

# Local Railway Items from Ottawa Papers - 1888

**Tuesday 03/01/1888 Ottawa Journal Canada Atlantic**

The Canada Atlantic Railway Company have just received from their car shops three new snow ploughs.

**Thursday 04/01/1888 The Equity, Bryson Pontiac & Pacific Junction**

Piece on Coulonge Railway bridge - illegible. Built by Dominion Bridge.

**Friday 06/01/1888 Ottawa Journal Maniwaki**

Readers interested in the growth of the district will be glad to learn on the authority of Mr. Rochon M.P.P. that the Quebec government will grant a subsidy of \$6,500 a mile to the Gatineau Valley railway company for the first ten miles and \$4,000 per mile for the remainder of the construction. This subsidy was obtained through the efforts of Mr. H.J. Beemer, the president of the company.

**Friday 06/01/1888 Ottawa Free Press Pontiac & Pacific Junction**

On the road of the P. & P. Junction railway at a point about three miles above Aylmer, a snow plow lies down the embankment. It was accidentally precipitated there while going over the track a few days since and has not been raised yet. The locomotive was also thrown half off the rails, and before they could be cleared passengers had to be transferred over the route in sleighs.

**Monday 09/01/1888 Ottawa Citizen Carleton Place**

Yesterday morning a funeral special with Mr. H.B. Spencer and between four and five hundred railway employees went to Brockville to attend the funeral of Engineer Charles Atkinson. The engine was completely draped in black. The deceased's body came down on the Winnipeg train and thence to Brockville.

**Tuesday 10/01/1888 Ottawa Free Press Pontiac & Pacific Junction**

The morning trains on the C.P.R. were all on time this morning. The Pontiac train, due at eleven was a few minutes late. The conductors said the storm didn't cause any delays.

**Tuesday 10/01/1888 Ottawa Citizen Canada Atlantic**

The Canada Atlantic Railway will commence running a special service of heated freight cars between Ottawa and Montreal today (Tuesday) and will continue the same every Tuesday and Thursday until further notice. Also reported in the Ottawa Free Press same day.

**Thursday 12/01/1888 Ottawa Citizen Canada Atlantic shop**

Heating Cars by Steam. Once again the Canada Atlantic Railway have shown some of their enterprise, and intend in future to heat their cars by steam. Each car will be heated from the locomotive, and will have pipes running along the side with a coil under each seat. Rubber pipe connections are used between the locomotive and the different cars by which means they can be easily uncoupled. The Canada Atlantic is the first railway to adopt this system, which removes a great danger - that of fire from the heating stoves.

**12/01/1888 Brockville Recorder Westport**

B&W Station Construction

Mr. John Warwick who has the contract for building the station houses on the BW&SSM reports the work as going on splendidly. Those at Lyn, Unionville and Singleton's corners have been finished while the remaining six are all under way.

**Wednesday 18/01/1888 Ottawa Journal Ottawa City Passenger**

The Street Railway company have added to their winter service the elegant sleighs built by the Messrs. R. Shore & Co. of this city. The new sleighs are built of Black Ash nicely painted and comfortably cushioned. It is the intentions of the company to have ready for use in spring several new cars which will be built by the Stephenson Car Company of New York.

**Friday 20/01/1888 Ottawa Citizen Westport**

Before the 1st of February next it is said the Brockville, Westport and Sault Ste. Marie Railway will be completed from Brockville to Westport, a distance of about 45 miles and regular trains running. The objective point is Sault Ste. Marie where a connection will be made with the northwestern system of railways, the whole length of the line being 500 miles. Said Mr. Wood M.P., discussing the scheme yesterday, "It will be the shortest route between the "Soo" and the seaboard, inasmuch as it is an air line and by bridging the St. Lawrence at Brockville a connection will be formed at Morristown with a complete system of American railways. The local traffic will also be good, for the road so far runs through the eastern garden of the Province, and there are thirteen towns and villages along the line. The Canadian Pacific Railway will not be able to handle the freight of the Northwestern States, and our road, which shortens the distance to the seaboard by at least one hundred miles, cannot fail to control a large share of the through freight.

**Thursday 26/01/1888 The Equity, Bryson Pontiac & Pacific Junction Coulonge**

Coulonge notes. The ten miles of railway recently completed between here and Black River were inspected last week, and the work pronounced satisfactorily executed. It is not intended to open this portion of the road for traffic before next spring

**Friday 27/01/1888 Renfrew Mercury Westport**

Notwithstanding reports to the contrary which have been circulated, the authorities of the Brockville and Westport Railway say that it is their intention to give the public railway accommodation this winter, and that they expect to have the track completed so that regular trains can be run soon after the first of February. Of course the road will not be fully ballasted, but they say that it will be in such a condition that trains can be run with safety. Another locomotive and twenty more cars will arrive shortly. With respect to the numerous complaints that have been made respecting no pay for work done, it is stated that the men were informed that the next payday would be when tracklaying was completed, and was expected to be about the 20th day of January.

**Friday 27/01/1888 Ottawa Free Press Pontiac & Pacific Junction**

Quebec 27th. A case of considerable public interest was argued before Judge Caron in the Superior Court here yesterday. In September, 1881, the County Council of Pontiac voted \$100,000 to assist the building of the Pontiac and Pacific Junction Railway. The \$100,000 was represented by bonds, one half of which were negotiated or cashed by the Hon. J.G. Ross of Quebec, who now sues the provincial government to recover the \$50,000 as advanced by him. The government is the principal defendant, but the Pontiac county council has also been mis a cause. The plaintiff was represented by the Hon. G. Irvine and the government by the Hon. F. Langelier, and the Pontiac interest by Mr. McDougall of Aylmer. The construction work on the road, it appears, was stopped during two years owing to the fact that the contractors had to suspend payments. Since then the work has been resumed and the company now claim the amount of \$50,000. The defence pretend had pleaded that the bonds on which Senator Ross' action is based are worthless, as they were signed by a Mr. McNally instead of Mr. W.P. Poupore M.P.P. and warden of Pontiac county. It is alleged that Mr. McNally had no power to sign as warden of the county, as he had not been regularly elected to that office, but had obtained it by fraud, and that his partisans only made use of him for the purpose of signing the bonds, which, legally speaking, should have borne the signature of Mr. Poupore, the properly elected warden. This is the first time, it seems, that a similar question has been raised in Canada, and it is said that no matter what may be the nature of the judgment of the Superior court, there will be an appeal to the Privy Council.

**Saturday 28/01/1888 Ottawa Journal Pontiac & Pacific Junction**

\$50,000 wanted from Pontiac

Quebec - Judge Caron has reserved judgment on a case of considerable public interest here, namely a suit by the Hon. J.G. Ross, of Quebec, to recover \$50,000 from the Provincial Government and the County of Pontiac.

In September 1881 the County Council of Pontiac voted \$100,000 to assist the building of the Pontiac and Pacific Junction Railway. The \$100,000 was represented by bonds. Hon. Mr. Ross took half of these, paying \$50,000 to the company which was building the railway. He now wants to return the bonds to either the Government or the County Council and get his money back.

The defense pretends that the bonds on which Senator Ross' action is based are worthless as they were signed by a Mr. McNally, instead of by Mr. W.J. Poupore, M.P.P. and warden of Pontiac county. It is alleged that Mr. McNally had no power to sign as warden of the county as he had not been regularly elected to that office, but had obtained it by fraud, and that his partisans only made use of him for the purpose of signing the bonds, which legally speaking should have borne the signature of Mr. Poupore, the properly elected warden.

Senator Ross is represented by Hon. G. Irvine and the defendants by Hon. F. Langelier M.P., and Mr. McDougal of Aylmer, the former for the provincial government and the latter for the county.

**Saturday 28/01/1888 Ottawa Journal Westport**

Mr. James Carrol, foreman of the works on the Rideau canal, speaking to a Journal reporter about the construction of the new Brockville and Westport Railway, said the line is now entirely completed from Brockville to Westport with the exception of a gap of about five miles between Delta and Farmersville and the officials expect that gap will be closed, the line ballasted and in running order about the 15th of February. The stone piers for the bridge across the Rideau river at Newboro are already constructed and the ironwork for the bridge is now lying at Lyon on the C.P.R. (sic) ready to be shipped to Newboro as soon as the gap between Farmersville and Delta is completed.

The directors of the road intend giving a grand banquet at Farmersville, about the 15th of February, when the last rail will probably be laid. The passenger and freight equipment for the road has been ordered, and trains are expected to be running regularly between Brockville and Westport by the 1st of March.

**Monday 30/01/1888 Ottawa Journal Pontiac & Pacific Junction**

The Pontiac County Debentures now in dispute before the courts of Quebec have a history of their own. When the Pontiac and Pacific Junction Railway was first projected through the county the railway company, of which the Hon. L.R. Church was president, asked the people to assist the undertaking by granting a bonus. The president had represented Pontiac in Parliament, and exercised a good deal of influence, and the idea of having a railway caught the people's fancy at once. A vote was taken early in 1881 but the upper end of the county were not satisfied with the conditions and they voted solidly against the grant and defeated it.

In September 1881, another vote was taken to grant \$100,000 to the company, and this time it was successful. The present M.P.P. for Pontiac, Mr. W.J. Poupore, was then warden of the county. When the bonds were presented to him for signature he refused to sign them, claiming that the private guarantees promised as to when the road would run had not been given and he refused to sign away the people's money unless these guarantees were given. The guarantees, as understood at that time were that the road would be built within a fixed period of time, and should not cross the Ottawa river at any point east of Black river. In 1882 a new County council assembled in Bryson, the county seat, and Mr. Simon McNally was elected warden - illegally, it is claimed by some, and signed the debentures. They were deposited with the provincial treasurer and were only to be given out to the company as the road was built. Although the company failed and the construction was dropped for two years, the bonds were given over to the promoters of the road. Since then efforts in different directions have been made to relieve the county from redeeming these debentures which are for twenty years at six per cent interest. At one time negotiations were opened with the federal government with a view to assuming the bonds and relieving the people from paying them but the negotiations from one reason or another fell through. The Quebec Government, which Senator Ross is suing, is brought in because the people of the county claim that the debentures are invalid as the company did not construct the road within the specified time, and the provincial treasurer had no right to let the company have the bonds.

**Thursday 31/01/1888 Ottawa Free Press Ottawa City Passenger**

The street car company intend on making purchases of quite a number of horses this spring, when some at present in use will be retired.

**01/02/1888 Canada Lumberman Kingston (CP)**

The Rathbun Company, through their Kingston agency alone, have handled off the K. & P. railway 1061 car loads cedar posts, shingles, lumber and railway ties. This would make a train, with engines enough attached to move them, over eight miles long. This material, together with what has arrived from Ottawa and other points, makes 121 vessel loads shipped by this firm from Kingston during 1887.

**Thursday 02/02/1888 Ottawa Journal Pontiac & Pacific Junction**

The Pontiac and Pacific Junction Railway has just completed arrangements with the Canadian Pacific railway to run two trains a day into Ottawa from Calumet island, the terminus of passenger traffic on the new line.

**07/02/1888 Athens Reporter Westport**

Hervey to Give Banquet in Farmersville

It is rumored that the Contractor, Mr. Hervey, and the Provisional Directors of the B&W&SSM Railway will give a grand banquet in Farmersville about the 15th instant in honor of the opening of the road from Brockville to Westport.

Now that the railroad is about completed our village road commissioners should have preparations made to lay a sidewalk from Wellington St to the station the first thing in the spring.

The B&W Railway offices in Brockville have been removed to the Comstock Block.

07/02/1888 Athens Reporter Westport

Delta February 2 - Engine Goes By  
Hurrah for the railroad. We could see the iron horse today for the first time, and it was a welcome sight to all.

07/02/1888 Athens Reporter Westport

Westport Station Completed by Mr. Bolton - Laying of Switches to Start  
The station house at Westport is just about completed. Its neat appearance and fine finish as well as the despatch with which the work was executed reflects much upon the ability and workmanship of Mr. Bolton. The work of laying the switch here will be commenced immediately, when all will be ready for the arrival of the first train.

07/02/1888 Athens Reporter Westport

Phillipsville - Temperatures Plummet - Locomotive Off The Track between Phillipsville and Delta  
It has been some time since we saw any news in your paper from this place. I would have written you before, but the thermometer got so low that our ink froze, and we lost our jack knife and could not sharpen our pencil. But as the thermometer has come in sight again, we take this opportunity of writing you a few lines.

It is nothing new to hear that the engine is off the track on the B&W railroad. It took the boys about eight hours to get it on the track between this place and Delta, one night last week. The boys worked well without their suppers. The engine has been off the track ever since the B&W road was commenced, that is what is the matter.

Thursday 09/02/1888 The Equity, Bryson Pontiac & Pacific Junction Aylmer

Aylmer notes. The P. & P. J. has made arrangements with the C.P.R. to run two trains daily into Ottawa from Aylmer, the present terminus of the passenger traffic. This will be a great convenience to the people of Aylmer and vicinity.

Thursday 09/02/1888 The Equity, Bryson Ottawa, Arnprior and Renfrew Renfrew

Report from Renfrew Mercury about a meeting to incorporate the Ottawa, Arnprior and Renfrew Railway.

Thursday 09/02/1888 Ottawa Citizen Maniwaki

Mr. H.J. Beemer, President and Mr. J. Day McDonald, Secretary-Treasurer of the Pontiac Pacific Junction Railway, were in town yesterday on business connected with that enterprise. In conversation with a Citizen representative, Mr. Beemer said, "Yes, we are getting ready to begin work on the Gatineau Valley Railway. As soon as the sun gets through with its contract for removing the vast fields of snow which mantle the Hull mountains and the valleys thereof, the industrious navy and the relentless steam drill will begin the work of destruction. The Gatineau Valley quiet must be disturbed by the echo of the railway whistle, and that before very long. We have made good progress with our surveys, and with the opening of spring we expect to put on a good force of men. At the annual meeting the Board of Directors was reelected." Mr. Beemer also stated that he was making extensive arrangements for the continuation of work on the Lake St. John Railway and its branches. More about Lake St. John Railway.

Friday 10/02/1888 Ottawa Citizen Canada Atlantic

The Canada Atlantic Railway has just completed and put on the road a fine new snow plough which will replace the large winged plough which was badly damaged at St. Polycarpe. The new plough was made at the company's Elgin street workshops.

Friday 10/02/1888 Ottawa Citizen Canada Atlantic

Canada Atlantic Railway. Letter to the editor from Claxton: Extracts.

has travelled extensively in UK and France.

..when I took the 4.30 p.m. train from Montreal to your city. If my experience of railway travelling counts for much I can now with all confidence confirm that for speed, comfort and luxury of travelling the Canada Atlantic has no equal in Canada. I have been over them all, Montreal to Chicago and Montreal to the capital of the N.W.T. The cars on the Canada Atlantic are, I believe, the only cars in Canada which are heated by steam from the engine, doing away with the unsightly box stove in the corner, while the antiquated oil lamp has given place to the electric light, which enables passengers to read the smallest print with perfect ease. All this comfort is not confined to the luxurious Pullman, but is to be found in all the cars. I took a seat in the parlour car "Casselman" which only costs \$50 extra - a mere trifle compared with all the surrounding comforts. The attentive and courteous porter served up meals of a very high order at a very moderate cost. It would be well if some of our hotel keepers would ask and pay that porter for his recipe for making coffee. Now, Mr. Editor, your readers have my opinion of the Canada Atlantic as a mode of locomotion between your city and Montreal, and I think you will say, on reference to my card, which I enclose, that I am in a position to form and give an opinion.

