Ahearn and Soper were advised today through their solicitor Mr. Chrysler, that the charter for the electric railway has been granted, and that it will be forwarded as soon as the city council repasses the resolution which was unanimously carried at the last meeting. That resolution provided that the City Passenger Railway Co. should be allowed to make its Rockcliffe connection and extend its Queen Street line to Broad Street, provided however that the Electric company would signify its willingness to enter into an equitable arrangement with the old company for the use of the Sparks Street line as far as Metcalfe.

More

Messrs. Ahearn and Soper, being seen, said "Yes, the charter has been granted to us at last, and will be sent down as soon as the council passes the resolution, which the Hon. Mr. Gibson has requested to have passed. We have given Mayor Birkett a letter signifying our willingness to enter into an equitable arrangement for the use of the present route on Sparks Street as far as Metcalfe st., so that the resolution Mr. Gibson requests to have passed is to all interests and purposes a confirmation of the one already passed.

"Is Wellington st. included in your charter?" inquired the Journal. "Yes, but we shall use Sparks street as agreed in our letter to the mayor if the other company will make an equitable arrangement to allow us to do so. By having Wellington street as part of our route we are in a position to deal with Mr. Keefer's company for the use of Sparks street, and as far as we are concerned we shall try to come to terms with him as promptly as possible. As soon as the charter reaches us we shall be in a position to confer with him and also to order our rails which we are most anxious to do at once in order to avoid further delay."

Messrs. Ahearn and Soper much pleased etc.

The car shed of Electric Street Passenger railway is being pushed ahead. The foundation walls will be completed this week, and yesterday afternoon the frames for the entrance arches on Queen street were put in position.

10/04/1891 Ottawa Journal Ottawa Electric

First Ground Broken

Men at work for the Ottawa Electric Railway

Messrs. Ahearn and Soper, in accordance with the terms of their contract with the corporation and in evidence of their good faith, broke ground on the construction of the electric street railway yesterday.

The first ground was broken on Rideau street in the morning, when a gang of men commenced digging holes for the electric poles on that thoroughfare.

Mr. Soper being seen by the Journal said: "Yes, we have commenced operations by digging holes for poles on Rideau. We are going to replace the Bell telephone poles and use the new poles jointly for the electric street railway and the Chaudiere electric light and power and the Bell telephone wires, thus avoiding the multiplication of poles.

THE FIRST LINE TO BE BUILT

As to the routes we intend building this year, it will be from the C.P.R. depot to Wurtemberg Street via Albert, Metcalfe and Wellington streets, Dufferin bridge and Rideau street; from the corner of Bank and Albert to the exhibition grounds on Bank Street, from Wellington to the C.A.R. depot on Elgin Street and thence across to Bank Street, via Catherine; from Rideau street to St. Patrick on Dalhousie and thence via St. Patrick Street bridge to Creighton st., New Edinburgh.

TRACKLAYING THIS MONTH

Work will be rushed straight along. Tracklaying will commence on the 25th instant.

Further inquiry elicited the fact that during the two or three days the stock books of the company had been open, the sum of \$90,800 had been subscribed.

Mr. H.C. Evans of New York, representing the Johnson Company of Johnstown, Pa., through whom Messrs. Ahearn and Soper are obtaining some of their rails, was also in the city, and stated their supplies would be forwarded in a few days.

HOW THE CARS ARE PROPELLED

The mode of propelling the cars is apparently very simple. On both sides of the street are electric wire poles, between which are suspended sustaining wires.

Supported by these is the circuit wire. The latter is a six sided copper wire about a third of an inch in diameter. From the roof of the car rises what is known as the "trolley arm" terminating in a wheel that runs along the underside of the circuit wire. The current is conveyed to the motor underneath the car by means of this trolley arm, and thus the car is set in motion.

The cars of the new company are now being painted and will shortly arrive in the city.

13/04/1891 Ottawa Free Press Ottawa Electric

The laying of the rails for the Electric street railway will commence on or before the 25th of this month. The contractors are merely waiting for the material to arrive. The work will be under the superintendence of Mr. Leamy of 342 Elgin street, who has already engaged most of the men required.

City Engineer Perreault, superintended the erection of poles for the electric street railway on Rideau street on Saturday afternoon. The majority of poles do not project more than three or four inches into the gutter and are nine clear feet from the sidewalk.

14/04/1891 Ottawa Journal Ottawa Electric Albert Street

The foundation wall of the new electric railway car shed on Albert street, near Lyon, is now four feet above ground and the frames for the doors are being put up. The work is being rapidly pushed. The shed will be 134 feet long leaving 60 feet next to Queen street for future extension, 60 feet wide and 25 feet high. It will be solid red brick, well lighted by windows on the four sides. The front will be ornamental and the doors wood with iron finials. The roof will be flat.

The shed will accommodate 25 cars and there will be four tracks in the interior and two "pits" for repairs in the centre and workshops at the right hand side.

The building will be well drained and there will be a fire hydrant. There will be a comfortable sitting room for the men when off work, and business offices.

The building which will be an ornament ?? will cost about \$7,000. Messrs. Arnold and Calderson are the architects. The contractors are: Matthews, masonry; Sparks, carpentering; Slack, iron work; and McKay, painting.

25/04/1891 Ottawa Citizen Ottawa Electric

Mr. Thos. Patterson has been awarded the contract for the delivery of the ties, rails and other materials for the electric street railway. The ties are now at the C.A.R. station and the rails at the C.P.R. station. Mr. Patterson will begin on Monday to deposit the materials at convenient distances along the route.

30/04/1891 Ottawa Citizen Ottawa Electric

The busy appearance of things on Albert street yesterday afternoon, where work on the new electric street railway is being actively pushed, showed that Messrs. Ahearn & Soper mean to carry on the work of constructing the road as expeditiously as possible. Without any undue ceremony work was commenced at one o'clock yesterday, 75 men being engaged by Engineer Hibbard. The men were put to work fifteen feet apart, between Bank and Metcalfe streets, and before night a great part of the excavating for the laying of ties had been completed. The work is being done by the day under the supervision of Engineer Hibbard, who has Mr. F. Leamy as foreman. Mr. Hibbard, who is performing the work in a most systematic manner, expects to have the greater part of the track laid on that portion of the street by this evening. With praiseworthy forethought he had a patrol on that street last night to warn and prevent travellers from coming to grief on the open portion of the road. Messrs. Ahearn & Soper pay the men \$1.25 for nine hours work. The news of the commencement of the work spread rapidly and hundreds of people, including M.P.s and Senators, visited the scene during the afternoon and passed many compliments to Messrs. Ahearn & Soper for the energetic and thorough manner in which they are having the work carried on.

01/05/1891 Ottawa Journal Ottawa Electric

Work on the electric street railway track is being rushed. The contractors, Messrs. Ahearn & Soper have one hundred and forty men engaged on the construction at a wage of \$1.25 per day of nine hours.

By this evening one track on Albert street will be laid from Bank to Metcalfe streets and the whole of one side of bank street.

The work is being done in fine style under the superintendence of Mr. F.A. Hibbard, with Mr. Leamy as foreman, and the contractors are frequently congratulated on their success.

More - grading by the city - quoted sections of the contract. Streets chiefly affected by the grading question were Catharine and Creighton.

02/05/1891 Ottawa Free Press Ottawa Electric

The double track of the Electric street railway between Bank and Metcalfe on Albert street was completed today at noon. The single track on Bank street from Albert to Lisgar will be finished this afternoon and the double track commenced.

02/05/1891 *Ottawa Citizen* *Ottawa Electric*

Engineer Hibbard, of the Electric Railway Company, now has 130 men in his employ, and is pushing the work of construction. About 2,300 feet of track has now been laid up to the established grades.

05/05/1891 *Ottawa Journal* *Ottawa Electric*

There were seventy five men at work today on Elgin street in construction of the electric street railway, and by noon the line was laid from City Hall square to Maria street. The work is being done quickly and well.

On Rideau street between Nicholas and Cumberland streets, another seventy five men are working, and the track is being quickly laid.

There was a conference of the mayor and aldermen this morning, those present being Mayor Birkett, Ald. Grant, Roger, Serim, Wallroa, Hill, Henderson, Deville and Hutchinson. The subject under consideration was Ald. Grant's complaint that on the west side of Bank street, a distance of only 12 feet was allowed between the rail and the sidewalk, whilst on the east side 16 feet remained.

It was explained that the track was so laid because at the point complained of old houses encroached on the street line. When these houses come down they will have to be built on the proper line and fair space will be allowed. The contractors contended that their line was laid with the knowledge and consent of the city engineer, and that a clear ten feet was allowed on the narrow side for the passage of vehicles, and that their line was in every case better laid and allowed more space than did the old city passenger railway on Sparks street. The space between the old line and the sidewalk outside Bake's grocery and again at the post office was cited as an example.

After a discussion in the open air it was decided that the line on Bank street should be moved, and as it was laid with the cognizance of civic officials that it should be paid for by the city. A large force of men commenced work digging the new trenches on the east side of the road today. Mayor Birkett and Ald. Hutchinson gave the contractors notice to move the line, and called the Board of works for this afternoon to ratify their action.

11/05/1891 *Ottawa Journal* *Ottawa Electric*

All hands Discharged

Work Stopped on the Electric Railway Construction

Messrs. Ahearn & Soper have addressed the following letter to the mayor and corporation.

GENTLEMEN. On the 17th November last we addresses a communication to your honorable body, pointing out that in view of the early construction of the electric street railway, it was desirable that the sewers in various parts of the city should be constructed without further delay.

We have had material for Albert, Metcalfe and Rideau streets ready to put into position for some days past but owing to the fact that the construction of the sewer on Metcalfe street has not been commenced, and that those in course of construction on Albert and Rideau streets are progressing very slowly we are unable to proceed with our work.

We also understand that a sewer is to be constructed on St. Patrick street, but that the work has not yet commenced.

It has been our aim and intention to have the electric railway in operation by June 24, but unless some energetic action is taken by your corporation to push these sewers to immediate completion we shall be seriously delayed.

May we ask your early consideration of this important matter.

Yours truly

Ahearn & Soper

ALL HANDS DISCHARGED

As a consequence of these delays, the whole of the men employed were discharged on Saturday evening, and today not a single man was engaged. About 150 men were thereby thrown out of work.

WHAT THE CHIEF ENGINEER SAYS

City Engineer Perreault said : I have not yet seen the letter and have only heard of it. The company are not delayed from construction altogether. They can still go on laying on Bank st., from Lisgar to the Exhibition grounds, on Elgin to Catherine, on Rideau from Wurtemberg to Sussex and on Dalhousie. By Thursday they will be able to lay up to Sussex on Rideau, and Mr. Sullivan will not be later than Saturday in completing his work on Rideau street drain construction. The delay is caused by no fault of the board of works, but by legal technicalities arising from the court of revision.

12/05/1891 *Ottawa Journal* *Ottawa Electric*

The northern end of Elgin street where the electric street railway track has been laid, was heavily macadamized this morning, and rolled with the steam roller. The roller passed over and over until the macadam was pressed down level with the rails. The object of this course is to force the stone down till it wedges under the flange of the girder rail, and makes everything right and firm.

18/05/1891 *Ottawa Journal* *Ottawa Electric*

The track of the electric street railway was being laid today on Elgin street between Sparks and Wellington. Tonight a gang of men will be engaged in putting in the "diamonds" at the crossing of the old street railway track at the intersection of Sparks and Elgin.

19/05/1891 *Ottawa Free Press* *Ottawa Electric*

The grading of the upper end of Elgin street will be proceeded with immediately. The Electric railway and street car track on Sparks street is laid.

19/05/1891 *Ottawa Journal* *Ottawa Electric*

The work on the electric street railway this morning was confined to the completion of the track laying on Elgin street between Sparks and Wellington.

This afternoon Mr. Hibbard and his staff were engaged in laying the curves from Bank street on to Albert.

The steam roller has completed the making of Bank street roadway and is now at work on Albert street.

The work of cutting the metals of the Ottawa street railway line on Spark street so as to remove them and lay the diamonds for the crossing at Sparks and Elgin streets was commenced this morning.

20/05/1891 *Ottawa Free Press* *Ottawa Electric*

About sixty men are employed today on the track laying of the Electric Railway on Rideau street; a number of others are busy with the placing of curves, while several are engaged in the work of putting in the cross section on Sparks and Elgin streets.

22/05/1891 *Ottawa Citizen* *Ottawa Electric*

The two electric generators for the power house of the electric railway arrived yesterday and were put in position at the company's Chaudiere works. The machines are the most perfect specimens of the Westinghouse Company's workmanship and weight 22 tons.

Mr. Hibbard had a staff of men at work until an early hour this morning putting in the crossings at the corner pf Sparks and Metcalfe streets. They performed the difficult task with great neatness. A specially hung electric light furnished the light.

Electric cars

Arrival of the first of a new kind.

By invitation of Messrs. Ahearn & Soper a Journal reporter today inspected at the company's sheds on Albert street, the electric cars which arrived yesterday from the Patterson and Corbin works at St. Catharines.

The car which is similar to the other nine that will be put on the road, is a handsome piece of workmanship and will be a credit to the city. It is 22 feet long, including the platforms, and will comfortably accommodate a large number.

The exterior is painted in two colors, a dark salmon and a lemon yellow, giving a bright and attractive appearance. On each side of the body on the salmon ground in old silver lettering is presented boldly the words "Parliament Buildings." These appear on all the cars, as the cars will run to the buildings, that being the adopted centre of the system. On the lower board, in dark red lettering are the words "Ottawa Electric Railway." On the roof, on each side, are triangular signs bearing the route of the car. They are reversible so that they can be used according to the location of the car. The platforms, front and back, are protected with sliding iron gates to prevent people getting on or off while the car is in motion, the speed at which it will go rendering such accidents possible without a precaution of that kind. There will be a driver and conductor on. The brake by which the car is stopped is of ratchet action and a great improvement on the old wheel system.

Entering the car one is struck by the excellence of the finish and arrangements. The windows are large and of the best glass, each being provided with sun shutters of the most improved pattern. The seats are most comfortably upholstered rendering riding a pleasure.

Widows on the side of the roof give all necessary ventilation. These windows are of figured white glass and with the red glass transoms over both doors give the cars a pretty appearance. The woodwork is of oak polished, and the trimmings are of burnished brass. The signal bells are within easy reach on either side. The bells, which are on the platform, have a mellow tone, particularly pleasant to the ear. At one end of the car is a Lewis and Fowler register by which, on pulling on a rope, the conductor registers each fare received, a bell ringing.

In winter heat will be produced by a neat stove which fits in between the seats on one side, and which, in summer, is removed and replaced by seats. At night the motors will be lighted up inside and on the platform with electric lights, giving a steady and bright light. The wheels will be thirty inches in diameter. In addition to the ten cars, three trailers will be used. These will be open cars to run with the regular cars on special occasions.

23/05/1891 *Ottawa Citizen**Ottawa Electric*

Two of the cars for the Electric Street Railway also arrived yesterday from the works at St. Catharines.

26/05/1891 *Ottawa Citizen**Ottawa Electric*

Detailed description of the new electric cars.--

28/05/1891 *Ottawa Journal**Ottawa Electric*

Delay owing to construction of drains on Albert between Bank and Concession streets and St. Patrick. Company allowed to lay down a single track on each of these streets to enable them to open their line.

More.

30/05/1891 *Ottawa Journal**Ottawa Electric*

Last night Mr. Hibbard with a gang of men put in the diamonds at the crossing of the tracks on Rideau street. The work was done without fuss or difficulty and well.

02/06/1891 *Ottawa Citizen**Ottawa Electric*

The special notched rails to be laid on Wellington street have arrived and will be laid shortly. These rails will rest on stringers running lengthwise with the street so there will be very little breakage of the block pavement. The ornamental poles for this street have also arrived and promise to look well when erected. The T rails are expected on Thursday, when the work of construction will be carried on rapidly. The line will probably be in operation by July 1st.

The double track on Bank street has been extended a couple of blocks further.

04/06/1891 *Ottawa Citizen**Ottawa Electric*

The car shop of the company is now nicely fitted up, and contains four of the cars. There is a capacity for twenty.

The T rails arrived yesterday and the work of track laying was proceeded with. The company have about one hundred men at work.

10/06/1891 *Ottawa Citizen**Ottawa Electric*

The electric railway track on Bank Street has been laid as far as Lansdowne Park.

11/06/1891 *Ottawa Journal**Ottawa Electric*

First Car Ready

The first of the new electric cars is nearly ready to be put on the track and more are being proceeded with rapidly. The arrangements for opening the road are being proceeded with rapidly. Mr. Hibbard is near the end of his work on Bank street. The line in that section now finished, so far as his construction goes, namely, out to exhibition grounds, whilst on Albert street, west of bank he has another large gang digging holes for the sleepers.

THE OVERHEAD WIRE

Mr. Knott is here and is aligning the overhead wire, which is flanged, hard drawn double copper wire, of about a quarter of an inch in thickness.

More

At might each car is lit up by five incandescent lights.

More

It is probable that the opening date will be between June 20 and June 30, the first cars to run being on Bank street.

12/06/1891 *Ottawa Journal**Ottawa Electric*

The Electric Street Railway Company had a gang of men at work today on the Wellington Street curves. The work is being done by cutting out the wood block pavement, and laying in stringers, on which the rails are to be laid. The rail will be flush with the street and the whole work, when completed will not injure the permanent roadway at all.

The laying of the rail curves from Metcalfe on to Wellington street for the Electric Railway was commenced yesterday.

The Electric Street Railway have assigned Messrs. McRea & McClenaghan the contract for the clothing for the conductors. The uniform will strongly resemble that of railway conductors. The color will be invisible blue. The cap bears a white metal plate with the word "Conductor" and the coat and vest carry white metal buttons with the same word.

12/06/1891 *Ottawa Citizen**Ottawa Electric*

The contract for the clothing of the conductors and motormen of the new street railway was awarded to Mackay & McClenaghan, the well known Wellington street tailors. The suits will be made from a pretty shade of navy blue serge with silver buttons on coat and vest. The company have blue caps to match, and altogether the uniform will be very striking. (Also reported in the Ottawa Free Press same date)

The Electric Railway Company yesterday commenced the work of laying the curves of their railway at the corner of Wellington and Metcalfe streets.

13/06/1891 *Ottawa Free Press* *Ottawa Electric*

The track laying on Wellington street is now in progress, workmen being engaged in turning the corner of Metcalfe street with the curves.

17/06/1891 *Ottawa Free Press* *Ottawa Electric*

The Electric Street Railroad Company track out to the Exhibition grounds was finished today and the cars will start running about the 24th of this month.

18/06/1891 *Ottawa Free Press* *Ottawa Electric*

Yesterday afternoon at their sheds on Albert street the Ottawa Electric Railway Co. made the first introduction of the running of their cars. Mr. Thomas Ahearn, the manager, having charge of the operations, and as the car passed to and fro in the building in the presence of hundreds of spectators, flashes of electricity were observed in the line running on the upper portion of the building. On being interviewed, Mr. Ahearn stated that the car by the force of electricity was equal to about ten horses, and the rate of running could be made up to, if necessary, thirty miles an hour. On the 24th inst. The first car will run, Bank street being the selected point to start on from near Albert street to near the Exhibition grounds. The cars are of the newest design and can be stopped with almost instantaneous operation and are easily worked.

Mr. A.K. Knott, of Chicago, who is stringing the trolley wires for the electric railway is engaged at present on the Bank and Albert street curve. He has got the machine upon a lorry as a wagon was too high and awkward for effectual work. The slack of the Bank street wire has all been pulled up but owing to the dirt and stones on Albert street the work is progressing slowly just now.

18/06/1891 *Ottawa Journal* *Ottawa Electric*

The Electric Street Railway completed their second car yesterday afternoon. It was put in motion and quite an number of persons were driven to and fro on it in the car shed.

20/06/1891 *Ottawa Journal* *Ottawa Electric*

Messrs. Ahearn & Soper stated to the Journal that they expected to have the formal opening of the electric road the latter part of next week. The Bank st., Metcalfe, Wellington and Rideau would then be opened and the Albert st. line if the grading is finished. Invitations are being issued. The opening will take place at the car shed Albert st. after which the visitors will run over the line. Six cars will be put on then.

The cars when regularly running will pass given points every seven minutes. Transfer tickets will be issued to all points off the main line and they must be used within 15 minutes of issue.

The work of stringing the electric railway overhead wire at the interconnection of streets is going ahead steadily. It draws crowds of onlookers and is being done in a workmanlike manner.

22/06/1891 *Ottawa Free Press* *Ottawa Electric*

The firm which has the contract of excavating the track for the Electric railway company seem to be having a hard time with their navvies right now. A number of them on Saturday got a quantity of liquor from some retain store and in a few moments were helplessly drunk on Rideau street.

23/06/1891 *Ottawa Free Press* *Ottawa Electric*

The rails for the electric street railway have been placed in position in the block roadway of Wellington street . The rails are laid on blocks at spaces of three feet apart and are bolted to these blocks by means of iron plates. Workmen are now engaged in connecting the Wellington street track with the Rideau street section.

24/06/1891 *Ottawa Free Press* *Ottawa Electric*

Employees of the Electric Street railway were busy all last night stretching the wires on Albert street for the car dynamos.

24/06/1891 *Ottawa Journal* *Ottawa Electric*

Messrs. Ahearn & Soper have now definitely fixed the date of the official opening of the electric street railway for Monday next at 2 p.m. when the run over the road and program already announced will duly take place.

25/06/1891 *Ottawa Journal* *Ottawa Electric*

At the formal opening of the Electric Street Railway on Monday next at 2:30, the four cars will be started by J.W. McRae, president of the company, ex-Ald. McLean, Mayor Birkett and Ald. Henderson. After the run a collation will be served at the Exhibition grounds.

Four motors begin work on Bank Street.

At 6 o'clock this morning before the stir and bustle of the day had commenced, four cars left the electric station on Albert st., and following one another, at a distance of about 100 yards, ran quickly and easily along the south track on Albert street to Metcalfe and up the grade on Metcalfe street to the corner of Wellington, where they were reversed and ran back down over the same track to Bank st. out which they went as far as Ann. The streets were quiet when the cars went out, but not long so. The loud tones of the alarm bells were rung at the street crossings and awoke the sleepers and soon hundreds of citizens, the small boy element predominating, hurriedly dressed and were out on the streets and the scene became most lively.

When the cars got on Bank street, Mr. Ahearn threw them open to the public, and in a few seconds they were liberally jammed with shouting small boys, with a sprinkling of ladies and gentlemen, while the cars gongs started all the dogs of the vicinity barking, and for a while there was general excitement. The cars ran up and down bank st. for an hour or so, keeping the entire section in a delighted buzz. South of Nepean street speed was put on and all four cars glided along at a lively pace, but maintained at the same time a comfortable and novel smoothness of motion.

The grade on Metcalfe street was taken without the least apparent difficulty. Mr. Ahearn, who personally drove one of the cars, expressed himself highly pleased with the way things went. The other cars were driven by Mr. Knott, electrical expert, and Messrs. J.O. Mullin and J.E. Hutchison. Last night between 5 and 6 one car containing Messrs. Ahearn and Knott was run over the same route.

The speed of the cars is not affected in any way by the number of cars on the straight line at a time, but if, say one car is on the straight line and two others turn a curve, loss of power results to the car on the straight line, it taking more power to turn the curve.

Details of routes etc.

25/06/1891 *Ottawa Free Press* *Ottawa Electric*

Yesterday afternoon a short trial trip was made with an electric car on Albert street, and about 6 o'clock this morning four of the completed cars were turned out of the car station and, amid much excitement, a run was made down Bank street. More, account of routes etc.

25/06/1891 *Ottawa Citizen* *Ottawa Electric*

The opening of the electric street railway will take place on Monday afternoon next.

26/06/1891 *Ottawa Citizen*

Ottawa Electric

The trial trip of four cars on the new electric railway took place early yesterday morning and, as that on Wednesday evening, proved most satisfactory. The cars ran up and down Bank street and were crowded. Messrs. Ahearn & Soper, the contractors, each controlled one of the cars.

The invitations to the formal opening were issued yesterday. There will be four cars put on the track and Mr. J.W. McRae, president of the company, Mayor Birkett, Ald. Henderson and ex-Ald MacLean have been invited to start one car each. Only that portion of the line known as the Bank street branch will be in readiness for Dominion Day. The company expect to have their hands full in transferring passengers to the Exhibition Grounds.

The routes traversed will be as follows:

Bank Street Branch - The cars on this branch, on leaving the Exhibition Grounds will proceed to Albert, thence to Metcalfe and Wellington, then across the other track and return on the same route.

New Edinburgh Branch - From New Edinburgh the cars will run via St. Patrick, Dalhousie, Rideau and Wellington streets to same point as the Bank street cars, and will return over the same route.

The Elgin Street Branch cars will run from Wellington street via Elgin and Catharine to Bank street and return, and the main line cars will run from the Union depot of the C.P.R. via Albert, Metcalfe, Wellington and Rideau streets to the Protestant Hospital.

By this arrangement the public will be able to pass from any one point in the city to the other with one transfer on the upper portion of Metcalfe street, transfer tickets being granted to that end.

In accordance with the terms of the contract cars will only stop at those crossings on the various streets which are situated nearest the terminus of the route so that passengers desiring to enter the cars on Bank street for the exhibition should do so on the southern crossing of any intersecting street; those coming from the exhibition will stop at all northern crossings. No passenger will be allowed to enter or alight by the forward door of the car as the gates are kept locked. At all points between the intersecting streets signs will be hung stating that "cars stop here." In order to rapid transit as few stoppages will be arranged as convenience to the public needs will allow and citizens are warned to see that their children do not endanger their lives by running in front or playing around the cars.

29/06/1891 *Ottawa Journal*

Ottawa Electric

A Great Day For Ottawa

The formal opening of the Ottawa electric street railway took place this afternoon at 2 o'clock, when guests to nearly the number of 120 gathered at the headquarters, offices, shops and car house on Albert street and proceeded via Albert and Bank streets to Lansdowne Park in four motor cars.

List of invited guests.

The park gates on Bank street were reached after a quick run and the whole party disembarked.

Adjournment was made to the house where a sumptuous cold collation was served after which speeches were made and the health and prosperity of the new enterprise heartily drank.

The party returned to the car about 6 o'clock.

The cars containing the guests were started by Mayor Birkett, Ald. Henderson, ex-Ald. MacLean and Mr. J.W. McRae, president of the company.

The motormen in charge of the cars after starting were J. Healy, A. Lafleur, Ed. Butler and Y. Bennett. The conductors were Mr. Goodwin, E. Groulx, H. Hanley, Frank Butler. The motormen and conductors were in neat dark blue uniforms with silver buttons and cap plates.

Full account also in the Ottawa Free Press.

Full account of the opening - speeches etc.

30/06/1891 *Ottawa Journal*

Ottawa Electric

Further description of the opening includes a three verse song "The Electric Train" by Oliver Wendell Holmes.

The starting of the first cars for the official opening of the electric railway yesterday briefly noticed in yesterday's Journal took place from the Albert street shops in the presence of a great crowd of citizens and strangers, comprising men, women and children of every age and every walk of life; and as the cars in quick succession glided smoothly along Albert and Bank streets now only were the house doors and windows crowded, but the streets were lined by crowds of spectators who frequently cheered and waved their hats and handkerchiefs as the cars passed.

More

Speeches

As soon as the cars had discharged the guests they began making regular trips and were crowded with passengers each trip and continued so until 11 p.m. last evening.

30/06/1891 *Ottawa Citizen*

Ottawa Electric

Very long article.

Ottawa went whirling by another milestone in the path of progress yesterday. The new electric street railway was formally opened, and soon the rumble of the electric car will become as familiar as if the people had been used to it all their lives.-- four new cars in which the company's guests made their way to Lansdowne Park.-- trolley arm on which a gay little flag fluttered --more.

02/07/1891 *Ottawa Free Press*

Ottawa Electric

On Tuesday evening the trolley pole and the base of one of the electric cars was pulled off by the trolley wheel catching at the junction of two wires. A live wire struck a horse which fell in an instant from the force of the current. However, it recovered from the force of the shock in a few minutes.

02/07/1891 *Ottawa Free Press*

Ottawa Electric

A gang of men commenced this morning laying the track on Elgin street from Maria to its junction with the main track at the corner of Catharine and Bank streets.

03/07/1891 *Ottawa Journal*

Ottawa Electric

One of the guy wires of the electric street railway on Metcalfe st. near Sparks, broke and fell to the ground Thursday afternoon. It fell on to a horse belonging to Mr. John Donovan and knocked the animal over. The wire was taken quickly off the horse and it jumped up again none the worse for the shock.

03/07/1891 *Ottawa Free Press*

Ottawa Electric

The electric street railway was opened over the Albert street route to the Union station yesterday and has been in regular running order since. Arrangements are made by the company for their cars to make connections with all incoming and outgoing trains. This branch of the road will be known as the main line and will connect with all other branches of the electric railway at the Metcalfe street terminus.

03/07/1891 *Ottawa Journal*

Ottawa Electric

The Electric Railway company have arranged to have five cars leave the corner of Sparks and Metcalfe sts. for the C.P.R. depot at 6.20 o'clock tomorrow morning to convey the excursionists to the Ogdensburg train.

04/07/1891 **Ottawa Citizen** **Ottawa Electric**

During the rain storm yesterday a portion of the temporary electric line work near Broad street, gave way in the wind and caused a long stretch of the overhead wire to fall to the ground, thus interrupting the circuit and stopping the electric cars for about an hour. The company, with commendable promptitude, repaired the wires and in the meantime refunded fares to the delayed passengers and in the case of a car near the Exhibition Grounds, brought the passengers in by cabs. The company is replacing a number of clamps which have proved defective by stronger ones. A large gang of men were at work until midnight on Albert street making permanent repairs, and at that hour everything was in perfect order. The electric road to the C.P.R. was opened on Thursday morning and was largely patronized on that day and yesterday. It is a great convenience to people travelling to the station.

06/07/1891 **Ottawa Journal** **Ottawa Electric**

On Saturday afternoon, owing to a breaking of a small insulator, the overhead wire on Metcalfe st. between Sparks and Wellington became slacked. The trolley arm on one of the cars also received too much pressure and was wrenched away from the roof. A man held it in position while the car returned to the sheds.

06/07/1891 **Ottawa Journal** **Ottawa Electric**

Twenty-one passengers from Britannia took the electric road this morning at 8.15 and reached Metcalfe street in seven minutes.

The trolley [sic] for fixing the insulators was at work early today on the overhead wires of the electric street railway on Albert and Bank streets. Whenever the cars come along, the trolley is shunted so as to allow them to pass. The whole re-insulation of the line will be speedily completed.

07/07/1891 **Ottawa Free Press** **Ottawa Electric**

An electric car ran off the track on Broad street at half past eleven yesterday, but was righted without much delay, and proceeded on its way to the Union station.

07/07/1891 **Ottawa Journal** **Ottawa Electric**

Riding at night on the Electric Street Railway to the Exhibition Grounds and back has become all the rage. Every night now the cars are crowded. The fresh air of the open district from the C.A.R. track outward and back is very invigorating. The speed put on the cars after the C.A.R. crossing is passed, gives a delightful sense of pleasure.

09/07/1891 **Ottawa Free Press** **Ottawa Electric**

Two more cars for the company arrived yesterday and will be made ready for the track at once.

--

It is expected that the Elgin street and New Edinburgh branches will be opened for traffic by the latter part of next week.

The last rails of the Elgin street branch were laid yesterday on Catharine street. The track is now completed from Wellington street to bank street via Elgin and Catharine streets.

Parties who have ridden to or from the Union depot on the electric road express surprise and delight at the manner in which the cars swing around the very sharp curve at the corner of Broad street and the Richmond road. As the hill is steep and the curve quite sharp it was considered the worst point on the route, but the cars swing around as easily as on the most level part of the road.

Some of the residents along the different routes of the Electric Street railway complain of what they consider a n unnecessary amount of gong ringing by the conductors of the cars especially late at night. No doubt due precaution should be taken, but at the same time the annoyance might be lessened. There seems to be no reason why the gong should be sounded except at crossings.

10/07/1891 **Ottawa Free Press** **Ottawa Electric**

The Rideau street branch of the line will be opened tomorrow (Saturday) afternoon when the first car will be run over the route and regular traffic continued. Owing to a fight between two large dogs which were allowed to travel on the platform of the cars, the company have decided that canines must take the roadway in future.

--

There will be four open cars on the line shortly two of them running within ten days time.

13/07/1891 **Ottawa Journal** **Ottawa Electric**

Electric Railway Free Ride

T.W. Currier, 188 Rideau st. will present each and every purchaser who patronized his great cheap sale of furniture with a double ticket for electric road.

P.S. Sale continued until 15th August. Every article reduced.

13/07/1891 **Ottawa Journal** **Ottawa Electric**

Fearful state of city streets. Streets along the route of the Electric Railway are not completed. Danger to public life etc.

14/07/1891 **Ottawa Free Press** **Ottawa Electric**

Many complaints are made of the long and tiresome detention of passengers on the electric cars by the Bank street branch at the switches on that line. Owing to the want of more cars a stop was made last night at Cooper street fully fifteen minutes.

14/07/1891 **Ottawa Free Press** **Ottawa Electric**

The Electric Railway company expect to have the double tracking of Bank street to the Exhibition grounds completed by Thursday evening.

15/07/1891 **Ottawa Journal** **Ottawa Electric** **Patterson's Creek**

The embankment of the roadway over Patterson's Creek on Bank st. road gave way in several places before yesterdays torrents of rain, and the whole earth work is now in such a critical condition that another heavy downpour like that of yesterday would work destruction.

More

Gang of men put on by the electric road.

The street car service was stopped for some hours, the cars lying idle on the south side of the creek.

15/07/1891 **Ottawa Citizen** **Ottawa Electric**

Two letters from the company - city not maintaining the grades up to rail level, hole in track at Patterson Creek.

Letter to the mayor and corporation

We are instructed by the Ottawa Electric Street Railway Company to call your attention to the terms of the contract entered into between the city of Ottawa and their company under which it is the duty of the corporation to make the level of the streets to the level of the grade furnished to the company, and to keep and maintain the streets level with the rails. We are informed that all the men at work upon the line have been discharged, and that the engineer is at present without any instructions from the council for proceeding further with the work and that the council separated last evening without making any provision for having the same done. If the work is allowed to remain in the state in which it now is, a very serious loss will be inflicted upon the company for which the corporation will be directly responsible. Part of the line now in operation can only be worked at a serious disadvantage and damage to the company's cars from the streets not being graded up to rail level. This applies to Albert street for a great part of the distance lying west of Bank street to the line upon Wellington and Broad streets and to a great portion of the line on Rideau street.

In addition the company now have several miles of track laid and ready for operation upon which they cannot run their cars until the grading is completed by the city. This applies to Dalhousie, St. Patrick and Creighton streets, and to the line upon Catherine and Elgin streets, upon each of these lines they sustain a daily loss of revenue from not being able to use their property. The company have in good faith performed their part of the contract and look to the city to do the same. City liable for damages etc.--

Second letter to the city.

Bank street line was interrupted today by the sinking of the roadbed at Patterson's Creek. One of the cars was left standing idle at the south end of the line and the trip of the remaining cars was cut short at the north side of Patterson's Creek.

More

Mayor Birketts views.

I think the company are, to say the least, going a little too fast. They are expecting too much of the city. Their contract does not call for the completion of the New Edinburgh and Elgin street routes until August 1, I believe, and because they are ahead of time they talk of damages from the city. I think the city has done wonderfully well, and it is expecting too much to ask that we keep up with their track laying when we have to fill in from 1 to 3 feet in depth the entire road surface most of the way.

More

20/07/1891

*Ottawa Citizen**Ottawa Electric*

The Electric Railway Company had a new trailer car at work on the Bank street branch on Saturday afternoon, and it accommodated the large number who took advantage of the line.

22/07/1891

Two more cars and another trailer are en route by the C.P.R for the Electric street railway.

24/07/1891

*Ottawa Journal**Ottawa Electric*

Electric Road Notes

The Electric Street railway company put their first car on the Elgin Street route this morning. Sharp at 9 o'clock car No. 17 with Mr. Ahearn on board, motor man Lunny and conductor ? Bearing on its front the ?? "C.A.R and Wellington ?" ??? station and back. The time of the double journey was 19 minutes.

The track is in very good condition, Messrs. Ahearn & Soper having ballasted the line themselves. The grip was good, as it has indeed been on the whole line. Messrs. Ahearn & Soper have been most fortunate in the excellence of their construction, all their guages [sic] having been most accurate.

The raising of the grade for the electric road on Albert street west of O'Connor causes the sidewalk to be flooded every time there is heavy rain. Residents near the Orange Hall say they are nearly drowned out on these occasions.

Frequent complaints were heard yesterday of long intervals between cars on the Bank street route. As soon as new cars arrive they will be put on and the full efficiency of the services maintained.

As soon as the electric street line between Rideau street and Creighton street can be opened the cars from the Exhibition ground will run straight through to New Edinburgh, while the cars from the C.P.R. will continue to ply to Sandy Hill.

A stray stone flung by some unknown hand smashed the fancy glass lights in the door of the Albert Street offices of the electric street railway last night.