Saturday 11/02/1888 Ottawa Citizen Canada Atlantic locomotive

The Canada Atlantic Railway Company have added a large new engine to their rolling stock. The size of the engine can be imagined from the fact that the tender carries eight tons of coal and 3,800 gallons of water. The new engine will run between Montreal and Ottawa.

Wednesday 13/02/1888 Ottawa Free Press Montreal and Ottawa Interprovincial Bridge

The engineer engaged in preparing the profile for the proposed interprovincial bridge was at work on the Ottawa river today.

Tuesday 14/02/1888 Ottawa Journal Lachute Gatineau

The Winnipeg express collided with an up freight train near the Gatineau River bridge this morning. No injuries Much more.  
The exact cause of the accident could not be ascertained as the train hands and officials of the road were all as dumb as oysters.  
Also reported in the Ottawa Free Press.

17/02/1888 Perth Courier Westport

Tracklaying Finished on Westport Division

Brockville, Ont. 15 February. Track laying was finished yesterday (Tuesday) on the Westport Division of the BW&SSM. The steel bridge across the Rideau at Newboro are being erected by the Dominion Bridge Co and is expected to be completed by Monday. Regular trains are to be put on between Brockville and Westport in a few days. The location of the line west of Westport is to be pushed vigorously.

Friday 17/02/1888 Ottawa Free Press Winchester Merrickville

No. 3 express on the C.P.R. between Toronto and Montreal was detained yesterday through a freight being off the track at Merrickville. When the freight was approaching Pike Falls, it was seen by the section foreman who, knowing that the express had not yet passed up, thought the freight intended waiting for the express on the siding at that point. He opened the switch and the freight under a full head of steam rushed into and through it. The derailment at the other end was the cause of injuring the engineer and throwing the brakeman from the top of the cars. Eight cars, two containing stock, were derailed. The accident happened about three o'clock in the afternoon and the track was blocked for four hours. The expresses both ways had to transship and return.

*17/02/1888 Perth Courier Westport*

Tracklaying finished on Westport Division. Brockville 15 February 1888.

Track laying was finished yesterday (Tuesday) on the Westport division of the BW&SSM. The steel bridge across the Rideau at Newboro is being erected by the Dominion Bridge Company and is expected to be completed by Monday. Regular trains are to be put on between Brockville and Westport in a few days. The location of the line west of Westport is to be pushed vigorously.

*Saturday 18/02/1888 Ottawa Free Press Chaudiere Chaudiere*

On the Canada Atlantic there have been very heavy shipments of lumber. More lumber is being shipped from the Chaudiere depot than from any other shipping point in Canada. The prospects are that the rest of the winter will show a continuance of the shipments on a heavy scale. The yard is full of loaded sleds waiting for cars.

*19/02/1888 Brockville Recorder Westport*

This morning a gang of Italians numbering between 40-50, who had been employed on the Brockville and Westport Railway, reached town. They were looking for their pay.

*Monday 20/02/1888 Ottawa Journal Canada Atlantic Greenfield*

The Canada Atlantic Railway Company have a gang of men at work removing the lumber and freight cars ditched below Greenfield on Friday morning. The damaged cars will be brought to Ottawa and repaired in the car shops.

*Monday 20/02/1888 Ottawa Free Press Pontiac and Renfrew Bristol*

The Bristol iron mine have just been closed down and 66 men have been turned out of employment for a few weeks at least, after which they hope to resume operations. A large gang of the unemployed men arrived in the city on Saturday night. Mr. Blackburn, of New Edinburgh, Mr. McGee of this city, and Capt. Sims of Ironsides are the shareholders in the mining syndicate which opened operations there last spring. The Bristol iron mine are said to be the richest in this section of the country. The ore is plentiful and is of good quality, excepting in places where it is tainted with sulphur. Captain Simms, the manager, has made a contract with an American firm, to melt the ore and extract the sulphur, but it was alleged that the work was not being carried out and the burners of the Bristol mine being out of order the company decided to close down until new burners would be built. The productions of the mines were in good demand in the American markets and were purchased in the original form at \$12 per ton by American smelters. The average production daily has been considerable less during the past two months due to the scarcity of water which compelled the manager to close down a portion of the machinery at times. Capt. Sims has left on tour through the American mining regions with a view to adopting some new methods and importing the latest and best designed machinery which will be put in operation when the work is resumed.

*Wednesday 22/02/1888 Ottawa Citizen Canada Atlantic*

Railway Workshops

His worship the Mayor is strongly in favour of having the workshops of the Canada Atlantic Railway built here and considers that the City Council should either grant a bonus or exemption from taxation as an equivalent. He has prepared the following letter which he will submit to a special meeting of council: A short time ago it was reported in the Ottawa papers that the Canada Atlantic Railway intended erecting their workshops at Clarke's Island. In view of the fact that the Canada Atlantic Railway property will be in the new territory added to the city it is highly desirable, and of the utmost vital importance that the workshops should be kept here.

Upon inquiry I find it is the intention of the company to locate their workshops at the point referred to, and commence work as soon as the weather will permit.

The reason assigned by the company for locating at Clarke's Island is that they own 120 acres there: it is in the centre of the road, and furthermore they can land their own coal at that point direct from the mines by water.

It is reported that the Valleyfield people are moving energetically in the matter, and will give a handsome bonus, exemption from taxation for a term of years etc.

The capacity of the new workshops will be very large, employing two hundred and fifty men at the commencement.

The Canada Atlantic Railway, in the very near future, will extend its line to Parry Sound. A bridge will shortly be erected at Coteau therefore the growing importance of this road can hardly be estimated. I think that a strong effort should be made to have these workshops here. Now is an opportune time when the bill is before the legislature of Ontario..

Would it not be wise, and in the best interest of the city to take prompt action in the matter and not have it said outside of Ottawa that Valleyfield had "stolen a march on us".

Leaving the matter to your favourable consideration, etc.

*Wednesday 22/02/1888 Ottawa Free Press Ottawa, Arnprior and Renfrew*

Bill in the Ontario legislature to incorporate Ottawa, Arnprior and Renfrew Railway. To be constructed from Ottawa to Arnprior and thence by way of Braeside to the village of Renfrew.

*Thursday 23/02/1888 Ottawa Journal Canada Atlantic*

There is quite a division of opinion with regard to whether the Canada Atlantic workshops should be bonussed by the corporation. Ald. Hutchison is firmly against anything in the shape of a bonus while Ald. Roger thinks that anything that would add to the wealth or population of the city should receive a reasonable encouragement.

*28/02/1888 Athens Reporter Westport*

Passenger Car Arrives in Brockville

The Recorder says that a passenger car for the B&W reached Brockville on Thursday.

Bridge in Place Newboro February 27 - The railroad bridge is placed in position and will be completed in a few days.

*28/02/1888 Athens Reporter Westport water*

Westport - Work on Turning Y Nearing Completion by Mr. Webster - Work Started on 500 Barrel Water tank Westport Saturday Feb. 25

Operations on the railroad are progressing favorably here. Mr. Webster has a gang of men at work laying the track of the turning Y which will be completed in a few days.

The building of a large water-tank of five hundred barrels' capacity was commenced last week. We expect the iron horse to make his first appearance in Westport this week.

*Thursday 01/03/1888 The Equity, Bryson Pontiac & Pacific Junction Aylmer*

For some time past the residents of Aylmer have been bothered by a shunting engine of the Pontiac and Pacific Junction Railway which has been kept running up and down the street upon which the track terminates frightening horses &c. At the last meeting of the council a resolution was passed requesting the Railway company to stop the nuisance by keeping the engine in their yard. The company complied with the request.

**Thursday 01/03/1888 The Equity, Bryson Pontiac and Renfrew Bristol**

The work at the Bristol has been stopped for a time. Work was progressing satisfactorily until it was found impracticable to continue shipping until a railway is constructed from the mine to Billerica, a distance of about four miles. The mining company, through the dilly dalling policy of the P. & P. J. Ry. company, is thus forced to abandon work until such time as they can construct and place in running order a railway of their own. Having this object in view, application has been made by the Bristol Iron Mining Company to the Federal Government for a charter to build a road, and it is hoped that the least possible delay will ensue in having the bill passed. There are now, lying at the mine, 8,000 tons of calcinated ore ready for shipment., which cannot be handled from the fact that it takes all the profit to haul it to the station, with teams , until a railway is built. More (interview with Capt. Symons.)

**Thursday 01/03/1888 Ottawa Citizen Canada Atlantic Elgin Street**

Man met his death at the Elgin Street station

Last night at about midnight a man was found horribly mutilated on the line at the east end of the Canada Atlantic station. Life was found to be extinct and word was at once sent to Constable McKenzie who was soon on the spot, and the police station by telephone, word being sent back to communicate with the coroner. A Citizen reporter visited the station at 1.30 a.m. and found Constable McKenzie at the depot. In answer to inquiries he stated that the man had been killed by the express which came in at 8.30 p.m., but was not discovered until midnight. It is thought that he got off the express on to the platform at the west end, and there being no passengers for the Chaudiere, the cars were backed into the shed. He must have then stepped off the platform on to the rails and been struck by the car of the attached engine kept to take the Chaudiere passengers to their destination. From this spot he was carried to the switch at the east (Elgin street) end of the platform where he was eventually found. The engine, after backing the car into the sheds went to the Chaudiere and must have passed a second time over the spot where the unfortunate man was found. He must have been first struck by the car at the west end of the platform as blood was to be distinctly seen on the snow there (as well as on the car). The body was fearfully mutilated, one leg being completely severed from the body and the other being broken in several places, the rest of the body, with the exception of the face being horribly cut up. Constable McKenzie searched the body which appears to be that of a man of about 33 years of age but could find no clue to his identity. He was dressed in dark home spun-clothes and had nothing in his pockets. At 1.45 a.m. Constable McKenzie left the station to telephone to Coroner Wright.

March 2 - The unfortunate man who was killed on Wednesday evening at the Elgin Street station was identified yesterday morning as Francis Deslaurier. The deceased lived about eight miles from Casselman and was a fairly well-to-do farmer. County Constable McKenzie notified Coroner Wright who visited the spot early yesterday morning and after inquiring into the facts of the case considered that an inquest was not necessary. Enquiries were then made by telegraph along the line which led to the body being identified. Friends of the deceased visited the depot and took the remains home on the noon train. Deceased was a man of about 60 years of age and leaves a family of grown up sons and daughters.

**02/03/1888 Perth Courier Westport**

First Train to Newboro. Brockville 21 February 1888.

The first train from Brockville over the BW&SSM arrived last Sunday with part of the bridge to be placed across the canal. The balance of the bridge arrived the following Monday and will be in readiness for the passenger trains next week.

**02/03/1888 Perth Courier Westport**

First Train to Newboro

Newboro February 21. The first train from Brockville over the BW&SSM arrived last Sunday with part of the bridge to be placed across the canal. The balance of the bridge arrived the following Monday and all will be in readiness for the passenger trains next week.

**Saturday 03/03/1888 Ottawa Journal Chaudiere Chaudiere Extension**

Mr. E.J. Chamberlain, general manager of the Canada Atlantic Railway Company speaking to a Journal reporter.

"When will the C.A.R. extension to the Chaudiere be completed?"

"There are two more arbitrations to come off before the right of way is secured, but it is expected that the cars will be running into all the mills on this side of the river before the close of the sawing season.

**Monday 05/03/1888 Ottawa Journal Canada Atlantic**

The Canada Atlantic Railway Company have just received from the Pullman Car Company two hundred freight cars which will be used during the coming spring in the lumber carrying trade on that line.

**Tuesday 06/03/1888 Ottawa Free Press Canada Atlantic Elgin Street**

It having been reported that the Canada Atlantic Railway were about to place gates on each side of their track at the foot of Elgin street and elsewhere, a Free Press reporter called on Mr. E.J. Chamberlain, general manager of the road, this afternoon at his office. Mr. Chamberlain said that it was not the intention of the company to place any gates on Elgin street, but when the road was running through to the Chaudiere they may place them at the crossing on Queen street. However, nothing definite has been decided on at present.

## The First Run of the B&amp;W

After years of patient waiting and hoping against hope, the long sought but much delayed train from Brockville to Westport is now an accomplished fact.

If the spirit of Allan Turner Esq. had been permitted to visit this mundane sphere and could have stood on the station platform as the train steamed into Farmersville station, he no doubt would have remembered the prophetic words we heard him utter 15 years ago I may not, and probably shall not live to see a train running between Brockville and Westport but I firmly believe that only a few years will pass before you take your first ride over the road. The railway was completed several days ago, except for the finishing of the iron bridge across the canal at Newboro which was finally completed last week so the railway officials sent out invitation to all reeves, deputy reeves, and several others to take a ride over the line last Saturday, March 4.

Accordingly, an engine drawing a baggage car and a passenger car was sent out from Brockville to Westport last Friday afternoon. On its arrival at the Westport Station, a good percentage of the population was at the station to see it pull in, and cheer upon cheer rang over the winter air. The residences of some of the leading men of the village were decorated with Chinese lanterns, those of Reeve Adams, and Rev. D.Y. Ross being the most beautifully illuminated. Unfortunately the wind came up during the night with d drifting, but it was decided to make the run just the same, and at 7 am, on Saturday morning the whistle blew a warning note that all was ready for the first passenger run.

Boarding the train at Westport were: W.J. Fredenburgh, E.J. Adams, W.J. Webster, H. Lockwood, George Fredenburgh. After a short run of thirty minutes, Newboro was reached where almost the whole village was out to see L.S. Lewis, J.U. N. Knowlton, W. Bass, James T. Gallagher, R. Blake, J.H. H. Cole, T.W. Preston, J. Webster, and C. English, board the train. Only a short distance had been traversed when the train came to a halt in a snow bank, and all train hands, and some of the passengers had to go to work with shovels, and at frequent intervals for nearly two hours there was a tussle with the snow.

At 10:20 Philipsville was passed and Delta reached at 11:10 where the passenger list was increased by T.K. Scovil, Portland; W. Richardson, Seeley's Bay; J.R. Dargavel, Elgin; and J.E. Brown, W.H. Denault, S.J. Seaman, D. Brown, And W. Robinson.

A Telegram was sent to Farmersville that the train was coming and would be carrying passengers, and at 12:15, it pulled into the station. Here, the Armstrong House bus and a team and a sleigh carried the passengers down to the hotel, followed by all the small boys of the community and watched by the rest of the population. After a hearty dinner was enjoyed as guests of the railway officials, the party returned to the train, accompanied by J.B. Saunders, W.G. Parish, Tom Berney, S.B. Williams, James Ross, J.C. Hannah, and Bethuel Loverin. From Farmersville to Lyn no drifts were encountered and the train arrived in Lyn at 2:20 where coal and water were taken on, and a quick trip over the GTR soon brought the train to Brockville.

Here a large crowd welcomed the passengers and carriages were waiting to take everyone to the Railway Company offices in the Comstock Block, where they were welcomed by Mr. Hervey who spoke on the building of the railway. He then invited all to be guests of the company at a sumptuous feast at the Revere Hotel. During the banquet, one of the party arose and said that they could not consider putting Mr. Hervey to the expense of returning them to Westport, and as many of the party desired to stay over Sunday in Brockville, they could do so, and the rest could arrange other transportation home. Several in the party were greatly upset, as they thought the train would be taking them home, but although Mr. Hervey offered to do so, his offer was refused by this party who said he had already been too kind. In fairness to Mr. Hervey, we will say that he provided carriages as far as Farmersville for all who cared to travel that far, and from this village, a livery bus was hired to return to their homes. But the rumor went abroad that Mr. Hervey had left the party to get home as best they could.

In speaking to the party from Farmersville, upon their return, they praised the officials most highly for their entertainment and excellent food provided. They spoke of the comfort of the coach, and their enjoyment of the trip.

## First Through Passenger Train

The first through train consisting of a locomotive and passenger car came in over the BW&SSM today (March 3) arriving at 1:40. The car was crowded with representations and leading citizens of Westport, Newboro, Phillipsville, Delta, Portland, Farmersville and other places.... The train left Westport early this morning but the road between Newboro and Farmersville was considerably blocked with snow and progress was slow. The run from Farmersville to Lyn, however, was made in good time, the 12 miles being covered in 39 minutes... On arrival, the party was driven to the offices of the company, Comstock Block and were afterwards entertained at dinner at the Revere House by Mr. Hervey, the contractor.

Ottawa Free Press

Maniwaki

A party of surveyors are at work blazing the route of the Gatineau Valley railroad in the vicinity of Kazabazua and Bochette (sic) villages. The surveyors think the old route can be much improved upon and considerably shortened. Building operations are expected to be commenced as soon as the snow goes and the property in several villages through which the road will run has enhanced in value since the survey has been made. The Desert will be the terminus of the road for a while at least and Mr. C. Legue and John Grace who are large property owners in that village estimate their property at several thousand dollars more since they have learned the route this road will take.

First Passenger Train Steams Into Westport February 29

On February 29th the first passenger train on the new B&W Railroad steamed into Westport. The next day it returned to Brockville carrying 15 passengers who said the ride was very enjoyable and the roadbed in good condition. A train will go from Brockville to Westport one day and back the next for a while yet and perhaps later the same train will return at night.

There was no great jubilation at Newboro when the first train came in. People at Newboro have seen trains before and they have heard so much blowing and puffing by certain of the officials they have already become tired of it.

Problems With Payment of Municipal Bonuses (Get a new copy of this item From Brockville Recorder

The matter of the payment of the bonuses to the BW&SSM railway company by the townships through which the road passes appears at last to be satisfactorily settled. The townships of Crosby, Leeds and Lansdowne, and the rear of Yonge and Escott each handed over to the trustees debentures in the amount of two thirds of the bonuses granted. On behalf of the company it is guaranteed that all the indebtedness contracted since the 1st of September 1887 shall be paid at once.

The Rear of Yonge and Escott, and Bastard and Burgess deposited each a portion of their bonds in the Bank of Montreal which for the present they retain control of as a guarantee for the payment of claims due in these townships under the above arrangement, the bonds to be released to the company as soon as the claims are paid. The remaining portion of the debentures will be handed over by the municipalities as soon as the road is fully completed and trains running. This settlement will aid in bringing about the early running of regular trains and be of advantage to all parties concerned. The Recorder

Freight Operations start; Snow Stalls Freight Train At Farmersville

Six carloads of lumber came in over the B&W on Thursday last for Mr. W.G. Parish. Two or three cars of general freight passed on to points along the line.

A freight train passed up the railway line yesterday but owing to bad snow drifts, it did not get through, and is now laid up at Farmersville station, awaiting more favourable conditions.

Westport March 9 The long talked of and long desired event, the arrival of the first train at Westport, caused considerable excitement in the village on the evening of February 29th when the locomotive steamed up to the station for the first time. On Friday night it returned with a passenger car to carry the excursionists to Brockville the next day. Those who had the pleasure of enjoying the first ride, were well satisfied with the condition of the road.

Mr. Fredenberg received a car load of wheat on Wednesday for the roller mill.

Newboro Monday Mar 12 The glowing account given by some of the papers out at the end of the line, regarding the recent excursion over the B&W to Brockville, would have been just as well had it been put a little milder. None of the citizens from here were at the station to see the train off but those who were to be passengers. There was no cheering unless it was to encourage a talented young gent in his efforts to catch the train after it had left the station, and in which effort he was successful. Most of the people in this Borough have seen railroads before, and all have heard too much puffing and blowing by certain of the officials of this road to crazy over one little excursion.

Bill to Amend By-Law; Payment of Municipal Bonuses; Payment of Creditors

The bill introduced in the Local Legislature, in the interests of Mr. Hervey, amending the charter of the BW&SS Railway, was withdrawn, excepting the clause giving the company power to construct a branch line to Lyndhurst, Morton and Jones Falls. But since the negotiations regarding the handing over of a portion of the municipal bonuses to pay off the debts contracted since September last, another clause has been added to the bill, providing that the councils of those municipalities, which have granted bonuses to the road, may, if they so wish, authorize the trustees appointed to have charge of the bonds, to turn over a portion of them to the railway company, before the road is fully finished and equipped, as required by the bonus by-laws, which provide that no portion of the bonus shall be payable until the road is completed and put in running order from Brockville to Westport.

The company had become financially embarrassed, and the only hope of a large portion of the indebtedness being paid was in the municipalities coming to the help of the company and granting them the right to dispose of a portion of the bonuses. We understand that the money received on these bonuses can only be paid over on the condition that the debts contracted subsequent to the 1st of September last are paid in full, the balance, if any, to go to the contractor, Mr. Hervey. In connection with this arrangement an agreement was entered into whereby a committee was appointed who have power to hand over the money granted, only when they are satisfied that those debts have been cancelled. The worst feature of the whole case is the failure of the company or the custodians of the bonuses to make any provision for the payment of the old debts incurred by contractors prior to the first of September last. Hundreds of hard working mechanics, tradesmen and laborers have been kept out of their honest dues for months and under the present arrangement the prospect of their ever getting anything is very small indeed.

Money Still Not Paid

Phillipsville Monday March 26 When may we expect the railroad money? is the first question that is asked, just now.

Farmersville - The officials of the B&W RR were at their office here on Saturday last paying off a large portion of the indebtedness incurred since September. We learn that the construction men will be put at the work of getting out fence posts at once, so that the line can be fenced as soon as the frost is out of the ground. A few days more of warm weather will thaw the ice from around the ties so as to allow the gravel trains to commence work. A large number of gravel cars are lying at the station ready to be used for ballasting.

Wednesday 28/03/1888 Ottawa Journal Chalk River Carleton Place

The Canadian Pacific Railway Company have a large gang of men engaged at Carleton Place making extensive repairs to the station house there.

Friday 30/03/1888 Renfrew Mercury Kingston (CP)

Deputations from various points are going or have been to Ottawa to ask the Government for a grant of \$100,000 towards the proposed railway from Flower station, K. & P.R. to Carleton Place, via Lanark and to confer with capitalists regarding the proposed scheme.

Monday 02/04/1888 Ottawa Free Press Sussex Street Sussex Street

The old hay shed in the St. Lawrence & Ottawa Railway yard, near Sussex street, is again being made the rendezvous for disreputable characters at night. Unless looked after by the police, it will soon be torn down entirely.

Wednesday 04/04/1888 Ottawa Journal Montreal and Ottawa

While the Lower Town people are figuring on getting a bridge across the Ottawa at Rockcliffe which they naturally conclude would, commercially speaking, give a great impetus to that part of the city, a surprise is in store for them, which, as a means of bringing in trade will throw the bridge scheme far back. The surprise is that it has been decided that the Prescott and Vaudreuil Railway from Vaudreuil to Ottawa is to commence almost at once. The road is to traverse the counties of Prescott and Russell.

The route of the road has been laid out and by this survey it will make the distance between Ottawa and Montreal at least sixteen miles shorter than by any of the present routes.

A company has been formed for the prosecution of the work and a charter granted. The Dominion Government has subsidized the road from Vaudreuil to Hawkesbury, a distance of 30 miles, with \$3,200 a mile. The Quebec Government give the road for thirty miles for 10,000 acres per mile, and the Ontario Government are also expected to come down handsomely. It is expected that the counties interested, Prescott and Russell, will project their assistance in the form of a bonus.

The road will connect with the Grand Trunk at Vaudreuil and will tap Hawkesbury, Vankleek Hill and several other large centres of population. Where in Lower Town the road will come in has not yet been determined, but it is not unlikely to run to run into the city near the St. Lawrence and Ottawa station.

It is understood that the right of way for the new road has been secured and that building will begin from Vaudreuil as soon as the weather permits. The country to be traversed is described as very easy for construction, very little bridging required. There is no question that should this road be pushed through it will give the lower portion of the city an impetus of a big size, bringing, as it would, trade from two large counties as well as Montreal and other points.

Thursday 05/04/1888 Ottawa Citizen Montreal and Ottawa Vaudreuil

The Prescott, Ottawa and Vaudreuil Railway intend commencing work at Vaudreuil as soon as the snow has disappeared.

**Thursday 05/04/1888 The Equity, Bryson Pontiac & Pacific Junction**

A gentleman related to us the other day that after dark sets in there is not enough light on the passenger train of the P. & P. J. to read a newspaper, and on inquiry he learned that the management would not allow the lights to be turned up higher as it was too expensive buying coal oil and if the lights were turned beyond a certain mark the lamps would smoke for which the man having the superintendence of this particular part of the train's paraphernalia, was subject to a fine. The economy practised by the officials - the high up fellows we mean - is reduced to a science.

**Saturday 14/04/1888 Ottawa Journal Canada Atlantic Ottawa East**

The residents of Archville complain that every Sunday, for some time back, the sanctity of this day has been broken by the unnecessary and obtrusive whistling and puffing of a shunting engine in the C.A.R. yards south of the bridge. The nuisance, they say, is especially despicable while they are at church.

**17/04/1888 Athens Reporter Westport**

Mr. Smellie, Chief Engineer In SS Marie Making Preliminary Arrangements to Purchase Land - Credibility of B&W Has Completely Vanished - One Lifting Gang at Work Fixing Error of Last Winter

Sault Ste Marie April 12: Mr. Smellie, the Chief Engineer of the BW&SSM Railway has been in town making preliminary arrangements for the purchase of the right of way and grounds for station, workshops and yards for this line. This company will build an independent line from Brockville to this place passing through the town through the fourth concession of park lots in close proximity to the Wawanash Home. The passenger station, it is expected, will be between Pim and Wilson streets or at the intersection of the railway line with one of them. Work is rapidly progressing on the eastern portion of this road at the present time and construction will commence at this point at an early date.

The above press despatch illustrates the truth of the old adage that one must go from home for news. We have no difficulty in believing that the Company's engineer was at the Soo purchasing station grounds, right of way, etc, for events have proved that the B&W is ready to buy anything that can be negotiated and to undertake any work which can be done on the long credit plan. But when pay day comes, the company fails to redeem its pledges. Happily, the credit of the B&W has reached, in the estimation of the people here, that point where confidence has entirely vanished. We say happily, because the credit of the company gone, people will cease to be victimized by its unfulfilled promises and dishonored engagements. The statement that work is progressing rapidly on the eastern end will be read with astonishment by those who know the facts. We believe we are within the mark when we say that the total force now at work is comprised in one lifting gang of not more than twelve men, all told. These could not even counterbalance the destructive work of the elements, even if their efforts could be directed to that end. The work they are actually engaged in however, is that of rectifying the errors in the construction work performed last winter, for instance, tearing up rails and cutting off portions from them to allow for expansion, a property of iron which seems to have been totally lost sight of last winter by those who superintended the work. Instead of rapid progress in the work of lifting and ballasting, the very reverse of this is the case, and if more energy is not put forth, the track, never in proper shape will rapidly deteriorate until it becomes utterly unfit to bear the passage of even a hand car over it.

The finances of the company, so far as we are able to judge from the facts at hand, are in an equally unsatisfactory condition. The sums which have been paid out for work and supplies in accordance with arrangement agreed to by the company and the municipalities granting the bonuses have been comparatively small, and we hear complaints on all sides of hardship occasioned by the company's failure to pay. It is reported and we believe correctly that the company received over forty thousand dollars of bonus money, instead of the smaller installments which, it was generally understood, were to be handed over under proper safeguards to ensure the money reaching the creditors. Where the money has gone to, Contractor Hervey could tell, if he would. Why it was that the people's representatives in the township councils so bungled as to permit the company to grab such large amounts, without precaution on the part of the municipalities to see that the money was applied to its legitimate use is a question which the ratepayers immediately interested would like see answered.

**Tuesday 17/04/1888 Ottawa Journal Canada Atlantic locomotive**

The Canada Atlantic Railway Company have just had placed in their train service between Ottawa and Montreal the locomotive purchased a couple of weeks ago at Philadelphia.

(80 years ago) Second Train of the Season Leaves Brockville

The second Sunday train of the season left here early Sunday morning (from Farmersville) and in the absence of Supt. Mooney, the despatching orders were given by Assistant Supt. Fowler. The train consisted of engine and tender and baggage and passenger car. The orders were to make the round trip in one hour and twenty-nine minutes. The train got off to a good start and arrived in Delta in twenty-one minutes. Here a short halt was made for refreshment. Beyond this point no time was kept, but when the train did not arrive back in Farmersville at the appointed time, the assistant superintendent concluded that something must be wrong. The telegraph lines were down and there was no way to find out what the matter was. Patiently he waited. One, two, three - five long hours sped by, and no train. Finally, he hired a livery horse and started up the line at a fast rate of speed. At Delta the train was observed standing on the track, but all passengers had flown. Inquiry revealed all were at the hotel enjoying refreshment and playing cards. The assistant supt. concluded that as the excursionists were so anxious to remain in Delta, they could stay there and, arranging for a boy to drive his livery rig back, he brought the train to Farmersville. The party of happy excursionists started for home by the tie sidewalk, and reached here just as the shades of evening fell.

**Tuesday 17/04/1888 Ottawa Free Press Ottawa City Passenger**

The street railway company have for some days been picking away the ice about the rails of their tracks with, in some cases, anything but pleasant results. The debris thrown on each side of the roadways is an inconvenience to those wishing to get from vehicles to stores and the ruts made in the roads are a nuisance to parties driving.

Delta - Brockville, Westport & Seldom See Money

Mon. Apr 23: It has been suggested here that you add one other appropriate appellation to our little railway and that is the Brockville, Westport and Seldom See Money Railway.

**Thursday 26/04/1888 The Equity, Bryson Pontiac & Pacific Junction Aylmer**

Aylmer. The Times says:- Down by our depot there is a considerable bustle and noise of late. Anyone standing there on Monday morning as the overcrowded Pontiac train came in, and two acres of cars from Ottawa rolled into the station would not say that Aylmer was going behind. Fifteen years ago the one who would tell us that such a sight could ever be seen at our Union Depot would be taken for a fool. And yet there it is today, in all its iron reality and strength of steam. Aylmer is keeping pace with the time and is yet destined to be the Bath or the Rockaway of the Canadian Capital.

**Thursday 26/04/1888 The Equity, Bryson Pontiac & Pacific Junction**

The Pontiac train suffered an accident last Friday. The driving shaft broke when near Coulonge. The engineer, however, succeeded in getting the train into the station.

On Friday night as the passenger train entered the yard at Coulonge one of the valves on the locomotive broke rendering it incapable of proceeding further. The passengers had to walk the short distance to the station. The services of another engine were secured to take the train down the next morning. The disabled engine was repaired and followed the morning train down a few hours afterwards.

Campbell's Bay. It is said that the P. & P. J. will soon begin to draw ballast from the gravel pit at this place.