A number of men engaged in the construction of the electric street railway track were discharged yesterday and the day before. The reason is given that the construction is practically completed.

25/07/1891

*Ottawa Free Press**Ottawa Electric*

Two new cars and a trailer for the Electric railway arrived in the city this morning.

25/07/1891

*Ottawa Citizen**Ottawa Electric*

The Elgin street branch of the Electric Street Railway, running between Wellington and the Canada Atlantic Railway was opened yesterday (?) morning. It was largely patronized during the day. As soon as the line between Rideau street and Creighton street can be opened the cars from the Exhibition Grounds will run straight through to New Edinburgh, whilst the cars from the C.P.R. will continue to ply to Sandy Hill.

W. Robertson having written to the city council stating that the Electric Company were not running workmen's cars in the morning and the evening. City Clerk Lett yesterday wrote him at the request of the Chairman of the Railway Committee drawing his attention to the fact that the agreement between the company and the Corporation does not come into effect until Saturday.

01/08/1891

*Ottawa Citizen**Ottawa Electric*

It is understood that the two open cars belonging to the Ottawa Electric Street Railway Company are to be used on special occasions only. Many would like to see them out every day.

01/08/1891

*Ottawa Free Press**Ottawa Electric*

--(Mr. Ahearn) also visited St. Catharines where he placed an order for four vestibule electric cars, which will be 24 feet in length, being 2 feet longer than the cars at present in use here. One new car was placed on the track this morning and another will be in use on Monday. The four new cars will arrive in time for the Central Fair traffic.

Hit by an Electric Car

A bad smash took place on Rideau street last evening about five minutes past eleven o'clock. A hackman named Dumais was just driving into his place on the stand opposite the end of Nicholas street when car no. 12, driven by Motorman Young, collided with it as it crossed the track. The horse was badly cut about the hind legs, the body of the rig hurled in one direction and the wheels in another, and Dumais himself pitched to the ground. The car was brought to a standstill immediately and in fact was slackening down speed when the accident happened. Mr. Dumais only received a slight shaking.

03/08/1891 *Ottawa Journal**Ottawa Electric*

Mr. Ahearn of Ahearn & Soper returned from a business trip in the States in Saturday.

On his way he called at St. Catharines and ordered four new cars measuring 24 feet each and fitted with vestibule doors.

An extra car was put on the line on Saturday.

There are now running on the line 9 motor cars and 2 trailers.

04/08/1891 *Ottawa Citizen**Ottawa Electric*

A car ran over the Lower Town Branch of the electric railway early yesterday morning. The branch will be opened for traffic this morning.

05/08/1891 *Ottawa Journal**Ottawa Electric*

Last evening the denizens of Lower town turned out in crowds to see the brilliantly lit electric cars rush over the line to New Edinburgh. The opening of this route is expected to confer great benefits on the district through which it passes.

05/08/1891 *Ottawa Citizen**Ottawa Electric*

Yesterday morning the electric cars were run through the entire line from New Edinburgh through St. Patrick, Dalhousie to Rideau street. Last evening the streets in Lower Town through which the splendid cars traversed were lined with admirers who watched their progress with eagerness. The company deserves praise for the enterprise and the careful direction given by the superintendent, as well as the prudence of the wide awake motor men. The car innovation in St. Anne is welcomed by the ratepayers who will derive great benefit there from.

12/08/1891 *Ottawa Journal**Ottawa Electric*

Power plant at Chaudiere hit by lightning and disabled.

12/08/1891 *Ottawa Journal**Ottawa Electric**Chaudiere*

The Electric Road Car Service Disabled.

The lightning also disabled the electric street railway plant at the dynamo station at the Chaudiere. About four o'clock when the storm was at its worst, the electric fluid struck one of the overhead wires, at what point is not known and flashing over the wires, passed into the two powerful dynamos and "burned-out," to ? the technical term the armatures, or power-generating - apparatus in each, causing the system to be shut down at once. The cars were left standing useless on the tracks in all directions.

To explain the nature of the damage it may be said that the armatures are the cylinders of rolled wire that revolve between the field magnets. These armatures are insulated, and when the insulation is removed from any cause they cannot be worked. Yesterday the electric fluid "burned" off the insulation about an inch square in each armature, and melted two copper wires in each as well, and this was sufficient to cause the stoppage of the system.

Immediately after the occurrence Mr. Ahearn was on hand and, with his staff of electricians, went to work to repair the damage. To get out the armatures from the dynamos to repair them, the top field magnets weighing about five tons had to be removed. This was a job that required a large gang of ?, "jacks", and tackle to carry out, and proved a low and arduous task. The men had to work all night. By 9 o'clock this morning one of the armatures had been repaired and the field magnets replaced. But when the water was turned on, a fresh "burn" occurred and once more the dynamo was unworkable.

Mr Ahearn will have the armature on the other dynamo repaired tonight and expects to have the cars running tomorrow morning.

About a hundred persons who were at the exhibition grounds at the time the cars were stopped had to walk home.

The company has ordered two reserve armatures, and if in future a similar accident should occur only about half an hour will be lost.

14/08/1891 *Ottawa Citizen**Ottawa Electric*

The electric cars resumed operation yesterday, the damage done to the armatures by the lightning on Thursday having been repaired.

17/08/1891 *Ottawa Journal**Ottawa Electric*

The Electric Street Railway had trailers on the Elgin street route from midday today and took out hundreds of people to the circus grounds.

20/08/1891 *Ottawa Citizen**Ottawa Electric*

The trail cars of the electric road not having been found to work very successfully, owing to their light weight causing them to leave the rails, they have been withdrawn from this service and are now being fitted with motors. It is expected they will be on the route again before long.

24/08/1891 *Ottawa Journal**Ottawa Electric*

A cow was run over by an electric car at the corner of Murray and Dalhousie streets about four o'clock on Saturday afternoon. The car was derailed and the cow seriously injured. The animal was owned by Mr. Moise Cousineau of Clarence street, by whom the loss will be severely felt.

Agreement between the mayor and the railway. Will remove the rails laid between the C.A.R. station and Bank street and double track Bank all the way to the Exhibition grounds.

We shall not remove the rails on Catharine Street until we have made a connection between our present Elgin Street line and Wellington street.

01/09/1891 *Ottawa Citizen**Ottawa Electric*

The work of excavating for the extension of the double track of the electric railway on Bank street was commenced yesterday. About thirty men are employed.

02/09/1891 *Ottawa Journal**Ottawa Electric*

Civic Street Railway Committee met yesterday and accepted the offer of the Ottawa Electric Railway to double track Bank Street and take up the Catherine street track.

At present there is only a single track on Bank Street from Cooper to the swing bridge and a single track on Elgin st. to the C.A.R. station, the track on Catharine st., not being graded, is not being used at present. (City would use the money appropriated for Catharine st. for the work on Bank st. - a friendly way out of a difficulty, i.e. city lack of funds)

Elgin st. cannot be extended south of the C.A.R. because of the shunting.

Also in the Citizen.

04/09/1891 *Ottawa Free Press* *Ottawa Electric*

n connection with the delays which sometimes occur on Albert street near the ladies college at the end of the double track it is explained by the Electric Railway company that as originally arranged the double track was to be laid the entire length of Albert street, but owing to the construction of the sewer an arrangement was made with the Board of Works by which the Electric company agreed to lay only a single track at the side of the road in the meantime, and upon the completion of the sewer, to put down the other track. It is expected that this will be done in the spring.

07/09/1891 *Ottawa Journal* *Ottawa Electric*

The Electric Railway company were running the first open motor car Saturday and today. The electric cars seemed quite unable to cope with the crowds of people going out to the games this afternoon and at almost every corner crowds were congregated waiting for a chance on the next car.

08/09/1891 *Ottawa Journal* *Ottawa Electric*

The Electric Street railway yesterday conveyed some twelve thousand persons over their lines without any accident being reported. Two of the vestibule cars for the electric street railway were shipped from St. Catharine's yesterday, and two will be shipped next week. The double tracking on Bank st. will reach the C.A.R. tomorrow evening. By the end of next week the double track will be laid right out to Lansdowne Park.

09/09/1891 *Ottawa Journal* *Ottawa Electric*

Ottawa Electric Railway intend to double track Rideau street. When asked why they didn't do it in the first place they said they didn't anticipate the amount of traffic. The work of double tracking Bank st. is being rapidly proceeded with and the electric company are making an excellent work of it. The old single line is being retained and a single rail laid down on each side thereof at a car's breadth distance so that the double track will be half composed of the present single track. The ties for the new construction are laid between the old ties on each side. The down track is completed and a capital roadway is left for carriages to pass up and down. The work does not interfere with waggon or passenger traffic and residents outside of the city limits are able to drive in and out as usual. The horses are getting used to the cars, and carriage traffic on Bank street has resumed its old-time activity.

11/09/1891 *Ottawa Citizen* *Ottawa Electric*

Work on the Electric Railway Company's Creighton street extension is progressing favourably and the work will be completed in a few days. A platform has been erected on the street upon which the carts drive and dump the ballast into the trucks, which are run off where required on the line.

21/09/1891 *Ottawa Free Press* *Ottawa Electric*

Two more vestibule cars for the electric railway have arrived and will be put on the track at once. The Rideau street double track will be finished and a full service provided for the opening of the exhibition.

22/09/1891 *Ottawa Journal* *Ottawa Electric*

The cutting down of the crossings between the electric railway tracks for the operation of the winter car scrapers is now going ahead on Elgin Street. The electric cars are being rapidly "vestibuled" for the winter's frosts. The vestibules re put on in sections and can be removed in the spring. The Mogul snow sweeper has arrived at the CPR station.

14/11/1891 Ottawa Free Press Ottawa Electric

An alarming electric street railway accident occurred near the C.P.R station last night-- one of the open end cars running on Rideau street to the Union depot, had proceeded down Albert street to the junction of that street and Broad street, which is on the Richmond road. At this turning on to Broad street there is a steep grade down to the station. Midway between the beginning of the grade and the terminus of this section a side or bye line of the C.P.R crosses the street. This line is used solely for freight and it was here that the accident took place. The electric car had rounded the corner of Albert and Broad streets and had just entered on the down grade on the curve when the bell of the train was heard and at the same time the string of freight cars was seen crossing the street very slowly. The motor man at once applied the brake. No use! The wheels spun around without the aid of electricity and the momentum of the electric car caused it to run full tilt

A CLOSE CALL.

Collision Between an Electric Car and C. A. R. Freight Train

The first casualty of consequence which has befallen the electric street railway in the four months of its existence occurred at five minutes to eight o'clock last night at the Chaudiere. Car number 14, of the main line, was descending the hill at Broad street, approaching the C.P.R.. Station, just as Canada Atlantic lumber train was backing into the Chaudiere yards. Motorman Lunny did not see the red light signal which C. A. R. Gateman Eastman had placed on the middle street car track while he swung his "all right " signal to the approaching train, till within a very short distance of the crossing, He put the brakes on, but the rails were slippery and the car slid on the rails. Then he reversed the motor which, fortunately, took instantaneous effect, and just as the first car of the lumber tram struck the front platform the electric car started back up grade.

The damage was, however, serious enough as it was. Five passengers were in the car and when the collision occurred all were thrown from their seats by the shock. Mr. Andy Burrows, the well-known drover, was injured about the left hip and leg, but managed to walk to the Canadian Pacific Railway depot, where station Officer Graves assisted him on board the train for Smiths Falls, which is Mr. Burrows' home now. A lady passenger, Mrs. Higman, was thrown against the opposite seat and bruised some what about the head. The motorman was thrown uninjured from the platform, which is badly twisted. The hood, too, was torn off. In half an hour Mr. Ahearn and Superintendent Hutchison had the wrecked car straightened out and back in the shed.

The damage to the car will not amount to more than \$20, but it was certainly a narrow escape for all five passengers, for had not the reversing gear worked instantaneously the car would have certainly been ground to pieces by the passing lumber train.

The electric car shed has been extended through to Queen street, the whole of the new tracks being elevated over a huge pit wherein the men can work at every car from beneath. The cross tracks are to be abolished and in place thereof one track will be used to run the car to the rear of the shed, when a travelling track will carry it to any position that it may be desired to occupy.

20/11/1891 Renfrew Mercury Ottawa Electric Chaudiere

A serious collision between an electric car and a lumber train on the C.A.R. at Ottawa was very narrowly averted one evening last week. The lumber train was being backed into the Chaudiere yard, as the electric car was descending the hill at Broad street. The motor man put on the brakes but the rails were slippery and the car did not stop. The motor was then reversed, and backed the electric car up grade, just as the front platform was struck by the lumber train. There were five people in the electric car, and all were thrown about: but none were very seriously hurt.

Another Street Car Collision.

A collision resulting in the killing of one horse and the serious injury of another happened on Saturday afternoon on Albert street. The Metcalfe stage was driving along by the electric line when the driver pulled across the track to reach the stables. Before the motorman could put on his brakes the car struck the horses, which were hurled some distance from the rig. One had a leg broken and had to be killed, and the other was badly cut. Seated in the coach were the two children of the proprietor, Mr. Hornidge. Fortunately they were not hurt. Mr. Hornidge's driver, a steady and reliable man, also escaped. He says he can prove by witnesses that the car was going at an excessive rate of speed, and maintains the gong was not rung to warn him. On the other hand, the motorman avers that he rang repeated warnings.

16/12/1891 Ottawa Journal Ottawa Electric

The men on board the electric sweeper say that yesterday they were hailed by a gentleman who took the machine for a passenger car and shouted to them to take him on. They told him the car stopped for nothing, the storm not excepted.

Conductor Armstrong of car No. 11, while helping a partly intoxicated man off the car in New Edinburgh last night, got a pair of black eyes for his courtesy. He is off duty for repairs.

Crushed by a streetcar

Mr. Ira Morgan is fatally injured

How the accident occurred

He dies in hospital at 3.15 this morning

Mr. Ira Morgan, of Metcalfe, one of the most widely known residents of Russell County, was carried in the ambulance to the Protestant Hospital at half past ten o'clock last night, with several ribs fractured and his spine broken. The doctors did not expect he would survive his injuries.

At twenty minutes to ten o'clock he was seen to board the fore end of an electric car near the corner of Sparks and Metcalfe streets. He missed his hold, swung round in front of the car and fell to the ground. The car went slowly on for about five feet further. Then the motorman stopped it quickly, and reversed. But the low steps of the car had passed over his body, and Mr. Morgan was pulled out by two gentlemen, badly broken in body, but still conscious. He even assured his rescuers that he was not by any means fatally hurt. They carried him to the drug store on the corner and the proprietor, Dr. Shillington, at once commenced an examination of his injuries. The streets were thronged with people at the time, and in a very few minutes a dense crowd gathered about the door, eager to learn the extent of the injured man's hurts, for Mr. Morgan was known to nearly everybody in the city.

The Doctor's Report

Ten minutes after the accident occurred Drs. Wright and Powell arrived: and very soon Sir James Grant was also in attendance. The patient was still conscious, and while the doctors were examining his back he frequently requested them to replace the covering as he felt very cold. Among those who stood around anxious to hear the doctors' reports were County Councillors Cowan and Craig, County Solicitor Powell, County treasurer Cowan, Mr. A.S. Woodburn, Mr. C.W. Mitchell and Mr. W.Y. Soper of the Electric Street Railway Company. Dr. Powell said: "From the cursory examination I have been able to make, I believe several ribs are broken, and a portion of one of them must have pierced the lung as the air is puffing up beneath the skin. The spine is also broken but the spinal cord is intact."

"Will he survive?"

"There is a chance that he may live, but his case is extremely critical." That was all Dr. Powell could say. Sir James Grant and Dr. Wright concurred in this opinion. By the time the ambulance came Mr. Morgan had been bandaged up, and such temporary measures taken to relieve him as could be resorted to. Dr. Shillington accompanied the patient to the hospital.

How it Happened

Mr. Alexander McCullough was an eye-witness to the accident. He said: The car was coming down Metcalfe street slowly, just before it reached the crossing from the telegraph office, I saw Mr. Morgan walk towards it. He took hold of the hand rail on the forward end of the car, swung round and fell on his face right in front of it. The steps went over his back. Mr. Robert Brown and I ran to help him, and before we got there the car was stopped. It didn't go more than five feet after Mr. Morgan fell; if it had he would have been crushed under the wheels for sure. Just as the motorman reversed, I called out: "For God's sake go easy; there's a man under the car." The steps, of course passed over him again, and the conductor helped Mr. Brown and me to drag him out. I did not think he was badly hurt, for he said to us, "Oh; I am not killed yet; I am alright." Then we carried him into Dr. Shillington's drug store."

Mr. H.V. Goolah, barber, told substantially the same story. "I watched Mr. Morgan," he said, "go across from Graves Bros. corner, up Metcalfe, as if to meet the car which was crossing very slowly down from the switch. I watched him closely, as he seemed to be walking carelessly. Going right up to the front vestibule, in the left side, where there is no door, he made a grab for the handrail. I don't know whether he caught it or not, but down he went in front of the car on his face, with his head over the barest rail. I thought he was gone, but they stopped the car in a second, just in time to prevent the wheels going over him."

From these statements as well as other evidence observable both before and after the accident, and only too conclusive as to contributory causes, it seems clear that the electric railway employees were in no way to blame for the casualty.

Taken to the Hospital

The Electric Railway company is constructing a siding on Creighton street near St. Patrick's street bridge, and when this is completed, which will be in about ten days, "through cars" will run all the way from New Edinburgh direct to the exhibition grounds without change.

10/05/1892 Ottawa Journal Ottawa Electric

The Electric Railway Company have purchased the property on Albert street east of the car shed, and is considering the erection of a large iron, fire proof car house. It is the intention of the company to use the new building for storing the cars, and the present car shed for workshops.

When all the new rolling stock are finished there will be an equipment of 30 cars which will tax the capacity of a good sized building. The new car house will extend from Albert street on the front to Queen in the rear. The property in the rear, it will be remembered, was purchased from the Sparks estate some time ago.

Order given to Wylie for 4 open and 3 vestibule cars. More.

11/05/1892 Ottawa Citizen Ottawa Electric

Mr. T.A. Ahearn treated a party of young folks to a drive over the electric railroad yesterday afternoon in a private car. The occasion was the birthday of his little son Frankie.

14/05/1892 Ottawa Citizen Ottawa Electric Ottawa Car

The first railway car built in Ottawa appeared on the tracks of the Electric Railway yesterday afternoon, and is as creditable to the manufacturer, Mr. W.W. Wylie, as it is to the enterprise of the Electric Railway.

The new car, car No. 6, is an open one with a double roof, and was built throughout at the Ottawa Car Works, Kent street. Its design is much superior to that of the open cars hitherto in use, while the finish of natural wood, highly polished, with veneered roof of birdseye maple, and the polished brass trimmings, give it a most elegant and luxurious appearance. Instead of the ordinary flapping curtains generally in use on open cars, the curtains of car No. 6 roll up and down, a decided improvement. Altogether the first Ottawa made car is a complete success.

Speaking to the Citizen, Superintendent Hutchison said "We are satisfied with the result of our endeavor to have cars built in Ottawa, and have ordered six additional ones to encourage Ottawa manufacture, and wherever possible, we shall do so." Mr. Hutchison added that special arrangements are being made to accommodate the Queen's Birthday traffic on the 24th inst., by which time a number of new cars would be ready.

20/05/1892 Ottawa Citizen Ottawa Electric Ottawa Car

The second open car manufactured by the Wylie Car Company for the electric railway will be put on the road today.

20/05/1892 Ottawa Citizen Ottawa Electric

Men are at work laying the turnout for the electric railway on Crichton street, preparatory to the through service from New Edinburgh to the Exhibition Grounds, which will commence next week. The run will be done in ten minutes.

25/05/1892 Ottawa Free Press Ottawa Electric

The through line of electric cars between New Edinburgh and the Exhibition grounds began running this morning. There are six cars on the line and the time allowed each for the round trip of eight miles is one hour. Everything worked very satisfactorily for the first attempt and the through cars will continue running hereafter.

Arrangements were made today by the Electric Railway company to provide a car for Mrs. McLeod Stewart around the city. Mrs. Stewart has been an invalid for many years and has never left her home since her illness.

08/06/1892 Ottawa Journal Ottawa Electric

Ground was broken this morning for the new car shed on Albert Street. The work will be pushed through.

Electric car No. 10 (open) was turned out of the car shops yesterday. The first load it carried was the vice regal party on their return from Electric Park. They went out in close car No. 24, the Philadelphia car.

The electric cars were in waiting at the electric park last evening. Lit up in a row they made a pretty sight. The vice regal party occupied the first car.

This includes photograph of the works "W.W. Wylie, Carriage & Sleigh Manufacturer". There is no more popular carriage and car factory in Eastern Ontario than that owned and conducted by Mr. W.W. Wylie at the corner of Kent and Slater streets, which is a three story building with a commanding appearance added to which is ample yard space. The leading specialty of this eminent firm is the electric street railway cars and the evidence of their excellent work in that department can be seen daily on the streets of Ottawa. The firm has at present orders for other seven cars, four open and, three close, one of the latter being intended as a superb official car. Having these contracts on hand enables Mr. Wylie to give sufficiently large orders to Buffalo firms for the best qualities of lumber and lumber is the first essential of carriage building. Not alone in car building does this firm excel as a visit to their factory will denote. The large staff of hands being continually engaged in building all kinds of rigs and carriages of the usual kind as well as handsome private equipages.

THE MOTIVE POWER

of the factory is a powerful electric motor and it may be mentioned that the firm does all its own work for the blacksmith's shop with electric fans for the fires to the upholstering work on the second floor. Above this is the handsome show rooms which are only temporary, as the firm intend to build a spacious addition to the premises. The paint shop is also on the second floor as well as other departments of the business. Machinery in a workshop like this is a vital part and it may be added that Mr. Wylie has shown his enterprise by having the latest, most improved and most expensive machines and mechanisms of different kinds possible to be had for his trade. The firm is full of go.

Messrs. Ahearn & Soper yesterday shipped an electric car, fully equipped to Winnipeg. It will be used on the electric railway there. Mr. J. Mullin will go the Capital of the Prairie Province to look after the car.

20/07/1892 *Ottawa Free Press* *Ottawa Electric*

Rapid progress is being made by Mr. Frank Leamy with a gang of thirty-two men in the construction of the electric street railway on Ann street between Bank and Bell streets. This is a distance of 3,720 feet or nearly three quarters of a mile.

Early this morning the rails were laid from Bank to Lyon streets, a distance of two blocks and the metals had been spiked between Bank and Kent, while spiking was in progress between Kent and Lyon.

The ground is very uneven and in order to obtain anything like a workable grade a great deal of extra work will have to be done. The road bed from Bank street sinks for some 250 feet and for this distance the track will have to be lifted about eighteen inches. Then for seven or eight hundred feet the street and track grade run level, after that comes a stretch of lifting, till the greatest hollow is reached between Lyon and Bay streets. This extends for some 200 feet and immediately after comes a slight incline. At Division street comes a curve which the electric railway line will have to follow. After Lyon street on the south side is skirted by very pretty bush.

IN addition to the men engaged in laying lifting and spiking, five men are engaged in drawing poles, four men in peeling them, and three or four in digging the holed for planting them. The curve from Bank street will not be put in until the construction is otherwise completed. Three thousand fine tamarack ties, warranted sound, have been laid along the route of the new extension. These were supplied by the Rathbun company. The construction of this piece of work will be completed in about a fortnight's time.

--
In addition to this work the Electric Railway company intend double tracking the line from the single track on Albert street to the C.A.R. track crossing on Broad street at the Chaudiere end of the line.

The line will also be double tracked on Bank street, from Catharine street to Isabella street, putting in heavy new doubled diamonds at the crossing of the C.A.R. track. This will be done this season.

20/07/1892 *Ottawa Journal* *Ottawa Electric*

The new car shed on Albert street will shortly be completed. The board of the electric company will have offices there.

20/07/1892 *Ottawa Citizen* *Ottawa Electric* *Albert street barns*

Work on the new car shed on Albert Street is progressing favorably. The board of the Electric company will have offices in the new building.

The 35 year franchise will be signed provided the electric railway company agree to extend their line to Gilmour mills within three years. More.

05/05/1893 Ottawa Citizen Ottawa Electric

A question the Civic Street Railway Committee will shortly have to consider is what bridge and street the city is going to allow the amalgamated street railways to run their lines over. The rumor that the company would prefer the Sappers Bridge and Sparks street has raised anew the opposition of certain property owners.

11/05/1893 Ottawa Free Press Ottawa Electric

The Free Press had an interview this morning with some of the officials of the Electric Railway company and learned from them the following particulars of the line.

The company yesterday gave an order for 750 tons of rails for the new line running from New Edinburgh to the Suspension Bridge and expect to commence operations on the work of changing the line from horse cars to electric power by the 10th of June. As soon as everything is in readiness operations will be rushed through and it is expected that the whole line will be completed by the middle of August so as to be in readiness for the opening of the Central fair. The electric line will run exactly upon the same route as that hitherto used by the horse car line, the changes to be made simply in connection with the present electric railway track which will be removed from the Dufferin bridge and Wellington st., the whole traffic coming

ACROSS SAPPERS BRIDGE

--the cars, some twelve in number, are already built.

--Rockcliffe line to be changed to electricity.

--nothing decided about extension to Hull

-- It is expected that a number of the largest horse cars will be overhauled and used as trailers for special occasions.

11/05/1893 Ottawa Citizen Ottawa Electric

An order was yesterday given for 100 tons of rail to be used when the present horse car railway is replaced by electricity.

13/05/1893 Ottawa Citizen Ottawa Electric

Ald. C. Wright yesterday handed in at the office of the Electric Street Railway the contract with the city of Hull duly signed by the civic authorities. Owing to Mr. Soper's absence in New York, however, the agreement will not likely be signed by the company until next week.

17/05/1893 Ottawa Journal Ottawa Electric Hull

Now that the contract between the city of Hull and the Ottawa Electric St. Railway company is complete with the exception that it requires the signature of Mr. Soper to it, the main topic of conversation in Hull is regarding the construction of the road, where it will be run and when its construction will begin. More - intentions of the company etc.

The new iron posts to be used in the electric railway for supporting the trolley wires in the central portion of the city arrived yesterday and arrangements are being made for their erection. They will be placed along the edge of the sidewalk about 100 feet apart, and embedded in a cement foundation.

10/06/1893 Ottawa Free Press Ottawa Electric

Work on the Rockcliffe line is being rushed. The track from Sussex street to the end of the line is being substantially built, some great rock cutting being necessary in order to allow of double track. The poles are all being erected today and will be painted. In order to make the bridge across the ravine at Rideau Hall safe, new beams and supports have been put in by the company, the curves to connect with the Creighton street line will be put in position at once. At Rockcliffe a most substantial pavillion has been erected and a comfortable dwelling for the keeper is in course of erection. The view from the promenade is one of the finest in the Ottawa valley. A large number of conveniences for picnic parties are being provided and the resort will be greatly improved thereby.

13/06/1893 Ottawa Journal Ottawa Electric

It is expected that work on laying the electric track between New Edinburgh and Rockcliffe will be completed tonight or tomorrow night. Over one hundred men are at work.

The iron poles for the Ottawa electric railway trolley cross wires are being placed on Sparks street.

The Electric Railway company have one hundred men now engaged on extending their line from Creighton street to Sussex street in New Edinburgh, where a junction is formed with the City Passenger line.

All the trolley wires are expected to be up on the Rockcliffe branch of the electric railway by tomorrow and with the exception of a short transfer at New Edinburgh a passenger can ride by electric car from any point in the city to Rockcliffe.

15/06/1893 Ottawa Journal Ottawa Electric Rockcliffe extension

The Rockcliffe extension of the Electric Railway Co. will be in running order in a few days. The Creighton street tracks and those of the extension will be joined in a day or so. Some delay is caused by the non-arrival of the trolley wire. Everything is in readiness to string it.

16/06/1893 *Ottawa Journal* *Ottawa Electric* *Rockcliffe extension*

Electric cars to Rockcliffe tomorrow, Saturday, afternoon from one o'clock. Transfers issued from both horse and electric cars. Orchestra in the pavilion. The electric railway extension to Rockcliffe will be completed today. Two cars will run on the route and it promises to be largely patronized. The weight of an electric car is seven tons. This is the information given to the street railway committee last night.

17/06/1893 *Ottawa Journal* *Ottawa Electric* *Rockcliffe extension*

The opening of the Rockcliffe extension of the electric railway, which was to have taken place this afternoon, has been postponed as the company were unable to have the trolley wire stretched in time. Barratt's orchestra had been engaged for the occasion.

17/06/1893 *Ottawa Journal* *Ottawa Electric*

Accident to electric car No. 8 on Rideau street.

19/06/1893 *Ottawa Journal* *Ottawa Electric* *Rockcliffe extension*

The Electric car Company ran busses from New Edinburgh to Rockcliffe on Saturday. A large number of passengers were conveyed, hundreds going down under the impression that they could run right through.

21/06/1893 *Ottawa Journal* *Ottawa Electric*

The people of Sussex Street don't want the electric cars on that street to run faster than six miles an hour and have petitioned city council to see that such shall be the rate of speed when the new line goes into operation.

23/06/1893 *Ottawa Citizen* *Ottawa Electric* *Rockcliffe extension*

Time, three o'clock in the morning! Place, the New Edinburgh terminal of the electric and horse railways.

"Let her go," said the Superintendent Hutcheson, and leaving the sleeping city with its glittering electric lights behind, the first electric car upon the Rockcliffe extension sprang forward into the silence and darkness of the woodland. As the trolley bell pented forth its warning hundreds of feathered songsters awoke and thus to nature's accompaniment was the long anticipated opening of the line to Rockcliffe Park inaugurated. With Superintendent Hutcheson on the first car was Mr. Ahearn, to whose untiring efforts the early opening of the line is due, and a representative of the Citizen abroad for an airing after his night's work. The run from New Edinburgh to the pavilion at the eastern terminus was made in three and a half minutes and was successful in every respect.

The track is of the most solid standard steam railway construction, with extra heavy guard rails upon all curves. The whole road is one succession of curves through what is probably the most picturesque scenery in Canada and terminating at the pavilion from which is obtained a series of views up and down the Ottawa and Gatineau rivers, and across the Laurentian range of mountains indescribably charming.

Near the pavilion a neat cottage has been erected for the caretaker and family. Light refreshments will be kept and ice and hot water supplied to visitors and picnic parties. Conveniences for both ladies and men have been erected in suitable locations. The pavilion, which is 30 by 60 is lighted by electricity. Round tables are being built around a number of the larger trees in the park for the convenience of picnickers.

Connection is made at New Edinburgh with both the horse and electric cars from the city.

23/06/1893 *Ottawa Journal* *Ottawa Electric* *Rockcliffe extension*

The electric street car service being finished to Rockcliffe park, no doubt tomorrow afternoon a large crowd will be in attendance. An orchestra will furnish music.

24/06/1893 *Ottawa Journal* *Ottawa Electric*

Accident to car No. 22 on the Elgin street line.

Track laying on the street railway line is now in progress on Sussex street between Rideau Hall gate and Dalhousie street. The "dip" between the New Edinburgh bridges is being filled in preparatory to laying down the rails.

From today the horse car company will accept transfers from the electric railway to the Rockcliffe line and electric car tickets will be accepted on the return trip from Rockcliffe.

After August 13, when the electric railway begin to pay mileage under the new charter, transfers will be given to and from both companies, on all parts of the lines.

Rockcliffe Park is now being fixed up by the companies. The rough edges cut down and things given a cultivated appearance.

27/06/1893 *Ottawa Citizen* *Ottawa Electric* *Ottawa Car*

Two electric cars built by W.W. Wylie for Messrs. Ahearn & Soper were shipped on Saturday to Winnipeg under the supervision of Ald. Perkins.

27/06/1893 *Ottawa Journal* *Ottawa Electric* *Rockcliffe extension*

Mr. W.Y. Soper says of the car incident Saturday, the affair was very slight and none of the ladies even knew the car was off the track. There was no steep incline at the spot and the car was only off the track for 50 minutes.

27/06/1893 *Ottawa Journal* *Ottawa Electric*

8% dividend declared. More.

28/06/1893 *Ottawa Journal* *Ottawa Electric*

Messrs. Ahearn and Soper have shipped two new cars, No. 26 and 28 to Winnipeg. They were manufactured by W. Wylie & Co. and placed entire on two flat cars at the C.P.R. depot under the direction of Ald. Peterkin.

The electric car authorities have of late been trying the effect of running a rope on one side of an open car to prevent people getting on and off on the wrong side, as sometimes there is a danger from cars passing each other. But it does not seem to work very well, as the young people dodge out and in under the rope regardless of all precautions. The only way to make the rope of any use would appear to be to make the rope line a double one and apply it to all open cars otherwise it will prove to be an inconvenience without being of any value.

29/06/1893 *Ottawa Journal* *Ottawa Electric*

The double track of the electric railway on Sussex street has been laid from McLaren's bridge to near the Queen's wharf. A gang of 100 men are employed. City engineer Surtees says that the New Edinburgh bridges cannot support a double track.

05/07/1893 *Ottawa Citizen* *Ottawa Electric*

The electric railway company have new tickets issued, which are known as "Limited Tickets". They are to be used instead of the workingmen's tickets, but nevertheless, afford the same advantages both in regard to price and the hours in which they are good.

07/07/1893 *Ottawa Journal* *Ottawa Electric*

Mayor explains to workers why they had to stop work on Sussex Street. Injunction obtained to cease work until 14th. Car No. 31 broke its trolley coming from New Edinburgh today.

The W.W. Wylie car building business was formally handed over on July 1st to the Ottawa Car Manufacturing Company. Letters Patent have been applied for, the provisional directors being Messrs. W.W. Wylie, T. Ahearn, J.W. McRae, W.Y. Soper and W. Scott.

10/07/1893 **Ottawa Journal** **Ottawa Electric**

The Electric Railway company have not yet put down the promised sidewalk between Creighton and Alexander streets. The line crosses the sidewalks on Creighton and Charles streets, where the cars meet to change passengers. This makes a most dangerous crossing.

12/07/1893 **Ottawa Journal** **Ottawa Electric**

Today the Ottawa Electric Railway started an early car service to Rockcliffe. The first car leaves Rockcliffe at 6.30 a.m. The campers are thankful.

13/07/1893 **Ottawa Journal** **Ottawa Electric**

The electric tracks on Sappers bridge will only occupy one foot more than the horse car tracks.

The City Passenger railway company have wires strung along the poles from New Edinburgh to the Queen's Wharf.

15/07/1893 **Ottawa Journal** **Ottawa Electric**

The industrial exemption committee held a short pow wow last evening to consider an application from W.W. Wylie of the car shops Kent street, for exemption from taxation. A little discussion revealed that the car works would soon be under the management of the Ottawa Car Company, a joint stock affair, consisting of shareholders of the Electric Railway company, letters patent for the incorporation already having been asked for.

Ald. Fraser who happened to be present, said as secretary-treasurer of the Electric Railway company he knew that \$25,000 stock had been subscribed and that application for incorporation to the government had already been made.

The committee agreed that they had nothing before them, as the letter from Mr. Wylie was simply for himself and not for the new company which was about to take charge of the shops, and an adjournment was made until the company could come regularly before the committee and state what they would do if granted exemption.

19/07/1893 **Ottawa Free Press** **Ottawa Electric**

The curve of the electric car track from Bank to Albert streets was completed last night. Work commenced yesterday at the junction of Sparks and Bank Streets.

20/07/1893 **Ottawa Journal** **Ottawa Electric**

The City Passenger Railway company have started to make the connection between their line and the Ottawa electric line by way of Bank connecting at Albert for all points south and west.

Car No. 33 ran off the track at the corner of Bank and Albert streets yesterday.

21/07/1893 **Ottawa Citizen** **Ottawa Electric**

The work of connecting the electric railway track from Albert and bank streets to the one on Sparks street is now going on.

22/07/1893 **Ottawa Journal** **Ottawa Electric**

The City Passenger Railway company put down some wooden poles on Wellington street west of Lyon street yesterday and some of the Wellington street people growled as they understood that nothing but iron poles would go down. It is understood that the wooden poles are but temporary and will be replaced by iron poles shortly.

24/07/1893 **Ottawa Free Press** **Ottawa Electric** **Ottawa Car**

The Ottawa Car company turned out a very fine electric car from the shops this afternoon for the Montreal Street railway.

24/07/1893 **Ottawa Journal** **Ottawa Electric**

A force of men were engaged stringing a trolley wire on Bank street near Albert after 12 o'clock Saturday night.

25/07/1893 **Ottawa Journal** **Ottawa Electric**

It is expected that the electric cars will be running on Sussex, Sparks and Bank street line this day week. The main line as well as the St. Patrick st. line will continue as at present on Wellington, Metcalfe and Albert, but the cars coming by way of New Edinburgh will go by way of Sparks.

26/07/1893 **Ottawa Journal** **Ottawa Electric**

Work on the electric railway on Sparks street is expected to be completed by Saturday night.

Motors on Sparks Street. First electric cars started last night.

Electric cars are running on Sparks street. A year ago it was thought such a thing could not be. Today it is an established fact.