**Thursday 26/04/1888 Ottawa Journal Tramway E.B. Eddy**

The E.B. Eddy Manufacturing Co. have completed the usual repairs to their mill buildings, machinery --- and in addition are just completing the construction of a new trainway system in which locomotives are used to convey the lumber from the platforms to the piling grounds.

**Friday 27/04/1888 Ottawa Free Press Sussex Street Dalhousie street**

The crossing at the railway track on Dalhousie street is in a very bad condition. It is worse than going over a corduroy road to cross it in a vehicle. The spaces between the rails should be filled in with planks. The cost to the company would be a trifle and the convenience to the public considerable.

**Friday 29/04/1888 Ottawa Citizen Canada Atlantic**

The rapidly increasing traffic over the Canada Atlantic Railway Company's line has made it necessary for the company to purchase considerable new rolling stock recently. The last addition is in the shape of twenty-five freight cars from Pullman which will be used for carrying lumber.

**01/05/1888 Canada Lumberman Tramway E.B.Eddy**

We learn from the Ottawa Journal that Mr. Geo H. Millan, mechanical manager of the E.B. Eddy Co., has gone to New York for the purpose of making inquiries and obtaining information respecting a number of small yard locomotives which will be used in the extensive lumber yards of the firm at Hull for hauling lumber. The firm have come to the conclusion that much more and better work can be done with locomotives than with the horses used at present. The introduction of locomotives will, however, necessitate the laying of new rails in all parts of the yard which will take a considerable part of the summer to complete.

**01/05/1888 Athens Reporter Westport**

As so many men working on the B&W railroad have not been paid in some time, the railroad is now going by a nickname, the Seldom See Money Road. The Recorder announced that ballasting would be commenced on the B&W yesterday, but there are as yet no signs of activity on the line.

**01/05/1888 Athens Reporter Westport**

Unpaid Workers - Cars and Broken Engine On Line

Sat. 28 Apr: Your graphic description of the progress of the BW&SSRR and the manner in which the business has been conducted is true as parties here waiting for their pay can testify. The only signs of a railroad to be seen here are the number of cars and a rusty broken-down engine standing on the line. Perhaps they are waiting for the cold weather of next winter to contract the rails so they will not require cutting, as there is not a man at work on this end by the line that I know of.....A number of laborers, who have been waiting for B&W pay and expecting to get work in the GTR ballast pit have been sadly disappointed as the pit is being worked by a large gang of Italians. This is much to be regretted as it will be a great loss to the merchants and others indirectly.

We sometimes hear of persons kicking themselves. Perhaps the reeves who allowed Mr. Hervey to comb the wool over their eyes, can kick each other. It seems strange that in a country where the laws are supposed to protect the working man, there should be no way in which a contractor or builder of a railroad can be got at summarily when they fail to meet their payment of wages.

**Wednesday 02/05/1888 Ottawa Journal Canada Atlantic**

The Canada Atlantic Railway Company have taken a new departure and one which will greatly aid the lumber interests of the city. They have completed arrangements by which they can take lumber shipped from Ottawa to New York by rail to Rouse's Point and thence by barge to Albany and New York. Shorter route than water to Sorel and Richelieu River to Lake Champlain. More

The Canada Atlantic have since their inception been the great lumber carrying line from Ottawa, but until the present have not been able to quote rates as low as the carriers by the Ottawa river. These new rates are actually lower than the all-water route, and in addition the lumber is carried to its destination much quicker than it would have been by barges.

The company expect to do a rushing business this summer.

The new arrangements will not affect local forwarders, as most of them have contracts with the lumbermen spreading over a large number of years, but it will affect the owners of American bottoms, which are supposed to carry most of the transitory trade.

**Thursday 02/05/1888 Ottawa Citizen Tramway E.B. Eddy**

The E.B. Eddy Manufacturing Company have completed the grading and laying of their new track and the locomotives have begun their work. They are found to work admirably and are far handier than horses.

Ottawa Journal - the E.B. Eddy Manufacturing Company have completed the work of grading their new tramway track through their lumber yards and the locomotives began work yesterday, hauling lumber from the mills. The new idea of using locomotives instead of horses is found to work admirably.

**Thursday 03/05/1888 Ottawa Journal Buckingham Buckingham**

The new Canada Phosphate Company of Buckingham made their first shipment of phosphate this season on Monday last, when 100 tons were shipped to Boston markets.

**Thursday 03/05/1888 Ottawa Journal Carleton Place**

The Canadian Pacific Railway have a large gang of men working between Ottawa and Carleton Place reballasting their track which in places has been washed out by spring rains.

**Thursday 03/05/1888 Ottawa Journal Canada Atlantic Bearbrook**

The Canada Atlantic Railway have a gang of men engaged reballasting their tracks down about Bearbrook where a portion of the track was washed out by spring rains.

**Thursday 03/05/1888 Ottawa Free Press Ottawa City Passenger**

About four o'clock yesterday evening the horses attached to No. 10 street car took fright at the tongue of the car failing near New Edinburgh and made several desperate attempts to get away. The driver and conductor held them but the tongue of the car was broken and one of the horses was slightly damaged.

**Thursday 03/05/1888 Ottawa Free Press Ottawa City Passenger**

The street railway company has put a conductor on each car since the death of the unfortunate newsboy who was killed by a street car a few days ago.

**Thursday 03/05/1888 The Equity, Bryson Pontiac & Pacific Junction**

Several washouts are reported on the P. & P. J. Railway above the Coulonge village. There is one opposite Creighton's Lake said to be about 60 feet wide.

**Thursday 03/05/1888 Ottawa Free Press Carleton Place Britannia**

There are some 500 people already out at Britannia for the summer. They are applying to the C.P.R. railway to grant them a local train and also to put up some sort of a shelter at the station.

**04/05/1888 Ottawa Journal Canada Atlantic McAuley's siding**

South Indian May 1 - A painful and probably fatal accident occurred yesterday morning at McAuley's siding, two miles below here, which may result in the death of Mr. A Paquette an esteemed resident of this place. It appears the workmen belonging to Mr. McTavish's saw mill were placing cars for loading and Mr. Paquette, in attempting to cross the track, was crushed into a space of not more than six inches, between two loaded cars, the cars bounded back from the force of the concussion and poor Paquette fell unconscious. More.

**Friday 04/05/1888 Renfrew Mercury Pontiac & Pacific Junction**

The Aylmer Times says that Chief Engineer Dale Harris of the Pontiac Pacific Junction Railway has gone up the line to finally locate the work from the Ontario approach to the bridge across the Ottawa river at Allumette Island to Pembroke, a distance of about three miles. The bridge will cost over \$2,000,000 and it will probably take a year to construct it.

**Friday**      **04/05/1888**      **Renfrew Mercury**      **Belleville**      **Perth**

The Courier says the men in the Perth carshops will be asked to work four days in the week overtime during the summer in order to increase the output of cars from six to eight per day.

New station on the C.A.R.

The St. Justine station, located between Glen Robertson and St. Polycarpe Junction on the Canada Atlantic Railway, is now completed and ready for business. Mr. A.I. Page has been appointed agent at the above named station.

Journal - Mr. A.L. Lepage of this city has been appointed station agent for the Canada Atlantic Railway at their new station, St. Justine, situated between Glen Robertson and St. Polycarpe Junction.

**Tuesday**      **08/05/1888**      **Ottawa Free Press**      **Tramway**      **E.B. Eddy**

The E.B. Eddy company of Hull completed the laying of the track through the large and extensive lumber yards on Saturday and at 6 o'clock this morning not less than two thousand hands went to work and the large sawmill with the new system of drawing lumber by locomotives was put in operation. The engines are run in almost to the saws and there are two crossings on Albert street in addition to the crossings on the main street from the mills. The engines are called "Nettie" and "Ella C," the latter after Mr. Eddy's daughter and the former after the daughter of Mr. Millan, the general manager. The saw system will be a saving of 42 horses and about 64 men and the platform can be kept clear much more conveniently than before. The trains of lumber are carried about a mile and a half to the furthest point of the piling ground in about four minutes.

Mr. Eddy said he could handle about half a million feet of lumber a day and he intended to put on a night gang as soon as possible. They would not use the engines at night but would pile the lumber in the yard and would have a force of about four hundred men for piling alone, and their cutting facilities, they are satisfied, are the largest in Canada. --

A new engine house has been built and the engineers are Mr. Brown and Mr. Butler, an old employee of the firm has been put on as an assistant for the present. The mills run from 6 in the morning until half past six in the evening.

**Thursday**      **10/05/1888**      **Ottawa Free Press**      **Tramway**      **E.B. Eddy**

Mr. E.B. Eddy's locomotive system of carrying lumber through the yards is working very satisfactorily. Every precaution is being taken to avoid accidents with the engines. The two crossings on Albert street are being guarded by a man in addition to the signals.

**Thursday**      **10/05/1888**      **The Equity, Bryson**      **Pontiac & Pacific Junction**

On Tuesday last the P. & P. J. pay car went up the line.

**Friday**      **11/05/1888**      **Ottawa Free Press**      **Ottawa City Passenger**

Last night about nine o'clock there was a regular jam of the street railway cars at the corner of Rideau and Sussex streets. Three cars were all stuck in one time in a lump there and all filled to overflowing. Some stupid party started a report that some had been run over by the cars and in a short time several hundred persons were at the spot looking for the accident.

**13/05/1888**      **Brockville Recorder**      **Westport**

Controlled Payment of Municipal Bonuses

The matter of the payment of the bonuses to the BW&SSM railway company by the townships through which the road passes appears at last to be satisfactorily settled. The townships of Crosby, Leeds and Lansdowne, and the Rear of Young and Escott each hand over to the trustees debentures in the amount of two-thirds of the bonuses granted. The township of Bastard and Burgess hands over one half the amount granted. On behalf of the company it is guaranteed that all the indebtedness contracted since the 1st of September 1887 shall be paid at once. The Rear of Young and Escott, and Bastard and Burgess, deposit each a portion of their bonds in the Bank of Montreal which, for the present, they retain control of as a guarantee for the payment of claims due in those townships under the above arrangement; the bonds to be released to the company as soon as the claims are paid. The remaining portion of the debentures will be handed over by the municipalities as soon as the road is fully completed and trains running. This settlement will aid in bringing about the early running of regular trains and be of advantage to all parties concerned.

**17/05/1888**      **Athens Reporter**      **Westport**

(WBW) Boxcar Dumped Into Canal at Newboro Malicious persons have committed a very mean act at Newboro on the Rideau a Canal. A box car was left on a branch track of the B&W which connects the main line with the water. On Tuesday evening the car was pushed into the water. It greatly interferes with navigation at Newboro. The Rideau Belle found considerable difficulty Wednesday in reaching the dock.

The Gatineau Valley Railway Company give notice that at the present session of the Quebec Legislature they will apply to have their act of incorporation amended so as to prolong the time of commencing the work of construction on the proposed line of railway.

**Monday**      **21/05/1888**      **Ottawa Citizen**      **Canada Atlantic**

The Canada Atlantic Railway Company intend repairing their line all the way to Coteau during the summer. They have put on a number of new hands for ballasting.

**22/05/1888**      **Athens Reporter**      **Westport**

Complaint on First Run Editor Reporter: A glowing description of the first grand excursion over the B&W appeared in the Times on the celebrated wool combing occasion. It was headed R.G. Hervey on Deck, and I thought at the time that the heading was suggestive, and subsequent events have proved that my thought was justified. Leaving aside all disregarded promises of payment of wages, what are the facts today? Farms are cut up and the time is not fenced, causing great inconvenience and loss to farmers. The road crossings are almost impassable, and there are other crying grievances which could be mentioned. How long will these things continue? If a private individual were to block up a highway, he would soon hear from the authorities. The writer had occasion to drive from Lyn to New Dublin, by way of Glen Buell encountering four railway crossings, all of which, excepting the one over the Victoria road, are positively dangerous. The one on the side road at Glen Buell is quite impassable, and I was obliged to turn back and go round by the school house corner. Perhaps, when the township is called upon to pay a bill of damages, the authorities will wake up. In the meantime the times is correct; R.G. Hervey is on deck. Sufferer.

**Friday**      **25/05/1888**      **Ottawa Citizen**      **Canada Atlantic**      **Elgin Street**

Departure of Lord Lansdowne. Station decorated, speeches etc. Train went direct to Quebec.

Lifting Gang Finishes Farmersville to Delta - Stranded Engine and Boxcar North of Delta Rescued - Lewis, Knowlton & Webster Awarded Contract for Lyn to Brockville - WJ Webster of Westport Awarded Contract for Fences and Telegraph Poles

The prospects for the early completion of the B&W have brightened somewhat during the past few weeks. The lifting gang have the road in passable condition from this village (Farmersville) to Delta, and the engine, tender and boxcar, that stood on the track near R. Kelly's for a couple of months was brought down to the village one day last week. The engine was run out to Delta and some dozen flat cars also brought to this station. The work of lifting the track, cutting off rails, &c., between here and Lyn is slowly progressing and one of the officials told our reporter that it would take between one and two weeks to reach the latter place. Meanwhile report says that Messrs Lewis, Knowlton & Webster have got the contract for completing the road between Lyn and Brockville and a portion of the plant used by this firm in building the section near Newboro went through this place yesterday. Lewis & Knowlton are pushing contractors, and if they are only furnished with funds will soon finish their part of the work. They had the reputation of being the most reliable contractors on the line, always paying promptly as they promised, and we hope that they have got this contract so as to sustain their own reputation and also put a little confidence in the general manager. It is also understood that W.J. Webster of Westport, has the contract of putting up the fences and telegraph poles along the line.

**Saturday** 26/05/1888 *Ottawa Journal* *Canada Atlantic*

The Canada Atlantic Railway Company have just received from the Pullman Company a train of thirty-two freight cars which will be used this season for hauling lumber.

**Tuesday** 29/05/1888 *Ottawa Journal* *Tramway* *Perley & Pattee*

The lumbering firm of Perley & Pattee have a gang of men employed in making improvements to the tramways used to convey sawn lumber from the mills to the piling grounds.

**Wednesday** 30/05/1888 *Ottawa Citizen* *Tramway* *Hurdman's mill*

Messrs. Hurdman and Co. have a complete system of tramways from their mills to the yard.

**Thursday** 31/05/1888 *Ottawa Citizen* *Chaudiere* *Chaudiere*

The Chaudiere Extension line and the Coteau Bridge questions will come up at a special meeting of the C.A.R. Company to be held on the 26th June.

**Thursday** 31/05/1888 *The Equity, Bryson* *Pontiac & Pacific Junction*

Construction will be resumed on the P. & P. J. R'y. during June, when the road will be rapidly pushed to Pembroke.

**Friday** 01/06/1888 *Renfrew Mercury* *Westport*

Commercial travellers who have been driven from Brockville to Westport along the line of the Brockville and Westport railway, tell startling stories of the character of the line. "An engine with a car in front and two behind, with goods for Delta, is dead in a lonely section of woods" said a traveller. "The reason it cannot proceed is the horrible condition in which the line is in. The money spent in constructing the road is practically lost because of the slovenly and unworkmanlike way in which it has been done. No allowance was made for expansion and as a result when the warm weather struck the irons they stretched themselves and as a consequence were lifted upwards and outwards and in many places at the ends are raising up to the height of two feet. The ties are clinging to the rails to which they were spiked. The rails now, owing to their warped condition, are unfit for further use. I guess there will be no traffic over the line for a further year."