THE FIRST CAR

About ten o'clock last night the work of stretching the wires and filling in the roadbed of the south track on Sparks from Metcalfe west to bank and south on Bank to Albert was completed and shortly after eleven o'clock the first car to run over the new line, No. 22, left the company's car sheds on Albert street with superintendent Hutchison and Mr. F.A. Leamy, track foreman, on board, the former at the motor and the latter at the rear end of the car watching closely the trolley. Those who happened to be at the intersection at the time jumped on board the car that they may be able to boast in years to come of being the first passengers over the new portion of road. The car proceeded at the usual rate along Bank to Sparks and east along Sparks to Metcalfe, beyond which point the line was not, at that early hour in final shape. The trolley was reversed and the car returned over the new line at a high rate of speed and the line was found to be in a satisfactory condition.

REGULAR SERVICE BEGAN

This morning the regular Sparks street service began as far east as the post office. All day, three cars, No's. 6, 38 and 52 have given a five minute service between the post office and the Exhibition grounds on Bank streets. These cars were until today on the route between the corner of Metcalfe and Wellington streets and the Exhibition grounds.

LAST DAYS OF THE HORSE CARS.

The horse cars were still jogging along Sparks street today, but it is expected that after tomorrow they will be a thing of the past on that thoroughfare. After tomorrow the horse car line will only exist from the corner of Bank and Sparks street, along Wellington to the end of track at the Chaudiere.

AN ANIMATED SIGHT

The novelty of electric and horse cars running simultaneously on one street attracted a good deal of attention on Sparks street today. "The old pedestrian line" as the horse system was generally called, kept one track going while alongside the dandy motor sailed gracefully along. The street had a very animated appearance with both style of cars running and workmen putting on the finishing touches to the road construction.

The extra stuff being dug from the streets is being carted away to New Edinburgh to fill in the "dip" between the two bridges.

About as noisy as any is the corporation street roller which is rolling in the loosened roadway and making it solid once more.

THE SUSSEX STREET SECTION

With regard to the eastern portion of the line from the post office to New Edinburgh via Sussex street, the old horse car route, superintendent Hutchison stated this morning that it was hoped the horse cars would also be discarded there after tomorrow night and the line ready for the electric cars as far as the bridge across the Rideau at McLaren's mill by Saturday morning. It will be impossible to extend the electric line into New Edinburgh until the bridge across the Rideau is completed and service will have to stop at that point until the new bridge is ready.

THE CHAUDIERE BRANCH

Superintendent Hutchison stated this morning that the company expected to have electric cars running along Wellington street and to the Chaudiere within two weeks.

THE RIDEAU BRIDGE

Work has commenced on New Edinburgh bridge. The electric company have given out the contract for the extension of the piers on the north side and the stringers and girders will be added afterwards. All the cost will be borne by the street railway company and will foot up about \$8,000.

THE INJUNCTION SUIT

Mr. R. Code, solicitor for the applicants in the injunction and against the street railway, Mr. D.B. McTavish city solicitor and F.H. Chrysler for the company, leave for Toronto this evening. Argument in the case takes place tomorrow.

29/07/1893 *Ottawa Journal**Ottawa Electric*

Mails by motors

Proposed delivery of the bags by the electric road.

Proposals have been made to deliver the mails to and from the post office and railway stations in future by the electric railway.

Three special cars to be built and possibly a siding from the Sparks street line into the rear post office yard. One car will likely take the mails to the C.A.R. station, one to the C.P.R. or Union station and the other for general use. More.

The street railway company expect to have Wellington street re-laid and in running order as far as Pooley's bridge in about two weeks.

29/07/1893 *Ottawa Journal**Ottawa Electric*

The W.W. Wylie Street Car company are putting the finishing touches to two elegant cars for the Montreal company. The difference between these new cars and the ones in use in Ottawa is that the Montreal cars have two feet more platform at each end.

01/08/1893 *Ottawa Citizen**Ottawa Electric*

Post Office inspector Hawken yesterday notified Mr. McKenna the contractor for the conveyance of the mails between the city post office and the railway stations, that his contract would be cancelled at the end of three months. The contract proper had about a year to run, but advantage was taken of the provision which enables either the department of the contractor to cancel the agreement by giving three months' notice. It is expected that by that time the Electric Street Railway Company will have their mail vans in readiness to commence the conveyance of the mails. The Post Office Department will bind the Street Railway Company to provide against stoppage of the service during thunderstorms or from other causes, by retaining a team or two of horses or having a storage battery for use in such emergencies.

02/08/1893 *Ottawa Journal* *Ottawa Electric*

Tomorrow, barring accidents, Sparks street will be electrified both literally and metaphorically. Tomorrow, all the electric cars that run the streets of Ottawa are expected to centre on Sparks street on their way to Bank Street, the Union depot and other points.

Each minute, a few fractions one way or the other, a car will pass a given point.

Tomorrow Sparks street will have become the main line of the electric system

More

Today one hundred men with pick, shovel and hammers were busy preparing to put in a switch, corner of Sussex and Rideau streets, to switch the main line and New Edinburgh cars from Wellington street to Sparks street. Tonight the men will work all night by electric light, put in the switch and by the early hours of dawn, barring accidents, Wellington street, from Dufferin bridge to Sparks street, will have been cut off. (should be Bank street?)

Tomorrow, when the change is made, all the electric cars will run on Sparks street, from the bridge to Bank street, along Bank st. to the Exhibition grounds, and along Bank and Albert to the Union depot and vice versa.

This state of affairs will continue until a switch can be put in on cor, Metcalfe and Sparks streets. Then the main line cars will run via Sparks, Metcalfe and Albert and the New Edinburgh cars via Sparks and Bank streets.

AS TO HORSE CARS

The horse cars will no longer run on Sparks street. The idea is to start them from corner Bank and Sparks streets for the Chaudiere, transferring passengers to them from the electric cars. When the horse car route is wholly converted to electricity the cars will also run on Sparks street. It will be three weeks more before this happy consummation.

When things are running in the new order the New Edinburgh people for the Union depot and the depot people for New Edinburgh will transfer corner of Bank and Sparks streets/ Depot people for Bank st. and vice versa corner Bank and Albert sts. Sandy Hill people for the show grounds will transfer at Sparks st.

03/08/1893 *Ottawa Journal* *Ottawa Electric*

Today as anticipated the buzz of motors was heard on Sparks street. More.

No formalities, busy scene,

03/08/1893 *Ottawa Citizen* *Ottawa Electric*

Probably Ottawa has never witnessed more active scenes than those of last night at the corner of Rideau and Sussex streets to Sappers bridge. Under the glitter of electric lights, hundreds of men were employed in laying the switch at the junction of the thoroughfares mentioned and arranging the tracks so that, commencing today all the cars running over the several termini of the electric system will pass over Sparks street from Sappers Bridge to Bank street via Sparks. By this change the line over Dufferin bridge on Wellington street down Metcalfe along Albert St. as far as Bank will be abandoned. The cars from the Protestant hospital and New Edinburgh to the Union depot and the Exhibition Grounds will all run on the same time as usual only they will go via Sparks to Bank street. The only material change will be a service of three electric cars from New Edinburgh via Sussex street, which will connect with the horse cars at Bank street for Hull.

04/08/1893 *Ottawa Free Press* *Ottawa Electric*

At half past nine o'clock this morning electric car No. 38 was run out of the car sheds and, with Superintendent Hutcheson at the motor, proceeded along Sparks street to the junction of Rideau and Sussex street for a trial run down the new tracks on the latter thoroughfare. On board the car were Messrs. J.W. McRae, W.Y. Soper, T.P. Brophy, T. Workman, Mayor Durocher, G. McNab, R. Quain, Ald. Baldwin, ex-Ald. Laverdure, Mr. Bradley, Superintendent MacDonald, W.A. Clarke, Robt. Ingram, J. McRae junr., S.M. Rogers and a Free Press representative. There was a slight hitch in turning the new curves which were not quite ready for traffic but on the whole going no other trouble ensued. The residents of the streets seemed well pleased with the new mode of transfer. On the return trip the Hon. T. Lambert, who had been doing business at the mills boarded the car as did Ald. Hawken. The track is very level and the trip is likely to prove a good one being well situated for getting cooling breezes off the river. This afternoon the regular traffic began, the cars running from the New Edinburgh bridges to the corner of Sparks and Bank, where connection will be made with the horse cars on the Hull line until the whole track is ready for electric cars. This line will be known at night by green lights on the front on the cars, the Union depot line being white and the Bank street cars being red.

Extra cars will run to

Rockcliffe tomorrow and a band will be playing in the pavillion.

The Elgin street cars now stop on the south side of Sparks street in place of crossing the tracks and running to Wellington street.

05/08/1893 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

Two new cars for the Montreal Electric street railway were turned out of the car factory today. They will be completely equipped with trucks and motors before being sent to their destination.

08/08/1893 *Ottawa Journal* *Ottawa Electric*

The street railway laborers are rushing the putting down of the electric railway tracks on Wellington street as a great rate. One of the tracks is nearly finished as far as Pooley's bridge.

08/08/1893 *Ottawa Journal* *Ottawa Electric*

Car No, 50 ran over a large dog.

10/08/1893 *Ottawa Citizen* *Ottawa Electric*

Then the electric line has been completed to the Chaudiere it will be the scenic street railway of Canada skirting, as it does, the Ottawa river from Rockcliffe to the Chaudiere Falls.

12/08/1893 *Ottawa Journal* *Ottawa Electric*

Wm. McEvels, conductor of car No. 26 Elgin street route, requests the Journal to state that his car runs on time on all occasions and any persons talking to the contrary talks without knowledge of the facts.

14/08/1893 *Ottawa Citizen* *Ottawa Electric*

Commencing today the tickets for the two street railway companies will be accepted on all of the electric and horse cars. Hitherto they have only been good upon the cars of the company by which they were issued.

15/08/1893 *Ottawa Journal* *Ottawa Electric*

The open electric cars are now equipped with a chain on one side so as to prevent passengers from getting off on the track side. This will prevent a good many accidents.

16/08/1893 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

Four new electric cars for the Montreal Street railway were tested on the tracks yesterday and many favorable comments were made by our citizens on the neat appearance and excellent work being done under Mr. Wylie's inspection.

16/08/1893 Ottawa Free Press Ottawa Electric

The railway company expects to have electric cars running on one track along Wellington street by Saturday morning, and also along the roadway on Sussex street as far as the New Edinburgh bridge by the same date. This will give access to new Edinburgh by the Sussex street route.

All iron poles erected by the company are receiving a coat of black paint which greatly adds to their appearance.

A cab driver from Hull was awfully indignant when , at the corner of Metcalfe and Sparks street this morning an electric car overtook his hack in the track and pushed it along until he got out of the way. The only damage was to the cabby's temper.

18/08/1893 Ottawa Free Press Ottawa Electric Ottawa, Broad Street

The Electric Railway company are now laying ties along the rear of the baggage room at the Union depot. Formerly the cars ran down the middle of the road but the new siding will enable them to run alongside the platform. The track will be complete in the early part of next week.

18/08/1893 Ottawa Citizen Ottawa Electric Ottawa Car

The Ottawa Car Company will have a busy time of it for some weeks to come. In addition to the construction of eighteen cars for Montreal, they have orders for several from Hamilton and Winnipeg.

18/08/1893 Ottawa Journal Ottawa Electric

The Ottawa Car Company has now under construction eighteen cars for Montreal. There are several orders from Winnipeg and Hamilton to fill too. One of the cars manufactured by the Ottawa Car company for Montreal Street Railway company was run through the streets yesterday.

19/08/1893 Ottawa Citizen Ottawa Electric Union Depot

The Electric Street Railway company are constructing a short track from their main line on Broad street running immediately alongside the platform of the C.P.R. station. The branch is for the convenience of passengers and unloading of mails when the company's mail contract commences. The ground where the track is being laid has always been utilized by hack men and not a little indignation is being expressed by them at being crowded back to a more distant point from where the passengers alight from the incoming trains.

Men were engaged today moving the track from the centre of the street into position close to the depot platform. The improvement will allow passengers to step to and from the electric cars without going into the roadway at all.

19/08/1893 Ottawa Free Press Ottawa Electric

The electric cars made their first trip across the New Edinburgh bridges last Thursday night. The tracks extend to the slope across the second bridge. The declivity between the two bridges has been filled up with stone gravel and the very best of materials. A stone wall prevents McLaren's stables from being crushed in with the weight of material pressing against them.

22/08/1893 Ottawa Free Press Ottawa Electric

Work on the Electric Railway company's new bridge across the Rideau at New Edinburgh is being pushed ahead rapidly. A small track on trestle work runs out to the site of the middle pier. The stone and material for the pier is conveyed over this roadway more quickly than if it were all lowered from the bridge above. The eastern pier is now complete. The new structure will be on the same level as the original structure.

22/08/1893 Ottawa Journal Ottawa Electric

First Electric Mail cars are being built at the Ottawa Car Shops.

In the sheds of the Ottawa Car Co. are being built the first electric mail cars that have ever been constructed.

They are to be used for the carrying of mails from the city post office to the railway depots and the steamboat landings.

The three cars which until recently were in use on the street passenger line are being rebuilt for this purpose. The cars will be vestibuled at each end. In the centre of the car on each side will be a double door where the mail bags will be thrown in. There will be no windows on the car whatever, but the interior will be lighted at all times by electricity.

Inside there will be shelves for the holding of the bags and everything possible will be arranged for the comfort of the mail clerk who will be the only person allowed within the car. The doors will be made to lock from inside of the car, and so mail clerk can lock himself in to prevent anyone taking the mail, should this be necessary.

CANNOT BE HELD UP

Besides this there will be no side foot platforms on the car and it would be impossible for anyone to board it while it is in motion.

A motorman will alone be necessary to run the car while the mail clerk watches the mails. The cars will run between the depots and the post office without stopping. Street crossings will be unheeded. A larger gong and one having a louder tone than those on the electric cars will warn people of the approach of the car, when it is at least two or three blocks away from any of the street crossings.

The mail cars will be much lighter in construction than the ordinary electric car and will run at a more rapid speed. each car will bear the lettering "V.R." "Royal Mail".

It is understood that one car will run to the Union depot and another to the C.A.R. depot and a third to the Empress landing at the Queen's wharf and to points nearest to such places as Cummings bridge and other suburban post offices.

The change to the mail service takes place on the first of November.

Late last night two new cars built by the Ottawa Car Co. were shipped by the C.P.R. to Montreal.

20/10/1893 Ottawa Citizen Ottawa Electric Ottawa Car

Mr. John Ahearn, electrician of the street railway, has arrived home from London, where he has been superintending the work of opening a new track. He said the electric cars would be running on the 30th inst.

21/10/1893 Ottawa Free Press Ottawa Electric

The Electric Street Railway company are laying their tracks in the rear of the city post office to obtain closer connection therewith for the purpose of the electric mail service, which is shortly to be instituted. It is intended as soon as the present contracts for carrying the mails to the different railway stations and to Hull, have expired, to place the carrying system in the hands of the electric railway. A number of old cars, formerly in use on the old street railway are being fitted up for the service. The establishing of an electric postal delivery system, similar to that in vogue in New York, is also under contemplation, it is said, but the present needs of the city hardly warrant such a step.

02/01/1894 *Ottawa Citizen* *Ottawa Electric*

Sunday afternoon, Mr. Cardinal's handsome half bred Spokane ran away on Rideau Street. Turning down Sussex Street he continued his wild ride till the New Edinburgh bridges were reached, where in his blindness he took the Electric Railway bridge by mistake. The poor animal got safely over about half the bridge before his legs went through the spaces between the ties. It was nearly an hour before he was rescued, badly damaged and cut up. This bridge is a regular trap for runaways, or for even persons not knowing the locality. This is the second accident within a week.

05/01/1894 *Ottawa Journal* *Ottawa Electric*

An iron pulley in the new steam power house of the Ottawa Electric Railway broke yesterday, but fortunately no one was near enough to be injured.

08/01/1894 *Ottawa Citizen* *Ottawa Electric*

Between the hours of nine and eleven o'clock Saturday night, a storehouse used by the Electric Railway Company adjoining the Company's car sheds on Albert street was destroyed by fire, together with a couple of sheds at the rear owned by Martin McDonald. The origin of the fire is unknown.

Within a few minutes after it started the storehouse was in a mass of flames, the fire having been given an impetus by a couple of barrels of grease that were stored away in the building.

The firemen worked hard and kept the fire from making its way into the car sheds. At one time the car sheds were thought to be in danger, and the cars in them at the time were ruin out on to Albert street. The damage is estimated at \$500 or \$600, being covered by insurance. This estimate will be doubled if it is proved that several armatures that were stored in the building are destroyed..

08/01/1894 *Ottawa Journal* *Ottawa Electric* *Ottawa Car*

Cars are already being manufactured at the new three story building of the Ottawa Car Company on Slater street. The upper portion of the building is hardly yet complete but owing to a pressure of business the company was compelled to use the lower part as soon as possible. They have now orders for thirty-six cars from outside cities and have an extra staff working at night.

04/04/1894 Ottawa Free Press Ottawa Electric Ottawa Car

The new electric car building shop on Albert street has advanced to the point of putting on the sheet iron covering.

06/04/1894 Ottawa Journal Ottawa Electric Ottawa Car

In one month from the time the work commenced the Ottawa Car Company will have their new car sheds completed. The work has been rushed forward with the usual expedition displayed by the company in their undertakings.

It is a three story building 40 feet frontage by 99 feet deep on Slater street, immediately in rear of the company's present premises. The building is of wood, set on solid cedar posts, which are let down to the solid rock, and it is sheeted outside with Canada plate. Although only started only three weeks ago, it is so far completed that frames for the Hamilton cars are being worked on in it.

In the near future a solid masonry foundation will be put in. The floors are not divided up. On the first floor the finishing and painting will be done, and the second floor will be devoted to the trimming shop and the manufacture of carriages. The main portion of the machinery remains in the present premises and will be run there.

The roof is flat, inclined downward to the centre, where the water drains off. The flooring is double, the top laying being put down diagonally to give extra strength. Underneath the building is a space to be used for the storing of lumber.

Outside the building a drum elevator is being constructed which will take up a car from the ground to the first floor after it has been put together. The total cost of the building will be about \$5,000 and the strongest and best of work has been put into it.

CARS FOR OUTSIDE ROADS

The company now have an extra amount of work on. They are supplying all of the rolling stock for the Galt street railway, and they will be constructed similar to the Ottawa cars and put out as fast as possible. The eleven cars being built for Hamilton are 37 feet long and run on two trucks. In Hamilton there are no sharp curves and the length of a car is immaterial. They will be finished in a somewhat superior style to the Ottawa cars and will be built like a railway car with an aisle in the centre and rows of seats on each side.

The ten Montreal cars will be some closed and some open. The amount of work now in has made a boom and will keep a full staff steadily at work for the summer.

The Street Railway Company had placed some new open cars on the streets. There are fifteen similar ones, it is said, being made by the Ottawa Car Company. The making of the cars outside the city is tantamount to the annulment of the company's contract. Workingmen are asking if there are any of their representatives in the city council beyond the glamour of the company in the present distressing conditions of the labor market to object to this company overriding its by law by getting cars outside the city? There are plenty of skilled mechanics in Montreal, workmen say, to build as many cars as the street railway needs. They also call the aldermen's attention to the fact that under the company's charter it is obliged to have the cars made here. Witness.

C.P.R. and O.E.R. Unite to Build an Electric Railway to Aylmer from Britannia

Right from Ottawa to Aylmer by electric cars by way of Hintonburg, Skead's Mills and Britannia, crossing the Ottawa river at Deschenes Rapids on a bridge that is to cost \$150,000. Such is the move the C.P.R. and the Ottawa Electric Railway have combined in.

The Journal got a hint of the scheme this morning. Mr. H.B. Spencer, superintendent of the C.P.R. and Mr. Ahearn, manager of the electric railway, being seen, admitted the Journal's information to be correct and further stated that all arrangements have been made to carry it out by next spring.

The plan is to run a track from the terminus of the Albert street line, to Cedar street in Rochesterville, over the Cedar street bridge to Hintonburgh through the heart of which it will run, afterwards traversing the property of the Ottawa Land Company, which is, in reality, the Electric Railway Co., down to the C.P.R. tracks near the river.

After crossing the C.P.R. tracks at a very advantageous spot, the electric line will continue its way on the C.P.R. property parallel to the C.P.R. tracks.

ALONG THE C.P.R. PROPERTY

The electric line will pass through Skead's Mills and at Britannia will shear off just east of the C.P.R. station, cut through the village and strike the river just at the foot of the Deschene rapids.

As stated, the river will be crossed by an iron bridge which will also be used for vehicles, toll will be charged. By this bridge will be filled a want too long felt by the farmers on both the Quebec and Ontario sides of the river.

The electric line will land on the Quebec side near Conroy's mills where it will again enter the C.P.R. property and continue on its way to Aylmer.

The C.P.R. to allow the Electric Co. to do the business that will pay have agreed to withdraw all of their "suburban" trains from Aylmer and Britannia to Ottawa.

The distance of the run is estimated at ten miles.

The road would be a sort of joint affair between the C.P.R. and Electric Railway.

SURE TO PAY

Mr. Ahearn thinks the line is sure to be patronized and pay because it will tap so many important suburban points. The scheme will provide an easy way of giving Hintonburgh car service.

Mr. Spencer said the new road will be started next spring, as there is very little right of way to buy, or other arrangements to make.

Electric cars every hour.

The decision of the C.P.R. and the Electric Railway Co. to build jointly an electric railway to Aylmer, bridging the Ottawa river at Deschenes Rapids, as outlined exclusively in the Journal Saturday night, has caused much favorable comment. Today the Journal secured details of the scheme.

It is the intention of the companies to start work in April and to have electric cars running to Britannia by the middle of May.

The bridge across the river will not be finished until sometime in July, but after that the cars will run to Aylmer. 'Till they do, the C.P.R. will keep on their present steam service on the Quebec side of the river.

CARS HOURLY

When the line is complete to Aylmer, the cars will run hourly between Ottawa and Aylmer, and intermediate points. A car will leave the terminus each hour, crossing somewhere near Britannia.

These cars will run from 6 o'clock in the morning until 11 o'clock at night. There can, therefore, be no objection to the time card by summer residents and others.

The cars will run all winter, the tracks being ballasted high like the tracks of the steam cars. The rails will be kept clear of snow in the usual way - by snow plough. If the traffic is blocked in any storm it will be after all the steam cars are snowed up. In the matter of keeping the cars going the energetic record of the electric railway should be a guarantee of constant running.

The cars used will be of the same pattern as those made by the Ottawa Car Co. for the Galt and Preston Electric Railway. 40 feet long with a 10 ft. compartment in front for mail, baggage and express parcels. The company expect to carry the mails along the line and will do an express business between the points of the road. Freight from Aylmer and Britannia will be carried by the C.P.R. in the usual way.

HIGH POWER MOTORS

On the new line high power motors are to be used and it is calculated the distance estimated at ten miles will, including stops, be travelled in half an hour.

The cars will be housed in Ottawa, the last trip being made from Aylmer at 11 o'clock.

The intention of the company is to close up the present line from Aylmer on the Hull side of the river and throw all the passenger traffic from Aylmer to Hull and vice versa on to the Ontario side of the river. With the court house and jail removed from Aylmer to Hull the travel between these places will be much smaller than at present. Those who have to make the trip will get on the Ottawa electric car at Hull and be given transfers to the Aylmer line.

The price of tickets has not been arranged yet, but Mr. Ahearn says the fare will be very reasonable as the companies are desirous of encouraging suburban traffic.

SUBSIDY FOR THE BRIDGE

The companies expect to get liberal subsidies for the bridge from the various governments as the bridge will be a boon to farmers living on both sides of the river and who, to cross now, have to drive round via Ottawa.

In case of any breakages on the road at any time to delay traffic, the C.P.R. will take up the service with steam engines.

Mr. Ahearn, speaking to the Journal today, stated that the scheme has been under consideration for the past 18 months. It is not something suddenly sprung to counter another scheme.

WORKING TOGETHER

For a couple of years back the electric railway has been considering the scheme, but were not prepared to face the powerful opposition of the C.P.R., but now an amicable arrangement has been made and the two companies were working together.

Rails on the way.

The rails ordered by the Electric Railway for the 1895 extensions have arrived in Montreal and are expected here in a few days.

Today the company gave their order for spikes and bolts. These are purchased in Canada.

The ties are all out and delivered in the situ. As soon as the rails arrive work will at once be begun.

The first ties will be laid on Nicholas street, but the line to the Experimental Farm will go on at the same time. Employment will be given to a large number of men.

Seven hundred and sixty-two tons of rails will be used in the different extensions. Theodore and Nicholas streets will take 282 tons and the Hintonburgh-Experimental Farm line 480 tons. In the different branches 22,000 ties will be used.

It is not know how soon the line to the Farm will be built, but the company with their usual push will hustle the work all they can.

04/05/1895 **Ottawa Free Press** **Ottawa Electric**

Electric railway construction will be in full blast within a few days, and large gangs of men will be engaged very shortly in building the extensions to the system along Nicholas, --and to the Experimental Farm, already the ties are being laid on the first named thoroughfare, and this morning fourteen cars of rails arrived in the city for the tracks. These will be distributed in quick order on the route of the St. Georges ward extensions first, while the Hintonburg route will be followed up as rapidly as possible.

Hitherto, Mr. Frank Leamy has done the work under the immediate control of the company, but this year the company has made a change, having signed a contract with Mr. Walter Leamy to execute the job, Mr. Frank filling a similar position under his brother's contract as he did for the company. One of the stipulations of the Electric Railway Company is that
ONLY CITY LABOR

shall be employed on the construction work wherever it is possible to do so, the desire of the directors being to give employment to our own people under every possible circumstance. Mr. Leamy had the control of a large share of the Montreal Electric Railway tracks and is one of the best men on the continent in this class of work. There will be no time lost in completing the job. He is today making arrangements to start work on Monday morning.

The new design of rails for laying on the asphalt pavement have been shipped by boat from Chicago, and will come via Prescott.

The Rockcliffe route appears to be as popular as ever judging by the number of visitors there during the past few days. Improvements made by the company during the past winter are highly spoken of.

13/05/1895 **Ottawa Journal** **Ottawa Electric**

Messrs. Ahearn & Soper of this city have been awarded the contract for the construction and equipment of an electric railway in Oshawa, besides an extension from the town to Lake Ontario.

The line to be built will be about six miles and a half in length. The extension from the town to the lake will be about two miles in length. It is understood that the price for the contract is between \$175,000 and \$180,000.

Mr. M.C. O'Donnell of this city is to be sent up by the firm to have charge of the mechanical construction. He will be absent from the city all summer on this work.

Yesterday as two green cars were passing each other on the Chaudiere bridge, where the tracks are very close, they collided and shattered to pieces the steps and uprights on one side of both cars. Conductor Lyon gave his motorman the signal to start from the end of the line, and when his car had gone three quarter ways on the bridge the car coming from the other end started on to the other end of the bridge, and before the cars could be stopped, they collided with the above results. The two motormen were suspended for one month because they knew that the tracks were too close at this point to admit the passing of two cars. The motormen were new hands and it was owing to this that the accident happened, The damage to the two cars amounts to \$200. No person was hurt.

The Board of Works meets tonight to deal with the application of the Electric Railway Company for a track on Little Sussex Street.

The Electric Railway Company are preparing to string wires for the extension from Hintonburg to the Experimental Farm. The work is to be completed by May 1st.

18/04/1896 Ottawa Citizen Ottawa Electric

The Board of Works met last night and decided to recommend the Council to grant permission to the Electric Railway Company to lay a track on Little Sussex street to more closely connect with the C.A.R. station -- more.

21/04/1896 Ottawa Citizen Ottawa Electric

That from the Board (of Works) recommending that the Electric Railway company be granted permission to lay a single track connection from the Sussex street line across Rideau street and along Little Sussex and Besserer streets to the Central station provided they pay all expenses incurred ---

24/04/1896 Ottawa Journal Ottawa Electric

Cars are expected to be running shortly between the Experimental Farm, via Hintonburg, and Rockcliffe. In preparation for the increased traffic consequent upon the opening of the new line the Electric Railway Company have had six new electric cars built some of which are already in the car sheds. The trolley poles on the line from Hintonburg to the Farm are now being put up and are already past Parry Sound tracks.

The chief cause in the delay lies in the fact that the bridge under the C.A.R. tracks, through which the electric cars will have to pass is not quite high enough and will have to be raised. Men are at work this morning drawing gravel preparatory to doing this.

The merry-go-round at Rockcliffe is expected to start Saturday evening. And if the weather is fine the band will be in attendance at night.

Men are at work on the second track of the electric streetcar line in Hintonburg. It is expected the double line of cars will shortly be running as far as the old toll gate.

28/04/1896 Ottawa Journal Ottawa Electric

It is expected the Hintonburg line of the Electric Street Railway to the Experimental Farm will be opened on Friday or Saturday of this week.

Experimental Farm

This afternoon the directors of the electric railway and a number of prominent gentlemen took a special car and enjoyed a run over the new line to the Experimental Farm, the party leaving the Russell House shortly after half past two o'clock.

01/05/1896 Ottawa Journal

Ottawa Electric

The new electric line to the Experimental Farm was formally opened yesterday. Somerset Street cars now run from the Farm to Sussex Street, and when the weather gets warmer and traffic towards Rockcliffe increases, additional cars will be placed on the Somerset street line and they will run through to Rockcliffe. At 2.30 o'clock yesterday afternoon a party of aldermen, city hall officials and a few others boarded a special car at the corner of Sparks and Elgin streets and ran out over the line. It runs west through Hintonburg and along Cedar Street to the new West End Park and land of the Ottawa Land Association, where it turns southward and a run of about three quarters of a mile over Holland avenue, running through the park lands, terminates the line at the Farm grounds, about a quarter of a mile distant from the Farm offices.

The run is a fine one and is bound to become popular. The line passes through some fine residential country, and in time the avenue through the park is bound to become a beautiful spot. On the avenue the trolley wires are strung from a single line of poles between the tracks, with an arm extending on each side.

The cars stopped going through the park, and the passengers were each presented with a souvenir bouquet of wild flowers. A straight run of seven miles was then made to Rockcliffe Park, the car covering the distance in thirty minutes including the stops.

A short stay was made at the park while the crowd was whirled on the merry-go-round.

Messrs. W.Y. Soper, J.W. McRae and J.E. Hutcheson, were personally in charge of the trip and made it very pleasant for their guests.

Also full account in the Ottawa Free Press same date.

Ottawa Electric

Experimental Farm

The electric cars are now running to the West End Park and the Experimental Farm. The formal opening of the extension to those points took place yesterday afternoon when the directors of the company took the members of the City Council and other friends over the new line in a special car.

The excursion party, which also included civic officials and members of the press, left the Russell House corner at 2.30. It arrived at the Park fifteen minutes later. There, the members of the party, who had previously been supplied with cigars, were presented with button hole bouquets of wild flowers gathered in the Park.

It was agreed that the ride was a beautiful one and that the park would be popular. From the Richmond Road to the Farm the line runs through the property of the Ottawa Land Company and the Park and under the tracks of the Parry Sound Railway. There is a double track, the poles for supporting the wires being in the centre and having double cross arms. The poles will be crowned each with an electric light and the avenue, which will be known as Holland avenue, will be most picturesque. Five minutes walk from the end of the line is the site mentioned for the proposed new rifle range.

After having viewed the Park, which men are now fixing up, the party boarded the car and made a lightning trip to Rockcliffe. The distance - seven miles - was covered in exactly thirty minutes.

"No place like Rockcliffe," was the unanimous opinion. Before the excursionists left they were given a ride on the merry-go-round, in which aldermen and all participated with great gusto. A few minutes after four the party was again in the city after a most enjoyable outing. All tendered their hearty thanks to Messrs. McRae, Brophy, Soper, Scott, Workmen and other directors of the road for their hospitality and courtesy.

Chaudiere

Arrangements are being made to erect a special railway bridge from the present terminus of the electric railway at the Chaudiere in order that the cars may run as far as Main street, Hull. An agent for the Dominion Bridge company has looked over the proposed route and the work is expected to be completed this fall.

The Journal was informed today by an officer of the Ottawa Electric Railway Company that a line will be built from the present Chaudiere terminus to Main street in Hull.

Owing to the narrow width of the present stone arch bridge on the Hull side the extension will occasion the building of an iron bridge on the eastern side. Arrangements have been made to go ahead with the work on the new bridge. The contract has been awarded to the Dominion Bridge Company of Lachine. Mr. Johnson has been in the city for a few days looking over the situation.

Permission will have to be obtained from Mr. E.. Eddy before a portion of the line that will touch his property can be built, but it is not anticipated that any trouble will be found in getting his permission. More.

The Ottawa Electric Company have prepared plans to extend their line almost as far as Main street, in Hull. It is proposed to construct a wooden bridge from the present terminus to where the car tracks of Buell & Co. cross the roadway and from there to erect an iron trestle to Eddy's small stone building formerly occupied as the office of the company's sash and door factory.

It is proposed to go ahead with the work at once and to complete it as far as the Buell crossing before the end of October, and possibly to the proposed terminus if satisfactory arrangements can be made with Mr. Eddy who is at present away from home. The company have arranged their plans so as not to interfere with the Eddy water power, and it is more than likely therefore that no difficulty will arise between Mr. Eddy and the Company in the matter.

Mr. Phillip Johnson, general manager of the Dominion Bridge Company, Montreal, was in the city a couple of days ago, looking over the site and examining the plans with a view to undertake the work.

The Electric Railway Company set a couple of hundred men at work yesterday on the loop at the end of the Bank street line. The work will be rushed through in time for exhibition week.

Mr. Thos. Ahearn, manager of the Electric Railway, said yesterday that cars would be running to Main street Hull before the winter. The cost of the proposed iron bridge over the slides is estimated at \$15,000.

Edwards and Co. ask the Board of Works for permission to run a curve from the electric railway on Sussex street into their yard so they can transfer lumber at night to C.A.R. depot. More.

City Board of Works Meeting.

Edwards & Co. wrote requesting the privilege of laying a line from the electric tracks on Sussex street to their yards at New Edinburgh. The company intends using the cars for shipping their lumber from the mills to the Canada Atlantic central depot, it being explained that the railway had the privilege of carrying such freight after certain hours at night.

Ald. Payment objected to this proposal. There would be no rest for the residents along Sussex street if these plans were carried out and he thought that by refusing the Edwards company such privileges as are now asked would stop what would otherwise be a nuisance.

The city engineer stated that the new method would save a great deal of heavy cartage on the streets.

The matter was referred to a committee which would visit the spot.

Accident with car No. 211.

The Ottawa Electric Railway Company expects to have their line extended into Hull by the end of next month.

Mr. A.H. Duggan, Chief Engineer of the Dominion Bridge Company, is in the city. His company has the contract for erecting the structure which is to carry the tracks of the Ottawa Electric Railway Company from the Union bridge to Hull. Mr. Duggan stated to the Journal that the work would be completed by the first of December. The cars of the Ottawa company will then run direct to Hull and reach the Hull and Aylmer Co.'s tracks, thus filling the present gap and avoiding the necessity of any walking on the part of the passengers.

The electric railway are placing a new waiting room at the Chaudiere terminus.

The preliminary work for the extension of the Ottawa Electric Railway to Main street, Hull, was commenced yesterday morning. It consisted of clearing away the old timbers below the bridge leading to Booth's lumber yard, and preparing the ground for the laying of the stone foundations for the iron superstructure. It is expected to have the work completed by the end of November.

The Ottawa Electric railway authorities have adopted an excellent scheme for the convenience of travellers at the Central depot. They have placed indicators bearing the color or sign carried by each line of cars and underneath each sign or color appear the names of the streets over which that particular line of car passes. By looking at the indicator a stranger can tell at a glance what line of cars to take to reach any particular point of the city.

The Electric railway company is having a 200 horse power locomotive constructed for the purpose of hauling lumber from the Edwards mill in New Edinburgh to the Central depot yards. The locomotive will run by electric power and will be used only at night being run on the Sussex street tracks.

The Ottawa Car company is erecting a baggage car especially for the transfer of baggage of passengers coming in on the Hull Electric railway and transshipping to the Ottawa Electric line. This traffic is too heavy for the regular cars of the Ottawa service and the latter company are having the car built.

The Ottawa Car Company is erecting a baggage car especially for the transfer of baggage of passengers, coming in by the Hull Electric railroad and transshipping to the Ottawa electric line. This traffic is too heavy for the regular cars of the Ottawa service and the latter company is having the car built.

15/10/1896 The Equity, Shawville Ottawa Electric Hull

The Hull Dispatch says: Mr John Brophy, C.E., has been engaged during the past week with a staff surveying the proposed route of the Ottawa Electric railway into the city. As already stated, the contract for the iron bridge work has been awarded to the Dominion Bridge Co'y of Montreal. Right of way has been secured from Mr. E.B. Eddy over his pond, which will enable the company to cross the slides and have its terminus at the small store building now occupied as an apply house for the E.B. Eddy company. This will bring the Ottawa cars within fifty feet of the Hull Electric line and will prove of great convenience to the travelling public who now have to walk across the bridge and approaches to the Union bridge. It has been also stated that an offer has been made to the Hull Electric company to effect a junction there, but whether advantage will be taken of the proposition or not remains to be seen.

16/10/1896 Ottawa Citizen Ottawa Electric Hull

The Ottawa Electric Railway Company have closed a contract with the Dominion Bridge Company for the erection of a bridge over the Eddy mill pond and slides in order to enable them to run their cars into Hull. The water will be let out of the pond today so that the masons can commence work on the foundations of the bridge tomorrow. Messrs. Holbrook & Sutherland have the contract for the masonry.

16/10/1896 Ottawa Free Press Ottawa Electric

A small idea of the great source of convenience that the new bridge which is being erected by the Ottawa Electric railway company at the Chaudiere will afford the general public will no doubt be interesting. The object of the bridge is the extending of the electric company's tracks to north side of Hull, which will be the terminus.

The bridge will be built of steel girders and trestle spans. The girders will be six foot spans and one forty foot span. The trestle portion of the bridge is to be twenty foot span.

The trestle south of the Buell-Hurdman mill will be erected on substantial masonry foundations and will be located on the east side of the public highway. The street will be widened, and the persons who traverse that portion of the city know the difficulty there is at present in driving there, owing to the extensive traffic. Quite a number of men are now engaged in excavating and preparing foundations for the masonry to support the trestle and bridge work. The foundation is splendid, being of solid rock.

From the Buell-Hurdman mills north the trestle will rest on concrete foundations set on solid rock. The road will not touch the highway at any point after leaving the present terminus, but will run parallel with it, crossing the Eddy ponds in front of the dye house and match factory.

The bridge and trestle, when completed, will be about 900 feet in length. The Dominion Bridge company have the contract for the steel and trestle work, while the engineering work is in charge of Mr. J.B. Brophy.

It is expected that the bridge will be completed before the cold weather sets in, and a large gang of men will be shortly added to the present force.

16/10/1896 Ottawa Journal Ottawa Electric Chaudiere

Yesterday an agreement was signed between the Ottawa Electric Railway Co. and the E.B. Eddy Co. by which the Ottawa Company, after entering Hull, will extend their line through the Eddy yards, for the purpose of handling the firm's freight and carrying it out for shipment over the Canada Atlantic Railway at the Chaudiere.

By the agreement the electric company will build over the company's reservoir east of the street, then skirt along between the match factory and the street, crossing the street at the government slide, and pass up between No. 2 and No. 3 mills, past the rear of the company's office and their large "Jumbo" warehouse and on to the head dam, then running back into the warehouse.

The route will require altogether about two thirds of a mile of track.

To haul by motor.

A large electric motor, similar to that used by the Hull Electric Co. will be used for the hauling of freight from Eddy's yards over the electric railway lines across the Suspension Bridge to the intersection of Duke and Bridge streets where the Chaudiere tracks of the C.A.R. run up to Bridge street. Of course, all freight will be shipped and moved after eleven o'clock at night when the passenger service on the electric railway is over.

It is learned that the Hull Electric Co. are negotiating with the E.B. Eddy Co. for the entrance to their yards from the Hull side which will give an outlet for the firm's freight for shipment by C.P.R.

23/10/1896 Ottawa Journal Ottawa Electric Chaudiere

The lease given by the E.B. Eddy Co. to the Ottawa Electric Railway does not permit the company to carry passengers over the whole line through the Eddy yards. The company are not permitted to carry passengers further than No. 2 mill at Hull.

The first electric car for the city of Quebec was given a trial trip on the Ottawa tracks this morning under the auspices of several members of parliament and senators from Quebec and vicinity. Hon. Francois Langelier, M.P. ex-mayor of Quebec, officially started the car by turning the current on at the controller. A trip was made to the Chaudiere Falls and the new Victoria Park. The car ran perfectly and the Quebec people expressed themselves as delighted with the construction, equipment and furnishing of the car.

19/05/1897 **Ottawa Free Press** **Ottawa Electric**

The unusual sight in Ottawa of a runaway street car was witnessed by the promenaders on Rideau street last evening about 10:30 o'clock. The motorman lost control of a Dalhousie street car while on the bridge near Howe's block. The brakes refused to work and, although the trolley was thrown off, the car gained added momentum with every yard of its progress and rushed down Rideau street. The switch at Nicholas street was open and the car dashed around the curve nearly striking a man, who expected it to go down to Dalhousie street. It went as far as Daly avenue before it came to a stop. The passengers who were in complete darkness after the trolley was thrown off, were quite nervous with the strain upon their system while the car was on its career, but were uninjured.

The grand opening of Victoria Park will take place on 24 May.

25/05/1897 **Ottawa Journal** **Ottawa Electric** **Victoria Park**

With over 2,000 people crowded inside the new pavilion, several hundred standing round inside the fences and many hundreds outside, to whom tickets could not be sold, the evening's entertainment at Victoria Park (ex-West End) opened last night. More.

--

A decidedly novel method of moving pianos was witnessed on Sparks street Saturday afternoon. An electric car, to which was hitched a trailer, stopped in front of Messrs. Orme's and Sons store, while of Cuddie's large vans containing a piano backed upon the tracks. The instrument then being transferred to the truck, and fixed into place, the car parted off with its novel load, and attracted no little attention on its journey. It was being taken out to Victoria Park to be used on the stage.

11/09/1897 Ottawa Journal Ottawa Electric

The E.B. Eddy Company's paper mills Nos. 2 and 3 were shut down today as the water power necessary to run them has been cut off. This is done so that the Ottawa Electric Company can commence building between Nos. 2 and 3 paper mills the new iron frame platform on which tracks are to be laid. It is intended to lay tracks from the present terminus of the Ottawa electric road, up between the two paper mills, out on to the Aylmer road, and into Eddy's warehouse. The Eddy Company's export goods may then be loaded on to the electric freight cars, conveyed direct to the C.A.R. and C.P. railway lines at the Chaudiere, and shipped away to their destinations. By this means the use of large drays and waggons previously employed for the purpose will be done away with.

The masonry work necessary to support the iron and steel girders for the platform is now completed and operations on the setting in the girders were commenced today. Three lines of track will be laid on the platform - one main line and two sidings. The Ottawa Electric Company will have between thirty and forty men engaged in building the steel platform structure and will have the work done in about a months time.

Conductors discharged.

Nineteen Electric Road Men No Longer in the Co's Employ.

Ottawa Oct. 1. There was quite a flurry in electric street railway circles this morning. Nineteen men received notice that their services were no longer required. Among the dismissed were several of the oldest men on the road who are charged with carrying passengers free.

Several prominent union men were dismissed. Two of the dismissed men informed the Free Press that the charge of carrying friends free is true and can be made against almost every conductor on the road. A number of the men discharged were receiving 15 cents an hour, and it is stated will be replaced with men at 13 cents an hour.

It is usual, after the rush of summer and exhibition week to lay off some of the spare men, but the dismissals this year have been in an unusual scale.

30/12/1898 Ottawa Citizen Ottawa Electric Ottawa Car

The Ottawa Car Company are at present building seventeen new cars for the Quebec Electric Street Railway Company. The cars are built on the same plan as the last cars constructed for use in this city. They are finished in first class style as to wood work and painting and are elegantly upholstered. The cars are about three feet shorter than those used in Ottawa and five of them are closed cars which will be used this winter, while the other twelve are open and are intended for use next summer. The first cars will be completed about January 1st, and will be shipped as soon as finished.

The company has finished a car for the Palace Car Café Company which has lunch cars on the streets of nearly all the large American and Canadian cities and it is also endeavoring to introduce the scheme in Ottawa having applied to the city council during the year. The car is in reality a large moveable restaurant, containing a small stove, refrigerator and all the necessities for getting up a meal in the shortest possible time. The cooking utensils are all bunched in one end of the car and are shut off from the rest of it by a counter running crosswise. The other end is fitted up with seats along a narrow table projecting from the sides of the car upon which the lunch is served. The car is taken out at night only and is hauled by horses around the city and those who work late or who wish to have something to eat before retiring, board the car and are served with a light lunch at a very small price.

The car which is on exhibition at the Car Company's works, is enclosed by beautiful stained glass windows and is a model of first class workmanship.

28/06/1899 Ottawa Free Press Ottawa Electric

The switch at the Union depot was open this morning and car 41 of the OER which was being tested, ran off the track.

12/07/1899 Ottawa Citizen Ottawa Electric Aylmer

A gentlemen interested in the Ottawa Electric Railway Company is authority for the statement that the corporation will soon take the preliminary steps to secure entrance to Aylmer, and thus obtain a share of the rapidly growing traffic to that point. Park property would be secured at the summer resort, he stated, and in all probability, the Mulligan or Scott properties would be secured for this purpose. A large hotel would also be erected and various attractions provided. Right of way from the city, it is understood, will be secured over the Pontiac and Pacific Junction Railway Pacific Junction railway, an arrangement with this object in view now being under consideration.

It is altogether likely that should an undertaking be arrive at between the two companies the construction work on the railway and interprovincial bridge will be hastened to completion. Nothing definite yet has been arranged in the matter, but nevertheless the scheme looks feasible.

Excellent park accommodation can be secured, and with the rapidly growing needs of Ottawa for such accommodation the proposed project should materialize into a paying venture. Those interested, it is understood, are loath to say anything till plans have reached a more satisfactory stage.

Incident with car No. 61.

18/09/1899 *Ottawa Citizen* *Ottawa Electric*

There was a collision on the Rockcliffe electric line yesterday afternoon just past the turn below the entrance of the drive at Government House. Car 242 was going down to Rockcliffe, followed by car 220. The first car stopped just past the turn to let some passengers off, when car 220 came up and dashed into it breaking the fender. The motorman reversed his motor so quickly that it burned out and ran backwards for some distance from the impetus. The flames shot up into the air and gave the passengers the idea that the car was on fire, and they tumbled out pell mell, but no one was hurt.

04/10/1899 *Ottawa Free Press* *Ottawa Electric* *Britannia*

Heny and Smith, the contractors, are making good progress in the extension of the electric line to Britannia. They have 250 men employed and about 50 teams. Grading, rock cutting and completing the culverts is now being done. About 1 1-2 miles have been graded so far. A track will be laid in the ballast pit. The whole line will be ballasted and an engine for hauling the cars which convey the gravel. There is only one grade on the whole line where there will be much cutting.

04/10/1899 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

The first of the quartette of electric coaches to be placed on the suburban line to Britannia is nearly completed at the Ottawa Car Works. Two other coaches are well under way and will be finished in ample time for the opening of the road. The beauty of the cars is only being realized in the finishing touches are being adjusted and the ensemble effects brought into full view. Instead of having a name for each car there will be painted on the side "Britannia-on-the-Bay". This is a catchy name and resembles the hyphenated cognomen of another provincial summer resort "Niagara-on-the-Lake."

Each car will be double seated throughout containing 28 seats and will carry 56 passengers comfortably. The vestibules are unusually large and will accommodate a number more in a crowd.

One of the novel features will be an electric push button at the side of the car opposite each seat. All the passenger will have to do is to push this button when he or she desires the car to stop. These buttons are the same as in C.P.R. sleeping cars.

Interiorly all the cars will be finished in oak and on the outside there will be the regular dark coach finish canvas, painted is also used on the inside. This will make the conveyance perfectly moisture proof. Small electric heaters will also be placed under each seat. The cars will be equipped with a Westinghouse air brake and will also be provided with an air brake whistle for use in the country. A gong will be used in the city. A little motor will keep up the supply of air, and, if the motorman used, say 10 pounds of air in stopping the car, this motor will work up to the maximum pressure. Everything in connection with the equipment and construction of these coaches is the most modern out.

14/10/1899 *Ottawa Citizen* *Ottawa Electric* *Ottawa Car*

In about two months time the four cars being built for the new Ottawa-Britannia electric belt line will be placed in service. One of the cars is the combination baggage and passenger car that formerly met the trains at the depots. This car is 35 feet long and will seat 40 passengers. It will be fitted up in elegant style and will be in reality a new car. The three other cars are 50 feet in length and seat 40 passengers. All the cars will be painted in the Pullman green color, an olive green, and will be fitted with new style vestibules. Some artistic examples of wood carving are to be seen on these cars. Each seat is provided with a push button placing the passengers in communication with the motorman. To better advertise the line each car will bear the name of the new terminus, Britannia on the Bay.

Work is being pushed ahead on six combination baggage and passenger cars for the Quebec city suburban line and repairs are being made to several cars of the Ottawa Electric Railway company. --

The car company will not engage in the construction of automobiles during the coming winter but further orders for cars from outside cities are expected.

21/10/1899 Ottawa Citizen Ottawa Electric Britannia

Messrs. Heney and Smith, who have the contract for constructing the Ottawa Electric Railway company's extension to Britannia, are rushing that contract on to an early completion. The undertaking was commenced on September 8th. Though it was agreed to have it completed by Nov. 7th, that date is likely to be exceeded by a couple of weeks. Even this, however, will involve very speedy construction. By Nov. 10th the four and a half miles of track will be entirely laid and part of the ballasting done; by the end of the same month the whole work will be completed. Besides the mileage under the contract, Messrs. Heney and Smith have had to build one and a quarter miles of track into the gravel pit. Along the route there have been encountered some engineering difficulties. At Holland's farm some 30,000 yards of grading through gravel and boulders had to be performed. At Westboro, near Cole's farm, there was a cutting in rock of between ten and twelve feet, and a filling on an average of fourteen feet. One mile of the track is already laid at the Britannia end and yesterday men started to lay the ties at the Experimental farm. There are under employment 285 men, 45 teams and 42 carts. John Smith is the walking boss, Neil McCorney the time-keeper and Duncan Garley the track layer.

23/10/1899 Ottawa Free Press Ottawa Electric Ottawa Car

The Ottawa Car Works (Limited) has received a large order for cars from a large American syndicate of contractors, of which Mr. J.A. Powers, of Troy, N.Y., is the head man. Mr. Powers is superintending the erection of an electric road at St. Catharines, and has ordered four fine cars of the same design and construction as the Britannia cars. The Ottawa Car Company secured the preference over all American car builders owing to the excellence and up-to-date build of their cars. An extension is now being erected to the car construction shop, which will make the full depth of the shop 122 feet. The company expects to have the order from Mr. Powers filled in a couple of months.

The work of installing the new Buffalo blast system of heating and ventilation is going ahead. Contracts have been awarded for the boilers, while the fan and pipes are being made in Buffalo. The new heating system will be in operation by the middle of November.

23/10/1899 Ottawa Free Press Ottawa Electric Britannia

Description of progress on the Britannia line.

--A half mile track has been laid at Britannia to the gravel pit to obtain ballast. A C.P.R. locomotive, thirty one flat cars, a ballasting plough and a steam shovel have been procured for ballasting as soon as track enough is laid to operate the two trains, which the flat cars will form--

03/11/1899 Ottawa Free Press Ottawa Electric Britannia

-- the steam engine and flat cars are expected today.

The work has been greatly delayed on account of the contractor's inability to secure cars. This has been owing to the car famine which exists on all railways. The track laying for the whole four and a half miles is about half done. The ballasting will now be proceeded with.

--

A line of track has been laid from the Britannia end of the line to the big gravel pit. After the rails are all laid the construction of the electric portion of the road will be undertaken.

18/11/1899 Ottawa Free Press Ottawa Electric Britannia

The work on the Britannia extension is going ahead with a rush. A steam shovel is at work about half a mile southwest of the terminus at Britannia. The shovel loads a flat car every minute and two trains of flat cars are at work. The ballasting has commenced from the end of the western terminus. The track laying and grading is nearly completed for the whole length of the line. Ballasting is now the principal work.

20/11/1899 Ottawa Free Press Ottawa Electric Ottawa Car

The Ottawa Car Works will be even busier than ever this winter. The order for four long cars for the St. Catharines and Niagara river road has been duplicated so that the company will have to manufacture eight cars of the same style as those now being turned out for the Britannia line. The Hamilton and Grimsby road, which recently ordered two cars from the company, sent word this week increasing their order to four. This speaks well for the excellence of the cars turned out in Ottawa.

22/11/1899 Ottawa Journal Ottawa Electric Britannia

The steam shovel in use at Britannia by the Ottawa Electric Railway for taking out ballast for the Britannia extension is the largest of its kind used around here. The other day it was timed and filled ten flat cars with box sides in ten minutes.

Two locomotives and about forty cars are in use ballasting the line and it is expected that by Thursday one of the tracks, the work of laying which has been going on from the other end will be joined, finishing the connection between Ottawa and Britannia. About two hundred men are now employed rushing the work, which will be completed as soon as possible.

23/11/1899 Ottawa Free Press Ottawa Electric Ottawa Car

The Ottawa Street Railway company this week placed an order with the Ottawa Car company for four new open cars which will be run next summer over the Britannia line.-- Another order has also been placed for a long closed car. This will make the rolling stock of the Britannia extension consist of five open and four closed cars.

24/11/1899 Ottawa Journal Ottawa Electric Ottawa Car

Two closed cars for use this winter on the Britannia extension of the Ottawa Electric Railway are nearing completion at the works of the Ottawa Car Co. They will be as fine as any cars used on any electric road. Includes a detailed description.

29/11/1899 Ottawa Journal Ottawa Electric Britannia

The rails for the second track of the OER extension to Britannia have been laid and the ballasting is being rushed as fast as forty cars can be loaded and drawn off by two locomotives. The work of planting the trolley poles is going ahead also and it is anticipated that the line will be in operation before Christmas.

Work on the extension of the electric road to Britannia is going ahead. The laying of the double tracks has all been completed with the exception of 300 or 400 yards. The principal operation now consists of putting up the poles for stringing the wires. The engine and trains of flat cars are kept busy carrying gravel.

19/12/1899 Ottawa Citizen Ottawa Electric Britannia

The first car over the Ottawa Electric railway extension to Britannia was run out yesterday by Mr. J.E. Hutchison [sic] superintendent of the system, and Mr. T. Ahearn. The car was taken directly from the sheds and run to Bakers bush within about a mile and a half of Britannia. The road bed was found in good condition and the part of the road which is yet under construction will be completed in a short time. Also covered in the Ottawa Free Press, same date.

28/12/1899 Ottawa Free Press Ottawa Electric Britannia

Mr. Edward A. Evans, chief engineer and manager of the Quebec city, railway light and power company, is in the city and yesterday afternoon was taken over the greater part of the Britannia line in one of the handsome new cars. At 3 o'clock the car left the post office. Superintendent Hutcheson was at the controls and on board were President Thomas Ahearn, Messrs W.Y. Soper, Roberts Allen, Ed. A. Evans, G.H. Perley, Inspector Ingram and a Free Press representative. The new car, which is 40 feet long, being 10 feet shorter than the three other Britannia closed cars, ran with perfect satisfaction. The trip over the extension was made as far as Bake's Bush - about a mile and a half this side of Britannia. The trolley wire has now been temporarily strung to this point on one of the poles and notwithstanding that alignment of the rails has not been made as yet and the overhead wire is only held in position temporarily, a good time was made. The rails were practically all laid for the double track and the work of ballasting is being proceeded with. The greatest grade, which is only a three percent one, is at Holland's cut. The view from the car along the route is a charming one and a magnificent perspective is also obtained of the Ottawa river. The line of vision is not impeded, the centre pole construction being an important feature. The poles support iron brackets which hold in position the trolley wires. The poles will be painted white, with black butts. The fence posts will also be similarly painted. On the way back an exciting race took place between the trolley car and the locomotive which, on the other track, was pushing four or five flat cars loaded with gravel. The motor kept ahead for a considerable distance and would have won out had not the trolley pole left the overhead wire near the finish. The trip back to town was made in about twenty minutes. The Britannia extension will be in operation at the opening of spring. Contractors Heney and Smith are rushing the work. The road bed, when completed, will be on a par with the rolling stock - the best and most complete possible. The new 1,800 h.p. generator is now being installed in the company's new power house, which will be finished early in the spring. The Britannia cars will all be equipped with electric heaters placed directly under the seats. The electric button, opposite each seat, by which passengers may signal the motorman when they wish to get off, is also an up to date convenience.

29/12/1899 Ottawa Citizen Ottawa Electric Britannia

Heney and Smith are closing down their work on the Britannia line for the winter. A large number of men were laid off last night. Owing to the difficulty of ballasting with frozen gravel it is altogether probable that the work of levelling the track will not be resumed until next spring.

06/01/1900 Ottawa Citizen Ottawa Electric

Two streetcar tracks are being used as far as Sparks street and from there the single track is used as far as Holland avenue.

15/01/1900 Ottawa Journal Ottawa Electric

Ottawa to Britannia in an electric car in 25 minutes. On Saturday, Mr. T. Ahearn, superintendent Hutcheson, Mr. A.A. Dion and a Journal reporter made a trial run over the new suburban line. The track is laid all the way to the village but the trolley wire has only been strung to a point about half a mile this side - just where the tracks cross Richmond Road. It was to that point that the run was made. From the corner of Bank and Sparks Street to the stopping place the trip occupied 21 minutes. Mr. Hutcheson estimated it would take about four minutes to cover the other mile. Therefore the trip from the city to Britannia village could be put down at 25 minutes. When the line is in operation it probably will not take as much as 25 minutes, because in the first place the big cars now being built for the service will be more speedy than the one used last Saturday, and in the second place the track will be ballasted which at present it is not. Probably just at the present time, when shoveling coal into the furnace is the popular recreation, mention of the cool breezes the new line will make possible to sweltering humanity, may not appear quite timely. But the winter is bound to pass, and the hot spells will come again, and then - then the new road will come in for practical discussion. The new line. The new line has been laid in pleasant places. Almost all the way the Ottawa River is in sight. The line leaves the city tracks about 200 yards up the spur that runs into Victoria Park. The line runs close to the south side of Richmond Road all the way except for the mile from where it crosses the road till Britannia is reached. Up to the point where the line crosses the Richmond Road, the run, for a distance of about three miles is through a very picturesque section. There are a number of long grades (and several sharp ones) that give the route a rolling appearance and add zest to the downward runs, for pleasure seeking humanity always likes a spice of danger with its bit of fun. A flying car on a down grade on a hot day is a thing of joy to most people - so long as they feel the chance of accident are only 1 in 1,000. As to Rails and Cars Of danger, however, there is not likely to be the one part in 1,000. The rails are extra heavy, 72 pounds to the yard, and the cars will be big 50 foot fellows. On Saturday though the road was not graded, and the car used was only a 38 footer, and one used for late night service from the CPR station, the motion was delightfully even. When the road is put in proper shape and the regular cars are on, the travelling should be a pleasure. The cars being built for the line, will be provided with what is known as swing motion trucks - trucks which prevent the car from feeling the sideward jars and thus make progress so much more steady. The cars will be built much like regular railroad cars. They will be handsomely upholstered and finished in oak. A feature of the road is the straightness of the trolley poles. There are 350 of them set 80 feet apart. They will be painted white. A chance for capital. In connection with the opening of the new road a suggestion may be offered for idle capital. Now that electric cars are about to connect Britannia with Ottawa with a frequent service, low rates and stops at way points, there will likely be a demand for summer residences all along the route as has been the case around Montreal. Between Hintonburg and Britannia there are many lovely spots overlooking the Ottawa River. The land is high and dry and at many points there are clumps of woods. Beyond Westboro (Skeads Mills) there are many desirable spots. Some time ago, a director of the electric railway, at a board meeting suggested that the company should invest in land and erect a number of cottages for renting. The idea was considered an excellent one, but it was decided to leave such matters to private capital and enterprise. Capital and enterprise therefore have the floor. It is lot likely the hint will go astray. Special and local It is the intention of the company to run two sorts of cars "through" and "local". The first as the name implies will run to Britannia without stops, The other will be for the use of the suburbanites.

19/01/1900 Ottawa Free Press Ottawa Electric Ottawa Car

The third of the new closed cars, for the Britannia extension, has just been turned out by the Ottawa Car Works, and are to be delivered to the Street Ry. Company. Detailed description.

22/01/1900 Ottawa Citizen Ottawa Electric Britannia

Britannia. Heney and Smith have been awarded the contract for building the pier for the Ottawa Electric railway here. They expect to commence next month.

27/01/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

At 2 o'clock yesterday the first electric car reached the village at the C.P.R. station. The men expect to have the trolley wire and cross arms all put up today. Though this is one of the worse days of the season the men are working on the poles showing how anxious the company are to get the line in running order. There will be a car daily each way now for the working men. The men are also stringing a wire for the lights. Also covered in the Ottawa Free Press, January 29, 1900. - arriving at Britannia station the party was photographed and immediately returned.

30/01/1900 *Ottawa Citizen* *Ottawa Electric* *Ottawa Car*

The Ottawa Car Company has commenced the construction of four large open cars for use on the Britannia extension this summer. Each of the cars will be fifty feet in length and will be of a style and will be entirely different from any ever used in Canada. They will each be fifty feet long with an accommodation for sixty passengers and the seats will be arranged on both sides with an aisle in the middle, just the same as an ordinary railway coach. The sides will be open with a heavy wire net covering the lower portion of both sides of the car. The new cars will be ready for use early in the summer.

07/02/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

Officials of the electric railway had another trip over the Britannia extension yesterday afternoon and inspected the work. The road, though new, is in good condition and the cars run very smoothly. The contractors have considerable work to do yet before their operations are completed.

12/02/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

The Ottawa Electric railway company this morning commenced the construction of the big 800 foot pier into the bay at Britannia. A gang of about 50 men and 20 teams were put to work excavating for the foundation and commence the construction. The work will occupy between five and six weeks.

23/02/1900 *Ottawa Journal* *Ottawa Electric* *Britannia*

GOING AHEAD FAST.

The Work on the Big; Pier at Britannia Bay,

The Ottawa Electric Railway Company is making fast progress with the construction of its new stone pier at Britannia Bay. The ice has been cut for 1,000 feet, the full distance which the pier will extend, and about twenty-five teams are busy drawing stone from the works of the Metropolitan Electric Company's canal. The water was frozen to the bottom nearly the entire distance which the pier runs, so that when the ice was cut out, the work of filling in the stone on the bottom was comparatively easy.

The top of the pier will be covered with a heavy coating of cement and the sides will be rip-rapped. The T which will be constructed across the end of the pier will be a wooden one constructed on the ordinary crib work.

19/03/1900 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

The Ottawa Car Works last week shipped two handsome cars to the Niagara, St. Catharine's and Toronto railway. The company has two others nearly completed and will ship them in a few days.

02/04/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

Through the kindness of the officials of the Ottawa Electric Railway company, a party from the press gallery of the house of commons, along with representatives of the city papers, were afforded an opportunity on Saturday afternoon of going over the extension to Britannia in one of the handsome cars which the road has had constructed especially for that traffic. Mr. T. Ahearn, president, Mr. J.D. Fraser, secretary, and Capt. J.E. Hutcheson, superintendent of the road accompanied the party and were most courteous in their treatment of the scribes. About twenty-five took the trip, the run from Elgin street to Britannia occupying but 25 minutes.

About one month's work remains to be done before the road is finally completed, but the cars run very smoothly, with the absence of jolting, notwithstanding that this line is as yet unfinished.

At Britannia there is every evidence of preparation for the very large traffic which the company expects this summer. Extending out into the Bay for a distance of 1,020 feet is an immense pier, constructed of stone, at a cost of \$9,000, and which will be used for promenade purposes. In the pier there are three openings to permit of the passing of boats, and at the end a breakwater will afford protection from the ice when it breaks up in the spring. From the end of the walk to the shore the water is only four feet deep and will thus furnish excellent facilities for bathing. The bottom is sandy and the beach will doubtless be the attractive feature of the new summer resort. The company also proposed to put up a large pavilion facing the bay, and a building for ladies and children. Arrangements are also being made for excellent sanitary conditions.

On the return trip, the distance from Britannia to Holland avenue, Hintonburg, was covered in the short space of eight minutes. The line will be opened early in May and the work of completing the construction will be resumed about the middle of this month. A ten cent fare from all points in the city will doubtless ensure popular patronage for the new line this summer. The courtesy of the officials was most heartily appreciated by the newspaper men.

Also covered in the Ottawa Free Press, same date.

05/04/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

One of the new Britannia cars that have been built by the street railway company was given a trial run up Sparks street this morning to test the efficiency of the Westinghouse air brakes with which it is equipped. The brakes worked in a satisfactory manner. The car was switched on the track beside the post office and in coming out to return along Sparks street the front wheels took right track but the rear wheels took another track. The car was backed up and the second time the rear wheels followed the front ones alright.

11/04/1900 *Ottawa Free Press* *Ottawa Electric*

The railway company will shortly erect a new car shed. The present sheds, which really consist of three departments or sheds, are inadequate to provide the necessary accommodation for the increased rolling stock. The new shed will be about one third the size of the present one. The question of site is now under consideration.

17/04/1900 *Ottawa Free Press* *Ottawa Electric* *Britannia*

Contractors Heney & Smith have a large number of men at work on the Britannia extension. The steam shovel is now at work in the gravel pit west of Britannia. An engine and long train of flat cars takes the gravel down to where it is needed. There is considerable ballasting to do on the road.

19/04/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

Heney and Smith, the contractors, have a large gang of men at work on the electric line to Britannia. The workmen are engaged in ballasting and leveling the track.

20/04/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

The new pavilion which the Ottawa Street railway company is erecting at Britannia is well advanced and will be completed by the time the extension is ready to be operated. It is situated adjacent to the promenade pier which extends out into the bay for over 1,000 feet.

26/04/1900 *Ottawa Journal* *Ottawa Electric* *Chaudiere*

Account of the great fire - an electric car which had been stopped opposite Booth's will probably be destroyed.

01/05/1900 *Ottawa Free Press* *Ottawa Electric*

The Ottawa Electric street railway set a large number of men to work this morning restoring their track, poles and wires from Mackay's mill to the terminus of the line in Hull. A car will be taken across the river today on a boat and ?? other side of the burnt bridges to the Hull terminus.

Passengers using the green line will be given transfers. On arrival at the ? bridge they will then only have to go about 100 yards to the bridge at the bulk head which is 34 feet wide (this part is mixed up) They can then take the car on the other side of the bridge, the transfer being good to ride into Hull.

More details about temporary arrangements as a result of the fire.

24/05/1900 *Ottawa Free Press* *Ottawa Electric* *Britannia*

Britannia line will open tomorrow.

25/05/1900 *Ottawa Journal* *Ottawa Electric* *Britannia*

Opening of Britannia line. Between 12,000 and 15,000 were carried over the new extension. Park not quite completed. Fine overhead foot bridge.

25/05/1900 *Ottawa Citizen* *Ottawa Electric* *Chaudiere*

By June 15 it is expected communication by electric cars between Ottawa and Hull will be re-established. The Dominion Bridge Company has a gang of men at work repairing and replacing the trestle work under the O.E. railway on the Quebec side.--

The footpaths will be separated from the roadway and tracks by a railway.--

28/05/1900 *Ottawa Journal* *Ottawa Electric* *Chaudiere*

The passengers on the Pontiac train as well as the Aylmerites are sorely inconvenienced by being obliged to walk through Mr. Booth's lumber yard to connect with the Ottawa cars. The Hull Electric Company has offered to lend a car for connection between Eddy's Corners and McKay's Mill. It is claimed here that the track can be made perfectly safe in three days so that the great inconvenience to the public is considered entirely unnecessary

Saturday June 9. The people of Aylmer and the passengers by the PPJ Railway greatly appreciate the convenience arising from the repair of the OER from Eddy's Corner to McKay's Mills and the resumption of traffic on that piece of road.

04/06/1900 *Ottawa Citizen* *Ottawa Electric* *Chaudiere*

A foot bridge has been completed across the lumber slides on the site of the Chaudiere bridge destroyed in the fire. This establishes direct communication with Hull. The O.E. railway company has a gang of men at work repairing its tracks on the Quebec side and when this work is completed, a car will be placed on the line between the Hull terminus and the McKay mill. This car will connect with the regular line on the Ontario side, the connecting link being the footbridge just completed which is 500 feet long.

05/06/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

The pier is not quite finished yet but will be likely completed before the end of the week

The ground near the pavilion is being leveled and when this has been done it will be sodded. Gravel is being obtained from the C.P.R. pit

The high bridge over the C.P.R. track is to be lighted up.

06/06/1900 *Ottawa Citizen* *Ottawa Electric* *Chaudiere*

Ever since the fire the electric street railway company has been busy repairing the bridge from what was McKay's offices to Hull. A car has been taken over and will run between these points. A temporary walk is being built over the slides so that passengers for Hull will have but a very short walk to transfer from one car to another. The work will be completed today.

09/06/1900 *Ottawa Free Press* *Ottawa Electric* *Chaudiere*

An electric car was started running between the Chaudiere bridge and Hull on Thursday much to the convenience of Hull passengers. The electric railway act is much appreciated.

15/06/1900 *Ottawa Free Press* *Ottawa Electric*

Incident with car No. 202.

23/06/1900 *Ottawa Free Press* *Ottawa Electric*

The Ottawa Electric railway is running its second trolley wire from the Chaudiere bridge to Hull. It is expected that a second car will be put on between the bridge and Hull shortly.

25/06/1900 *Ottawa Free Press* *Ottawa Electric*

For some time past the directors of the Ottawa Electric Railway Company have felt the need of additional car shed room owing to the increases in their rolling stock. The present sheds are altogether inadequate. The question of a suitable site has been under consideration for some time.. It was at first thought that the piece of property that the company owns just at the entrance to Rockcliffe Park would be a desirable location, but the directors have now changed their minds and will build the new sheds on the Britannia line, not far from Holland avenue. Work on the new structure will begin in the fall.

26/06/1900 *Ottawa Citizen* *Ottawa Electric* *Britannia*

A new switch is being placed in position near the platform. It is intended to serve for the sidetracking of a sufficient number of cars to convey the people back to Ottawa after a band concert.

30/06/1900 *Ottawa Free Press* *Ottawa Electric* *Chaudiere*

The Electric Railway Company have erected a temporary waiting room and shelter at the end of the bridge for the convenience of Hull passengers. Two cars are now running from the bridge to Hull and the long wait previously experienced by passengers is avoided.

10/07/1900 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

The already large rolling stock of the Ottawa Electric Railway Company is to be increased by eight new cars. The order for them has been placed with the Ottawa Car Works and work commenced. The new cars will be closed ones, each thirty feet long and fitted up in the most up to date manner. They will be ready for use this fall.

The Ottawa car Works has also received an order for four more fifteen bench open cars for the Niagara, St. Catharines and Toronto Railway.

During the past week the company shipped three closed cars, each fifty feet in length, to Quebec City.

Four cars were shipped to British Columbia for use on the Vancouver railway system. One handsome combination mail and passenger car was sent to Berlin and Waterloo.

16/07/1900 *Ottawa Free Press* *Ottawa Electric*

Incident with car No. 64.

23/07/1900 *Ottawa Journal* *Ottawa Electric* *Rockcliffe Rifle Range*

A large gang of men started today to build the two miles of double track for the electric railway that will be necessary to connect the terminus of the present railway at Rockcliffe Park with the Rockcliffe rifle range.

It is necessary that this road be completed by the last of August in order that it may be available for the Dominion Rifle Association matches which start on August 28. So an extra large gang has been put on. Under the superintendence of Mr. J.E. Hutcheson the work will be rushed through with the greatest of speed. The road starts from the Rockcliffe pavilion and winds its way along the cliff on the outside of the forty-four foot right of way around the park coach road. Then it finds its way down the cliff by means of a trestle and across the Bronson and Keefer lands. Then another trestle will be necessary to carry the road across the outlet of McKay's lake. Then the railway will be run along what is known as the sand ridge road and up to the Aberdeen pavilion and the range.

A large loop will be put in on the range so the car will be able to make the turn without turn of trolley.

The road will be a very pretty and picturesque one and will probably present the greatest engineering difficulties of any line of street railway yet built in Ottawa.

25/07/1900 *Ottawa Free Press* *Ottawa Electric*

Incident with car No. 228.

27/07/1900 *Ottawa Free Press* *Ottawa Electric*

Some of the electric cars which are used on the Somerset street line are too high to pass under the Parry Sound bridge on Holland avenue. Several of the signs showing the routes have been torn off the cars.

Work has commenced this morning on the construction of the new barns of the Ottawa Electric railway on Main street, Hull. The contractors are Mr. Crane and Messrs. Lowe. The plans of the building were drafted by Mr. James Mather and show a most substantial structure. It is expected to be finished by the 1st of December.

OER plans for rebuilding power plant. Long article.

01/08/1900 *Ottawa Citizen* *Ottawa Electric* *Rockcliffe*

The electric railway extension to the Rockcliffe range is being proceeded with rapidly. More.

04/08/1900 *Ottawa Journal* *Ottawa Electric* *Rockcliffe Rifle Range*

Today, probably the first consignment of twenty-five carloads of rails will arrive in the Capital from Moncton, NB. They are the new rails for the Rockcliffe Rifle Range extension. They are sixty two pound rails.

The heavy 72 pound rails for Somerset Street which is to be paved, have to be ordered from the United States. When they are laid on Somerset Street between Bank and Bay, the old rails will be taken up and re-laid to build the Bell Street extension.

The grading of the Rifle Range line was finished last night. Many of the ties are laid and some of the poles are up. There are one hundred men working and Mr. J.E. Hutcheson is hustling matters. The quick work done almost establishes a record in rail laying.

Another door in the Albert Street car shed is being widened and heightened to permit the entrance of the big Britannia cars.

The auditorium at the West End Park will be turned in a few days into a commodious car shed. In this winter and summer cars will be stored. The company badly needed an auxiliary shed for their ever growing rolling stock.