**Friday** 01/06/1888 *Ottawa Free Press* *Chaudiere*

A flagman should be placed at the cutting on Concession street, Mount Sherwood, by the railway company. It is said to be a bad place where drivers cannot see when a train is coming past until they are right up to the track.

**Friday** 01/06/1888 *Renfrew Mercury* *Kingston (CP)* *Kingston*

The K. & P.R. have received an order from the C.P.R. Co. for 150 more freight cars.

**Saturday** 02/06/1888 *Ottawa Free Press* *Ottawa City Passenger*

The Street Car company have an elegant new car placed on the road. The new vehicle completely throws the old ones into the sheds.

**Monday** 04/06/1888 *Ottawa Journal* *Article* *Dr. Bergin reference*

Negotiations, so the stories go, are on the tapis for the purchase, by a syndicate of that part of the C.P.R. line extending from Ottawa to Montreal and Quebec.

Mr. Beemer, Hon. Mr. Church, and it is reported Mr. Chapleau, are interested in the scheme, which is no more than a big deal to utilize the line between Ottawa and Quebec as the basis of a huge railway system to include the various colonization railways running north. The roads are the Pontiac and Pacific, the Gatineau Valley, the railway running north from St. Jerome and the Lake St. John railway. A part of the scheme is to colonize the districts the railways traverse.

The Canadian Pacific Railway company find the working of the North Shore line too expensive for the receipts it gives them owing to the lively competition of the Canada Atlantic. The last named line has long been coveted by the G.T.R. people, who are anxious to reach the capital in order to tap the lumber shipping trade but they have been unable so far to secure their objective on account of the high price asked by the Canada Atlantic company. The Grand Trunk people have however obtained control of two charters, one from Dr. Bergin's company, the other from the Vaudreuil & Ottawa Co. which they hold as a menace to the Canada Atlantic Co. if the latter do not come down.

It is said now that the C.P.R. will attempt to acquire the control of the Canada Atlantic in order to thwart the plans of the G.T.R. thus once more bluffing their old enemy in the huge railway game played by the two great rival companies.

**Monday** 04/06/1888 *Ottawa Journal* *Canada Atlantic* *Elgin Street*

The Canada Atlantic Railway Company have a gang of men engaged building two new sidings in their freight yards for the accommodation of their increasing traffic.

**Tuesday** 05/06/1888 *Ottawa Citizen* *Aylmer branch* *Aylmer*

Another passenger train has been put on from Ottawa to Aylmer by the C.P.R. Company, It leaves the city at 12.35 p.m. and arrives from Aylmer at 11 p.m. (Note the CPR advertisement shows the train leaving at 12.01)

**Wednesday** 06/06/1888 *Ottawa Citizen* *Ottawa City Passenger*

The working class complain at the late hour that the street cars begin running in the morning. At Montreal and elsewhere the cars generally start to run at 7. The street cars in the city are still controlled by a single driver, who does double duty, filling the position of conductor and driver as well. It is not an uncommon thing to see the horses entrusted to the care of youngsters while the driver is collecting fares, and it is a wonder that accidents are not more frequent occurrences. The company should have a conductor on each car, and thus allow the driver to devote his whole time to the care of the horses.

**Thursday 07/06/1888 The Equity, Bryson Aylmer branch Aylmer**

A station agent at Aylmer was somewhat surprised on Thursday morning when he went to open the office about 7.15 o'clock, to find locks bolts and bars burst asunder, and the office presented an appearance as if it had been ran sacked by burglars. On closer examination it was found that the padlock of the waiting room door had been forced with a crowbar, and that the door of the inner office had been similarly broken in and papers and other documents scattered about the floor, the drawer having been ran sacked, the safe blown open, and the sum of \$30, the amount of the receipts of the previous day, missing. The burglars, whoever they are, left their implements behind them, which consisted of crowbars, braces, bits, a chisel and a hammer. Which was afterwards ascertained had been taken from the section room, that place having been evidently broken open for the purpose. A hole had been drilled in the door of the safe, an explosive inserted, a fuse ignited, and the door of the safe torn apart, the contents being then extracted. More.

**Friday 08/06/1888 Renfrew Mercury Westport**

The bed of the Brockville and Westport Railway has been lifted and straightened and the locomotives, sidetracked for two months, taken to Delta. Contracts have been let for the building of the Lynn and Newboro branches.

**Tuesday 12/06/1888 Athens Reporter Westport**

Our Railroad (A Poem)

Away down the railroad track we'll go  
And look for the engine long  
and when we have found the old steam horse  
We will sing this joyous song

Oh! it's coming  
It's almost here  
This railroad will be running  
'Bout the close of the year.

We will mount to the top of the tallest trees  
and strain the eye for the coming train,  
And at the first glimpse of the joyful sight,  
Our tears will fall like rain.  
Oh! it's coming...

We will deck our village with bunting bright  
And put on all our holiday wear  
On the day that the first through train is run  
And sing with a will thought the navvies stare.  
Oh! it's coming...

And we'll toast the magnates every one -  
Saunders and Berry and Mooney -  
And the welkin shall ring in our excess of joy,  
Though they should think us looney.  
Oh! it's coming....  
Anon

**Wednesday 13/06/1888 Ottawa Free Press Chaudiere Chaudiere**

The Chaudiere extension of the C.A.R. is now being rapidly pushed forward. Surveyors were busy today placing pickets for the course and grading of the metals, and in a few weeks the cars will be running into the great lumber district.

**Thursday 14/06/1888 Ottawa Free Press Ottawa City Passenger**

The Street Railway track is in course of reconstruction along Sussex street today and also in New Edinburgh.

**Friday 15/06/1888 Renfrew Mercury Winchester Smiths Falls**

We recently noted that Mr. Tompkins who built the C.P.R. station at Smiths Falls, has been given the contract for the erection of some twenty buildings in Vancouver, B.C. The Winnipeg Free Press says that Halpenny & Co., of Winnipeg, are at present shipping brick from St. Boniface, to be used in these buildings.

**Saturday 16/06/1888 Ottawa Citizen Chaudiere Chaudiere**

Owing to construction work on the Chaudiere branch of the Canada Atlantic Railway passenger trains heretofore leaving the Richmond Road station are discontinued until further notice.

This notice appeared in subsequent editions until June 19th when the CAR advertisement was modified by deleting reference to the Richmond Road service - the 10 November 1887 date was retained however.

**Saturday 16/06/1888 Ottawa Journal Chaudiere Richmond Road**

The Canada Atlantic Railway company have discontinued running their passenger trains to the Richmond Road station for the present in consequence of the work on the extension to the Chaudiere.

The notice also appeared in the Ottawa Free Press for Friday 15 June.

**Monday 18/06/1888 Ottawa Free Press Sussex Street Sussex Street**

The empty store houses composed of coal oil soaked boards at the St. Lawrence & Ottawa railway crossing on Dalhousie street should now be removed, as there is no more use for it, and it is a standing menace, should it take fire, to the neighborhood.

**Monday 18/06/1888 Ottawa Journal Maniwaki**

The Aylmer Times announces that twenty miles of the Gatineau Valley Railway (from Hull to the Peche) will be completed before December next. Mr. J.P. Mullarky P.L.S. will be on the line located to purchase the right of way for the first twenty miles next week. Estimates are being prepared so that no time will be lost in letting contracts when Mr. H.J. Beemer the President of the road returns from England. He is expected here about the 20th of this month. Two steam shovels have been purchased and will be placed on the works to execute them as speedily as possible.

**Monday 18/06/1888 Ottawa Journal Chaudiere Chaudiere**

The Canada Atlantic Railway Company have put a steam shovel to work at their gravel pit to load cars for the fill in on the line of their extension over the Hill and Higginson property. The work of building the revetment wall along the face of the cliff on Britannia terrace will begin next week. Hundreds of tons of filling in will be necessary at this point. The line will cross Queen Street West and Britannia Terrace on Tuesday next. When the rails are laid a diamond will be made with the Street Railway Companies (sic) track on that street.

**19/06/1888 Athens Reporter Westport**

Elbe Mills - Large Gang and Train at Work Levelling Roadbed

A train and a large gang of men have been at work here on the railroad during the past week. Dirt is being hauled from the banks to level the road bed.

Westport - WJ Webster Sends Teams to Grade Between Lyn and Brockville

Westport, Sat. June 16: W.J. Webster has sent a number of teams from here to work at the grading between Lyn and Brockville. His fencing gang will soon have this part of the work done. Mr. Webster is one of the most pushing contractors who has had anything to do with the road. The lifting gang have just reached the station today with their work. They report the road in a passable condition to Farmersville. We expect the lost engine to appear again next week.

Lyn - Lost Engine Returns After Absence of Several Months

Lyn, Sat. June 16: Our village was startled by the peculiar shrill whistle of the B&W engine on its return after an absence of several months. The contractors for the Brockville section have brought on a number of teams and a quantity of plows for the back country and intend pushing the work of construction. Since the return of the engines, Sunday work has recommenced. The total disregard with which the managers treat the wishes of a civilized community who believe that Sabbath desecration never prospers, does not help the credit of the company. It is hoped the new life of the enterprise may be permanent.

**19/06/1888 Athens Reporter Westport**

Track in Running Order Between Lyn and Delta

The B&W railway track has been put in running order between Delta and Lyn. The engine and gravel train reached Lyn on Saturday night. On Sunday afternoon, a train was run back to this place (Farmersville) consisting of three carloads of lumber and shingles, for A. Parish & Sons, and three car loads of barbed wire for fencing the track.

**Wednesday 20/06/1888 Ottawa Free Press Chaudiere Chaudiere**

The C.A.R. company have arranged to have the work of constructing their extension at the Chaudiere completed by the middle of July. As soon as the road is ready they will commence shipping timber from the yards with the most improved facilities. The work is being pushed forward rapidly.

The C.A. railway extension track is now laid nearly to the waterworks aqueduct at the Chaudiere. It is said they contemplate building a bridge over the Ottawa river via the island opposite Parliament Hill to connect with the proposed Gatineau Valley railway on the Hull shore.

**Thursday 21/06/1888 The Equity, Bryson Pontiac & Pacific Junction Klock's Mills**

Four horses were killed at Klock's Mills on Wednesday last by a locomotive. They were the property of Messrs. Klock.

**Thursday 21/06/1888 The Equity, Bryson Pontiac & Pacific Junction Pembroke**

On Tuesday night of last week the town council of Pembroke met to consider a letter from Mr. L. Ruggles Church, President of the Pontiac and Pacific Junction Railway Company, which asked the town to furnish the right of way for the railway from the point at which it would strike the Ontario shore right into Pembroke, along with terminal grounds in Pembroke and also to grant right of way along McKay street to the mills on the muskrat river.

Accompanying the letter was a plan of the route intended to be taken by the Company. On this plan the line strikes from the Ontario shore opposite Morrison's Island to Mr. White's land in front of Mr. Henry Mitchell's farm, and runs in a south westerly direction around the high piece of land and enters the corporation below the A. & P. White farm, and runs from thence to the corner of Herbert and McKay streets where the terminus will be. In the report which accompanied the plan it was stated that the plan was only an approximate one.

Various members of the council discussed the matter in a conversationable manner, and a committee was appointed to inquire into the matter and report to the Council.

**Thursday 21/06/1888 Ottawa Journal Chaudiere Chaudiere**

The Canada Atlantic extension at the Chaudiere has been completed to the waterworks aqueduct and preparations were made yesterday to construct the line across Queen street west.

**Thursday 21/06/1888 Ottawa Citizen Chaudiere Chaudiere**

The Chaudiere extension of the Canada Atlantic Railway is now laid to the Waterworks Aqueduct, and yesterday preparations were commenced for bridging Queen Street. The company will push the work as fast as possible.

**Friday 22/06/1888 Ottawa Journal Chaudiere Chaudiere**

The Canada Atlantic railway company have a gang of workmen engaged removing the street railway tracks at the corner of Queen street west and Britannia terrace at Pooley's bridge for the purpose of making a diamond semiphore (sic) when the Canada Atlantic extension crosses the street.

**Monday 25/06/1888 Ottawa Free Press Ottawa City Passenger**

This morning a baker's rig came to grief on the rails of the street car track owing to an attempt of the driver to cross it.

**26/06/1888 Athens Reporter Westport**

Italian Laborers Work at Farmersville - Grounds Prepared for Sidings at Delta

Another batch of Italians reached here on Tuesday last, and at once went to work on the railway. During the past week, part of the gang have been preparing the ground for sidings at Delta, and part are scattered along the line leveling up the grading. In a few days, the roadbed will be in a condition to run gravel trains over the entire length of the line.

**Tuesday 26/06/1888 Ottawa Free Press Chaudiere Chaudiere**

The Chaudiere line is being quickly laid. The work of raising the street car track is now going on.

**Thursday 28/06/1888 Ottawa Free Press Chaudiere Chaudiere**

The first train on the Chaudiere extension branch of the Canada Atlantic railway passed over the city waterworks aqueduct at seven o'clock this morning and consisted of ten flat cars laden with ballast in charge of Mechanical Superintendent Donaldson. The patent safety crossing bars, manufactured by an American company and made of iron worked like a charm. One man manipulated a crank which dropped four posts at once, two on each side of the crossing at Queen street, thus stopping all traffic. Ballast trains were running all day, and the track is now laid a good distance towards Bridge street, back of the new No. 1 fire station. People in that vicinity this morning were much excited over the passing of the first train and businessmen seem quite jubilant over the advent of the iron horse.

**28/06/1888 Brockville Recorder Westport**

Construction on Brockville Lyn Section  
Messrs Lewis, Knowlton and Webster who have the contract to build the unfinished section of the BW&SSM between Lyn and Brockville have started teams and men to work.

**28/06/1888 Brockville Recorder Westport**

Construction on Brockville Lyn Section  
Messrs. Lewis, Knowlton and Webster who have the contract to build the unfinished section of the BW&SSM between Lyn and Brockville have started teams and men to work.

**Friday 29/06/1888 Ottawa Citizen Chaudiere Chaudiere**

Yesterday morning the first train passed over the Chaudiere extension branch of the Canada Atlantic Railway. It was laden with ballast and under the charge of Mechanical Superintendent Donaldson.

**Saturday 30/06/1888 Ottawa Free Press Chaudiere Chaudiere**

The C.A. Railway extension track is now all filled in around the old waterworks office at the junction of Queen and Britannia streets. The trestle work is completed to the extremity of Britannia street.

**Saturday 30/06/1888 Ottawa Citizen Prescott Prescott**

On Wednesday evening last some men stole a handcar on the St. Lawrence and Ottawa Railway and proceeded to work themselves to Prescott. There they were arrested and Constable Hornidge, of the C.P.R. yesterday locked up the four of them, John Callaghan, David Shields, P. Connor and J. McManus.

**01/07/1888 Canada Lumberman Tramway Perley and Pattee**

The lumbering firm of Perley & Pattee, Ottawa, have a gang of men employes making improvements in the tramways used to convey sawn lumber from the mills to the piling grounds.

Lumber for Sidewalks Farmersville A car load of excellent lumber for sidewalks arrived here over the B&W on Friday. It was unloaded and drawn to various parts of the town and the work of repairing and building new walks will be pushed forward as rapidly as possible. The lumber was purchased from W.G. Parish.

**03/07/1888 Athens Reporter Westport**

Another batch of Italians reached here on Tuesday and went to work on the railway. They are scattered along the line levelling up the grading. In a few days the roadbed will be in a condition to run gravel trains over the entire length of the line.