16/08/1900 *Ottawa Free Press* *Ottawa Electric*

There are now in daily use on the various lines of the Ottawa street railway forty-four cars. This is the largest number in the history of that road. Last year there were thirty-eight.

17/08/1900 *Ottawa Citizen* *Ottawa Electric* *Rockcliffe*

The Ottawa Electric railway will tomorrow inaugurate its service to the Rockcliffe range, the extension having been completed sufficiently to enable the cars to be run. --

28/08/1900 *Ottawa Journal* *Ottawa Electric* *Rockcliffe Rifle Range*

Article on the opening day of the Dominion Rifle Association meeting.

The cars are a great convenience and have done just what was needed to make the range accessible and highly popular.

12/10/1900 *Ottawa Free Press* *Ottawa Electric* *Britannia*

The Ottawa Electric company has completed their new station at Britannia and have also built two platforms provided with seats at Holland avenue and Barrie. The station at Britannia is heated with an electric heater and is very comfortable.

15/11/1900 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

The Belleville Traction company has purchased two cars from the Ottawa Car company which will be shipped in a few days. The Car company has also received ordered for three 40 foot long closed cars for the Victoria, B.C. railway and two thirty foot closed cars for Sarnia. Last week the company shipped the last of four line cars for the Niagara, St. Catharines and Toronto railway. The eight new cars ordered by the Ottawa Electric Railway from the car company are nearly all built. They will be equipped electrically by the Street Railway company and put on different lines in the city in a few days. Each car is thirty feet long and handsomely upholstered.

27/11/1900 *Ottawa Free Press* *Ottawa Electric* *Rockcliffe*

Owing to the increase in rolling stock the Street Railway company has found it necessary to increase its storing accommodation for cars. A new shed is being erected on their property at the entrance to Rockcliffe Park adjoining Princess avenue. The new shed will be brick, 210 feet long and 50 feet wide. The stone work is now completed. In the spring the company will build an addition to its car sheds on Albert street.

27/11/1900 *Ottawa Free Press* *Ottawa Electric* *Ottawa Car*

Three of the eight new cars ordered from the Ottawa car works are now in service, one on Albert street and two on the Somerset street line. The new cars are 34 feet long and provided with the Brill truck which is the easiest riding truck known, very little oscillation being noticeable. The remaining new cars will be in use shortly. The company's regular service this winter numbers forty-four cars as compared with thirty-seven last year.

Mr. Greene, general manager of the Hamilton Street Railway company,; Mr. Moody, a director of the Cataract Power company, and Promoter Patterson of Hamilton, were in the city yesterday negotiating for new cars for the Hamilton road from the Ottawa car shops. The visitors were taken over the Britannia extension by Supt. J.E. Hutcheson and unanimously pronounced it the finest suburban line they had seen.

07/12/1900 *Ottawa Citizen* *Ottawa Electric*

The street railway has put a combined passenger and mail car on the Bank street route. In it the mails will be conveyed from the branch to the central office.

24/12/1900 *Ottawa Journal* *Ottawa Electric* *Chaudiere*

Electric cars will cross the bridges over the slides at the Chaudiere today for the first time since the big fire on April 26th. Ordinary vehicular traffic will not be resumed for some time yet.

28/12/1900 *Ottawa Free Press* *Ottawa Electric* *Rockcliffe*

Work on the new car sheds of the Ottawa Electric company at the entrance to Rockcliffe Park has been interfered with by the weather. On fine days the workmen manage to make good progress and will soon have the structure completed.

04/01/1901 *Ottawa Citizen* *Ottawa Electric*

There was a partial tie up of the Rideau Street line of the street railway last night caused by a car jumping the track. As car No. 64 was speeding northwards down the Nicholas Street hill, the motorman seemed to lose control and on reaching the curve was going too fast to turn. The car went straight ahead, jumping the track, stopping within two feet of the sidewalk in front of Bourque's store. The auxiliary car and gang were summoned and had a big contract getting the car back on the track.

30/04/1901 *Ottawa Journal* *Ottawa Electric* *Hintonburg*

The Electric Railway Company are at work in the village (Hintonburg) welding the rails. They intend going as far as Holland avenue with the work.

12/09/1901 *Ottawa Journal* *Ottawa Electric*

The Royal trolley "The Duchess of Cornwall and York" was given a trial run through the city and out to Britannia-on-the-Bay yesterday. The luxurious electric car "The Duchess of Cornwall and York" has been provided by the Ottawa Electric Railway expressly for the use of their Royal Highnesses, the Duke and Duchess of York. The car is 50 feet in length, straight sides and vestibuled at both ends, full monitor roof of the Pullman pattern. The color is also Pullman standard with the British coat-of-arms conspicuous on both front and rear. The interior of the car is furnished in antique polished oak, the ceiling being covered with three ply birds eye maple veneer, and decorated. There are four large British plate mirrors set in frames, two at either end of the car. All trimmings, such as hat racks, books etc. are in solid bronze. The window curtains are of the latest design, and are very ornamental. The car is brilliantly illuminated by five clusters of incandescent electric lamps, twenty one in all. The floor is covered with a rich Royal Blue carpet. The car contains fourteen large easy chairs beautifully upholstered in olive green plush. The trucks are double and of the swing motion pattern with graduated springs. The electrical equipment is very complete and consists of four Westinghouse 40(?) h.p. motors. The car is also fitted with the Westinghouse automatic air brake, and is capable of attaining a speed of fifty miles an hour. This is the first electric tram car ever provided exclusively for the use of Royalty. The car was manufactured by the Ottawa Car Manufacturing Company.

New Street Car Signals.

Young Men Have New Way of Stopping Trains.

The old lady who waves her hand at an approaching car when it is a block away, the young woman who stands on the sidewalk holding her skirts and signalling the conductor with her parasol after the car has moved on, the man who runs for the car, the small boy who whistles when he does not want a tram, must all take a back seat when the young man with a bugle comes along. That's the latest street car signal. Last night a conductor on a car near the Protestant Hospital was about to give the signal to "go ahead", when out of the gloom came the clear tones of a bugle. Several times it was blown and the conductor waited. A minute elapsed and two young men with bugles came running out of the darkness and boarded the car. The conductor gave the signal to "go ahead," and the newest method of signalling Ottawa street cars had been successfully inaugurated. But the most dangerous habit is said to be the habit some women passengers have when riding on the open cars in summer. They poke the motormen in the back with the sharp end of their parasols.

Streetcar overturned.

And six people were seriously injured.

Nasty accident on the Hintonburg line at Preston Street yesterday afternoon.

Probably the most peculiar accident that has ever happened on the Ottawa Electric Railway since its establishment occurred last night about five o'clock when a car going down Somerset Street hill ran off the track near Preston Street and turned completely over on its side, smashing the glass and side of the car to splinters, and severely injuring the occupants. The passengers, four in number, were Mrs. and Miss. Wilson of Kemptville, Mr. Fred Robson of Britannia and Mr. Wm. Hanright of the Department of Agriculture who was returning to his home in Hintonburg. The car was in charge of Conductor A. Gemmell and Motorman R. McCrea and was running at a high rate of speed. When about half way down the hill between Rochester and Preston Streets, it left the track and continued on its course for about 25 yards when it turned over on one side with a crash. The motorman was sent flying through the window, and the passengers sent flying about inside in a manner that they do not wish to experience again. Mrs. Wilson was pinned down in such a way that planks had to be secured and the car raised in order to free her. She suffered a severe nervous shock and a bad shaking up. Her daughter was also badly bruised and received a flesh wound on the arm. Mr. Robson was thrown about so badly that he had one rib broken and his side injured. Mr. W. Hanright was badly bruised on the back and hip, but was able to go home on the next car. Motorman Rod McRea was badly cut with the broken glass and received a general shaking up.

Various theories are advanced for the cause of the run off. A new sewer grating has been placed between the tracks about half way down the hill and from the appearance of this grate it is thought that the wheel must have struck it as the grate bears a deep bint. This seems the most acceptable theory as to the cause of the car leaving the track.

More.

Tracks are in bad shape.

They say street railway is using many mile of 40 pound rails instead of 56 pound as required by by law.

An inspection of the condition of the street railway tracks has been made by the City Engineer and the special committee composed of Ald. Champagne and Cunningham. A report has been prepared by city engineer Kerr which shows the road to be in bad shape.

Out of 14 miles of roadway, the rails on three miles are 40 pounds instead of 56 pounds. Except on Somerset Street and the permanent paved roadways the joints of the rails are in a bad state of disrepair.

Throughout the entire track the surface is irregular and in many places there are undesirable depressions in the rails. The rails are in many instances several inches higher than the road, for which the blame is partly due to the city and partly to the company.

The report contains no recommendations and it is probable the committee will now delve into the by-laws and charters to see what power the city has to bring the company to time.

10/07/1902 *Ottawa Journal**Ottawa Electric*

More power for street railway.

Storage battery of 1000 h.p. purchased

The Ottawa Street Railway company are making preparations for the installation of a large storage battery adjacent to their present power house at the Chaudiere.

A new dam will be constructed to replace the present wooden one in front of the proposed building. The building will be brick 70 feet by 40 feet and the battery will have a capacity of 1000 horse power. Its office will be to regulate the current so as to make unnecessary the automatic regulator now in use with the water wheel. The storage battery will take charge of what is called the "peak" of the electric load and the stored up energy can be used in cases of exceptional demand for increased current.

The battery has been purchased from the Electric Storage Battery Co. of Philadelphia and cost \$75,000. It is expected to have it in operation in December.

09/02/1903 *Ottawa Citizen**Ottawa Electric**Albert Street*

Will rebuild.

Electric company will immediately repair damages by last night's mishap.

The Ottawa Electric Railway company will immediately commence the rebuilding of the part of its shed which collapsed last night. Examination of the structure was made this morning and the breakdown was evidently caused by the supports not being of sufficient strength to hold up the weight of the structure including the snow on the roof. In the collapse of the building two of the big Britannia cars were badly damaged along with several others. The cars were principally open ones and the roofs were badly smashed.

There is a further report with a drawing.

With an awful crash which could be heard for blocks away the Queen Street portion of No. 3 car shed of the Ottawa Electric Railway collapsed at ten o'clock last night. Fortunately there was no loss of life nor was anyone injured but ten cars were smashed. Queen Street was strewn with brick and stone debris while heavy financial loss was entailed on the company. Although the cause of the accident is not definitely known it appears to have been due to a defect in construction of the wall. The car sheds of the company front on Albert Street between Kent and Lyon and run through to Queen. It was the north end of the Queen Street end of the easterly shed that went down last night.

Men employed by the company were at work in no. 2 shed when there was a sudden trembling of the adjoining structure. An instant later and down went the Queen Street wall covering the sidewalk and part of the roadway with lime and bricks. Simultaneously the north end of the roof came down right on top of a dozen electric cars which were in storage. The cars were almost entirely destroyed or badly damaged. The tremendous force of the air tore from their hinges the big doors on the south side and hurried them out to Albert Street.

For a minute or so no one knew what had happened, Residents of the locality attracted by the noise and thunderous report which sounded like that of an explosion, got a sudden fright. But they lost no time in investigating and soon the cause of the trouble was ascertained.

Superintendent Hutcheson, secretary Fraser and other officials of the company were on the scene at once and as soon as investigation showed that no more of the building was likely to collapse a staff of men was put to work picking up bricks and clearing the debris from the sidewalk. It was indeed a fortunate circumstance that no persons happened to be passing at the time otherwise they would have been crushed under the avalanche of lime and bricks. A careful search was made when the pile was cleared away but no one was found to have been a victim of the disaster.

The car shed which collapsed had a height of about 25 feet and width of some fifty feet. It was built some fine years ago, and the construction, which was of brick with steel girders, was supposed to be solid and substantial. It was at first suggested that the accident was caused by the weight of snow on the roof, but that theory is not entertained. The roof was cleared after the last storm and not a great deal accumulated on it yesterday.

Superintendent Hutcheson stated last night that the accident, as far as he could find out, was due to some defect in the construction of the wall, but just what caused it to heave out at this season of the year remains to be determined. The wall had never given any evidence of being weak or in any way faulty.

The railway will suffer considerable financial loss as a result of the accident. The cars destroyed or damaged - numbering eight or ten - were each valued at about \$1,500, while the loss on the building is placed at about \$2,000 making the total around \$10,000 or \$12,000. The buildings are insured against fire but not against such an unusual accident as that last night. Most of the cars which were put out of business were open ones used in summer so there will be no interference with the service.

The company will institute a thorough investigation in the matter and will endeavor to ascertain the cause of the collapse. There are two large sheds adjoining but they stand intact. Notwithstanding the hour at which the tumble occurred many spectators were attracted to the scene last night.

12/06/1903 *Ottawa Journal**Ottawa Electric*

William Donald Munro.

During the past week the Ottawa Electric Railway has appointed what is known as a chief conductor.

The office is a new creation and has been filled by Conductor William Donald Munro who has been with the company since they ran their first car eleven years ago and for one year before that he was employed with the old horse car line.

Chief Conductor Munro has thus served twelve consecutive years in the employ of the road and has the proud reputation of never having been suspended for a single hour during that time. He is always polite yet firm, always reliable and attentive to his duties. In uniform he is neat and as clean as a new pin, an all round first class conductor.

Mr. Munro was born in Quebec 35 years ago and came to Ottawa when 13 years old. He obtained his education in the public schools of Ottawa and took early to work to earn his own living. He was only 23 years of age when he took his first car.

Mr. Munro's parents were from Inverness, Scotland and came to Canada among the early settlers. They removed from Quebec to Morrisburg, and subsequently to Ottawa where they resided and raised their family. Both of Conductor Munro's parents died some time ago.

Conductor Munro lives at 135 Creighton Street, is married and has four little boys. He had the distinguished honour of being selected as conductor on the car which carried the Duke and Duchess of Cornwall and York to the slides and again from Rockcliffe to Government House after the luncheon at the shanty.

His promotion has brought him many congratulations from friends and fellow employees.

There is a drawing of conductor Munro in a uniform cap with the badge number 40.

An addition to car sheds

OER to put up \$10,000 extension.

Forty car loads of rails expected this week. Relaying rails starts next week.

The Ottawa Electric Railway will erect a large addition to the car sheds on Albert street.

The extension will be two storeys high and will be built on the east side of the structure extending from Albert through to Queen Street. The cost will be \$10,000. The addition will be used as a paint shop and to store cars, the present shed room being crowded owing to the increase in the rolling stock. The structure will be built this summer.

Heavy Rails Coming.

Forty car loads of heavy rails are expected this week from Ohio. This means 1,000 tons of 80 pound seven inch rail. They will be laid on Elgin, Rideau, Albert and possibly Dalhousie streets if the latter are paved this season. The work of placing heavy rails on Rideau Street will be begun the latter end of this week. The tracks on the north side will be torn up first and all cars going round the loop will proceed down Rideau on the south tracks and around by Charlotte street and Laurier avenue west.

Ottawa Electric Company Lose Again in Miss Dodd's Action

Toronto, Feb. 6. The court of appeal has dismissed with costs an appeal by the Ottawa Electric Railway company in the action of Dodd vs. the Ottawa Electric Railway. The company appealed from judgment of the divisional court, dated 27th June, 1905, dismissing with costs an appeal by the defendants from judgment of Justice Teetzel upon findings of a jury at the Ottawa spring assizes in favor of plaintiff for \$1,200 and costs in a negligence action. The plaintiff, a music teacher in Ottawa, while stepping upon the defendant's car at corner of Lyon street, was thrown to the ground owing, as alleged, to the car starting prematurely. The jury found in plaintiff's favor.

Seized four electric cars.

Miss Dodd springs surprise on company

Sheriff Sweetland has seized three streetcars and a repair car belonging to the Ottawa Electric Railway Co. to satisfy the judgement of the High Court sustained by both the Divisional Court and the Court of Appeal, for \$1,200 in favour of Miss. Theresa Dodd of this city.

It is not supposed for a moment that the defendant company is unable to liquidate the judgement, but the action was taken presumably, to forestall the intention of the company to carry the matter to the Supreme Court of Canada.

The cars are seized and held for sale at 11 a.m. Saturday Feb. 24 at the Railway Company's sheds at Albert Street and notice to that effect is posted in the sheriff's office at the Court House. The cars are No. 45, 24 and 26 and repair car No. 10.

In this case, Miss Dodd, music teacher, was injured by a fall from a streetcar. She claimed damages and won her case on two appeals. The Electric Company declared its intention of appealing to the Supreme Court, but Miss Dodd, a lawyer, has evidently determined not to wait.

20/02/1906 *Ottawa Citizen**Ottawa Electric*

SEIZED THE CARS

Miss Dodd's Counsel Issue Writ Against Railway.

Four cars of the Ottawa Electric Railway company are advertised to be sold by the sheriff on Saturday, February 24th. They were seized under a writ of execution.

Some time ago Miss Theresa Dodd, music teacher, was given a verdict by a jury against the company for damages sustained on a street car. Appeals were taken to the divisional court and the court of appeals but the judgment was sustained. Then counsel for Miss Dodd had Sheriff Sweetland seized the four cars on a writ of execution. The cars seized were number 24, 26 and 46 and repair car number 10. The sheriff took a bond instead of leaving a man in charge. Since the seizure was made, Miss Dodd's counsel has been notified that the company intends to carry an appeal to the supreme court. There is no likelihood of the cars being sold, as some arrangement will doubtless be made.

22/02/1906 *Ottawa Journal**Ottawa Electric*

Stay in Execution Ordered in the Case of Miss Dodd against the Ottawa Electric Railway.

Sale postponed indefinitely and the way is now open for the company to appeal the judgement to the Supreme Court.

22/02/1906 *Ottawa Journal**Ottawa Electric*

SALE OF THE ELECTRIC CARS

Stay in Execution Ordered in Case of Miss Dodd Against Ottawa Electric Railway

A stay in execution has been ordered in connection with the proposed sale on Saturday next of four electric cars of the Ottawa Electric Railway Company which were recently seized to satisfy the judgment of the High Court, sustained by the Divisional Court and the Court of Appeal, for \$1,200 in favor of Miss Theresa Dodd, of Ottawa.

The seizure was made not because the Ottawa Electric Railway Company was unable to liquidate the judgment, but presumably to forestall the intention of the company to carry out the appeal of the Supreme Court of Canada.

The stay of execution was ordered yesterday by the Court of Appeal, Toronto. This means that the sale of the cars will be postponed indefinitely, and that the way is now open for the Railway Company to carry the appeal against the \$1,200 judgment to the Supreme Court. Action has already been taken in this direction. This is the case in which Miss Dodd claimed damages for injuries resulting from a fall from a street car.

19/04/1906 *Ottawa Journal**Ottawa Electric*

Visit of Prince Arthur to Ottawa.

Party left Government House at 10 o'clock. They travelled by special street car 99 in personal charge of Mr. Thos. Ahearn and Supt. Hutchinson and run by motorman D. Duras and H. Hyndman.

The car ran out to Britannia where the visitors were delighted with the splendid improvements that the company have made in that popular resort.

Returning to Westboro they embarked at the old Skead's mill in two 35 ft. lumbermen's boats. Shoots the chutes.

On reaching the foot of the locks the party walked to the Post Office where the special car was waiting to take them back to Rideau Hall.

The prince was much impressed with the car arrangements and when he saw the car waiting at the Post Office he exclaims "Wonderful, really you have made splendid arrangements for us".

...

The special car provided for His Royal Highness and suite was decorated with flags and in front and rear with the Royal Coat of Arms, carved and gilded giving the car a regal appearance which was greatly admired.

...

When Prince Arthur leaves Ottawa next Friday morning at 11 o'clock for Coteau where he will take the main line of the G.T.R. for Niagara, he will be drawn over the Ottawa division by one of the most powerful engines of the company. The iron monster, which now lies breathing in the roundhouse, is being thoroughly overhauled and dressed up for the state occasion, and when it is trotted out by Engineer Ferguson and Fireman Prindiville of Ottawa and hitched to the Royal train it will look as bright as a dollar. The engine is No. 1,332 weighs 260,000 lbs and is capable of developing a speed of 80 miles an hour.

Supreme Court Throws Out Appeal in O.E.R Co. vs. Dodd

Ottawa Electric Railway company v. Dodd was heard in the supreme court yesterday. The respondent sued to recover damages for personal injuries incurred in falling when getting on a car, owing to its being started before she was aboard and the consequent jerk causing her to fall. The jury found that the company was negligent in starting the car before the respondent was on the platform of the vestibule and also that it had started the car at too fast a rate. The divisional court and court of appeal sustained a verdict of \$1,200 against the company. Counsel for the appellants argued that as the only evidence was that of the plaintiff, who did not prove that the starting of the car caused her to fall, the jury had no right to infer that it did. The court dismissed the appeal without hearing counsel for the respondent.

Gilmour Hotel wall falls into street.

Collapses just as street car on Bank Street is passing the ruins. The car is demolished and five persons are seriously and two probably fatally hurt. Conductor and Motorman both among the injured.

The skeleton walls of the burned Gilmour Hotel fell this morning smashing like an egg shell electric car 45 of the Gladstone Avenue line.

The motorman and conductor and three passengers were more or less seriously injured. One passenger is likely to die.

The injured are:

WILLIAM CAMPBELL contractor, Hintonburg, skull probably fractured and badly injured about the body - will likely die.

MRS NELLIE THOMPSON widow, 57 Monroe Street, injured about the head and body.

CONDUCTOR TOM MCCABE badly cut about the head and hands.

MOTORMAN HARRY LYNCH knee cap fractured and cut about the head.

CITY FIREMAN POTVIN probably fatally injured internally. Not expected to live.

IN A GALE

The walls went down just about quarter past seven, while the westerly gale that prevailed at that hour was at its worse.

The electric car was going past the ruins southerly towards Gladstone Avenue when the crash came. The wind caught a corner of the ruins which ran around into Gilmour Street and tore it away like paper. The fall of the angular corner piece carried with it the front walls on Bank Street. In less time than it takes to tell, practically the whole of the front wall was down on the street and under the mass of debris lay the wreck of an electric car with five injured inside.

It was a pitiable sight that scene after the wall fell. It did not seem as if any one could come alive out of the wreck, so badly was the car smashed. A telegraph pole that had stood near the corner lay across the wreck of the car, completing the appearance of disaster.

But in a very few minutes a crowd had gathered and willing hands were at work getting the victims out of the debris. The motorman and conductor were carried into Dr. Beaman's office on Gilmour Street, near Bank Street, the others were carried into Watson's Drug Store at the corner of Gilmour and Bank streets where they were carefully tended until the hospital ambulances arrived.

MIGHT HAVE BEEN WORSE

While the results were bad enough in all truth they might have been worse. The accident happened to a car that was going up Gladstone Avenue. At the hour going up it was naturally not full. Fireman Potvin from no 8 station who lives on Bell Street was on his way home to breakfast; Mrs Thomas was on her way home from market. Contractor Campbell was going that way on business. Had the walls fallen on a car going toward the city many more people would have been injured as all city going cars from Mount Sherwood from 7 o'clock to 9 o'clock are crowded.

MOTORMAN'S STORY

Motorman Harry Lynch was found by the Journal in Dr. Beaman's surgery where he was heroically standing the intense pain of the setting of a broken knee. He was apparently suffering severely, but spoke to those around about the accident. He said:

"We got no warning whatever. We were just about the middle of the ruins when we heard a noise and saw the walls coming. There was no time for escape. In another second we were crushed."

"Were you running fast?" was asked.

"About our usual speed. I wish," he added, "we had been going twenty miles an hour. We might have got clear if we had."

Mr. Lynch added that it was their third trip past the ruins this morning and he had not thought of any mishap.

Conductor McCabe was suffering too severely to talk.

More.

A peculiar feature of the accident is that while the car was smashed into kindling wood, the door on the front of the car remained intact, even to the large sheet of glass which was not cracked.

More.

Note: report of the burning of the Gilmour hotel is in the Saturday September 15 edition.

Railway Commission

Case to be argued

Application by the Ottawa Electric Railway for an order compelling the village of Hintonburg to pay a share of the cost of widening the Somerset street bridge.

28/06/1907

*Ottawa Citizen**Ottawa Electric**Somerset street bridge*

The board also took up the application to compel Hintonburg to pay a part of the cost of widening the Somerset street bridge, but it was not pressed to a conclusion. An agreement may be come to between the street railway and the municipality and the meantime the application is allowed to stand.

Mr. C.J. Bethune on behalf of the Ottawa Electric railway said the case arose out of a right embodied in the judgment of the board ordering the widening of the bridge and which judgment stated that Hintonburg might be called upon to show cause why it should not bear a share of the widening, inasmuch as the western approach to the bridge was in that municipality. Under the agreement between the village and the company the latter had to grade the street leading to the bridge to the width of thirty feet. It had not been done just to that width but this was with the acquiescence of the municipality. However, he thought the company was willing to widen the street thirty feet but it had not been determined how much wider it should be, Till that was done he suggested the application might stand. If the cost would be slight the application might not be pressed,

Chief Engineer Mountain said the present width of the street was 24 feet. The bridge was to be widened 16 feet, making a forty foot roadway in all.

Mr. J.L. McDougall for Hintonburg thought if the case stood an agreement could be reached.

Judge Killam said that on the terms of the judgment previously given a formal order for the widening of the bridge would issue reserving the question as to Hintonburg being compelled to pay a share,

Accident on Britannia line - see accident file.

Fire Destroys Electric Car
Mysterious Affair on Holland Avenue
Loss \$3000, Covered by Insurance

Supt Hutcheson thinks some tramps got in and lighted matches.

Car No. 202 of the Ottawa Electric Railway Company was destroyed by a fire of mysterious origin at 2 o'clock this morning while standing on the siding at Holland avenue.

The car is one of the big ones used on the Britannia run and was in use yesterday up to noon on snow cleaning operations. It was then run along the track past the turn from Holland avenue to Britannia and locked. About two o'clock this morning "trouble" appeared on the line and it was known that the trolley wires were short-circuited somewhere. Cars were sent in all directions and at 2:15 the blazing car was seen on Holland avenue. It was then almost totally destroyed and nothing could be done to save it. The loss will be \$3000, fully covered by insurance.

The only explanation Superintendent Hutcheson could offer was that some tramp or other person sought shelter in the car and lighted matches.

There will be several miles of new track laid by the Ottawa Electric Railway company the coming summer on the line to the Experimental Farm and George street loop. There is now only one thing standing in the way of the extension to the Farm and that is the Grand Trunk bridge on Preston street. An order for raising the bridge to permit of the passage of trolley cars below, and this order will have to be made by the Railway Commission. More.

The company has the rails on hand and will go ahead as soon as the weather permits. More

The railway company has just received the last of an order of twelve closed cars which will be available for summer use in times of great crushes but will have the equipment of open cars as last year.

May be no fatalities from car collision.

Patients doing well at hospital considering serious nature of Sunday's crash of street cars.

Citizen's first account was very complete and few more details can be added to description (the May 25 edition is missing, [possibly a holiday] but there is a full account on page ten - see next record)

Today's reports of the injured in the collision of two electric cars on the Britannia line on Sunday are more reassuring. Only two amputations have been necessary so far and all the patients who are in the hospitals have a good fighting chance. While one or two of the patients are still in critical condition, the attending physicians are hopeful that no fatalities will ensue.

Charles Byrne, who had his right leg amputated at the Protestant Hospital shortly after the accident, is in good condition today and was resting easily at noon.

The fracture to the front of his skull which caused some alarm at first has given no trouble and it is now not considered dangerous. Fred Byrne, the younger of the two brothers, was weaker when he was taken into hospital. His left leg was amputated at the knee yesterday and in addition it is fractured at the thigh and the right leg is fractured below the knee. He was very weak last night but this morning rallied considerably and was quite bright, though his condition is still critical. Miss Lena Morin, stenographer for William Scott and company, is also picking up remarkably well. She has a fracture below the left knee, the limb is rather badly crushed and there are bruises on her face and arms. She was at first considered one of the least hopeful cases but today she shows a marked improvement. Miss Driscoll's condition is also very satisfactory in spite of the fact that there is a compound fracture below the right knee and a simple fracture below the left. The others in the hospital are all making splendid progress though of course some of them will be laid up for a long time.

The opinion of the Superintendent and of the other street railway employees is that the accident was due to the motorman on the rear car endeavoring to stop the car without, in the excitement of the moment, shutting off the power. In his report on the accident he stated that he shut off the power about three hundred feet behind and then applied the brakes. When he found the brakes did not stop the car he states that he attempted to reverse but the reverse handle would not move. In order to reverse it is necessary to first shut off the power completely, then move the reverse handle and turn on the power again. The superintendent thinks that the motorman neglected to turn off the power in the excitement of the moment. The car had been in use all day and there had been no complaints.

In support of this it is said by some of the street railway men that if the power had been shut off some distance away, even if the reverse did not work, the car would not have been damaged to the extent it was by the impact. At the same time all are unanimous in Motorman Carroll being one of the most careful on the road. He had been a motorman for sixteen months, the inspectors had reported very favorably on his care and attention to duty and only the other day Motorman Leclair on the big car which was in front had remarked to his conductor on the care of Carroll.

Under the former running rules of the company the motormen were supposed to keep fifty to one hundred yards behind the car in front while running. It is understood that in future they will be requested to keep 200 yards behind.

Last evening Superintendent Hutchison [sic] stated that the list published in yesterdays Morning Citizen was as complete as he had it. There are, however, a few who received very minor injuries or shaking up. Mr. Dodtout, 227 St. Patrick Street was jammed between seats and Dr. Lambart has since been attending him. He however was able to assist the passengers who had been more seriously hurt. A. Julien, 263 Dalhousie Street, had a hand badly bruised. He was on the front of the ill fated car but jumped. Dr. Bourque is in attendance.

In the account of the wreck it was stated that thieves were busy among the debris picking up purses. This might be true of some persons but other more worthy citizens who were on the scene rescued some of the passengers valuables and restored them to the owners immediately. One man in particular was performing this act of kindness to the losers immediately after the wreck.

This is page ten of the same edition.

The injured are listed with full details. There are 17, including Motorman Carroll.

A rear end collision on the Britannia electric railway line at 5.30 Sunday resulted in injury to about 20 people. Ten are in hospital, several of them in a very critical condition. While the attending physicians do not relinquish hope, it is feared that two of the cases may result fatally as much blood was lost before the patients reached the hospital and the injured were in great shock.

The accident was caused by open car no. 260 running into the rear of the heavily built Duchess of Cornwall and York car, which had stopped. Both cars were coming in from Britannia when the big car was stopped almost opposite Barry's Hotel to let off a lineman to repair a break in the wire. The open car was coming behind at a good speed and crashed into the rear of the car in front, the motorman stating that the brake and reverse failed to work. As the front car has a heavy steel floor and is higher than the smaller and lighter car, the floor of the front one crashed over that of the open car, demolishing the end and forward seats and causing injuries to the passengers, mostly to their lower limbs. Motorman Carroll on the rear car, remained at his post, he escaped almost miraculously, with but slight injuries.

The majority of those hurt sustained their injuries as a direct result of the demolition of the front of the car, but some were hurt by falling off or junking off the rear and sides, one girl leaping on to another and breaking her arm, as another witness of the accident related.

The point where the accident happened is about one hundred feet east of Barry's hotel. At that point the track is level but just before there it there is a downgrade and beyond that an up grade. Therefore cars travel at a fairly good clip along the strip of track. There is also a bend in the track near the place, but apparently this fact had nothing to do with the accident as the motorman in charge of the rear car says he saw the front car, but did not think it was going to stop. The realization that there was to be a collision came to motorman and passengers in a flash, but the impact came before the car could be stopped or the passengers could jump.

The scene that followed the crash was one of intense excitement. The small car was wrecked by the impact, while the vestibule and rear end of the roof of the front car were smashed. The passengers who were unhurt tumbled headlong from both cars and rushed madly for safety, while the heartrending chorus of shrieks and groans arose from the wounded and the frenzied friends of those hurt or caught in the wreckage. Some cool heads, however, rallied the excited passengers and at once began the work of rescue. Many pathetic scenes occurred in the removal of the injured to the sward lining the railroad tracks, several of the women passengers in particular becoming hysterical at the thought that relatives, friends or children were among the wounded. In the meantime messages were despatched to town for doctors, not a surgeon being on any of the cars which by this time were rapidly arriving at the scene. Many of the wounded were placed on the car with which the second car collided and brought to the Protestant General hospital.

On the arrival of the big car containing the injured at the head of Rideau Street a huge crowd had gathered, the news having spread rapidly throughout the city. Scores of people hurried to the various hospitals impelled by agonizing thoughts that members of their own families were perhaps among the unfortunate passengers and when willing hands carried the stretchers from the car the crowd at the junction of Charlotte and Rideau streets pressed forward and surrounded the bearers.

Chief de la Ronde was conspicuous at this time and with detective Thos. Ryan and several officers cleared a lane through the throng to the hospital gates. The railway company had issued orders to stop all cars and a long line of trams extended down Charlotte and Rideau Streets. The crowd grew steadily, the report having gained circulation that many had been killed in the crash but the police and railway officials eventually reassured the people that nothing in the nature of a fatality had happened, and the announcement that all the wounded had been conveyed either to the hospital or their homes had the effect of dispersing many of those gathered at the hospital although many small groups remained eagerly discussing the accident and awaiting information regarding the condition of those transferred from the ambulance car to the institution.

The Citizen staff on duty for the morning paper had a busy time. All the phones were kept busy and hundreds gathered in front of the office to read the bulletins. Within a very short time after the accident the Citizen had a correct list of all who were seriously injured and was able to assure anxious parents and friends. So many were besieging the office for information that a departure was made from the rule prevailing for Sunday and bulletins were put out to relieve the intense anxiety of thousands.

At the hospital - paragraph omitted

Father speaks (of the two Byrne boys) - paragraph omitted.

Motorman's story. The Citizen interviewed Mr. Edward Carroll, 586 Albert Street, the motorman on the car coming behind. Mr. Carroll escaped with a badly cut forehead and right leg severely strained at the joints. He explained that the big Britannia car was about 150 feet in advance, until its rate of speed began

apparently to decrease. As he did not think it was going to stop he did not reverse until the cars were 75 feet apart. He then turned the reverser to utmost but whether through a defect or not, reverser, he says, failed to stop the car, as the result of which the accident happened.

Motorman Carroll flatly denied that he had his head turned and says he was watching the track all the time.

Thrown from Car - paragraph omitted

Saved Children - paragraph omitted

Why large car stopped

Motorman Leclair pulled up to allow Lineman to alight for wire repair.

Charles Caron of 97 Hinton avenue and Zephirin Leclair of 127 Dalhousie street were conductor and motorman on the Duchess of Cornwall car. In an interview with a Citizen reporter Mr. Leclair told why he came to a stop. It seems that one of the little iron fastenings from which the trolley wire is suspended had become in need of repair and a lineman was on Leclair's car for that purpose. He requested Leclair to let him off at the break and this the motorman did. He had just released the break [sic] and was on the point of starting again when the rear car crashed into his. Being comparatively light and low its floor wedged under that of the big car thus pinning some of the people beneath the wreckage. Two ladies, the motorman noticed, were held in this way. In order to release them, the trolley of the big car, which had come off, was put on again and the car moved forward. Its passengers whose injured were no worse than slight bruises rendered what aid they could to the sufferers and in this they were assisted by Messrs. Barry and Hill who live nearby and who supplied water and towels. The backs of the seats on the uninjured car were broken and those of the victims who could be taken, four women, two men and three boys were made as comfortable as possible, the others being left beside the track to await the ambulance. Mr. Leclair said he would never forget the ride that followed. When about half a mile from the scene of the accident a doctor was taken on and at the corner of Empress Avenue Drs. E. Borque and Whitton were secured while Dr. Jas Seager afterwards boarded the car. The injured were deposited at the Protestant Hospital.

The Ill fated Cars

The two cars, as they stand in the barns are mute witnesses of the terrible force of the collision. the awful wreck made of the front platform of No. 260, the smaller car, shows it a miracle that any of those who were travelling on it escaped with their lives.

Paragraph omitted - difference in height etc

Among the wreck of splintered seats and twisted brass work are ominous blotches of blood, while broken teeth were also picked up.

The larger car is uninjured save for the fact that the steps and everything underneath the rear platform as far back as the last truck has been carried away. The interior however presents a ghastly spectacle, everywhere are blood stains.

Both cars may soon be in use again as the property damage will amount to only about \$500.

Stories of eyewitnesses - paragraph omitted

Cut on face - paragraph omitted

Saw it from road - paragraph omitted

Thieves at work

The scene of the accident was littered with purses and jewelry of all kinds and it is likely that some of this will never again be seen by the owners thereof as some articles were picked up by persons unknown and carried off. The usual excuse was given that "the finder knew the owner" but this, in some cases was evidently a thin one.

The cars were all densely packed with people coming from a Sunday afternoon at Britannia. Immediately after the break in a long line of cars were held up and were kept waiting for about twenty minutes. Most of the women passengers were rather nervous, and one would not be persuaded to go on the big car. All of the ambulances of the city turned out promptly. Amongst the debris on the smashed car were teeth, boots, gloves, wearing apparel and many other things. News soon reached the city of the disaster, and all Britannia cars coming in were the object of curiosity. The track at the scene of the accident was not in any way damaged.