**03/07/1888 Athens Reporter Westport**

A B&W Episode -

Tis said that the course of love never did run smoothly and we are of the opinion that a couple of B&W employees think that their.....for their chosen vocation got a bad setback the other evening. Early Thursday morning orders reached here for two of the officials to proceed to Lyn and assist in running a train over the road from that place to.....out towards the end of the line. Using a pumper, they reached Lyn in good time only to learn that the engine was still lying at Brockville.....one, two, and nearly three hours elapsed before the long looked for train arrived in sight. Six o'clock came before it was ready to leave Lyn and when they finally got under way, the speed was necessarily slow, the train being heavy and the road not in the best condition. All went well however, until the crossing at Henry Lee's was reached. Here, the grass had grown to such a height alongside the track that it lay over the ties and rails. As soon as the wheels of the engine met this obstruction, there was a whirr and the train came to a standstill. The train was backed and repeated efforts made to push through. Two long mortal hours were spent in trying to overcome the obstruction but as the water was running low, it was finally decided to return to Lyn and take a fresh start in the morning. Here is where the dilemma of our boys came in. They had arranged to meet their lady loves by the moon's pale light on the shady boulevards of our classic little town; and as the hour for the meeting drew near and they were some ten miles from their store clothes, it was no wonder that they were in a sad predicament. Farmers along the line were interviewed, bribes offered, entreaties made and imprecations indulged in but none were found willing for love or money to waft our two friends on towards the desired haven. Finally, when all other resources failed, they wisely concluded to hoof it to town.

Westport - B&W Train Hasn't Arrived - Station Grounds Deserted and Disordered

June 30: The B&W train has not reached here yet. The station grounds still remain the same disordered place - devoid of beauty or neatness, and strewn with piles of ties, rails, fence posts, etc. The only perceptible improvement is the putting up of a wind mill to lift water into the tank. We are pleased, however, to hear of progress in the work further out on the line and hope that the new life will soon extend to this end.

**Tuesday 03/07/1888 Ottawa Free Press Chaudiere Chaudiere**

On Saturday afternoon the trestlework on the C.A. railway extension near Britannia street gave way, and two flat cars of the gravel train were thrown off the track. Conductor Bob McKee, who was in charge, had to jump off and severely sprained an ankle. As a consequence, the crew of the ballast train were obliged to work yesterday.

The old immigrant shed at the St. Lawrence and Ottawa depot, is being demolished. Mrs. Galvin has been obliged to vacate the premises.

**Friday 06/07/1888 Ottawa Citizen Canada Atlantic Limoges**

Yesterday afternoon news reached the city that the line of the Canada Atlantic Railway was blocked near South Indian owing to fire raging on each side and across the track.. the line was impassable, the rails having coiled up with the intensity of the heat .. anticipated that the men would get to work during the night and relay the 100 yards or so of burnt line in time for the first train in the morning.

It was about this time last year when this line was troubled by fire near Bearbrook and a serious accident narrowly averted.

July 7 - The Canada Atlantic Railway Company lost no time yesterday morning in repairing the damage done to their track by the fire. Sixty sectionmen were put to work, and the afternoon Montreal express, which stopped at Casselman all night was able to get through and reached Ottawa at 5 a.m. in the morning. The passengers speak highly of the attention of the company.

*Thursday 19/07/1888 Ottawa Journal Sussex Street Sussex Street*

The Canadian Pacific Railway Company have to all intents and purposes closed the old St. Lawrence and Ottawa railway line from Chaudiere junction to the depot on Sussex street, thereby depriving the lower end of the city of a railway terminus, which for upwards of thirty years was the life and soul of that portion of the city. In consequence of this a large proportion of the business which was done on Sussex, Dalhousie and the other streets in Lower Town leading to the old depot when that branch was in use and the St. Lawrence and Ottawa depot was the terminus of the line to Prescott, has now found its way to Upper Town and the Chaudiere.

The desertion of the old terminus of the line by the C.P.R. company was not done quickly. It was the work of years and has caused a great deal of dissatisfaction among property holders and businessmen in the lower portion of the city, who say they have been ruined in consequence of the depreciation in the value of property and the departure of business to the upper end of the city. They contend that when the line was built into the city in 1850 the then corporation of Bytown granted a bonus of £15,000 sterling, or about \$75,000, towards the construction of the line, and in addition loaned to the then Bytown and Prescott railway company £50,000 or about \$250,000 to assist the work of construction on the distinct understanding that the north-eastern terminus should be in Bytown.

Some four years ago the St. Lawrence and Ottawa company got under the control of the Canadian Pacific railway company. That company, as soon as it assumed control of the road, changed the terminus of the line as far as passenger business was concerned, to their depot in the Chaudiere. This caused a howl among the property owners and businessmen of Lower Town and the City Council was appealed to, but they, on the advice of the City Solicitor, decided that it was impossible for the corporation to compel the C.P.R. to run its trains into the old depot. Things went on, the Canadian Pacific gradually withdrew their freight business from the lower town station until now not a single car is to be seen week out and week in at the Sussex street depot, where previous to the purchase of the road by the C.P.R., all the traffic of the line to Prescott entered and left the city. Last winter that branch line was fully five months blocked with snow and not a single car passed over it.

More - city interest, C.P.R. refused to allow C.A.R. to purchase the line from where it crossed their line so they could open up a depot there etc.

Mr. Thomas Rideout Inspects B&W

Mr. Thomas Rideout, government inspector of railways, returned to town last evening after a tour of inspection over the BW&SSM, made with a view of paying over a portion of the government bonus. The road is reported in fair condition.... Some difficulty has been experienced in getting suitable ballast.

*Thursday 19/07/1888 The Equity, Bryson Portage du Fort and Bristol Branch*

Another agitation is on foot to secure railway communication for this village. The new scheme, we understand, is to build a line from Portage du Fort to Campbell's Bay, which will form a connecting link between the proposed P.D.F. and Bristol Railway and the P. & P. J. Railway. The promoters of the scheme claim its practicability, so far as the route is concerned, admits of no question. They purpose sending a delegation to Quebec shortly to interview the Premier on the subject of aid towards construction. They claim - and it seems reasonable too - that a line such as they propose to build is entitled to the same consideration as Mr. Mercier was promised to the P.D.F. line. The latter has not received assistance as yet, the company being only in embryo when the subsidies were voted, and therefore not in a proper position to expect it at that time. But now that the promoters have secured a charter they feel pretty confident of getting a subsidy before the close of another session, if not sooner. We shall be very glad to hear of the success of both enterprises, as the villages chiefly interested would doubtless develop into places of flourishing character with the aid of railway connection without which their future cannot be one of great importance. The promoters should keep the ball rolling.

*Thursday 19/07/1888 The Equity, Bryson Pontiac and Renfrew*

To ensure more safety the Canada Atlantic Railway company are building a fence around their extension to Bridge street from the Queen street crossing westwards.

*Saturday 21/07/1888 Ottawa Free Press Sussex Street Sussex Street*

The residents of Lower Town owe a deep debt of gratitude to Ald. Henderson, to whom alone belongs the credit of breathing life into, and taking action in the matter of the closing of the old St. Lawrence & Ottawa railway depot on Sussex street. Many and grievous have been the complaints made by residents in that neighbourhood, of loss sustained both by decrease of trade and depreciation in the value of property but though many suffered none took any decisive action.

Ald Henderson, however, was among those who were affected and after conducting a private correspondence with the C.P.R. asked the city clerk to write and inquire whether they intended to reopen the station and when? No answer was forthcoming and so he moved his resolution of Monday night referring the matter to the city solicitor.

In reply to a Free Press reporter, Ald Henderson said: "I know nothing of old bylaws; the city subscribed for \$15,000 WORTH OF STOCK

on the ground that it would be a great advantage to have a railroad running from the waters of the St. Lawrence to those of the Ottawa. That stock has, of course, been eaten up, as the line has frequently changed hands. The grounds upon which I base my resolution are these: The ground on which the depot stands, eleven lots in all, was granted to the railway in trust for a depot - whether passenger or not I cannot say, but it is not now used as either a passenger or a freight depot. Then again, the company has frequently and successfully applied to government for pecuniary assistance, urging their claim on the ground that they were doing incalculable benefit by running their line between these two points. These two points were named in their charter, they have received all they ask, and yet they propose to discontinue using the depot. When the C.P.R. acquired the line they immediately

MOVED ALL THE STOCK

to the Union depot and commenced such a line of action as was calculated to drive away traffic from the line and give them an excuse for closing it. Then they closed the depot and now hardly use it at all. The firm of McLaren & Co. have felt this very heavily. We have frequently been unable to obtain cars, and when we have asked for them have been told that they were in use elsewhere. I then wrote privately and was told that it would take \$10,000 to repair the bridge, but if would guarantee them a paying traffic, the depot would be reopened, if not we must send to the Chaudiere for shipment. This means a discrimination of 50 cents per 1000 feet against us. I am not aware that the charter gives any right to guarantee of paying traffic, or that the ground was given on that understanding. The C.A. railway are willing to buy the whole branch of the line, and would make that their chief depot, but the C.P. railway will not sell. I am of the opinion that the city can obtain a mandamus to force them to reopen the depot and maintain it open.

*Thursday 26/07/1888 The Equity, Bryson Portage du Fort and Bristol Branch*

Mr. Thomas Somerville has purchased a house and a lot from Mr. John Thomson, which he intends repairing and enlarging and fitting up as a depot for our new passenger railway.

The stock books of the P. & B. Railway Co., will soon be open. It is expected the necessary amount of stock will be subscribed in this village; but doubtless parties from far and near will subscribe as well.

*Thursday 26/07/1888 Ottawa Free Press Ottawa City Passenger*

The last of the bands in the circus procession, yesterday, had a narrow escape from, perhaps, serious injury, while their heavy chariot was rounding the corner of Sussex and Rideau streets. The driver of the long string of horses was evidently not used to the Ottawa street railway tracks and attempted to rive obliquely across them, with the result that the waggon caened slightly. The musicians, who were playing for all they were worth, got a scare and stopped suddenly, prepared to make a spring to the ground. The jehu, however, by a dexterous movement of the ribbons righted the vehicle which narrowly missed being tipped over.

*Thursday 26/07/1888 Ottawa Free Press Chaudiere Chaudiere*

The press house yard has been considerably reduced by the new Chaudiere extension of the C.A.R., and the waterworks will, in future, have no room to spare.

*26/07/1888 Brockville Recorder Westport*

Regular Trains Now Running from Brockville to Westport

Lyn The B&W are running a train daily over the road, and on Saturday brought in several cars of cattle to be shipped to Montreal. We are pleased that things are getting into shape.

Delta. Mr. Alonzo Allyn spent a few days in Delta...He looks thoroughly thrifty and expresses a good deal of pleasure at a conveyance over the B&W to Brockville.

*Thursday 26/07/1888 The Equity, Bryson Pontiac and Renfrew*

The line of railway between Bristol and B Illerica, being a portion of the line proposed to be built by the Pontiac & Renfrew Railway Co., is now under construction, with Capt. Symons, supt. of the the mines, in charge. The Capt. was in Ottawa last week hiring men for the work of construction. The number required was two hundred.

The work of construction on the line of the Pontiac & Pacific Junction railway is being vigorously prosecuted and it is expected that before next fall the company will be running their trains into Pembroke. Ottawa and Pembroke will then be connected by a line via the north shore of the Ottawa. An official of the road, speaking to a Journal reporter said:

:The line is now open for traffic from Coulonge to Aylmer and thence into Ottawa via the Aylmer branch of the C.P.R., a distance of about eighty miles. Trains are run regularly every day over this portion of the line.

ON THE OTHER SIDE OF COULONGE

"on the other side of Coulonge, the distance to the point on the north shore of the Ottawa river where the line crosses to Allumette Island on its way to Pembroke, is eleven miles. This portion of the line is grades and the rails laid. Construction trains are now working making up the fill for an approach to the bridge across the north channel of the Ottawa river. At this point a bridge about 100 yards in length has been built across the channel between the main land and Allumette Island. The length of the line across that island will be about seven miles, at the other end of which a bridge about fifty yards in length will have to be constructed between Allumette island and a small island known as Morrison's Island, then another short bridge about 25 yards in length across what is known as the Blind Channel, and the line reaches the main land on the south shore, five miles from Pembroke.

"The construction of the five miles from the bridge to Pembroke will be the easiest part of the construction yet attempted from Aylmer, as the country is perfectly level and the line will run almost parallel to the line of the C.,P.R."

THE REMAINING CONSTRUCTION

There is now actually built some 91 miles of the line from Aylmer to Allumette Island and 80 miles under operation from Aylmer to Coulonge. The work that remains to be done is the construction of the bridges across the Ottawa and the portion across Allumette Island, and from the opposite shore to Pembroke. The main part is the iron bridge from the north shore of the Ottawa to Allumette Island. The distance is only about 100 yards but the water in the channel is very deep and rapid and it will be the most difficult piece of bridging on the whole line. After this bridge and the seven miles across Allumette Island are constructed the bridge across the Morrison's Island, a span of about 50 yards will follow, but the water is shallow and the bridging easy. The last bridge, about 25 yards long brings the line to the main land on the south shore of the river.

THE P.P.J AND THE AYLMEER BRANCH

From an official source the reporter learned that the Pontiac and pacific Company are running their passenger and freight trains into Ottawa on the seven mile Aylmer branch of the C.P.R. using their own cars and equipment for which privilege they hand over to the C.P.R. every cent of the receipts on that portion of the line. Some time ago the C.P.R. offered to sell this branch line from Aylmer to Hull to the P.& P.J. Co. for \$12,000 per mile about what it cost to construct it but refused to give them any running powers over the C.P.R. bridge into Ottawa. The P.& P.J. Co. offered to pay \$10,000 per mile for the line with running rights over the bridge, or \$8,000 per mile without these powers, but eh C.P.R. refused to sell the line for less than \$12,000 per mile.

AIMING FOR THE SAULT

It has long been known that the ultimate terminus of the P.& P.J. line is Sault Ste. Marie. The line has been constructed from Aylmer to Allumette Island over very difficult country for little more than the government subsidy of \$12,000 per mile so that very little money has been expended in construction so far and it is estimated that the most difficult portion of the line is now built and that the remainder of the line from Pembroke to the Sault will be completed by the end of next summer.

The president of the road, Mr. H.J. Beemer sailed from France last week and will arrive here in the course of two weeks when negotiations for the purchase of the Aylmer branch will be re-opened.

It is rumored that next summer the P.& P.J. company and the Canada Atlantic will jointly build a bridge across the Ottawa river near the Suspension bridge thus connecting the two lines giving the P. & P.J. road the shortest line to the Atlantic sea board.

Saturday 28/07/1888 Ottawa Free Press Chaudiere Queen street

A Chaudiere horse came near being badly hurt this morning by making a break for the C.A.R. crossing while the bars were being lowered. As it was, the animal, which was driven by a man named Armand of Hull, got a severe blow in the head which staggered it. The horse became frightened at the noise of an approaching train, and his driver could not hold him back from the crossing.

Saturday 28/07/1888 Ottawa Free Press Ottawa City Passenger

The Street Railway company have commenced a thorough repair of their road, the track being now strengthened its entire length from the Chaudiere falls to the Rideau falls, new sleepers put down and old rails replaced by new ones.

The street rails wrenched the wheels off another rig today on Sussex street, and considerable profanity on the part of the driver was caused by the accident.