Final two paragraphs omitted

28/05/1908 Ottawa Citizen Ottawa Electric

A copy of the report of Mr. J.F. Wise, inspector of the Ontario Railway and Municipal Board has been received.

Extracts.

I took statements of motormen and conductors of both cars.

I secured the brake shaft and handle which were on the front end of the wrecked car. A thorough examination convinced me that the handle and ratchet were in perfect working order at the time of the accident. I also examined the controller and found the reverse cylinder worked alright. The main cylinder shaft was so damaged by the collision that it worked only as far as first notch.

Car to which the accident happened was equipped with a Peacock hand brake, I believe it was in good working order at the time of the accident. There are eighteen cars on the system with this brake which is recognized as one of the best hand brakes. The big car had Westinghouse air brake.

The front of the car where the motorman stood was occupied by passengers sitting on the front seat. In the face of imminent danger the passengers on the front seat hampered and disconcerted the motorman; he failed to keep his presence of mind and lost control of his car. This I find to be the cause of the accident.

It is important to have the motorman free from embarrassment and distraction while attending to his duties on an open car of this type as on closed cars where he is within a vestibule where passengers are not allowed to ride. I would recommend that the front seat on open cars be abolished so that a motorman in the discharge of his duties shall not be liable to have his mind distracted or his movements hampered by passengers either sitting down or standing up.

The OER is well run.

TRAFFIC DELAYED

Small Run Off on Britannia Line Tied up Street Cars.

A derailment on the Britannia line of the street railway caused a considerable delay about 7.40 last evening. One of the big open Britannia cars, No 315, on its way towards Britannia, while crossing the temporary switch just before the Somerset street bridge to take the left track, as the other track is pulled up, the rear truck jumped the rails Traffic was blocked, cars from Britannia turning back and those from the city lining up. After much delay the car was finally jacked up. No damage or any kind was done.

At 11.20 last night an open car from the Somerset street line, in coming off the post office switch, jumped the rails. The car was backed up and fell back into the rails. This was due to the spin rail being surrounded with dirt and not freely moving

25/06/1908 Ottawa Journal Ottawa Electric Experimental Farm

The management of the Ottawa Electric Railway expects to be able to announce within a week by what route, if at all, the company will build to the Experimental Farm as this matter is now under the serious consideration of the directors. It is certain that the company will not take any steps to have the Grand Trunk bridge on Preston street removed or contribute to the cost of such removal if possible and the alternative route appears to be by Holland avenue, which would be much prettier as it would pass through some of the show places of the farm. One of the difficulties in using the Holland avenue route is that the company would probably have to purchase additional rails as it would not use the high 6-inch rails within the farm. The rails used would be the same weight, but would not expose so much surface to the rays of the sun.

Ottawa Electric

Albert street barn

New car barns.

Ottawa Electric will build a new addition.

The Ottawa Electric Railway is arranging for the construction of an extra car barn adjoining its present one on Albert Street. The capacity of the latter is taxed and it is necessary to have the car storage in a fairly central locality. A site on Queen street was first intended to be utilized but before the board of control objections were urged by property owners in the vicinity. Some options were also secured for a location off Rideau street, but some of the owners held out for too high a price. As a consequence it is now intended to be built on the lot adjoining the present sheds. It will necessitate the removal of a couple of small buildings.

06/07/1908 *Ottawa Citizen*

Ottawa Electric

George street loop

The Ottawa Electric Railway began to use the new loop by way of George street. It branches off Sussex and goes down George and up Mosgrove street to Rideau, making a convenient turning point near the centre of the city. In the morning the Gladstone avenue cars will be rundown over the loop and in the afternoon and evening the Britannia extras. The new line will obviate the necessity of shunting at the Post Office.

14/07/1908 *Ottawa Citizen*

Ottawa Electric

Experimental Farm

Ties are being delivered and construction work will soon commence on the extension of the Ottawa Electric railway to the experimental farm. The company has concluded an agreement with the government in regard to the matter. The route is to be from Holland avenue across the farm to the observatory, with a loop around the offices and farm buildings. The original idea was to build the line up Preston street and residents of that locality were very anxious that it should be done, but an obstacle in the way was the Preston street bridge of the G.T.R. which is too low for cars to go under and also occupies a part of the roadway. The company took the position that if an extension were desired the city had to provide the street and in consequence it declined to share in the cost of altering the grade. The Grand Trunk is understood to take the position that when the bridge was built it conformed to the requirements of the law. The city objected to bearing the whole cost, estimated at \$16,000, and so the subject was dropped. Since then a new application has been decided on asking the commission to order the work and apportion the cost between the city and the two railway companies. Meanwhile the street railway has concluded arrangements with the government for the route by way of Holland avenue and consequently the Preston street project has apparently fallen through.

Collision between cars 256 and 246 on Sussex street opposite Government House Gate.

16/07/1908 *Ottawa Citizen*

Ottawa Electric

To guard against the danger of car trollies slipping off the conducting wire at railway crossings the street railway is installing a new protective safety device. One of them was installed at the crossing near the water works early this week. It consists of a wire net in the shape of a trough inverted over the stretch of conducting wire that overhangs the crossings. The wire net is connected with the conducting wire and also carries the current. The overhanging edges of the net are intended to catch the trolley should it slip off sideways. If the trolley should leave the wire the edges of the net would catch it and it would then pick up electricity from the net. This would prevent interruption of the current. This is installed only on the line where the cars have to take the up grade. On the other side the cars are on the down grade and do not need it. The taking of these protective measures is the result of the serious accident that occurred a short time ago at the St. Patrick street crossing.

Ottawa Electric

Britannia station

The new station of the Ottawa Electric Railway company at the village of Britannia to take the place of the one destroyed by fire will be on the north side of the tracks instead of the south side where the old one stood. The people of Britannia have given to understand that a fine brick building is to be erected there for the use of the people and will be a vast improvement to the one which was destroyed. The present concrete platform on the north side of the tracks will be the platform for the new station. It is understood that the work will be begun very soon as the present condition is very dark at night and inconvenient.

10/09/1908 *Ottawa Citizen*

Ottawa Electric

Experimental farm

Unless the Ottawa Electric railway is given permission to build a loop at the south end of Elgin street it will revert to a bob tail service on that street. This was the statement made yesterday by one of the officials of the company.

Good progress is being made on the Holland avenue extension to the Experimental farm and it is expected that it will be completed by the first of November. The winter service will then go into effect and will consist of one car running between the farm and the corner of Holland avenue where the cars now turn to go to Britannia. For the summer there will be a regular service with cars running from Sparks street. If permission is secured for a loop at the end of Elgin street cars will run to the farm by way of Albert, Preston, Somerset and Holland avenue. There will be a loop at the farm end and so it is imperative that there be a loop at the other end of the line. It is also imperative for catching visitors to the city that the cars for the farm pass Sparks street. Therefore if the loop cannot be secured at the south end of Elgin street there will be two cars placed on the Elgin street line, one on each track, giving a service of about twelve minutes. The Albert street cars would then be sent around the George street loop and out to the farm. No application for the loop has yet been made to the city council as it will not be required until spring. The Albert street cars will then not go to the front of Union station, only to the corner of Briard street except in the case of specials and extra cars.

15/10/1908 *Chesterville Record* *Ottawa Electric*

An appeal will likely be taken by the OER against the verdict of \$5,500 given by the jury to Miss Lena Morin of Mechanicsville, who lost a limb as a result of the accident on the Britannia line on May 24. It is claimed that the verdict is an excessive one. It is pointed out that Miss Morin has not been incapacitated from resuming an office position, and that the amount of the verdict, if invested at 6%, would yield her each year practically as much as she was receiving from her former position.

Some time ago the court gave a verdict of \$1,500 in favor of Mrs O'Leary whose husband was killed by walking in front of a Somerset Street car. The verdict was appealed and has now been carried to the supreme court. In the meantime Mrs. O'Leary has died but the fighting of the appeal will probably be continued.

13/11/1908 *Ottawa Citizen* *Ottawa Electric* *Experimental farm*

The Ottawa Electric railway has completed its extension to the Experimental farm and is operating a limited service for a few days pending the inauguration of the regular schedule. It has not yet been decided what cars will run to the new terminus but it is not unlikely that those going around the George street loop will go there. More.

08/12/1908 *Ottawa Citizen* *Ottawa Electric*

Accident involving car No. 44.

03/02/1909 *Ottawa Journal* *Ottawa Electric*

Few persons in Ottawa ever stop to think how many street cars pass the corner of Elgin and Sparks streets during the day.

Mr. W.J. Sayer, who attends the switch at the corner, recently counted the number carefully and found that 2,476 cars passed within 24 hours. They begin running at 4 o'clock in the morning on some parts of the system and there are cars in operation as late as midnight. Taking an average for the eighteen hours about 148 cars pass at that corner every hour. During the busier portion of the day there are more than this and the number will probably go near to 200 to the hour.

The cars on the Britannia run, on that from Union station to Ottawa East, and in fact on all parts of the system except the route from the Experimental Farm to a point where the Britannia cars are met, pass the corner of Elgin and Sparks streets. They are constantly whizzing by there and it is a good point to watch them and get an approximate idea of the traffic.

Some cars make ten trips a day and others about twenty, according to the distance they have to cover, and it would be somewhat difficult to estimate the distance they do cover.

A very conservative estimate, however, would be 7,000 miles a day: so that in the aggregate the cars here in a single day cover the distance from Ottawa to London, England and back every day.

Although the traffic is so heavy and the trips are made so frequently, there are few accidents.

24/03/1909 *Ottawa Journal* *Ottawa Electric* *Experimental Farm branch*

A vote of \$10,500, a farther amount required for construction of the Experimental Farm branch of the Ottawa Electric Railway was approved in committee of the Commons last night.

Mr. Fisher said the vote was to cover the cost of the portion of the line, a mile or so in length, within the boundaries of the Farm. The Chief Engineer of the Railway Department had computed the total cost of the work at \$39,882. The arrangement was that the same fares would be charged as on the city lines of the company. The cars would carry mail for the Farm.

Mr. Fisher said his department had sanctioned the project of the Farm line because there had been an insistent public demand for it. The company had agreed to construct the line to the Farm borders only on the condition that the Government would lay the line within the Farm limits. Five hundred dollars of the vote will be spent for fencing.

Action Against O.E. Railway

Arises out of passenger carrying parcel

Man refused to pay extra and so was put off

Writ issued claims damages from company

A writ launching a very interesting case will be issued by Mr. John R. Osborne on behalf of Mr. David Rotkin against the Ottawa Electric railway company.

Rotkin claims that he got on a streetcar on Gladstone avenue with a parcel in his hands. He put his ticket into the box, and then the conductor told him that he had to put in another ticket because the parcel was so large. He refused, and to use the plaintiff's own terms "He grabbed me by the whiskers and threw me out." He is suing for \$500 damages.

Superintendent Hutcheson to the Citizen said, that passengers were allowed to carry personal baggage not too large without extra charge on the cars. However, bulky parcels were charged for, by the passenger being required to put in an extra ticket.

This case should prove an interesting one, the manner in which Mr. Rotkin was handled, and the question of the size of the baggage coming into evidence.

NB. Page one of the Citizen shows the date erroneously as 1990, other pages show 1909.

Car No. 84 hits a fire reel

10/06/1911 *Ottawa Journal* *Ottawa Electric*

Rumor of merger of Ottawa Electric Railway Company, Ottawa Light, Heat and Power Company and Ottawa Car Company. Long article.

People on Sparks street were rather startled about two o'clock yesterday to see a strange looking street car coming up the tracks of the Ottawa Electric Railway. The strange part of the car is that it was not painted the color of Ottawa cars, red and yellow, but a bright green and yellow. The car was the one which has been built for the Edmonton Radial Railway by the Ottawa Car Co. It with the others of its kind, have been manufactured for the western city, will be shipped in a few days/ The run up Sparks street was just taken to make sure it was in good working order.

14/10/1911 *Ottawa Citizen**Ottawa Electric*

A COLLISION WITH THE CARS

As a Result Man and Wife Were Injured.

A double collision resulting in severe injuries to two persons occurred near the J. R. Booth lumber yards yesterday afternoon about 4 o'clock, when an Ottawa electric car bound for Hull smashed into one of the Booth lumber wagons and then into a horse and buggy.

Odeon Cousineau, who was driving the lumber wagon, related the following story of what occurred to a Citizen reporter who called on him at his home at 7 Philomen street, Hull.

"I had a load of 3-inch lumber on my wagon and was just coming out of the lumber yard when I heard a car bell ring, and I waited just in the entrance of the yard. A car passed bound for Ottawa, and hearing no other bell I thought the track was clear and whipped up my team to cross the tracks. There is a small grade from the yard entrance to the tracks which are about 30 feet away, and just as my horses were on the rails I saw a car coming along about fifty feet away. I whipped up my horses to save them if possible and jumped from the load. The car smashed the rig and threw the horses to the ground, but they were not hurt." Cousineau escaped with a badly sprained left arm, sustained when he jumped from his wagon. Miss Bernard and Miss Hill, two professional artistes who are performing at the Odeon, theatre at Hull who were on the car at the time of the accident, stated that their car was traveling at a fair rate of speed and had just crossed the bridge over the old slide, close to the Booth lumber yards, and when the car was about 100 feet from the entrance to the yard, a team drawing a load of lumber suddenly came out from the yard on to the tracks. The motorman rang his gong and applied his brakes, but was too late to stop the car, which crashed into the rig. So great was the shock that the conductor was thrown from the front of the car, and falling on the motor-man threw him to the floor where he lay stunned. The conductor was either thrown, or jumped, from the car, and to add to the confusion, the power became reversed somehow and the damaged car started to back down the track uncontrolled.

A horse and buggy containing Mr. and Mrs. W. Rink of the Mountain Road, South Hull, which had been following closely behind the car, could not be got out of the way in time, and the car backed into the vehicle, throwing the occupants out into the roadway, and smashing the buggy to pieces.

Mr. Rink and his wife were picked up in a semi-conscious condition and hurried to the Protestant hospital, where it was found the former had sustained an ugly gash in his head and cuts on his arms, while the latter was considerably bruised and suffering from shock. The shock from the second smash, luckily, threw the trolley from the wheel and the car came to a standstill

16/10/1911 *Ottawa Journal**Ottawa Electric*

Accident to car No. 90.

25/10/1911 *Ottawa Journal**Ottawa Electric**Ottawa Car*

The Ottawa Electric Company are having a large double truck steel sweeper constructed, which is to be used in the more severe storms of the coming winter. This is the first one of its kind to be used by any electric railway in Canada, and is to be built entirely of steel. It will also be more powerful than the present wooden sweepers now in use which in a very heavy storm are sometimes tied up. This new sweeper will be an immense help to all sections of the service. There are at present forty-two pay-as-you-enter cars in operation and it is not likely that more than this number will be used this winter. The old ordinary cars cannot be changed into pay-as-you-enter cars as the new cars have to have a specially constructed base.

23/05/1912 *Ottawa Journal**Ottawa Electric**New Edinburgh*

As the result of the recent heavy rains which have prevailed in and around Ottawa, the old store house or car barns, as the building is familiarly called, situated on Stanley avenue, New Edinburgh, last night fell down.

Not entirely, however, for the main portion of the building is still standing as erect as ever. The southern wall, facing on the beautiful lawn and garden of Miss I. Lumsden, fell in with a crash last night, totally obliterating a fine bed of flowers which the above lady had nourished.

The building in question is an old one, one of the first in fact that the Ottawa Electric Company built in the city. It is being used for storage purposes. Some time ago a portion of wall on the north side gave way and fell in on the yard of the fire station. No attention was given this occurrence, however until last evening, when several tons of brick loosened and fell as the result of the damp weather.

The damage to the building is only slight, and it is probable that the Electric Company will repair it at once. Men were at work clearing away the debris this morning.

17/07/1912 *Ottawa Journal**Ottawa Electric*

Accident to car No. 530.

01/08/1912 *Chesterville Record* *Ottawa Electric*

The weather on Wednesday was most favorable for the upwards of 500 excursionists who took advantage of the trip offered by the Sunday Schools of Winchester and Chesterville. About 250 boarded the train at Chesterville and these were joined by over 100 at Winchester and other contingents at Inkerman, Mountain, Kemptville etc. The Union station at Ottawa was reached at 10.30 o'clock.

By arrangement the Ottawa Electric Railway had special cars in waiting and the majority went immediately to Britannia Park, many taking advantage of the opportunity to go directly to the city. This park is a most beautiful one with every convenience for a pleasant day in the open. Ottawa is a beautiful city and with its electric car service visitors can go to a variety of attractive spots such as Parliament Hill, Rockcliffe Park, Chaudiere Falls, Experimental Farm and in the neighbourhood of government driveways. The excursion party left Ottawa at 8 p.m. sharp last evening and arrived at Chesterville at 10.30. All were delighted with the day's experiences. The Sunday School officials were greatly pleased and the two schools will net a substantial profit from the venture.

Elgin street cars on double track--

09/10/1912 *Ottawa Journal* *Ottawa Electric* *Plaza Bridge*

Cars soon to run on Plaza

In as short a space as three weeks possibly two, the cars may be running right through over the Rideau street section of the Plaza.

City engineer Kerr and Mr. Williams, a Public Works Department engineer, visited the Plaza today to settle the grades for the tracks that are to be laid.

It is thought the Street Railway Company will start work on this at once, which will mean the removal of tracks from Wellington Street near the Chateau Laurier in a few days.

12/11/1912 *Ottawa Journal* *Ottawa Electric* *Ottawa Car*

The one hundred men who went on strike at the Ottawa Car Company' factory returned to work today.

Their grievance has been settled satisfactorily, the men being granted ten hours pay on Saturday, and realizing the difficulty of getting to work on time during the winter months, the company recommended by Mr. W.K. Jeffries, will allow them one hours pay during the week to make up for time lost in this way.

28/11/1912 *Ottawa Journal* *Ottawa Electric* *Plaza Bridge*

With the actual beginning of the work of laying the rails across the Plaza this morning it may be taken for granted that conflicting reports regarding the running of the cars across the new square this winter are now laid to rest.

Definite action will be hailed by the merchants and public generally with great relief. The cars will probably be running early next week.

A number of men are hard at work this morning laying the connections at both the Rideau and Sparks streets ends. This will be completed in about a week. In the meantime the cars will run as far as Elgin street and there a transfer will be given to connect with the Rockcliffe, St. Patrick and Rideau street lines.

Mr. O'Toole of O'Toole and McGillivray, contractors, said today that the Plaza was now completed with the exception of the stone fence and this will be finished by Saturday.

Then the great derricks, the fences and the piles of rubbish which have marred the beauty of this part of Ottawa for so long will be removed and the Plaza will be revealed in its completed state.

29/11/1912 *Ottawa Journal* *Ottawa Electric* *Plaza Bridge*

Now that the work of laying the rails for the Plaza tracks has actually begun, the Ottawa Electric Railway is sparing no labor to rush this work to completion.

"We have engaged all the men we can lay our hands on," said Superintendent Burpee this morning, "and are trying to finish the work by Monday. Night and day gangs are continually at work and the connection for one of the two tracks is already made. We expect to experience more difficulty at the Rideau street end as there it will be necessary to lower the grade considerably and consequently much excavating will have to be done..

However, we are making a great effort to have the cars running on the Plaza by Tuesday next."

This includes a picture taken from a window of the Grand Trunk station over the Plaza bridge.

02/12/1912 *Ottawa Journal* *Ottawa Electric* *Plaza Bridge*

The work of connecting the rails for the Plaza tracks is still progressing with all possible speed. Both connections at the Sparks street end are already made while only one connection remains at Rideau street.

The tracks are now being filled in under the direct supervision of Superintendent Burpee who said this morning the cars would be running on Wednesday.

Work stopped on Preston street because G.T.R. has not yet received the double crossing.

10/10/1913 *Ottawa Journal* *Ottawa Electric* *Ottawa Car*

The Ottawa Electric Railway is going to repaint all the old big double-truck pay-as-you-enter cars a light green the same color as the present new cars are painted. Already car No. 538, which originally was red and green, is now running on the Somerset street line repainted.

The cars will be taken into the repair shed one by one or possibly two at a time and re-painted. This will have all the big cars the same color as is the case in Montreal.

14/01/1914 *Ottawa Journal* *Ottawa Electric* *Westboro*

The great need of a heated station on the electric railway line was never more needed yesterday and today. With the eleven minute service in operation many streetcar passengers were forced to withstand the full force of the elements, while waiting on a car. Some of the passengers took refuge in the open station room on the north side of the tracks.

Some stations on the Britannia line are not much use as shelters.

About 5,000 people live in the different villages and hamlets lying between the western limits of the city and Britannia. The majority of these people are wage earners and have to come to the city to earn their daily bread. A few may have their motor cars or horses and carriages, but the greater percentage have to use the cars of the Ottawa Electric Railway Company. These people are compelled to come into the city in all weathers and invariably this line has a heavy traffic. The distance is about five miles and scattered over this distance are some twelve stopping places and seven small buildings called stations. The intention of those who erected them probably was to provide shelter for passengers waiting for the cars in bad weather. A general inspection proves to one that while the majority of them might shade one on a hot day they are practically useless in rainy or cold weather. The five are situated at Holland avenue, Westboro, Clarella Park, McKellar Townsite, Richardson avenue, Britannia Highlands and Britannia village.

The only two which provide anything like comfort are at Holland avenue and Britannia village. The former being at a divisional point of junction where a portion of the traffic is transferred from one car to another during winter, and sometimes in summer, is said to be altogether too small for the purpose intended. The other serves very well in the winter, but is locked in the summer, and therefore is useless at that time of year.

Holland Avenue

A Journal representative went over the line yesterday and to his mind the stations on the whole are totally insufficient to accommodate the public which daily uses the road. At Holland avenue one finds a small brick building about 15x20 feet into which 50 people might crowd. As it is at a junction, should the unavoidable delay of several cars cause a large number of people to stand there on a bad day, some of them would likely have to stay outside. It has a brown tile floor and a wall seat running around two sides of the room. The walls up as far as one can reach are overlaid with white tiles. A small clock decorates the wall and an old fashioned telephone also hangs on the wall. Were it twice the size it would be a very good station of its kind.

A Disgrace.

"This station is a disgrace," said one resident of the village of Westboro to The Journal. He was, however, inclined to blame the boys for the disfiguration of the building, and was glad a constable had been appointed to keep them from congregating there in the evenings.

The station itself is a small frame structure of a dog kennel type, merely a hood over a small platform, about 6x12 feet. One might find some shelter there if the wind was blowing from the north, east or west, but when a driving wind from the south (the side next to the track) was blowing, it would be no protection whatever, as the rain would "drift" into the building. There are two openings at each end, ostensibly for windows, but the glass and sash have long ago disappeared. The floor is very dirty and even on a cold day there was a very unpleasant smell. Some of the boards are broken and the place has a generally uninviting appearance.

Chinese Pagoda

Although not finished and apparently only in course of erection is the station at Clarella Park. It slightly resembles a Chinese pagoda, and although very small, this was the only fault that one could find with it. Apparently its building was stopped with the advent of cold weather.

McKellar Townsite

A small frame building, covered on three sides, the end open, does duty for a station at McKellar Townsite. It is plain and rude and the painter, when he decided to "daub" the outside, used the liquid very sparingly. A rude bench-like seat was placed around the walls and the floor was comparatively clean.

Wayside stations

In many of the rural communities of this country, especially in the cheese producing districts, the farmers, have placed milk stands or covers in which to stand a milk can until a driver passing calls to take it to the cheese factory. Such stands are not unlike the structure which the Ottawa Electric Company have reared on their line at what is known as "Richardson's Crossing". It is a square, or nearly square, box painted white with a tar roof. When the Journal man dropped in for a minute he was told by a person there that it simply seemed like a shelter and that was all. Fortunately it had a door and a window in the door, but two panes of glass were broken. A notice was posted up inside "please observe cleanliness, etc."

A house without windows or doors is not very comfortable except in summer. Such is the state of the little rectangular box known as the station at Britannia Highlands. A judge's stand at a race course would be a palace compared to it.

Two doorways without doors are directly opposite and two square openings serve as windows as far as light is concerned, but do not keep out the cold or the rain. A proof of this was the remains of a miniature snow bank which is slowly melting away.

The station at Britannia village, like its sister at Holland avenue, is a brick structure, and it is the cleanest of them all. Its tile floor was without a spot, and its walls were clean. "No one could censure the Ottawa Electric Railway here," said the reporter to himself, but he soon found out his mistake. Making inquiries among the residents he was told that this station (the best on the line) was kept locked from the first of May until November. 1. Why and wherefore the residents did not know, but they said that if it were not for the two grocery stores, kept by Messrs. Nesbitt and Cummings, passengers would often have to stand out in the rain until a car came. But in justice to the station itself it might be said that it had a very wide cornice, and if people backed up against the walls they might escape the dropping from the eaves.

At the terminus of the line, as it is well known, the company have a very adequate covered platform.

Accident to car 609.

26/12/1916 *Ottawa Journal**Ottawa Electric*

FIVE WERE INJURED IN STREET CAR ACCIDENT

Four woman and one man were slightly hurt or bruised in the derailment of the hind truck of a Bank street car at the corner of Albert and Bank streets, Saturday evening. Those injured were standing at the corner of Albert and Bank streets. A Bank street car crossed the switch with the front trucks, but the switch closed and the rear truck swung onto Albert street. Striking those waiting at the corner.

Mrs. Welsh, 559, Albert street, and Mrs. Bates, 17 Hill street, were badly bruised and taken to their homes in a cab, called by Inspector Reid of the Ottawa Electric Railway. Mrs. Gardner, 122 Wellington street, Mrs. McAllister, 198 O'Connor street and Mr. Walter Williams of the department of labor, sustained bruises. Mrs. McAllister lost her handbag containing \$12 in the accident. The prompt work of the motorman in the application of the emergency brakes prevented a serious accident. The car was replaced on the tracks by the wrecking crew.

30/07/1917 *Ottawa Journal**Ottawa Electric*

HAD TO WALK WITH THERMOMETER AT 96

With the mercury hovering around the 96 mark, hundred of residents of the Capital were compelled to either walk or lay off for the day when an Ottawa Electric car was derailed on the curve at the Holland avenue turn at noon today, putting the Britannia and Somerset, street line out of commission.

The derailment occurred at 12.20 an hour at which many of the residents around Holland avenue, in Hintonburg, and along the line had arrived at their homes for lunch and the only service available on either of the two lines until 1.30 was a "Jigger", which could not begin to accommodate the crowds. Consequently, many walked, while others decided, in view of the heat, to call it a day, and took the afternoon off.

While the cause of derailment is not stated, it is thought that the intense heat had the effect of pulling the rails, which have not yet been fastened permanently, out of position. The back wheel of the car slid from the track in such a manner that it was impossible to quickly remedy the trouble. Aside from a slight shaking-up, none of the occupants of the car were injured.

TIE-UP ON BRITANNIA LINE KEEPS CROWD WAITING

The Ottawa Electric Railway Company was the subject of remarks more forceful than polite for over an hour on Sunday afternoon, when traffic on the Britannia line was completely tied up as the result of the derailment of a car on the temporary line at the Holland avenue turn. From 5.22 until 6.25 o'clock, those along the line who wished to return to the city, and those in the city who wished; to visit points along the line, wilted.

As was the case when a car was derailed at the same point about a week ago, the rear truck went off the track.

04/07/1919 *Ottawa Journal**Ottawa Electric**Rockcliffe*

Two heavy draft horses gave the soldiers at Rockcliffe and Inspector Bowden of the Humane Society considerable trouble near the military camp this morning, when they wandered on to the Ottawa Electric Railway bridge and got their legs caught in the ties.

Some time around dawn, the horses, the owner of which is unknown, wandered onto the tracks leading from the park to the rifle ranges. They went onto the bridge near McKay's lake and got their feet down between the ties. It is about 40 feet to the bottom of the gully which the structure spans, and a few feet either way and the animals would have been dashed to pieces at the bottom. They were held tight however when discovered this morning.

It was necessary to cut the ties and rails to get the horses out. Under Lieut. J. J. Gates and Lieut. A. McCracken and the men of the Garrison Company, with Inspector Bowden, saved the animals from serious injury. Sgt. W.C. Coote tied the feet of the horses and they were canted onto a tent floor and drawn off the bridge by a truck driven by Pte. Hillman.

The horses which had got a considerable distance out on the bridge before becoming caught, are now held at the military camp. They had no harness but one had a slip pasted to its hip bearing the number 57. The are in charge of Inspector Bowden.

Had the animals got on at night and the cars been running a serious accident might have occurred.

04/10/1919 *Ottawa Journal**Ottawa Electric*

Accident to streetcar 96.

22/11/1919 *Ottawa Citizen**Ottawa Electric**Rideau and Dalhousie*

STREET CAR SMASH: - BUT NO ONE INJURED

Big Somerset street Car Ran Into Smaller One at Corner of Rideau and Dalhousie Streets.

A serious streetcar. smash, which caused considerable excitement but fortunately did not result in the injury of passengers or the street car crews, occurred at the corner of Dalhousie and Rideau streets at 11.30 yesterday when a 30-ton Britannia line car, west bound on Rideau street, crashed into the side of a 12-ton car of the Hull-St. Patrick line, as it was rounding the curve to proceed north on Dalhousie street

Almost the entire side of the smaller car was caved in and smashed. Every window in its side was broken and the smaller car was shoved off the rails. The damage to the large car consisted of a bent fender and the ripping off of the front step. There were four passengers on the larger car and about half a dozen on the other. All escaped without injury, except for a shaking up.

Trolley Came Off.

Car No. 312 of the Britannia line was running west on Rideau street at a moderate rate of speed. The motorman, Mr. A. Cayer, noticed car No. 52 of the Hull-St. Patrick line running east on Rideau and begin to round the curve into Dalhousie street. When part way around the curve and broadside of the tracks, on the north side of Rideau street the trolley suddenly came off, causing the car to come to an unexpected dead stop.

The Somerset street car was only a short distance away and, though the motorman threw the power into full reverse, the momentum of the car, aided by a greasy rail, caused it to skid into the stationary car. The crash and the falling glass from the windows quickly attracted a large crowd and for a short time it was thought someone was injured.

Cars Tied Up.

Inspector. Tobin and other officials of the Ottawa Electric Railway were quickly on the scene, and directed the placing of the St. Patrick car back on the rails. While this was being affected the cars north: and east on Rideau street began to line up and at one time the string on the north bound track extended almost halfway to Cumberland street.

Car No. 312 was in charge of Conductor Alexander Moore and Motorman A. Cayer. The crew of the smaller car was composed of Conductor Edward Beauchamp and Motorman Dan. Bigras. It is estimated that the damage to the smaller car will amount to about \$500.

10/06/1921 *Eastern Ontario Review**Ottawa Electric*

Street car conductors in Ottawa have been ordered to desist from putting their hands about the waist of a lady to aid her in boarding a car. The Railway Company are now wondering why so many Ottawa ladies walk instead of using the railway.

18/11/1921 *Ottawa Journal**Ottawa Electric*

Car Service Delayed

Street car service in Ottawa was practically paralyzed for 45 minutes last night owing to a derailment of an eastbound Bank street car on the temporary tracks on Rideau street, opposite the Union depot, at 9.15. The fender falling and catching in some timber caused the front truck to jump the track.

03/02/1922 *Ottawa Journal**Ottawa Electric*

The St. Francis ratepayers association sent a petition to the Ottawa Board of Control to try to get the Ottawa Electric Railway to construct a new track, cutting off from the Somerset line at Bayswater, heading north along Bayview Road to Scott Street, and west to Westboro station along the CPR right-of-way.

This petition never went anywhere.

However, this is the first note indicating that Westboro station exists.

29/01/1923 *Ottawa Citizen**Ottawa Electric*

REVOLVING WINDOW FOR USE IN WINTER

The OER is trying out an invention by a local resident, a former motorman, which so far has proved very satisfactory, and which, it is expected, will prove of much value during the winter months.

The invention, which originates with Mr. Michael P. Cumerford, 74 Besserer Street, consists of a revolving center window for the front of the street cars, arranged by two pinions in the center. By means of a small knob, the motorman, when the window becomes covered with frost, can swing the window around, and dispose of the frost covering. At present when the window becomes frost glazed, the motorman has to stop his car, get out, climb upon the fender, and scrape the frost from the glass with an instrument provided for the purpose.

The new window is being tried on car 116 on the Preston Rockcliffe route, and Superintendent A. J. Tobin is impressed with its utility, while the motormen believe that it is a splendid thing.

"Apart from the feature mentioned, the window will prove an excellent medium for ventilating the street cars when necessary," said Assistant Superintendent C. W. Carson, for the company.

CARS DERAILED ON TEMPORARY TRACKS

The temporary tracks laid by the O.E.R. while the Bank street paving; is in progress, was responsible for several derailments of cars yesterday morning, and the consequent tying up of street car traffic for upwards of two hours.. The traffic was first disrupted when a . Bank street car failed to negotiate the new switch at Fifth avenue and was derailed. The wrecking car sent to help it met a similar fate at Second avenue, and thus caused a complete tie-up of traffic. In the evening around six o'clock two more Bank street cars were derailed at Pretoria avenue when turning from the regular to the temporary tracks, and much delay was caused.

28/09/1923 *Ottawa Journal*

Ottawa Electric

Complain of Delays Due to Derailment

To Be Routed Over Temporary Tracks for Three Weeks

Track laying and paving on Bank street, which has been in progress for one week already, will take at least three weeks longer it was said last evening by officials, and street cars will continue to be routed over the temporary track while the new rails are being laid.

There has been considerable complaining about the number of delays due to derailments and about the difficulty experienced by passengers while essaying a descent from the steps of the trolleys down to the crossings at various street intersections. One has to be fairly agile in order to make this descent safely and it is difficult for elderly or inactive persons to alight with any degree of ease. Several narrow escapes from serious accidents have been reported.

The new west rail is now being put down and the east rail has yet to be laid. When the east rail is being laid the temporary track will be laid on the west side of the street.

A traffic officer was stationed at the foot of Roseberry avenue yesterday afternoon to prevent a repetition of the experience hundreds of motorists had the night before when they were allowed to go up Roseberry avenue which has no outlet. Bank street is closed from Roseberry avenue south and motorists have to be rerouted eastward on Pretoria avenue or westward on Chamberlain avenue to reach Ottawa South.

However, complaints reached The Journal last evening that the same thing was happening and that there was no notice posted by the city, or no traffic officer to keep motorists from going up Roseberry avenue with the result that many turned into Roseberry only to find themselves forced to turnaround and come back to Bank street again.

Ottawa Electric

Hull loop

HULL LOOP TO COME UP ON MONDAY NEXT

The question of the construction by the Ottawa Electric Railway, at the Chaudiere terminus of its lines, of a loop whereby the company would be able to provide a better car service for the Ottawa-Hull traffic and the larger double truck cars, will likely be brought to a head at the meeting of the Hull city council on Monday night. (5/11)

Nothing stands in the way of the construction of the loop now except the sanction of the city council, to enable the company to go ahead with the work. .The Hull Electric Company, with its exclusive franchise over the streets of Hull, has stated it will not oppose the loop, and the E. B. Eddy Company is prepared to permit the city to allow the company to use a small portion of the Eddy park fronting on Main street, necessary to complete the loop and for the erection of a waiting room. The loop has been passed upon favorably by the engineer of the Board of Railway Commissioners and plans for the construction of the loop have been submitted to the Hull city council.

The O. E. R., in return for the construction of the loop, which it is stated will cost several thousands of dollars, addition to the cost of the new cars which will have to be placed on the line, is asking for further a total exemption of taxed for a limited period or else a fixed assessment for thirty years. This is the only point upon which the company and the city have not yet agreed

Threatening Fire in Chaudiere Area

Blaze at O.E.R. Shop on Middle Street. Horses Are Rescued from Stables.

Loss which exceeds \$6,500 was caused by fire which broke out in the blacksmith shop of the Ottawa Electric Railway stables, 198 Middle street, at 10.17 p.m. on Tuesday. Damage to the building itself was not heavy but some valuable motors and other machinery suffered badly. The loss is covered by insurance. Had it not been for the timely arrival of Mr. James Wright, of Hull, who happened to be motoring past the scene just as the smoke poured out into the street, a much more serious fire would have resulted. As it was he awakened the stableman and the two of them had plenty of time to get seven horses out of the stables and turn in an alarm.

Firemen under Chief Robert Burnett and District Chief Bradley were quickly on the scene with the firefighters. They battled the fire with four water streams and it was shortly under control.

The room in which the fire occurred has a heavy plank floor in which the blaze evidently smoldered for some time. The room is not used at night and is seldom entered. Chief Burnett thinks the fire may have been caused by a spark falling on the floor just before the blacksmiths left work at 5.30 p.m. In the heavy wood floor he says, it might have smoldered for some hours before assuming big proportions.

Besides the blacksmith shop, the building, a large two-storey affair, includes the company stables and a large quantity of feed was stored on the upper floor.

There was imminent danger of the fire catching in the feed but this was averted after strenuous efforts on the part of the firemen.

A pet cat, belonging to some of the employees at the stables, made its escape through a hole in the wall, taking with it a young kitten.

Street Car Stops being Changed

New White Posts are being Painted Now

"Staggered" street car stops on the Ottawa Electric Railway will be put into operation very shortly, as the work of changing the stop signs on telegraph posts and electric light standards is about complete.

Under the new system the number of street car stops will be reduced about 17 per cent., and should materially speed up the service, according to company officials. It was advocated by the Ottawa Traffic Committee and adopted by Board of Control and Council.

Cars will stop only under the new plan, which means that people living on certain streets will have to walk a block.

Meeting of Hull West council

The council was consulted by a representative of the Canadian International Paper Company, with regard to the moving of the CPR tracks in the neighbourhood of Cascades. The removal of the tracks will straighten out a tortuous curve, as well as materially shorten the line. But as the moving of the tracks will necessitate moving the power transmission line towers as well as the Bell Telephone Line and also affects the highway crossing the council deemed it best to postpone a definite decision until a more complete investigation of the matter has been affected [sic], and until the opinion of the residents of Hull West in the neighborhood of Cascades had been ascertained.

It was thought, however, by many, that the request of the company will be granted as soon as the investigation has been completed.

OER car 632 involved in an accident.

11/11/1926 *Ottawa Journal* *Ottawa Electric*

One man Preston Rockcliffe street car, No. 510, which figured in last night's hold up. As the back doors swung open to receive two would be passengers a large revolver was levelled at the operator, V. Landry and W.E. Scobie, car starter, who was going to the head office of the O.E.R. with money and tickets amounting to \$844. The bandits made off with the grips containing this booty. Five persons were arrested this morning in connection with the hold-up (picture of car).

BOLT DERAILS CARS CAUSING TIE-UP

More than a score of passengers on a southbound Hull-St. Patrick street car received a scare about 11 o'clock last night, when the front truck left the rails just as the car had cleared the railway crossing into the J. R. Booth, Ltd., mills, south of the Chaudiere bridge. The derailment was caused by a large bolt which was lying on the rail. The rear truck of the car remained on the tracks, the car swinging around at right angles to the road, completely blocking all traffic in both directions. It was 45 minutes before the wrecking crew succeeded in getting the car back on the track and automobile and other vehicular traffic was resumed.

OER soon to rebuild barn destroyed by fire.

Picture.

Caption: All the remains of 25 summer type streetcars and other equipment in the large barns of the Ottawa Electric Railway Company at Rockcliffe, near Rideau Hall, after the fire which swept the sheds late yesterday. To the left of the picture are two other sections of the car barns, housing trams which escaped the flames. This view, taken from the front, shows the depth of the barns, which are served by five tracks, and the extent of the damage, estimated at approximately \$200,000, but covered by insurance.

Take inventory of cars burned without delay.

Company did not lose all of its summer cars in Sunday blaze.

Types that were lost were coming obsolete.

Reconstruction of the fire devastated car barns of the company at Rockcliffe will probably be commenced at an early date, it was announced this afternoon by Major Burpee, vice president and general manager of the OER.

Major Burpee, who was not in the city yesterday when the fire occurred, obtained full details of the occurrence between his regular duties this morning, but stated at noon that no complete inventory of the loss has been made.

"We are having a complete inventory of the contents of the car barns made for the adjusters of the insurance companies, whom we expect here shortly to go over the place," the general manager said. Major Burpee said the building and its contents were insured by practically every company on the fire underwriters association list.

"We will naturally recondition the building which is needed for our stock," he stated.

Asked whether the destruction of so many summer type cars at the barns would mean the end of such vehicles in Ottawa, Major Burpee expressed the opinion that not all the summer cars were in the section burned. He believed there would be other such vehicles in the other two sections which escaped the flames.

"Of course that type of car is becoming obsolete," he stated. "We are asked - all transportation companies are - not to construct any more trams which have not a definite front entrance and exit."

Continued on page seven.

Page seven (excerpts only).

27 OER street cars and part of barn burn in \$200,000 fire.

causing damage estimated at \$200,000 and apparently started by clandestine smokers, fire wiped out one of the three sections on the car barns of the OER on Princess Louise Avenue, within a short distance of Government House, Rockcliffe, at 5.30 o'clock on Sunday afternoon. The loss is covered by insurance.

Twenty-five summer streetcars, all ready for emergency service, a rail bonding ca and a rail welding car, with the barn itself were destroyed while firemen from seven city stations aided by OER employees fought to save the other two units of the shops and to prevent the flames from spreading.

The fire gutted a familiar landmark at the western entrance to Rockcliffe Park, seriously depleting the rolling stock of the OER and threatening to destroy shops being prepared for an early opening having been closed for two year, to accommodate increasing street railway equipment.

So fiercely did the flames ravage the buildings, fanned by a strong wind from the river, that the interior soon resembled a raging furnace. The collapse of the roof sent showers of burning embers into the dense growth of evergreen trees on Pine Hill, behind the sheds and only the energetic work of the firemen in running 100 feet of hose up the steep hill saved these trees and others on Rideau Hall grounds from destruction. Had the flames got a start in these trees, it is felt that the entire park might have been fire swept.

Only an hour before a passer-by saw flames shooting from the roof of the nearest unit to Princess Louise Avenue, a watchman of the OER had been sent on an inspection tour of the premises. He smelled smoke in the barns. He made a thorough search, suspecting that someone had entered and was smoking on the premises. Although he went through every car in the three units he failed to locate the culprit or culprits. about four o'clock the watchman locked up the building and went away.

J.M. Ahearn visited the scene.

Cars were all conditioned for emergency use. Ready for motormen to step on to them and take them out. Of the summer type and were by no means out of date.

Building could not be reconstructed for \$25,000. 210 feet long by 60 feet wide, had five tracks. The centre unit, the next to that which was destroyed was cut off from the south wing by a two-foot brick wall. This alone saved the centre which was closed two years ago, but was not being reopened to take care of the increased rolling stock of the company. The barns were constructed about 15 years ago.

Ahearn had his suspicions. Electrical power had been turned off. Reason to believe that persons gained entry to the building for various reasons, and had even gone to the extent of digging under the doors on occasion. The company has clues to the identity of at least one such visitor.

Owing to the location of the fire there were reports that Rideau Hall was in danger. By 6 o'clock there was a large crowd present. Police were quickly at the scene and a cordon was formed around the place to keep children and others away from the zone in which the wind scattered sparks.

The roof of the burning section of the car sheds and its double doors were the first to burn despite the efforts of the firemen to confine flames to the interior. By six o'clock the roof had entirely gone and spectators were able from the front to look into the blazing interior of the long sheds where the street railway company's rolling stock was, even then, only masses of twisted iron and charred framework.

Only stout walls saved the whole shed of three sections.

Much more in a similar vein.

SECTION O.E.R. CAR BARNS AND ALL EMERGENCY ROLLING STOCK AT ROCKCLIFFE ARE DESTROYED

With Damage Estimated at Around \$200,000, Fire Is One of Biggest Ottawa Has Experienced in Years. Twenty-five Cars and Other Equipment Destroyed. Loss Covered by Insurance.

WOODS IN RIDEAU HALL GROUNDS ALSO IN DANGER OF TAKING FIRE

Firemen's Quick Dash With Hose Stream Up Pine Hill Probably Kept Conflagration From Sweeping Rockcliffe Park. Handi capped by Difficulty in Getting Water as Scene Outside City Limits. Origin of Fire Not Known, but Rigid Inquiry to Be Conducted by O.E.R. Company.

One of the biggest fires which has occurred in Ottawa in recent years broke out at about 5.20 o'clock yesterday afternoon in the Rockcliffe sheds of the Ottawa Electric Railway Company and caused a loss which is estimated at about \$200,000 by Mr. J. M. Ahearn, assistant manager and purchasing agent of the O.E.R., who appraised the damage last night.

Fanned by a brisk wind which blew from the west, the showers of sparks which arose from the blaze threatened that section of Rockcliffe Park woods behind the sheds, which is known as Pine Hill. Once, in fact, the bush did catch and the firemen had to run three hundred feet of hose in amongst the trees and up a steep hill before they could extinguish it. Had the direction of the breeze been slightly different the trees on the grounds of Rideau Hall would also have been endangered.

Starting from an unknown source near the front door of the west section of the building, the conflagration soon assumed large proportions and swept through the entire section of the building, destroying 25 emergency cars, a bonding car, and a track grinder.

In this part of the building, which was soon reduced to a raging mass of flames, were stored those cars which are used to carry unusually heavy traffic caused by the advent of some big event. Everyone of them was in perfect working order, ready for instant use, and their loss is quite a blow to the company, for although they are fully covered by insurance, their immediate working value is nil.

Blazing Roof Collapses and Woods Catch Fire From Shower of Embers

The first alarm came in by phone to station No. 6 on Sussex street, at 6.20, and within a few minutes the whole section of the building was beyond hope of saving. The rest of the building was saved by the thick brick wall which intervenes between it and the section destroyed, and by the efforts of the firemen who speedily torn down all wooden connection along which the flames might spread to the adjoining parts of the structure.

With the big front doors open the burning section of the building resembled a huge furnace. A gusty wind blowing from across the river drove through the opening into the building and forced the flames along before it. Then when the roof fell in the draft blew showers of sparks into the air over the rear of the building and into the tall evergreen trees which densely cover the hill immediately behind the sheds.

For a time, even before it actually caught, it looked as if the bush might go up too, as thousands of glowing sparks were landing in the trees. Occasionally a branch would catch and blaze up a little as the huge crowd which had gathered watched anxiously, fearing that before the end of the evening the beautiful park would have become a prey to the ravaging flames which the wind would have swept right across the hill.

It did catch finally; about three hundred feet from the border of the lumber, and firemen had to scramble up the side of the hill with a long length of hose before they brought the new blaze under control and finally extinguished it.

Water Hard to Get.

All hope of saving the stricken part the building was removed at once, not only had the conflagration got a tremendous start before the fire department could reach the scene, but water was not to be obtained without the greatest difficulty.

Chief Burnett pointed out to The Citizen that the scene of the fire was outside the city limits, and that there are few hydrants in the neighborhood. He said that the department did not hesitate to go to the fire even though it was outside the city limits, and, he added, even had it hesitated, would have been called later to protect the Rideau Hall property which is within the city limits.

From Rideau Hall

Hose lines had to be run from the front and back gates of Rideau Hall down to the scene of the fire, and before one of the big pumps was put on the hydrant end of the lines the pressure was very poor.

Firemen worked from the roof of the building overlooking the blazing section and poured what water they could on to the flames. But it seemed to do very little good until the fire began to burn itself out. Towards the end when it was smouldering, a great mass of embers and hot sparks with the steel frame of the roof and the skeletons of the cars silhouetted against the glowing red, sharp gusts of wind swept the length the building and sent shower of sparks flying over the trees behind.

Crowd Runs to Safety

It was just as the flames were beginning to die down. The coping around the outer edge of the roof, or what had been the roof, fell to the ground. Starting near the front of the building it peeled off and landed with a roar in the dry grass behind the structure. The grass immediately caught fire and blazed up along the side of the loop which runs around the structure, while the overhead wires which was supported on iron posts embedded in the coping fell away and sagged towards the ground, causing spectators who had ventured close to scamper away to safety.

Thousands of Spectators

Other Spectators, part of the great crowd of many thousands which had been attracted by the dense columns of black smoke which arose from the burning shed and by the red glare which, reflected from the clouds of smoke, could be seen from all over lower town and many other parts of the city, besides points up the Gatineau, passed behind the building in order to see what was happening on the other side. Occasionally they would get around without difficulty while at others showers of sparks would begin to fall on them as they ran meagrely somewhat apprehensive of being singed.

In all four streams of water were used by the firemen and a total of 7,200 feet of hose was run out through which the water was forced by two of the big gasoline pumps.

All Emergency Cars.

Mr. Ahearn told The Citizen that the loss of rolling stock suffered in this fire is somewhat of a blow to the company for it consisted of all the emergency cars which could be brought out at a moment's notice, and, though they are covered by insurance, there must necessarily be a delay before they can be replaced. He added that it was most fortunate that the flames had not spread to the adjoining section of the building, as this will be used as housing space for the new rolling stock which the company will put in operation later this fall.

The Rockcliffe sheds, Mr. Ahearn explained, had been more or less in use for some time except as a storage place for these emergency cars. With the coming of the new rolling stock, however, they will be reopened and will be as active as any other of the barns in the city

The fire will probably mean the final passing of the old open car in Ottawa, as they are no longer built. They were to be seen at exhibition time and at other times when the rush of

traffic was extraheavy and necessitated the use of a large number of extras. Previous to this they were run chiefly on the Hull-St. Patrick line during the summer months before the advent of the new St. Patrick street bridge and the big double truck cars on that line. Many of the cars destroyed were of the open type.

RESIDENTS FEEL THAT CAR SHEDS ARE AN EYESORE

Rockcliffe People Consider Time Opportune To Shift Them. Following Fire.

THINK NATURAL BEAUTY OF PARK IS MARRFD

A suggestion that the Ottawa Electric Railway car barn be moved from Rockcliffe Park and situated in some section where they would not be such an "eyesore," was received today by The Journal from various prominent residents of Rockcliffe Park district.

The consensus appeared to be that now was the psychological time, following the destruction by fire on Sunday afternoon of one of the three large car aheda, for steps to be taken toward this end.

Gives Three Reasons.

A prominent Rockcliffe resident said to The Journal that removal of the car barns was desirable for three particular reasons: First, their detrimental effect upon the beauty of Rockcliffe Park: second, their proximity to Rideau Hall Grounds, and thirdly, the fire risk because of them.

Rockcliffe Park, he pointed out, waa civic property, not Government property, as was generally understood. Rockcliffe, vlllage, of course., a quite distinct from the park. The park was aquired by the city many year ago. The Ottawa Electric Company, however, own the cite [sic] of the car sheds, and also the light ef way, having acquired them from the Keefer estate many years ago.

Th nrsieifc of th car barns certainly did not enhance the beauty of the park entrance, he said. It was a pity, he felt, that the natural beauty should be so marred. He had long thought upon the desirability of removal of the sheds, but now, he felt, was the time for action, before the Ottawa Electric Railway Company went to further expenditure in rebuilding the barn destroyed by fire.

Was a Danger.

Some experience, he thought, should have been derived from the fire on Sunday afternoon, as to the are risk resulting from the car barns. The danger of s forest fire of no small proportions was most marked, he said, and had the fire once gained a firm hold in trees beside the barn., it likely would have swept through the greater part of the park, fanned by the strong wind which was blowing. He was high in his praises of the work done by the Ottawa Fire Department in halting the advance of the flames, and protecting the trees.

The situation called tor immediate action, he felt. By a comparatively small outlay at the present time. the city could obliterate the detrimental effect upon scenic beauty, and the fire hazard. Hesitation of a few weeks, or months, would necessarily make the outlay heavier, should the barns be rebuilt. The iron was hot, and residents of the neighborhood felt that now was the time to strike.

HAVE NO COMMENT" ON CAR BARN PROPOSAL

O.E.R. Has Heavy Investment Involved at Rockcliffe

The suggestion that the Rockcliffe car barns, which were partially destroyed by fire a few days ago, be removed altogether from the entrance to the park, was received without comment by officials of the street railway company today. Manager Fred Burpee stated that the matter was not under consideration, although he supposed that if parties interested In the acquisition of other people's property were to make a reasonable offer it might be taken under advisement. The company had a very heavy investment in the Rockcliffe barns, however.

Another gentleman connected with street railway activities was of opinion that the entrance of the park would undoubtedly be improved if the barns were removed. "The move is bound to come sometime in the future," he stated, "although whether this is an oppotune time or not I cannot say. The location of the barns suits the railway's needs admirably, and the question is whether the purchase price would provide enough funds to buy an equally suitable site within the city limits. Then there is another matter that is perhaps not considered. This is the fact that the company pays township taxes on its Rockcliffe property. If it moved the barns into the city it would be forced to pay municipal taxes. All these are matters to be taken into consideration, and while the company may be in full sympathy with all efforts to beautify the city and Rockcliffe Park it must be borne in mind that it owes a first duty to its shareholder."

The question of the removal of the Rockclilfe barns is not a new one. It has been brought to the attention of the company on many occasions and a large number of visitors and residents have commented on the location of the barns so close to the entrance to the park. The site was acquired by the company many years ago from the Keefer estate and the barns were in operation before this park was taken over by the city.

ROCKCLIFFE BARNs ARE BEING REBUILT

New cars to be ready first of year.

Work on the rebuilding of the Rockcliffe car barns which were partly burned on September 25, will be completed within six weeks, according to J. M. Aherne, assistant general manager of the Ottawa Electric Railway Company last night.

Mr. Ahearn said that the debris was cleared away by Friday night Last and work on the reconstruction had started on Saturday. Within three weeks the roof will be in position and the remainder of the work finished by December 1. Few changes will be necessary in the barns, except to build up from three to four feet of brick wall joining Princess avenue. No structural changes are contemplated, Mr. Ahearn said.

Owing to the increase in business enjoyed by the railway within the last two years, Mr. Ahearn stated that it had been found necessary to reopen the shops at the Rockcliffe barns. They were closed when the Champagne shops were opened, but are again in operation. The contractors for the work are John Sutherland and Sons, of Ottawa.

Mr. Ahearn said that the 20 new " treadle" type street cars which are being built by the Ottawa Car Manufacturing Company will probably be ready for use by the beginning of next year. They are nearing completion and will be placed in service as soon as possible, he said.

Official test, new OER car, treadle type.

Equipped with every modern device, first of 20 makes trial run.

Replete with every modern device known in street car construction making for comfort and safety, the first of a fleet of 20 new cars to be operated by the Ottawa Electric Railway was given an official trip yesterday afternoon.

It is expected that most of the new cars will be in readiness to place on runs by December 12, starting with the Rlgin Bronson route.

Are treadle type.

The cars, known as the double truck treadle type, contain many new features heretofore unseen by local riders. They are of the pay-as-you-enter design with treadle steps for exit in the rear. Although the front entrance can be used as an exit, it is preferred that passengers use the rear exit. An electric sign, which illuminates when the car is halted immediately warns persons about to board the car that it is of the pay-as-you-enter type.

Seating accommodation has also been improved, the seats being covered with solid leather with a back rack which prevents over crowding. The car will seat 49 persons, 22 in the forward facing seats and 25 in the side seats. The car can be converted so as to employ a motorman and conductor if required.

Will not operate.

The steps, instead of being one solid piece, are made of leather strips designed in a grating effect. This is to prevent snow caking on the step. There is also a mirror in the operator's compartment which allows him to have the rear exit under observation at all times, and the car will not start when the treadle is being used.

In the operator's compartment the front window is of the swivel type, an invention of Mr. Cummerford, formerly a motorman employed by the Ottawa Electric Railway. This style of window ensures perfect vision in wet or snowy weather. The other windows in the car are absolutely weatherproof and have brass sills. Automatic ventilation.

Ventilation throughout the car is automatically controlled, filters having been installed in the ceiling at regular intervals.

Motorman J. Miles piloted the car on its first official trip yesterday. Mr. Miles has been with the Ottawa Electric Railway for 21 years. Others on board were Major F.D. Burpee, vice-president and general manager; Allan J. Torbin, superintendent; Austin Bill, Frank B. Beatty, departmental superintendent, Ottawa Car Manufacturing Company; B.A. Baldwin, Master Mechanic, Ottawa Electric Railway and W. Hogg, Ottawa Car Manufacturing Company.

On another page there are also two pictures.

15/12/1927 *Ottawa Citizen**Ottawa Electric*

Request made by Rosedale Municipal Association

It was decided to write to Major Burpee in regard to having the starting station at the end of Elgin Street moved to the corner of Main and Clegg.

16/12/1927 *Ottawa Journal**Ottawa Electric*

Sixteen new cars are put in service

Sixteen of the new treadle-type cars were placed in operation for the first time this morning by the Ottawa Electric Railway Company.

The cars were operated on the Bronson-Elgin route and company officials reported that they were entirely satisfied with the results. Although some passengers were rather confused as to the treadle step plan of exit, little or no delay followed the inception of the new service.

Several other cars of the same type are to be placed on other routes in the near future.

Accident involving car no 312.

30/01/1928 *Ottawa Citizen**Ottawa Electric*

Injured as truck and streetcar collide.

Melville Harris, 214 Nepean street, had two teeth knocked out and his leg bruised when the Standard Bread Company's truck which he was driving was struck head on by a Gladstone avenue street car near Bronson avenue. The front of the truck was considerably damaged but the street car fared better. Mr. Harris was proceeding west on Gladstone avenue and when about one hundred yards from Bronson avenue the truck skidded to the south street railway track. Before he could get to his own side, his truck was hit head on by the street car which was travelling east. Mr. Harris declined medical assistance.

08/09/1928 *Ottawa Journal**Ottawa Electric*

Car is derailed when axle breaks

A broken axle caused the derailment of an Ottawa Electric Railway street car on Beechwood avenue near Marier road yesterday afternoon. The breaking of the axle caused the front trucks to become detached from the car and then rolled a few feet to the side walk. Only one passenger was being carried at the time and she was unhurt. Traffic was tied up for two hours on the main line, although an auxiliary service was provided

01/02/1929 *Ottawa Journal**Ottawa Electric*

OVR streetcar skids to edge of Somerset Street bridge when rear axle drops without warning

Twelve passengers kept cool and reached safety

30 foot drop to CPR tracks was possibility

Rear wheel wheels of swung over north side of bridge.

A broken axle on the rear truck of Britannia street car no 312 caused the streetcar to leave the rails, the rear end swinging out over the edge of the Somerset Street Bridge just after midnight, causing excitement among 12 passengers.

There was no panic. Some of the women passengers screamed at the sudden and unexpected jolt and swing. As the car settled down at a standstill none lost any time in making an exit.

The passengers at the front did not notice what had happened as soon as those near the back of the car. A Poulin, barber, 943 Wellington Street, said he was seated at the rear and did not notice anything wrong until the car gave a sudden lurch throwing some of the passengers from their seats.

Had close call.

Conducted Lawrence McAteer remained at his post as the rear of the car jolted about. Noticing that the back door of the car opened out into a drop of 30 feet. He quickly directed passengers out of the front door. The passengers did not realize what a close call they had until they got off the streetcar and were surrounded by smoke coming from a C.P.R. engine which was passing under the bridge. They realized had the car gone a little further its suspended weight would have carried it over the bridge. About half of the rear of the vestibule of the street car was suspended over the bridge.

Railing was tone.

When the car came to a stop part of the rear truck had broken through part of the flooring of the old bridge, and this railing was torn down for several yards..

The rear truck of the car rested on the outside of the wooden framework of the bridge. This seemed to be all that was holding the car from plunging over the side of the bridge to the railway tracks about 50 feet below.

Owing to the late hour at which the derailment occurred there was no great street car tie as most of the cars had already gone to the barns. Traffic from uptown was turned back from the top of the bridge and a jigger service was maintained to Holland Avenue where cars were switched to Britannia and the Civic Hospital. The O.E.R. wrecking car was rushed to the scene. The wrecking gang worked most of the night in order to have the line cleared for this morning.

The street car was in charge of Motorman Patrick Summers and Conductor Lawrence McAteer,

EXPERIMENTAL FARM LINE

Editor. Ciftren: The weekly booster of the Ottawa Electric Railway in his last article entitled "Keeping faith with the community" seems to have overlooked the existence of a place in the vicinity of Ottawa known as the Experimental Farm. It is now the sixth week since the car service to the Farm was discontinued, the ostensible reason being that the traffic receipts did not pay for the costs of operation.

In justice to the company it must be admitted that many things have happened since the agreement of 1908 was drawn up which could not reasonably have been foreseen at that time. The war added very markedly to the cost of all kinds of materials used for construction and maintenance. The recent increase in the number of automobiles was responsible for a very derided reduction in the revenue derived from passengers fares. The closure of the Arboretum against skiers during the winter months still further reduced the receipts from this section of the line and seems to have brought matters to a climax.

Notwithstanding these extenuating circumstances the railway company was morally bound to adhere rigidly to its agreement until a new one was formulated after a full discussion of all the factors bearing on the question. If a new agreement is now drawn up what guarantee have we that the company will pay any more respect to it than they did to the previous one? Who is going to compel them to adhere to it? Of course the difficulty might be surmounted by the insertion of some such clause as "This company reserves to itself the right to abrogate this agreement without notice as and when it sees fit."

On the question whether the withdrawal of the car service to the Experimental Farm constitutes a breach of the agreement made with the city, the street railway committee of the municipal council continues to preserve a dignified silence. Possibly they feel that this question can only be settled satisfactorily after a series of observations on the motions of the heavenly bodies. J. ADAM. Ottawa. Jan. 15, 1930

28/02/1930 *Ottawa Journal**Ottawa Electric*

CAR IS DERAILED CAUSING TIE-UP

South-bound street car service was held up for 20 minutes last evening by the derailment of a Holland car at Bank and Somerset streets. East-bound cars on Somerset street were also blocked, but not as long as the cars on Bank street. The derailment happened about 9.30

As car No. 819 was turning west from Bank to Somerset the rear truck jumped the track. The wheels on the left side of the street slipped on to the nearest rail on the opposite track, thus preventing Laurier cars on Somerset street and Bank and Bronson cars on Bank street, from passing.

An emergency crew was rushed to the intersection and after 20 minutes work succeeded in clearing the switch. East-bound cars were able to proceed first. North-bound cars on the Rideau and Ottawa East lines were not delayed.

25/04/1930 *Ottawa Citizen**Ottawa Electric**Ottawa, Experimental Farm*

Build fence over Farm Tracks Loop

Department of Agriculture now uses right of way for chicken run

Seeing that the Ottawa Electric Railway has shown no indication of resuming the former jigger street car service to the Experimental Farm, from the Carling avenue loop, the Department of Agriculture has taken over the right of way.

Acting upon instructions from Deputy Minister Dr. J.H. Grisdale, employees of the farm have erected a fence across the tracks adjacent to the loop, and upon the rails where street cars used to run, fine healthy poultry are now housed, or run around pecking at the ties.

"We are using the right of way for an extension pro tem. of our poultry section," said Dr. Grisdale, but we have not interfered with the rails or the trolley wire.

Nothing further will be done pending the arrival back in the city of the minister, Hon. Dr. Motherwell."

It is understood that the right of way and also the rails and trolley wire are owned by the Dominion Government which bought them when the jigger service was installed and paid the O.E.R. to construct the line to the farm.

Officials of the street railway company had nothing to say on the matter this morning.

30/09/1930 *Ottawa Journal**Ottawa Electric*

Car Service Tied Up

The derailment of car No. 616 at the corner of Bank street and Gladstone avenue at about 6.30 yesterday evening caused street car traffic to the Glebe and Ottawa South as well as along Gladstone avenue to be interrupted for more than an hour. The derailment it is believed, was due to the car "splitting" the switch at the corner.

16/10/1930 *Winchester Press**Ottawa Electric**Hull*

Shot to Death

William Bertram Marshall, 25 years of age, one of the best known and most popular young men in Ottawa sports circles, was shot through the heart and killed instantly by an unknown assailant at 10.15 o'clock Wednesday evening at the Hull terminal of the Ottawa Electric Railway. The murderer escaped in an automobile, and police have very light clues to work upon. Marshall had gone to Hull with his chum, Arthur Ash, 426 McLeod street. The shooting followed an argument after the automobile driven by the murderer had run into the fender of Ash's car in which he and Marshall had gone to Hull after spending the evening in Ottawa together.

Covered in greater detail in the Ottawa Citizen same date.

Loss is \$30,000 as O.E.R. barn the scene of fire.

Many streetcars, mostly old stock are destroyed at Rockcliffe.

The north section of the Rockcliffe street car barn, together with a large amount of rolling stock of Ottawa Electric Railway Company was destroyed in a spectacular blaze which kept firemen from six city stations busy for an hour and a half yesterday afternoon.

Total damage is estimated at approximately \$30,000 although difficulty was experienced in placing an estimate in the streetcars destroyed owing to the depreciation in recent years.

Lost in the blaze were six of the latest type street cars (the 800) valued at \$12,000 each when new; one large green car of the same value, six pilot cars, several of the old type open passenger cars and other obsolete rolling stock.

Damage etc.

The fire, which was one of the most spectacular seen in Ottawa for some time past, was first noticed by a passerby who turned in an alarm at No. 6 Fire Hall on Sussex Street. Four stations responded to the alarm at 4.01 p.m. but at 4.12 o'clock Fire Chief S.B. Blackler sent for assistance and firemen from Stations 2 and 8 were despatched.

When firemen reached the barns the fire had secured a good hold and flames were shooting through the roof while thick black clouds of smoke were carried by a northerly wind over Rideau Hall grounds.

Firemen found considerable difficulty in that there were no hydrants nearby and lines of hose had to be laid from Rideau Gate at the corner of Sussex Street and from Maple Lane to the scene of the fire, distances of more than a quarter of a mile.

The north section of the barn was blazing furiously when firemen reached the scene and Chief Blackler and his men concentrated their efforts on saving the other two portions of the barn which contained streetcars of a more valuable nature.

Tackling the fire with three lines of hose, firemen soon had it under control and prevented it spreading to the interior of the centre portion although a section of roof was destroyed. As soon as tons of water were poured into the building dark heavy clouds of smoke came pouring out and could be seen for miles around. Within a short space of time almost 3,000 people had congregated around Rockcliffe Park. At times flames shot high into the air, while sparks flew in all directions as steel framework fell with a clattering noise.

Within an hour there was nothing left of the northerly section of the barn but smoldering ruins.

It was largely due to the efficient work of the firemen that the centre portion of the building was saved. In this building were six "800" cars, ten "jiggers" and other rolling stock.

A brick wall extending from the floor to the wooden roof also proved a great asset in keeping the flames back although fire on the roof spread to the centre section and was quickly quelled by a line of firemen.

Firemen were kept on guard in this section to keep the flames from getting a hold and their efforts being successful in preventing a much more serious fire with considerably greater loss.

At 5.30 the return was rung. Firemen were present from stations 2, 3, 4, 5, 6 and 8 while approximately 5,400 feet of hose was used.

No cause could be found etc.

\$60,000 loss at OER barn at Rockcliffe

Two of three sections are burned and old cars are destroyed.

Two of three sections of the Ottawa Electric Railway car barn in Rockcliffe were gutted by a spectacular fire this forenoon, the loss including contents being estimated by Major F.D. Burpee, vice-president and general manager of the company at approximately \$60,000. The loss is fully covered by insurance.

Forty old type streetcars, the small type double enders stored in the barn, were destroyed with other equipment.

The barn was valued at \$100,000 and was built around 30 years ago.

More

Believed by Major Burpee to have been caused by a cigarette stub or a small fire lighted by tramps who have often been chased out of the barn, the fire broke out in the centre section. Because of the height of the building, about 20 feet, and the roomy space encouraging draft, the flames spread quickly. The roof is of tar and gravel and the fire leaping through the centre roof soon resulted in billowing clouds of black smoke that could be seen from remote sections of the city.

The old cars in this section quickly fell prey to the flames but two of them had been removed with the aid of one of the large modern cars a short time before.

The three sections are separated by brick walls and the exterior of the structure itself is brick. The flames, however, ate into the centre section roof and across and down into the south section. It was soon evident that the latter section could not be saved so firemen concentrated on the north side, trying to save part of the centre section and the north section.

However, both south and centre sections were gutted and the east end of the north section also was damaged.

The side and rear outer walls as well as the inner walls had no windows making fighting of the fire difficult.

More

Several of the cars destroyed were the old fashioned open-sided type so popular years ago for the trips to Britannia and Rockcliffe Park. The other small closed types mainly were used as work cars, although the equipment was stored in the barn for emergency transportation purposes. The cars standing on eight track sections were destroyed.

27/09/1937 *Ottawa Journal**Ottawa Electric**Rockcliffe*

Residents feel that cars sheds are an eyesore.

Now is the psychological time to remove them.

- detrimental effect upon the beauty of Rockcliffe Park.

- proximity to Rideau Hall grounds.

- the fire risk because of them.

The OER owns the site of the car sheds and also the right of way having acquired them from the Keefer estate many years ago.

Could have swept through the greater part of the park.

Dr. E. M. Young Critically Hurt By O.E.R. Car

Physician's Automobile Is Hit At Magee Avenue Crossing, Westboro.

Dr. Ernest M. Young, 32. of 147 Strathcona avenue. Westboro, was critically injured at 11.30. o'clock this morning when an Ottawa Electric Railway car crashed into his automobile at the Magee avenue crossing in Westboro.

Taken to Civic Hospital unconscious, Dr. Young was stated to be suffering from severe head injuries, the full extent of which are not known, and from cuts and bruises about the face and body.

Carried 116 Feet

According to the report made by County Contable John Brown, Dr. Young was travelling south on Magee avenue. His automobile was directly on the tracks when the street car, eastbound, crashed into the machine and carried it 116 feet along the right-of-way. The street car was in charge of Motorman Fred Lauzon, 252 Frank street.

Tubman's ambulance conveyed the injured man to the hospital where he is being attended by Dr. H. B. Moffatt.

Dr. Young was still in an unconscious condition this afternoon. He was alone in his car when the crash occurred.

When the street car struck Dr. Young's machine, the automobile became wedged under the front part of the street car and was practically demolished as it was bumped along over the ties.

Ottawa Electric officials stated it was raining at the time of the crash, which may, have obstructed the doctor's view. The street car, they said, was travelling at approximately 20 miles an hour at the time and was brought to a stop within 116 feet, considered a quick stop in view of the downgrade at the scene. Motorman Lauzon reported to his superiors that Dr. Young failed to stop at the crossing although there is a stop sign at both sides of the Magee avenue crossing. The operator noticed the motor car, he said, when his street car was about 10 or 15 feet from the crossing and the emergency brakes were set immediately.

Second Collision.

Street railway men stated day's crash was the second one in which Dr. Young had figured. On April 22, of this year, they said, his car was slightly damaged. and he escaped injury when his machine was struck at the Strathcona avenue crossing.

Dr.. J. S. Nelson was quickly on the scene following the crash this morning and rendered first aid.

Tram Jumps Tracks Snarling Traffic

Twelve street cars were held up and traffic tangled for 20 minutes along Connaught Square when the rear wheels of a west-bound street car, turning up the Sparks street side of the switch near the National War Memorial left the tracks at 11.30 p.m Friday. Employees of the Ottawa Electric Railway were not long in getting the car back on the tracks. The derailment was caused when the switch had opened after the front wheels had crossed it, sending the rear wheels along the Queen street tracks.

Tram Jumps Track Strikes Automobile Traffic Delayed

When its rear wheels jumped the track as it turned off of Dalhousie street shortly after 8 o'clock last night, an Ottawa Electric street car swung crosswise on St. Patrick street, damaging a parked car and tying up traffic for about half an hour.

Driving the street car north on Dalhousie street, Operator Henri Deslaurier, of 163 McGillivray street, told police he had stopped at the corner of St. Patrick and was turning on. that street-when the accident occurred. The rear wheels of the car left the tracks on the turn, causing the rear end of the car to swing to the north side of St.. Patrick street, blocking the entire width of the street.

In swinging, the front right corner of the street car struck the left front fender of an automobile belonging to E. Chartrand. of 316 Daly avenue, which was parked about 25 feet from the corner on St. Patrick. Damage to the automobile was estimated at \$35.

The street car was loaded with passengers but as it was travelling slow at the time of the mishap no one was injured. O.E.R. officials said they were unable to determine any reason for the derailment. By means of buses the company was able to maintain schedules until the car was returned to the rails by a wrecking crew.

Constable H. Maloney investigated.

15/11/1944 *Ottawa Journal**Ottawa Electric**Sparks and Bank*

Derailement Fails To Disturb Sleeper

One passenger appeared quite oblivious to the whole situation when the street car on which he was a passenger was derailed at the corner of Sparks and Bank streets shortly before seven o'clock last evening. Traffic was tied up for fifteen minutes when a southbound Britannia street car spilt the switch while turning the corner and its rear truck tried to follow the northbound tracks The street cars were quickly re routed by Queen street and passengers on the derailed car .were transferred all transferred -- all but one. Sprawled in a seat one man slumbered while a wrecking crew pulled the car back on the track and was still asleep when it set out on its normal course again

Minto Girls Entertain Tram Passengers

A ride 'n a Laurier avenue street car shortly after four o'clock Thursday afternoon turned out to be a "musical jamboree" for more than 20 passengers when three school girls, averaging eight years old, began singing such tricky tunes as "Chickery Chick", "Bell Bottom Trousers", "Don't Fence Me In", and "The Trolley Song".

The girls, on their way to the Minto Skating Club with hooks and skates, displayed perfect rhythm and diction. Smiling faces turned constantly towards the rear of the car where the "pig-tail trio" seemed to be having a whale of a time.

An army sergeant soon joined in the chorus but the girls waved him off for being off-key.

Will Put Back Clocks on Trams

The Ottawa Electric Railway will eventually get their clocks back.

Despite the whispered word of some unsportsmanlike persons to the contrary, Dave Gill, the railway's general manager, insists the OER did not remove the clocks for fear persons would notice a slow-down in the service.

"We were forced to take them out when we ran out of spares to replace the clocks which would not run" Mr. Gill said.

When does the OER expect delivery of new clocks?

"You tell me when we're getting the buses, I'll tell you when we're getting the clocks," he countered.