Saturday 28/07/1888 Ottawa Journal Chaudiere Chaudiere

Mr. J.E. (sic) Chamberlain, general manager of the Canada Atlantic Railway, inspected the extension of that line along Britannia Terrace to Queen's Acre yesterday, the work of construction having been entirely completed. The work done was found to be perfectly satisfactory. Workmen are now engaged in removing the old buildings on Queen's Acres preparatory to the construction of the new depot at that place. The company's workmen are also engaged fencing in the track along Britannia terrace from Queen street west to the site of the new depot.

Saturday 28/07/1888 Ottawa Journal Lachute Gatineau Point

A spark from a C.P.R. locomotive ignited the grass near the station at Gatineau Point, the flames were extinguished with difficulty.

Saturday 28/07/1888 Ottawa Journal Sussex Street

C.W. Spencer says the fuss raised about the Sussex street depot can be attributed to James McLaren Lumber who want to ship their lumber form the Lower Town depot. Prepared to keep the depot open, repair the bridges etc.--

Saturday 28/07/1888 Ottawa Free Press Westport

A prominent railroad man has stated in the city today that Mr. R.G. Harvey of the Brockville and WP railroad has purchased what is known in Smiths Falls as Long Island near Portland. Mr. Harvey will build a grand summer hotel on the island which he thinks will prove a favorite resort in the near future.

Monday 30/07/1888 Ottawa Free Press Sussex Street Sussex Street

Long article on the closed depot.

Today the depot stands a deserted pile of ruinous sheds. Here the ruins of one destroyed by fire stands in all their black ugliness, there one blown by a gale lies a heap of worthless lumber, and utterly useless. The yard resembles a vast howling wilderness, with lines of rusty rails running between masses of rank weeds, whilst cars, passengers, hacks, locomotives and employees are all conspicuous by their absence, and the silence of Goldsmiths's deserted village reigns over the once busy scene. The only goods in the yard being a large pile of piles and an apparently dangerous quantity of petroleum. More.

**31/07/1888 Brockville Recorder Westport**

Trains now running from Brockville to Westport.

Regular trains are now running over the B&W from Brockville to Westport. The train leaves Westport every morning at 8 a.m. calling at Newboro, Singleton's Corners, Elgin Road, Phillippsville and Delta and reaching Farmersville at 9:45. The run to Lyn is made in about an hour and, if the GTR is clear, the run from thence to Brockville occupies only a few minutes. Returning, the train leaves the GTR station, Brockville, at 2:25, arriving here at about 4 p.m. and reaching Westport about 7 p.m. On Thursday last the train consisted of engine and tender, five freight cars and a passenger coach. On Saturday over sixty passengers were on board as the train pulled out of Farmersville and on the return trip the number was about eighty. Yesterday the up train was well patronized by the travelling public and several boxcars were filled with freight. For a young road, the traffic over the B&W is already well developed.

**Wednesday 31/07/1888 Ottawa Journal Chaudiere Chaudiere**

The Canada Atlantic Railway Company have completed laying rails on their Chaudiere Extension to the terminus on Queen's Acre. The line has yet to be ballasted from Queen street west to the terminus.

Locomotives 5 and 6 of the C.A.R., are engaged daily in drawing some 110 car loads of gravel from Booth's siding to the Chaudiere extension of the road. A monster steam shovel with a capacity of nearly two cubic yards a dip, is used in the work and loads a train of six cars in short order. The cars are self dumping. After the siding is exhausted gravel will be taken from Hurdman's Cut and Roxboro pit. The work of ballasting the extension, which now reaches to Bridge street, will probably take till the fall to complete.

Long article but much of it is illegible.

--the company are running their passenger and freight trains into Ottawa over the Aylmer branch of the C.P.R. using their new cars for which privilege they hand over every cent of their receipts on that portion of the line. --

**Thursday 02/08/1888 Ottawa Free Press Canada Atlantic**

C.A.R. will put on service to New York.-- The first of the two new cars arrived yesterday morning and are perhaps the best equipped and most comfortable cars on the continent. They are called the "Kenosha" and the "Kastola" and have just been turned out of the Wagner company's shops--

**Friday 03/08/1888 Ottawa Free Press Canada Atlantic Moose Creek**

Grand Trunk ballast trains of 65 cars each are at present engaged in drawing gravel daily from the Moose Creek pit, on the C.A.R., for the new double track laid from Coteau to Cornwall.

**Thursday 03/08/1888 Ottawa Free Press Canada Atlantic locomotive**

Four new locomotives of heavy draught, manufactured at the Baldwin works, Philadelphia, Pa., will shortly arrive in this city for use on the C.A.R. Engine No. 11, which has been under repair in the workshops, resumed running yesterday.

**Friday 03/08/1888 Ottawa Free Press Westport**

Trains have been running regularly this week on the Brockville and Westport railway, which is some 42 miles in length. The residents along the route are delighted at the sight of the iron horse speeding past their doors daily, farmers wives and daughters deserting their churns and spinning wheels, rush out to their doors and gaze upon the trains. The line is highly spoken of by those who have already travelled over it. The stage line is almost knocked out in consequence.

**07/08/1888 Brockville Recorder Westport**

Timber for trestle over GT shipped from Westport.

A portion of the timber for the trestle work on the B&W over the GTR between Lyn and Brockville passed through here last week. It was manufactured at Fredenberg's Mill, Westport.

Busy Time at Farmersville Station

Those who were at the station when the train came in on Saturday morning, witnessed a very busy scene. The incoming train consisted of engine, tender, eight freight cars, and one passenger coach. Sixteen teams were counted in the yard at one time, many of which were delivering cheese and hogs for shipment. Another car was added to the train, which steamed out with five cars of cheese, four cars of livestock, and a large number of passengers.

An Unexpected Trip on the B&W

Farmersville Now that regular runs are being made on the B&W, two local couples were just dying to try this new mode of conveyance, so last Saturday they started out on their own account. The party consisted of our genial young druggist, our cross country jumper, a curly headed school ma'am, and her friend from rural parts down east. Being at the station at the arrival of the 5:10, they entered the passenger coach and Conductor Flagg, with his customary courtesy, proceeded to show them around. "Let's ride a little way" said the school ma'am. So they asked Conductor Flagg if they could ride to the choke cherry tree, a half-mile down the track. The conductor gave a nod which they took to mean yes, and the train started and glided along so swiftly and smoothly that the excursionists took no note of the distance until one of them looked out and noticed they were heading fast toward Delta.

A frantic search of the train for the conductor failed to find him, and the train sped rapidly on. Visions of landing in Delta in disgrace and penniless were crowding around them when their shouts finally roused Bob, who had been enjoying a snooze in the baggage car, and he was persuaded to let them off on the track, much against his will. Forcing their way through a swamp, they struck the highway and meeting a farmer going in the wrong direction, they found they were only four miles from Farmersville. They started to walk down the road, which they followed for a distance of half a mile, when they decided to take to the track again, for easier walking.

And so, weary and footsore, the four trudged along until they saw a fire ahead, and came upon an Italian railroad worker eating his supper, which they found consisted of a big raw potato which he peeled with a two-edged dagger and his dessert was a bunch of choke cherries. As he knew very little English, they plodded on and reached Main Street just as the dark of the evening closed in. Never will they forget their first ride on the B&W.

Tuesday 07/08/1888 Ottawa Free Press Tramway E.B. Eddy

Messrs. Eddy & Co's. piling grounds opposite the Queen's wharf is filling up quickly and nearly all the lumber cut this season is being piled there. The company were at a disadvantage in former years as they had to draw the lumber so far, but since they inaugurated the locomotive system they can easily carry the lumber down to that piling ground. Their shipping facilities have been greatly improved this year.

A portion of the timber for the trestle work on the B&W over the GTR between Lyn and Brockville passed through here last week. It was manufactured at Fredenberg's mill, Westport.

Thursday 09/08/1888 The Equity, Bryson Pontiac and Renfrew

The building of the branch railroad from the Bristol iron mine, which is known as the "Pontiac and Renfrew" line, is being vigorously pushed and when completed will mark a new era in the history of mining in this county. The timber for the trestles is all out on the ground. The road will not be quite so wide as the Pontiac railroad, being only 66 feet from fence to fence, or 14 feet narrower than the P. & P. J. In securing the right of way the solicitor, Mr. Tetreau, has experienced little or no difficulty. There are now 150 men engaged in grading and there being no very great obstacles in the way it is thought the line will be completed in a short time.

There is no work going on at the mine at the present time. The three great shafts are filled with water and will not be touched until after the completion of the railroad.

Much discussion of the Russell mine which is within four acres of the new line of railroad.

Thursday 09/08/1888 The Equity, Bryson Pontiac & Pacific Junction Campbell's Bay

About three weeks ago a car load of product of the Lawn mine was shipped from Campbell's Bay Ry. station for Wales, England, where it is said, the best establishment in the world exists for assaying purposes. If it is found practicable to work that mine the ore will be shipped at Campbell's Bay it being the nearest station to the mine. (silver)

Messrs. Lewis, Knowlton and Webster have commenced work on this end of the Lyn section of the BW&SSM Railway and have excavated across Cedar Street. The bridge over the GTR near Lyn is well under way. Telegraphic communications will be opened to Westport in a few days.

Monday 10/08/1888 Ottawa Free Press Canada Atlantic

Second annual C.A.R. employees excursion to Clarke's Island - ten cars.

Friday 10/08/1888 Ottawa Free Press Chaudiere Chaudiere

The C.A.R. extension steam shovel has been removed to a fresh cliff of clay at Booth's siding, the old one having been exhausted. Several large lumber piles had to be removed before this could be done.

Locomotive No. 6 of the C.A.R. is now engaged in drawing stone from the Flats, a large quantity of which lies west of Pooley's Bridge, for the Chaudiere extension.

Monday 12/08/1888 Ottawa Citizen Chaudiere Chaudiere

A young boy named Watkins, living on Bridge Street attempted to ride his bicycle across the new C.A.R. track on Bridge Street on Saturday. The attempt was not a success, as the boy came over the handles on to his head and received several scalp wounds.

Wednesday 15/08/1888 Ottawa Free Press Chaudiere

Train leaves Chaudiere 7.40, Elgin street 8.00 for Clarke's Island.

Friday 17/08/1888 Ottawa Free Press Chaudiere Chaudiere

A glance around Britannia terrace shows that the residents are presently suffering somewhat severely from the construction of the C.A.R. Chaudiere extension. At present, as was pointed out by Ald Hutchison of the Board of Works on Wednesday, it is impossible, or next to it, for them to reach their yards with loads of coal or wood. Still anyone who has the slightest foresight can easily see that the construction of this line will, in time, greatly enhance the value of the property in this neighborhood.

Saturday 18/08/1888 Ottawa Free Press Chaudiere Chaudiere

The ballasting of the extension of the C.A.R. at the Chaudiere is making good progress. The steam shovel has been removed to a fresh siding.

**21/08/1888 Athens Reporter Westport**

Unionville (Forthton) Fair and the B&W The running arrangements made by the B&W are very satisfactory. Special excursion trains will be run on the second and third days as follows: Leaving Westport at 8 am, calling at all stations and flag stations, and arriving at Unionville at 10:30 am to start on the return trip at 5 pm. Return tickets will be issued at the following rates: From Westport \$1.20; Newboro \$1.05, Singleton's 85¢, Delta 60¢, Lyndhurst 50¢, Farmersville 30¢. A special train will leave Brockville at 1 pm sharp returning leave Unionville at 5 pm. `Fare for round trip 40¢. Stock and goods of all kinds intended for exhibition will be carried at regular rates and returned free, if not sold. Shutes for loading cattle will be erected at Unionville and at other points along the line.

In order to accommodate exhibitors who wish to send goods per railway the first day, but do not wish to go themselves later, the managers of the fair will receive exhibits so sent and place them in their proper places in the exhibition. Such exhibits may be addressed Superintendent of Fair Grounds, Unionville.

Mr. R.G. Hervey will exhibit (not for competition) several of the animals in his celebrated herd of Jerseys, some of which are worth \$2,000 each.

**23/08/1888 Brockville Recorder Westport**

A Trip on the B&W

Although some parts of the Brockville and Westport Railway track are not ballasted at all, the daily train which leaves Westport in the morning for Brockville and returns in the afternoon make good time.... The people in the back country are delighted to have the cars running.... From Brockville to Lyn the Grand Trunk track is used, including the Lyn branch till the station of the B&W is neared, where a switch leads on to their own line. The stations touched at are Lyn, Unionville, Farmersville, Delta, Elgin Road which also serves Phillippsville, Newboro and Westport and there will be a number of flag stations as well.... When the Brockville extension is finished, the road will be a great source of convenience and comfort.

Farmers Upset For Lack of Cattle Guards

Farmers are up in arms because the B&W railway has not carried out its promises to put up fences at crossings, and also make all crossings passable. There is nothing to keep the farmer's cows from getting on the track and it is impossible to get across the track on many roads. Driving from Lyn to New Dublin by way of Glen Buell, one has to cross four railway crossings which it is nearly impossible to do. One has to walk or scramble ahead, leading the horse while the rig tips and rolls and shudders from bump to bump.

**Thursday 23/08/1888 Ottawa Free Press Chaudiere Chaudiere**

John Swirl, the guidesman of the C.A.R. steam shovel at Booth's siding, accidentally fell off it yesterday and sustained a few bruises which, fortunately, were not serious.

The much wanted shelter for the gateman at the C.A.R. crossing on Queen street will now shortly be built. He stood his post well during the recent heavy rains.

A box car on the C.A.R. extension line suddenly collapsed off the trucks at the Queen street crossing about 2 o'clock on Saturday morning, while a gravel train was proceeding to the limit of the extension. The wreck was cleared off by daylight.

**Tuesday 28/08/1888 Ottawa Free Press Chaudiere Chaudiere**

No 30 locomotive of the C.A.R. has been withdrawn from the Chaudiere extension, and Nos. 5 and 6 engines are now doing the work of hauling gravel. No. 30 brings in fine gravel from Moose Creek.

**Wednesday 29/08/1888 Ottawa Free Press Canada Atlantic Elgin Street**

A new coal hoist on a large scale has been placed on the C.A.R. between the station and the bridge across the canal. New machinery has been put in by the company to effect repairs to the rolling stock when necessary.

**Wednesday 29/08/1888 Ottawa Free Press Chaudiere Chaudiere**

Engineer Jim Casey of the C.A.R. has been transferred from the extension ballast trains to the Montreal passenger services.

No. 5 locomotive will shortly go into the shop for repairs and will hereafter be used for heavy work on the main line.

The last train of earth from Moose Creek for the C.A.R. extension at the Chaudiere reached the city this morning. After today gravel will be drawn to the western (sic) extension from Clarke's Island to Rouse's Point.

**Thursday 30/08/1888 Ottawa Free Press Chaudiere Chaudiere**

When completed the C.A.R. extension at the Chaudiere will include eight tracks in all. Lumber shipments will be taken on the new extension next week. The second track on the C.A.R. extension, which was laid down west of Pooley's bridge, has now been completed.

**Thursday 30/08/1888 Ottawa Citizen Canada Atlantic wood**

The C.A.R. is having a coal hoist placed in position at their depot.

**Saturday 01/09/1888 Ottawa Citizen Canada Atlantic**

At present the Canada Atlantic Railway is shipping an average of over 60 carloads of lumber per day into American markets.