13/02/1946 *Ottawa Journal**Ottawa Electric*

Emmett Milloy Dies-of Injuries In Tram Incident

Emmett Milloy, 32, Connaught Gardens, Aylmer, died in Ottawa General Hospital at 12.20 : this morning from injuries received when he was believed to have been struck by a Hull Electric Railway tram in the company's terminal in the tunnel adjacent to the Chateau Laurier three hours earlier.

Operator of the car believed to have struck Mr. Milloy, A. Richer, 73 Berry street, Wrightville, told police that when he started the car after letting off some passengers, he felt a bump against the car. He immediately stopped the tram and got out but upon investigation did not find anything which could cause the bump. He then re-entered the tram and proceeded around the railway loop.

A short time later another street car entered the tunnel and the operator, J. Chef, saw a man lying between the rails. Mr. Chef notified the inspector in charge at the terminal, and he in turn summoned Gauthier's ambulance.

Mr. Milloy who was unconscious, was then taken to Ottawa General Hospital where he was found suffering a fractured pelvis, fractured ribs and an internal hemorrhage. He was treated by Dr. J. P. Bonfield and Dr. L. J. Mulvihill.

26/02/1946 *Ottawa Journal**Ottawa Electric*

Loaded Tram Jumps Track

Three persons narrowly missed being struck by the rear of a street car, when it was derailed at the corner of Bank and Sparks streets about 5.30 p.m. Monday.

The truck of the fully loaded tram passed through an open switch while it was turning off Sparks street, to go south along Bank. When the car was derailed, the back end swerved across Bank street and came to a stop within a few feet of a large plate glass window of Robinson Clothes Limited.

The swerving tram struck an automobile owned by H. Borobridge, 290 Clemow avenue and knocked it ahead about 15 feet. A parking sign on the west side of Bank street was also sheared off. As a result of the accident, traffic was held up for about half an hour.

An OER tow truck was despatched to the scene and made several unsuccessful attempts to replace the car on the tracks. Then another street car was brought into action and succeeded. The slightly damaged tram was then removed to the car barns.

Derailement of the tram occurred during Ottawa's busiest hour when hundreds were pouring from their offices, and drew a large crowd to the scene. Considerable excitement prevailed for a time.

05/03/1946 *Ottawa Citizen**Ottawa Electric*

First Of Series Of Rebuilt Trams Now Completed

First of about 50 rebuilt street cars which the Ottawa Electric Railway intends to put into service this year has been completed and will be demonstrated to the Civic Traffic Committee this afternoon.

Committee members and representatives of the press will be given the opportunity of examining and possibly having a free ride in the car.

Dave Gill, general manager of the OER, said the rebuilt street car differs from those now in use mainly in the seats, which are of a maroon and nickel finished metal construction with blue leather upholstery. Another innovation is the addition of grab straps to the wooden rail at the back of the car. Grab straps went out about the time of the changeover to the one-man operated cars.

The rebuilt cars will be all re-floored and finished in battleship linoleum. The layout of the seats and the interior and exterior paint job will remain the same as on those cars new in use.

Estimated cost for rebuilding 50 cars is \$100,000.

03/09/1946 *Ottawa Citizen**Ottawa Electric**Chaudiere*

20 Uninjured as Tram Jumps Bridge Tracks

For the second time in less than a week, an OER street car jumped the rails on the north side of the Chaudiere bridge, and about twenty passengers, enroute to Ottawa, received a thorough shaking shortly after three o'clock Monday afternoon.

The derailment occurred almost at the scene of last Wednesday's accident, when a Hull-bound tram crashed through the railing and almost plunged 45 feet to the on-rushing waters below.

In the latest mishap, the street car was proceeding in the opposite direction when the rear truck wheels slipped off the tracks and sent the car lurching towards the roadway, adjoining the rail bed. No one was hurt and little damage was caused, either to the tram or the trestle.

Street car traffic along the bridge was interrupted for more than an hour until a wrecking crew had jacked the tram up and removed it to the barns for repairs.

About 20 persons had boarded the tram at the Hull terminal loop. With Claude Villeneuve, of 2 Western avenue, Ottawa West, at the controls, the car was proceeding slowly towards the Capital when it suddenly reared up and jumped off the rails.

The motorman said there was considerable confusion inside the street-car, as the passengers, apparently aware of the near-tragedy that resulted in the last accident, made a concerted effort to escape through the front and rear doors.

However, they were quickly calmed by Motorman Villeneuve, who assured them that there was no danger of the car plunging into the swirling channel below.

Villeneuve said that the derailment was quite a jolting experience. "After that, I'm quite ready to take on Big Sid at the Rodeo. I'd be a cinch to win that \$100 prize they are offering to ride that bull for ten seconds," he said.

Contrary to earlier reports that the accident was caused by a broken axle, this was discounted by the operator of the tram. An investigation will not be completed until late today, on account of the Labor Day holiday, during which most of the OER officials were off duty.

At a late hour yesterday, S. R. Banning, chief adjustor of accident claims, said it was possible that the rails over which the tram was running may have been weakened by the heavy wrecking equipment employed last Wednesday to right the other street car, which went off the tracks with 70 passengers aboard, injuring three pedestrians when it crashed through the guard railing and almost plummeted over the embankment.

20/09/1946 *Ottawa Citizen**Ottawa Electric*

Trying New Clock For Ottawa Trams

There is a "time test" going on in Ottawa at the present in which nearly all residents are interested.

In an experiment to decide whether or not to instal clocks in all Ottawa Electric Railway street cars again, one tram, No. 880, has been chosen to "test" a new time piece. Officials of the company are apparently not satisfied with the service given by street car clocks before the war and the behavior of this single clock during the next few days will decide the question of clocks for all trams of the system.

Tram Jumps Track Traffic Tied Up

Traffic on the Britannia-George loop street car line was held up for almost an hour on Tuesday when a tram carrying about 30 persons jumped the track at Harmer avenue about 6.15 p.m.

The car was travelling very slowly when the accident occurred, as it was just starting up after discharging passengers at Harmer avenue. Cause of the derailment is unknown. The car was operated by R. Young.

Repair crews were summoned and soon had the tram back on the tracks but as both the street car and the rails had to be inspected traffic was held up for a considerable time.

Passengers were accommodated however when a bus service between between Holland avenue and Britannia was started about 10 minutes after the derailment.

07/11/1946 *Ottawa Journal**Ottawa Electric***Double Green Lights To Replace Present Light on Trams**

Electric Railway cars will be equipped with two green lights up front this Winter instead of a single blinding light, Allan T. Lewis, vice-president, told union representatives at a conciliation board meeting yesterday

"We have been experimenting with all kinds of lights until the cars looked like circuses ", said Mr. Lewis. The double green lights proved the best.

General Manager David Gill promised union representatives that windshield wipers would be installed on street cars as fast as the company could get them. The union also asked for heaters in the vestibules and for the front windows. Mr. Gill said the company was trying out one car with an insulated front vestibule

26/11/1946 *Ottawa Journal**Ottawa Electric***Tram Jumps Tracks At Uptown Corner**

Considerable excitement was caused at 8.40 o'clock this morning at the intersection of Bank and Sparks streets when an OER tram eastbound from Hull, jumped the tracks just as it rounded the turn, swung toward the sidewalk on the southeast corner and snapped a lamp post before coming to a halt.

The derailment, which tied up traffic until a derrick could be brought over from the Albert street OER barns, was caused when the wheels of the street car's front truck struck a loose bolt lying on the rails. Workmen quickly placed the tram back on the rails, and service was resumed within four minutes.

A Hydro crew removed the broken lamp post.

23/01/1947 *Ottawa Citizen**Ottawa Electric***Tram Trucks Expected Soon****Windshield Wipers For All Street Cars**

The Ottawa Electric Railway's \$2,000,000 revamping of its street car system will start at the end of this month with the arrival of a number of new high-speed trucks, it was learned this morning.

Replacement of the present trucks with the new high-speed ones will begin immediately on arrival.

Another immediate innovation will be in installation of wind shield wipers on all street cars. At present only two street cars have been equipped with wipers, and they have been so successful, all street cars will be equipped within three months.

Experiments are being made on street car No. 810 with a pull-cord signal stop as used on OER buses This is with the view of replacing the old type push button bell system.

The pull-cord signal bell system is the same used on the new streamlined PCC cars operating in Montreal and Toronto.

No new buses are expected to be purchased by the company this year, as it was indicated that the OER will concentrate on bringing its present street car service up to the newest possible standards.

The company program calls for new street cars to be built by the Ottawa Car and Aircraft Company, conversion of the 900 and 800 classes to a more modern vehicle, elimination of the old wooden Toronto Transportation Company cars, and gradual elimination of the oldest steel cars of the 600 class.

10/03/1947 *Ottawa Journal**Ottawa Electric***Tram-Bus Causes Derailment \$500 Damage**

Several persons narrowly escaped serious injury and damage of about \$500 was caused when an OER bus collided almost head-on with a tram on Confederation Square, just east of the War Memorial, at seven o'clock Saturday night.

Girouard Ladouceur, of 386 Albert street, driver of the bus, told Sgt. Reginald Raby he was proceeding east across the Plaza and was about to make a left turn onto the one-way road just east of the War Memorial when the crash occurred.

The tram was travelling west in charge of Ludger Parent, of 144 Fisher avenue. The front of the bus collided with left front side of the tram. The whole front end of the bus was crushed and part of the interior damaged. The vehicle finally wound up against the east curb. The tram was damaged less severely but the front trucks were derailed.

Several passengers were on the tram at the time. One of them, Joseph Girouard, 63. of 530 Rochester street, was thrown to the floor by the impact and suffered a bruised left shoulder.

The bus driver told police he had stopped his vehicle preparatory to making the turn and had then proceeded on signal from the operator of an east-bound tram. He said he had not seen the west-bound tram.

31/03/1947 *Ottawa Journal**Ottawa Electric***Derailment Halts Britannia Line Traffic**

Tram traffic on the OER Britannia line was tied up from 9.15 to 11.20 p.m, last night when the rear wheels of an eastbound car went off the rails near Churchill avenue.

Several passengers in the tram were shaken up, but no one was hurt

OER officials said it required considerable time to replace the wheels on the rails owing to a free drop of several inches to the ground. In the city, the drop would be prevented by pavement around the rails.

Buses were put on the line until the tram was restored to the rails.

25/04/1947 *Ottawa Citizen**Ottawa Electric***Modernized Trams Now Operating On Hull Circuit**

Three Ottawa Electric Railway streetcars are now in service on the Hull-St. Patrick run after being refitted with the new type high-speed trucks, a fourth, which has also been refitted with the new speed truck, is presently in the paint shop and will soon be on a regular schedule on the Hull line.

The new trucks are of a higher speed and quieter than the old, as the result of having a different type herringbone gear and pinion.

All the 22 cars of the 900 class of the OER are to be refitted with the new type truck.

Work is continuing in the reseating and reflooring of all the company's streetcars. The new style seats have been installed in about one-half of the OER streetcars, and the remainder are expected to be reseated by the end of the summer.

A recent innovation on OER streetcars, the installation of windshield wipers, which has proven successful is to be extended to all streetcars. Already about two-thirds of the entire number have been fitted with wipers.

At present the company is experimenting with pull cords for passengers to signal the streetcars to stop. This is expected to replace the old type push-button system.

18/06/1947 *Ottawa Journal* *Ottawa Electric*

For the Marian Congress, the Ottawa Electric Railway is running its trams all night.

24/06/1947 *Ottawa Journal* *Ottawa Electric*

OER Traffic Records Broken By Marian Congress Crowds

Chalking up a record that left previous transportation highs far behind, Ottawa Electric Railway street cars and buses carried a grand total of 1,579,298 persons during the week of the Marian Congress, an average of 225,614 a day.

During this time there was not a single serious accident David N. Gill, general manager, told The Journal.

Saturday Set Record.

High day for the week - and for all time in the history of the OER was Saturday, June 21, with a total of 272,529 persons. Sunday, free of ordinary weekday traffic, saw the greatest volume of Congress-bound passengers with 268,828.

08/08/1947 *Ottawa Citizen* *Ottawa Electric* *Westboro*

Passengers Leave Burning Tram On Britannia Line

Forty passengers hastily abandoned an OER street car on the Britannia line when a small blaze broke out in the rear of the tram shortly before 8.30 o'clock last night.

Nepean firefighters, employing chemical extinguishers, quickly quelled the blaze which was believed to have started in the motor. Traffic was interrupted for about 15 minutes before the immobilized street car was pushed to a side track.

The incident occurred near Golden avenue in Westboro while the car was westbound. As smoke poured up into the rear, the operator brought the tram to a halt, while the passengers made a hasty retreat through the front door. There was no panic and no one was injured.

On arriving at the scene, the Nepean fire department, brought the blaze under control before any serious damage resulted.

After traffic was restored all passengers from the first tram were transferred to another car to resume their journey.

12/09/1947 *Ottawa Citizen* *Ottawa Electric* *Coburg Street*

Runaway Tram Crashes Barn

A runaway OER tram was almost the cause of a serious accident, while backing into the Co-bourg street car barns, about 6.30 o'clock last night, when it crashed through the rear wall of the building, scattering bricks for a considerable distance along Augusta street. No one was hurt by the flying debris, and the street car stopped dead, a 15-foot plunge to the ground below being averted.

Moving up a wooden ramp after entering the barns from Cobourg street, the tram, in charge of Ben Greenberg, 359 Rideau street, jumped a wooden block as it neared the rear of the building and went hurtling against the brick wall, which faces Augusta street. The rear trucks of the tram left the rails, almost sending the empty conveyance to the cement landing under the platform.

Before brought to a halt the back of the tram plowed into the wall, ripping a hole about 15 feet square. The shower of bricks and mortar sent up a huge cloud of dust, while pieces of debris were hurled over a widespread area.

An inquiry into the mishap was immediately started by OER officials. It was learned that the tram plowed into the wall after the motorman momentarily took his hands off his controls to brush a cinder from his eyes.

City to purchase OER if vote is favorable

By unanimous vote the City Council, at a special meeting held last night, decided the city should take over the Ottawa Electric street railway system on Aug. 13, 1948, at a price to be determined by arbitration in accordance with the terms of the agreement between the city and the OER, or by mutual consent.

The purchase of the assets of the street railway company is, however, contingent upon the ratepayers giving authority to the city, by vote, to purchase the transportation company. It stated last night that the vote of the ratepayers will be taken as early as possible in 1948. According to the agreement between the city and the OER the vote must be taken before Feb. 12, 1948, by which time the city must give the street railway company notice of its intention to take over the assets of the company.

16/12/1947 *Ottawa Citizen* *Ottawa Electric*

Fire In Tram Delays Traffic

Street car traffic in the west-end was interrupted for about 20 minutes last night as a result of a fire outbreak in the motor of a Britannia tram, shortly after 6.30 p.m.

Proceeding westward on Albert street, near Empress, the passenger-laden tram was brought to a halt when flames suddenly flared up from underneath and believed to have been caused by a short circuit in the motor. The occupants quickly disembarked in an orderly manner, while an alarm was turned in. On arriving on the scene, firemen quickly quelled the blaze before serious damage could result.

Traffic was resumed after an OER repair crew, with the assistance of, another tram, towed the demobilized street car back to the Champagne barns.

13/01/1948 *Ottawa Citizen* *Ottawa Electric*

Renew Contract Between OER And Hull Council

Hull City Council last evening unanimously agreed to renew a contract with the Ottawa Electric Street Railway Company permitting the company to continue to operate its street cars from Ottawa to Hull until 1952. After this date, the council at the request of the company may agree to renew the contract yearly.

The main clauses of the contract are: the company agrees to pay a business tax of \$1,000 a year; use same type of cars as those operating on other lines in Ottawa; maintain its right of way and terminus in Hull in good conditions; give a six minute service from 6 a.m., to midnight. The adoption of the contract was proposed by Ald Henri Gauthier and E. Beriault.

The various clauses of the contract had been studied at a recent meeting and last evening the only change requested was that bilingual operators be maintained on the Hull line.

Ottawa Votes to Buy OER by a Majority of Four to One

Nobody seemed surprised that Ottawa property holders had voted for the city to take over the Ottawa Electric Railway on yesterday's plebiscite, but what did surprise not a few was the 4 to 1 mandate.

--

Ottawa's New Street Cars

For the first time for 23 years Ottawa Electric Railway patrons are riding in new street cars and are somewhat thrilled by the experience. These are nothing like Toronto's newer cars with rubber inserts in the wheels and automobile control, that makes them almost as silent as motorcars. Ottawa's Cars sound almost like the old "chariots," grind and jerk to a stop in much the same fashion and resemble them not a little in appearance.

But they are bright and shiny and new and, truth to tell, it is a pleasant change to travel in them. They have lights over the seats, and windows that open from the top. There are four of them, transferred from one route to another so that more passengers can sample their newness. The Ottawa Transportation Commission, of course, will pay for them, under the purchase agreement, when the public take over their own line a few days hence. The OER says they are not quite sure what they will cost it has not received the bill yet from the Ottawa Car and Aircraft Company.

If Ottawa's transportation experience were any guide, these brave new trams would be giving" yeoman service 30 or 40 years hence, enviously competing with their newer colleagues. But under public ownership most people hope that this is not to be. Citizens look forward to better things.

Public transportation has been improving elsewhere and long before the new cars are ready for the junk heap, Ottawa should have sleek, quiet, roomy trolleybuses taking people about. The city's narrow streets and congested downtown sections demand such vehicles. No doubt, before long, the OTC may supply them.

Passengers hope, too, that waiting in rain, sub-zero coldness and blizzards, will be made more bearable by reasonable provision of shelters at car-stops. If the four new cars herald something of this, if they are a symbol of better things to come, they are doubly welcome.

Big Deal Consummated In Matter Of Minutes

Ottawa today possesses its own transportation system. The historic transfer which saw the 57-year-old Ottawa Electric Railway pass into history and the advent of the new Ottawa Transportation Commission, took place shortly after midnight in a simple but impressive ceremony at the city hall.

Trams Fight Losing Battle With Buses

Ottawa eventually will have trolley-buses, W. R. Crelghton, OTC chairman said today in commenting on the "bus vs. street-car" controversy aired at Board of Control yesterday.

Asked if he did not think Ottawa streets were suitable for trolley-buses. Mr. Crelghton replied: "I believe we could handle them here without difficulty.

"Where trolleybuses are concerned, it's not so much the width of the streets that matters as the curves on the proposed routes."

Mr. Crelghton would not guess as to when the trolley-buses would be introduced here.

Losing Battle

David N. Gill, OTC general manager meantime showed statistics indicating Ottawa trams are fighting a losing battle with the buses. The OTC.-he said, now has 70 buses with four more on order.

Mr. Gill agreed the trend here and in other cities was for more buses and fewer street-cars. He thought the time would come when there would be no more of the old-style trams in the Capital.

As an indication of the infiltration of buses into the Ottawa transit scene. Mr. Gill recalled that the new bus service in Mechanicsville had started today. The OTC was also carrying out a survey, studying the possibility of a another bus service for the Lees avenue, Mann avenue, Robinson avenue and Hurdman's bridge areas.

Track-Jump Tangle Tally: \$1,000

A derailed tram on Bank street, just north of Somerset' street, tied up traffic for 40 minutes and caused more than \$1,000 damage when it plowed into two parked cars at six o'clock last evening.

The tram, one of the "Methuselah models" pensioned off by Toronto some years ago finally came to rest wedged between the second of the two parked cars and southbound tram.

Police said the derailment was apparently caused when a switch failed to function properly as the operator, Irving Robinson, 84 Bronson, avenue, was swinging north on to Bank from Somerset.

There were no passengers in either of the parked cars at the time. Passengers on both trams escaped injury.

Constable Kenneth Spratt walking along the east side of Bank street at the time, said the derailment did not become apparent until the rear end of the tram suddenly veered to the east side of the street some 120 feet north of Somerset.

Out of control, the rear end successively crashed two parked cars on the east side of Bank, owned by Jean A. Riopelle, 575 MacLaren street, and Lawrence McLean. 218 Russell avenue, respectively.

Damage to the Riopelle car, which was jolted against a fire hydrant, was \$750; to the McLean McLean car, \$200. The derailed tram suffered \$100 damage.

The front end swung to the west and, came to rest against the side of a second tram, operated by George Tanner.

Constable Spratt was aided by Sgt Reginald Raby and Constable Prosper Bruyere.

National Rly, Historical Men Visit Capital

The Midwest Chapter of the National Railway Historical Society, Inc., 330 members strong, visited Ottawa Sunday afternoon.

Behind Locomotive No. 2222, a 1927 model far removed from the Super Chief, they "roared" into the Capital from Montreal, where they are holding their annual convention.

Dressed in striped, peaked engineers caps and colorful windbreakers bearing railway badges and crests, they swept through the Union Station and out to George Loop, where they went on a street-car tour of the city.

Playing right along with the "historical" aspect, OTC General Manager Dave Gill placed four of Ottawa's real old timers at their disposal, including one of the wooden-sided "Toronto Boneshakers", and the oldest car still in use in Ottawa.

Touring Rail Lines

The society, which has its headquarters in Akron, Ohio, has toured most of the railway lines in the United States and Canada. The group yesterday was headed by W. L. Hay, chairman of the convention, and the president, G. E. Hooper, of Baltimore, Md., an executive of the Baltimore and Ohio Railway.

Their tour took them out the OTC's lines to Britannia, and Hull. They also visited the Parliament Buildings, stopped off at the Ottawa West railway yards of the CPR, and paid a brief visit to the OTC car barns near the yard.

The special" train on which they travelled from Montreal made up of old time wicker-seated, open-ended coaches and a diner, arrived at the Capital via the line through Montebello. Returning, they took the route through Vankleek Hill.

The group also toured Montreal and nearby points by ancient streetcars.

Three Shocked

Three persons suffered shock and traffic was snarled for more than half an hour when an OTC tram and an E.B. Eddy company freight car collided at the Eddy Street siding in Hull about 7.35 pm Saturday.

Treated at the Sacred Heart Hospital but allowed to go home were: Roland Gagnon, the tram operator, of 68 Rouville Street, Hull, Aline Lepine, of 402 Allen Boulevard, Eastview; Mrs. Paul Radakir, of 61 Russell Avenue.

The accident happened when the tram, northbound, crossed the train tracks of the E.B. Eddy Company on the Hull side and was struck on the right side by the westbound freight car.

The impact knocked both vehicles off their rails and shook the top of the freight car loose from its heavy wheels. Neither vehicle tipped over but the jar caused injuries to the tram operator and two women passengers.

With the freight car blocking Eddy Street and the north entrance to the Chaudiere Bridge, traffic was stopped for about 40 minutes until the heavy vehicles could be moved.

While no immediate reason for the accident was forthcoming, the Hull police are continuing the investigation. Saturday's accident was the second in less than a year at that level crossing. Last year two freight cars collided and tied up traffic for a considerable time.

The accident Saturday was investigated by Constable Herve Gauthier.

Tram-Truck Collision injures Four

Four persons were injured last night when a heavily loaded dump truck collided with an OTC tram on Somerset street, ripping 10 feet of the steel side out of the street-car.

The accident was at 9.15 on the south side of Somerset, 100. feet east of Percy street.

The injured

Injured was truck driver Robert Stanley Boyce, 25, of 168 Cambridge street; tram operator Keith Roe, 23, of 201 Friel street, and two passengers on the tram - Mrs. Alice Argue, 45, of 34 Murray street, and Ruby Maclaren, 20 Spencer street.

Boyce was admitted to Ottawa Civic Hospital suffering undertermined internal injuries. Mrs. Argue and Roe were treated at hospital for shock, cuts and bruises, but were allowed to return home. Miss MacLaren suffered leg cuts and bruises but was not taken to hospital.

The streetcar was proceeding east on Somerset and the truck, loaded with sandstone and grass sod, was travelling west. Police believe Boyce had been going south on Bay street and had turned right to go west on Somerset.

Tram ripped open

The left front corners of the two vehicles met and a large section of steel plating on the left side of the tram was ripped off by the box of the dump truck. The truck is owned by Foster R. Laughren, 105 Lebreton street, a landscape contractor. Bouce is employed by the firm.

Twisted steel, sandstone and glass were strewn about the street for 50 feet. Traffic was tied up for nearly a half-hour before OTC wreck trucks could clear the debris. A special tram was dispatched to pick up the 18 uninjured passengers from the damaged streetcar.

Mrs. Argue and Roe were taken to hospital by Wilson's Ambulance.

Damage to the street car was estimated at close to \$1,000 and to the truck at \$500.

Constable Thomas Glenn investigated.

1 Killed, 11 Hurt in Rush Hour

Pupils Among Injured

[photo - caption: The scene after the Churchill-Byron crash]

A fully loaded gravel truck rammed a 20-ton OTC tram sending 10 to hospital and a train killed a Gatineau man in Hull and injured his companion during the rush hour this morning.

Emile Lachaine, 55-year-old Gatineau building contractor died at the CPR's St. Henri Street level crossing when his small panel truck was demolished by a Montreal-bound passenger train at 9 a.m. His nephew, Robert Demors, 16, also of Gatineau was severely hurt.

Ten Go To Hospital

Half-an-hour earlier a heavy gravel truck had smashed into the rear section of an OTC tram at Churchill and Byron Avenues in Ottawa's West End.

[The article continues, but I stopped transcribing it.]

On page 7 of that same paper, there were two photos: CPR 1261 with wreckage of panel van on its pilot and a picture with the caption "inside the wrecked tram" from the OTC accident.

TRAFFIC JAM AS OTC TRAM DERAILED

Rush hour street car service suffered an upset shortly before 4 o'clock yesterday afternoon when a tram making the turn at the Plaza jumped a switch.

Some 30 cars piled up behind the derailed car tying up traffic in a solid line from Elgin Street to Bank Street.

Heavy snow in the switch was believed the cause of the derailment. A wrecking crew speedily put the derailed car back on the rails but, as a result of the tieup, cars were off schedule for some time until they could be re-routed.

23/08/1958 *Ottawa Journal**Ottawa Electric**Beechwood*

Ottawa Tram Nudges Shop Front

A tram which jumped the tracks on Beechwood avenue at McKay street about midnight stopped inches short of crashing through a store front and left 67 feet of gouged pavement and six feet of split rail. No one was injured.

A car driven by Guv Gravelle, 37, of 24 Carillon street was damaged by the tow-bar when the rear-end of the tram spun around.

Mrs. Ann Oakley, 336 Fairmont avenue, and two unidentified male passengers left the scene before the arrival of police. None reported injury to motorman Harvey Hubert Brown, 45, of 50 Bell street.

Brown told Constable Vern Johnston he was westbound on Beechwood when he felt the big vehicle lurch and veer sharply toward the sidewalk. OTC officials said they believed the derailment was caused by a wheel.

The tram stopped at the store front of Art's Smoke Shop, 27 Beechwood, a few inches in front of two plate glass windows.

Police measurement indicated the trolley travelled 31 feet on one rail before jumping off.

Force of the derailment split several sections of rail totalling about six feet.

Workmen put the street car back on course in an hour after towing it from the sidewalk with another tram.

Ten of Ottawa's oldest streetcars - some of them veterans of 44 years service on the Capital's streets, are on their way to the junk yard.

As part of the Ottawa Transportation Commission program of converting from trams to buses, these huge steel and wood trams were sold by tender and are being reduced to salvage.

One by one they are taken to the OTC's Richardson Road siding where they are stripped of their wheels and towed by truck to the wrecker's yard at the corner of Scott and Bayview Road.

it was originally intended to sell 10 of the old 600 class of street car built between 1913 and 1917.

It was later decided to keep three of the 600 class and dispose of three later-built trams that had been in accidents and would prove costly to repair.

All of the cars involved were built in the Capital by the former Ottawa Car Company.

They were offered for sale by tender to M. Zegerman [sic] and Company Ltd. for \$300 each.

Carted off to the scrap yard are seven 600-class trams built in 1914 and 1915; two of the 800-class, 806 built in 1924 and 843 delivered in 1925 and one of the 900-class 902 delivered in August, 1933.

The three 600 class trams got a reprieve and will be replaced as soon as the next group of new buses is delivered here. OTC manager of transportation, William Purdy told the Citizen today.

The big 600's plied mainly the Britannia line, carrying thousands of happy, carefree small fry and picnickers to the park and beach, over the decades. On weekdays they carried hundreds to work in the city's business section each day.

With their demise goes many a nostalgic memory, perhaps of harmless flirtations and budding romances struck up while hanging onto swaying straps in a crowded aisle.

The article is accompanied by two pictures showing a wheel being cut and a car being lifted off its trucks.

31/01/1959 *Ottawa Journal**Ottawa Electric*

Picture of 683 partially off a highway truck. "Desire" is in the destination blind.

Desire didn't quite make it.

This old OTC tram, christened "Desire" for her last trip, fell off the float truck hauling it to a junkyard yesterday afternoon. "Desire" destined to be cut up for scrap, created her last traffic snarl at the foot of the Wellington Street Viaduct at Bayswater Avenue. She was finally hoisted back on the truck and dragged to the rapidly filling graveyard for Ottawa's ancient trams.

Ghost Trains "Tip-Toe" Across City

If you see the old street car trundling down Sparks and other streets these days don't feel that the OTC has some second thoughts on its new bus services.

Some eyebrows were raised this morning when a street car was seen moving westerly along Sparks Street.

OTC General Manager explained that the car was definitely making its last run this time right to the scrap heap at Richmond Road and Richardson Avenue.

There are still a number that will have to make the final run from Cobourg Barns near Charlotte and Rideau.

Mr. Brady also said that the OTC now has in service 10 buses with double rows of seats on either side of the vehicle. Their main function will be for sight-seeing and charter runs within the city. These have a 51-passenger capacity, while the other 100 new buses have seats for 45.

13/05/1960 *Ottawa Citizen**Ottawa Electric*

Loses Legs Under Train, Man Passes

A 45-year-old man, George Joly of Rockcliffe Emergency Shelter, died early this morning in Sacred Heart Hospital in Hull, three-and-a-half hours after he was run over by an OTC tram near the Chaudiere Bridge.

He was taken to the hospital shortly after 10 o'clock, a few minutes after the accident occurred. On arrival, he was said by hospital authorities to be in a "critical condition". In spite of emergency medical treatment, he succumbed at 1.20 a.m.

The accident occurred near the north entrance of the bridge, directly opposite the Gatineau Power company's plant, just inside the Hull city limits.

Joly is believed to have fallen between the rails of the OTC west tracks shortly before the accident happened. He was not noticed by the OTC operator, R.

Sabourin, of 20 Joliette Street, Eastview, until a split second before the street-car passed over the spot where the man was lying.

The victim's left leg was amputated by the south-bound tram as it passed over his body.

The Injured man was taken to the hospital by Carleton Ambulance Co., and examination disclosed that his right leg was also crushed as a result of the accident, and he was suffering from numerous internal injuries.

Joly was treated at the hospital by Dr. J. Pichette, of Hull. The OTC operator told police that he had started on his run toward Ottawa, and was about to enter the bridge when he noticed a man's form lying on the tracks parallel, to the east rail. Although he threw the car in reverse it was impossible to brake the heavy vehicle in time to avoid the accident, he said.

Sabourin explained that the scene was almost in complete darkness. He stated that the beam of the street-car's headlight was too high to pick up the man's figure on the tracks.

Unaware that the accident had occurred within the Hull city limits bystanders advised the Ottawa police of the accident, and Constables Kenneth Duncan and Kenneth Johncox were rushed to the scene.

Noticing the plight of the injured man the two officers came to his assistance, and using their batons and emergency bandages applied tourniquets in an attempt to stop the flow of blood while awaiting medical assistance,

Hull-police were then notified and Constables A. Sauve and E. Lavergne ordered Joly taken to the hospital. Hull police completed the investigation.

With pictures of Bruce Dudley and streetcar.

Cars, buses hastened the demise of trusty streetcar

From 1870 to the early 1890's, horse-drawn cars formed the one-line Ottawa transit system.

By 1929, Ottawa's streetcar network served much of the area inside the then-city limits.

The wooden cars ran on rails around Confederation Square, along Wellington, Rideau and Elgin streets and, from 1897 to 1954, to Hull via the Inter-provincial Bridge.

Other lines, including the one to Britannia, didn't open until 1900, the year service was extended east to the Rifle Range, east of Rockcliff Park.

The southernmost line crossed the Rideau Canal on Bank Street, but looped around several South Ottawa streets,

short of the Rideau River. Another line ran to the Experimental Farm.

On May 2, 1959, the last of Ottawa's streetcars made its final run on the Britannia line, bringing an end to almost seven decades of streetcar service.

The history of the service is thoroughly documented in Bill McKeown's book. *Ottawa's Streetcars*, launched yesterday at OC Transpo headquarters.

Mr. McKeown, a native of Ottawa and resident of Japan since 1964, died there on Oct. 31, 2004.

The lifelong railway enthusiast writes of a period of failed plans, successful plans, competitors and backroom deals.

Before the service officially ended, it had become a shadow of its once prosperous self, a victim of the bus, which offered greater route flexibility, and the growth in private cars.

The most extensive abandonment of routes came in 1939 under the influence of the French town planner Jacques Greber, retained by the federal government to give Ottawa the look of a capital city.

Mr. Greber, in his wisdom declared streetcars passe, noting that Paris had torn up about 270 streetcar lines.

"Greber conveniently forgot to add that Paris was, literally, honeycombed with rail transit lines, albeit under the streets in the form of the Metro, where Ottawa had no such alternatives," Mr. McKeown noted dryly.

The book also looks ahead to the promise of light-rail transit, basically using updated streetcars.

While the O-Train's single route runs north-south, with an extension to Barrhaven, experience from earlier days would indicate a need for what many today say is essential, an east-west route.

Ottawa resident Bruce Morgan, a volunteer with the Ottawa Streetcar 696 Restoration, is one of those.

The group has been working to restore a 1917 streetcar that could be a special attraction on any light-rail system by 2008, when they hope to complete their labour of love.

Mr. Morgan said an east to west route would be a dramatic change and improvement for the system.

A north-south route "won't benefit the majority of people of Ottawa at this time," Mr.

Morgan said.

He predicts an east/west connection is only matter of time.

"The bottom line is always going to be dollars," said Mr. Morgan, who strongly believes that if Ottawa wants a successful rail-transit system, it needs a dedicated right-of-way, or should run underground, due to traffic congestion.

"I think, despite high costs there will be a tunnel under the city," he said.

The 256-page hardcover book is co-published by Railfare DC Books and the Canadian Railroad Historical Association.

It includes more than 300 photographs, collected by the author, of the city's streetcar history.

Before buses ruled the road, Ottawa's streets were laid with tracks to carry streetcars that zipped through the downtown core and beyond.

Though it's been 50 years since the cars were decommissioned, long-buried rails dug up recently during construction on Centretown streets are recalling the reign of the streetcar at a time when the Sparks Street BIA is urging its comeback alongside Ottawa's future billion-dollar transit makeover.

Holly Layte, along with members of the heritage committee, which she chairs for the Sparks Street Business Improvement Area, will be presenting a business plan to the BIA management board this December to reintroduce streetcars to Sparks Street.

Though modeled after the traditional streetcar, the proposed system will have an update on technology. The eyesore of overhead wires is a thing of the past, Layte says.

As one option, cars are able to run on circuits that pass from the track underneath them something the project may consider, Layte says.

The initial plan is for the new system to run from LeBreton Flats to the new convention centre at Colonel By Drive. Phase two includes a loop through Gatineau and the ByWard Market.

Layte says she believes Ottawa needs to revive the streetcar as part of the city's heritage, but it would still be a viable form of transportation and garner tourist attention.

"The renewal of the streetcar throughout North America is actually quite astonishing," she says. "Streetcars to Ottawa are like coffee and cream."

Though the project is only in the planning stage, she says they hope OC Transpo would adopt the system as a supplementary transit service.

With the push for rail elsewhere in the city, the project has added potential.

"The city should have never taken up the rail," says Somerset Ward Coun. Diane Holmes. "It's clear the citizens of Ottawa like rail."

The city itself has been pushing for a light-rail option following the success of the O-Train, she says, which has been running since 2001.

At the centre of that debate is what type of system best suits the needs of OC Transpo's almost 350,000 average weekday ridership.

The options range from automated light-metros like Vancouver's SkyTrain to streetcars the likes of Toronto's.

Colin Churcher, an Ottawa-based rail historian, says when the city decided to scrap the old rail system, the cars and rails were decrepit and in dire need of repair, which would have cost the city a lot of money.

But OC Transpo's website records that at its peak in 1929, the railway had a 30 million yearly ridership over more than 90 kilometres of track.

Considering the city's renewed interest in rail, Churcher says: "I guess we were caught in the times. If we'd known then what we know now, maybe we would have thought twice before we got rid of them [the streetcars]."

He said with new technology there are ways for rail to be sustainable and functional. "It doesn't have to be ugly," he says.

While the future of the Sparks streetcar project is uncertain, Centretown residents are backing the return of rail to the city, whether it is the renewal of the streetcar or light-rail transit.

"We need a downtown rail system," says Shawn Menard, Centretown Citizens' Community Association president. "I think it will only benefit Centretown citizens."

Menard says the CCCA has endorsed a streetcar-type system. A modernized version of what existed 50 years ago, Menard says, could fit the city once more.