**04/09/1888 Athens Reporter Westport Westport**

Business Very Brisk

Sat. September 1. Business on the B&W at this end is very brisk. Mr. Wardrobe's new bus is generally well filled going to and from the station. The freight train came in after the passenger train on Saturday evening and loaded five cars with timber for the road from Fredenburgh's mill. Mr. N. Whitmarsh shipped another carload of cattle and hogs this week.

**Thursday 06/09/1888 The Equity, Bryson Pontiac & Pacific Junction**

What's the matter with the work which was to be so vigorously pushed on the P. & P. J.? The season is about ended and there is no work done since last fall.

**Saturday 08/09/1888 Canada Lumberman Chaudiere**

At Ottawa the Canada Atlantic railway company have at last got their Chaudiere extension into working order. On Saturday September 8th, the first shipment of lumber was made over the new extension. The shipment consisted of thirty-two cars of lumber from Messrs. J.R. Booth's yards consigned to Messrs. Shepherd and Morse of Burlington. The company have men laying down platforms between the four terminating switches of the line where the lumber from the yards will be loaded. The idea of extending the tracks across Bridge street into Booth's lumner yards and also across on to Victoria island into Messrs. Brinson & Weston's yards has been abandoned until next spring and for the present the lumber for shipment will be loaded at the Crown acre station.

**Saturday 08/09/1888 Ottawa Free Press Maniwaki**

A piece of ground has been cleared near the Hull station where the rails for the Gatineau Valley railroad will be piled. Forty miles have been surveyed and operations can be begun at once. Several farmers who were asking exorbitant prices for the right of way through their farms have signified their intentions of accepting prices verbally agreed on at first.

Stolen Fence Wire At Farmersville \$50 Reward

\$50 Reward - Brockville, Westport and Sault Ste. Marie Railway.

FIFTY Dollars reward will be paid for information which will lead to the conviction of any person connected with the stealing of fence wire from the roadway of this company in the vicinity of the stone road crossing west of Farmersville about the 5th inst. James Mooney, Superintendent.

**Tuesday 11/09/1888 Ottawa Journal Canada Atlantic Elgin Street**

The Canada Atlantic Railway company have come to the conclusion that their passenger terminus can be placed further up Elgin street with advantage. Mr. Mountain, the company's engineer has just completed plans and specifications for a new passenger station on the corner of Lewis and Elgin streets, on the east side of Elgin.

It may be remembered that before the Canada Atlantic line was built some years ago, the company purchases a large block of land from the Stewart estate extending from where their present station is to the corner of Lewis street facing on Elgin. It was the intention at the time to build the passenger station at the corner of Lewis street, which is fully a quarter of a mile nearer to the centre of the city than the present station. But when the city refused to pay the road the \$110,000 bonus which the Canada Atlantic people claimed, the company refused to enter the city and built their present station.

Now that the limits of the city have been extended to take in the present station, the company have concluded that they may as well bring their passenger depot as near to the centre of the city as possible. The work of constructing the new station and lines leading to it from the bridge across the Rideau canal will be commenced early next spring.

**A PROBABLE UNION DEPOT**

The move on the part of the company will be a decided advantage on the part of the public. The company, however, have a double object in building this new station. They argue that in a few years the proposed new station will be in the very centre of the city, which is rapidly expanding its limits south and west, and it is their intention to make the new depot a union depot. It is understood that the company will have made arrangements with the Vaudreuil and Ottawa road and the Gatineau Valley companies whereby these Ottawa Valley lines when completed run into this new depot, and then it is expected the C.P.R. will see it to be to their advantage to do so likewise.

The old depot on Elgin street will be converted into a freight office and the main line of the Canada Atlantic will remain the same, the Chaudiere being the proper terminus of the road at present.

**Saturday 11/09/1888 Ottawa Citizen Westport wood**

The Brockville and Westport Railway takes eight hours to run about forty miles from Brockville to Newboro. Every time the train goes out it has to stop to take down three fences built across the track, much to the amusement of the American visitors; and every now and then they make the passengers get out and help wood up. Fact - Perth Expositor. Also in Renfrew Mercury 14 September, 1888.

**11/09/1888 Athens Reporter Westport Newboro**

One Horse Railroad

An item in a Perth paper last week says our railroad is a one horse one. Give us time, neighbor. Remember your Tay Canal with nary a horse!

**Saturday 13/09/1888 Ottawa Citizen Pontiac & Pacific Junction**

Strangers travelling on the Pontiac Railway are sometimes surprised and a little annoyed at the many delays and stoppages of the train which occur while running between Aylmer and Fort Coulonge. The other evening there was a strange gentleman and lady on board, each also a stranger to each other. Between Billerica and Smith's Station the train, after a great deal of tooting from the whistle, slowed up and the gentleman found, by putting his head out through the window of the coach, that the cause of all the delay was a cow on the track. The animal was turned off and the train proceeded only a short distance when, after much whistling, it was brought to a stand still again. The lady filled, no doubt, with curiosity and displeasure at what appeared to her mind unnecessary delay, turned to the gentleman and asked, "Why has the train stopped now?" "Oh.", replied the gentleman, "I guess they have overtaken the cow again." - Bryson Equity. Also in the Renfrew Mercury 14 September 1888.

**Thursday 13/09/1888 Ottawa Free Press Canada Atlantic Elgin Street**

The C.A. railway with their usual enterprise, have built unloading pens for live hog shipments which arrive at their Elgin street depot for local dealers. Messrs. Slattery and Thompson yesterday received two car loads of prize porkers by this road, from Essex Centre, Ont.

**Thursday 13/09/1888 Ottawa Citizen Pontiac & Pacific Junction**

It is reported that Mr. H.J. Beemer, of the Pontiac Pacific Junction Railway, has succeeded in floating in Paris bonds to an amount sufficient to extend the road through to Sault Ste. Marie. The road is now finished to within a few miles of Pembroke, with which town connection will be made this fall.

**Wednesday 13/09/1888 New York Times Pontiac & Pacific Junction**

**THE PONTIAC AND PACIFIC.**

TORONTO, Ontario, Sept. 12.--It is understood that Mr. H.J. Beemer, Manager of the Pontiac and Pacific Junction Railway, at present in Paris, has succeeded in organizing a company of capitalists there with a capital of over \$860,000 to complete the Pontiac and Pacific line from Pembroke to Sault Ste. Marie, to lease or purchase from the Canadian Pacific Railway the North Shore Railway from Ottawa to Quebec, and to obtain from the Government running powers over the Intercolonial Railway to St. John. The Canadian Pacific Railway, for some time past has found the North Shore Road especially that portion from Ottawa to Montreal a burden, and it is learned on the best authority that the company is willing to get rid of the whole line from Ottawa to Quebec.

The scheme is a large one, and the new company includes the Hon. J.A. Chapleau, secretary of State, and prominent men in Canada. The object of this system of lines is to move Western grain from Minneapolis and the Canadian Northwest to the Canadian Winter ports for shipment. The argument used with the Government by the company in securing running powers over the Intercolonial Railway is that the new system of roads would be of great benefit to the country in case the American Government carries out its course of retaliation, as the amalgamated lines would make a direct line to St. John and Halifax. The Pontiac and Pacific Junction Road is now completed to within three miles of Pembroke, and will be completed to that place before winter sets in.

**Saturday 15/09/1888 Ottawa Free Press Ottawa City Passenger**

The rail of the street tramway at the corner of Bank and Sparks streets is some two inches above the roadway and is exceedingly dangerous to passing rigs.

**Monday 17/09/1888 Ottawa Free Press Chaudiere Chaudiere**

The completion of the Canada Atlantic Railway Chaudiere extension is now almost accomplished as the many switches which were being laid during the last few weeks were on Saturday properly completed and ready for traffic. That the extension is now open for business is shown from the fact that during last night and today at noon fully one hundred freight cars had been shunted from the yards on Elgin street over the new line to the Chaudiere where they were today being loaded with lumber of all sorts and other materials by the different firms in the vicinity. J.R. Booth found use for fully fifty box cars, all of which were being loaded for shipments to Burlington, Vermont and other New England points. The Eddy Manufacturing Company also partook of the advantages of the new branch, which they say is very convenient, and were shipping carloads of pails, tubs and such like articles as are manufactured by them, to many places along this now famous line, which before caused them considerable inconvenience owing to the distances they had to convey their goods from Hull across to the Depot on Elgin street. On the whole the opening up of the extension has caused quite a boom in lumber circles around the Chaudiere, as all is bustle around the new yard today. The facilities for shipping are most perfect. A space forty feet wide is planked with 3-inch boards between the different switches throughout the length of the entire yard.

**18/09/1888 Athens Reporter Westport**

Fence Wire Returned

The parties who stole a quantity of fence wire from the track of the B&W about two miles above Farmersville must have got frightened at the prospect of detection. A few nights after the advertisement offering a reward for the apprehension of the thief appeared in the Reporter, a portion of the wire was returned. The officials believe they have a clue that will lead to the detection of the guilty parties but wish to state that, if the balance of the wire is returned, they will overlook the matter. A word to the wise, etc.

**Tuesday 18/09/1888 Ottawa Citizen Chaudiere Chaudiere**

The Chaudiere extension of the C.A.R. is now almost complete and yesterday a large number of cars were shunted on to the new line and run to the Chaudiere for lumber, Messrs. J.R. Booth and E.B. Eddy both took advantage of the opening, and nearly one hundred cars were loaded during the day.

**Friday 21/09/1888 Ottawa Citizen Chaudiere Chaudiere**

Evidence in the arbitration case between the Canada Atlantic Railway and the Chaudiere lumbermen regarding land on Britannia Terrace expropriated for railway purposes, was heard yesterday by arbitrators Hiram Robinson, C.R. Cunningham and Jas. Cunningham.

**Friday 21/09/1888 Ottawa Citizen Maniwaki Hull**

Four carloads of rails for the Gatineau Railway arrived at Hull the other day. Mr. H.J. Beemer, president of the company, is expected to return shortly from France, when work on the road will be pushed forward with all possible haste.

**Friday 21/09/1888 Ottawa Free Press Canada Atlantic locomotive**

The Canada Atlantic railway company are to the front again, this time with an elegant new locomotive painted a sort of Turkish rouge in order to correspond with the already handsome appearance of the coaches. Both engine and coaches are now of the same color and really present a gay appearance. Mr. W. Actor is in charge of this new engine while S. Athelson assists as fireman. 414 is the number of the new venture.

**Saturday 22/09/1888 Ottawa Citizen Chaudiere Chaudiere**

The company's extension into the lumber piling grounds at the Chaudiere, is proving not only a great convenience, but it is effecting an unlooked for economy. For instance, with the regular force of men, the Eddy Manufacturing Company are now enabled to load three additional cars per day, and Messrs. Perley and Pattee are able to do away with one gang of men altogether.

**Saturday 22/09/1888 Ottawa Free Press Canada Atlantic Elgin Street locomotive**

Locomotive No. 5 of the C.A.R. went into the shop today for repairs, and will hereafter be used for passenger purposes.

**Saturday 22/09/1888 Ottawa Free Press Chaudiere Chaudiere wood**

The C.A.R. steam shovel will be moved on Monday from Booth's siding at the Chaudiere to Perley's Cut, the former pit being exhausted for ballasting purposes.

Another new platform is being put down at the C.A.R. extension on the Chaudiere and will much add to the accommodation for shipping lumber and grain in that section.

A new shunting engine, a hard coal burner, will shortly arrive for the C.A.R. for use at the new Chaudiere yards.

**Tuesday 25/09/1888 Ottawa Journal Ottawa City Passenger**

The Street car company have put conductors on all the street cars during this week. This will materially shorten the time take to make the run between the Chaudiere and New Edinburgh.

(Note this was the week of the Fair)

**Friday 28/09/1888 Ottawa Free Press Pontiac & Pacific Junction**

Several of the Pontiac county fathers who are in the city attending the exhibition say there is great indignation among the ratepayers over the lawsuit between the P. & P. J. R. Co. and Pontiac county. The suite, which was won by the county, involves an expense of over \$100,000 on the county.

**Friday 28/09/1888 Ottawa Citizen Pontiac & Pacific Junction**

The appeal entered by the Pontiac Pacific Railway Company against the decision of Judge Wurtele for the plaintiff in the case of Brady vs. the P.P.J.C. has been disallowed by the Court of Queens Bench at Montreal and the judgment of Judge Wurtele confirmed. The action is brought by the plaintiff against the defendant for non-construction of a cattle guard. The plaintiff's horses strayed upon the track and were killed.

Brockville Freight Shed Nearing Completion

The freight shed for the B&W at the west end is nearly completed.

**Friday 12/10/1888 Renfrew Mercury Belleville Perth**

Sixty men were discharged from the Perth car shops last week. The Expositor thinks it absurd that the C.P.R. should be giving out large contracts for cars to other shops when their own works can turn them out for less money.

**Monday**      **15/10/1888**      **Ottawa Citizen**      **Sussex Street**      **Sussex Street**

Lower Town's Railway

A Reply to the demand for reopening.

Once upon a time the commercial interests of Ottawa centered in Lower Town; and when in 1851 the first railway connection was to be provided, the promoters of the St. Lawrence and Ottawa Road, between this city and Prescott, were glad to accept the gift of a generous portion of land there on condition of placing their station upon it. Trade moved west and the St. L. and O. Railway Station dwindled into insignificance compared with that of the Chaudiere used by the Canadian Pacific lines. In 1884 the C.P.R. secured possession of the St. L. and O., the passenger traffic was diverted to the Chaudiere, and only a portion of the freight was brought in at the old depot. Latterly freight trains have been stopped also. The people of the neighborhood chafed at the loss of business and shrinkage in the value of their properties, and at length the City Council was prevailed upon to remind the C.P.R. people that they were under an obligation to the city to run trains into the old station.

**FIRM, BUT CONCILIATORY**

The company's reply to this communication was presented to the Acting Mayor Erratt on Saturday evening, at a meeting of the Finance Committee, of which he is chairman. The company refuses to acknowledge any such obligation as that claimed, claim that the public are better satisfied with the service to the Union station than at the Sussex Street station, and proceed to give reasons why, if they wanted to, they could not run trains into the latter. They claim that their bridge over the Rideau River is in such a condition as to make the passage of trains over it dangerous, and held that in the present unsatisfactory condition of the river, this bridge, or any better one replacing it, is liable to be carried away by the spring floods. And, comforting New Edinburgh at the expense of Ottawa Ward, they declare their intention of shortly erecting a station on the baby ward side, for the handling of local freight. This local freight will, of course, consist chiefly of Maclaren's lumber.

This ought to please Ald. Henderson, who is manager for the Maclaren business, but he wants more. As he told the committee, he would have the city endeavor to force the company to run trains into the old station, even if the aid of the courts had to be invoked. If they don't want to do this, he wants them to give up the property given for station purposes, so that some other railway may come in and use it.

**UPPER TOWN NOT DISSATISFIED**

When the frank admission - for a lawyer - that law and reason might not be the same, Ald. McVeity declared it unreasonable to seek to compel the railway to use a station which it had abandoned by reason of a change in trade. If the east end had suffered, the people of the west had been the gainers, and could not be expected to be a party to a fight in the courts against their own interests. The injury had been caused not to the city, but to certain individuals and these could, if they liked, take action for damages.

Another Upper Town representative, Ald. Gordon, was not inclined to get the city into a suit with the C.P.R. It would be too big a thing and have too much risk attached to it. He thought it probable that the majority of the public would hold that they were better served as is, and declared - despite Ald.

Henderson's protest - that the business had gone from the railroad, not the railroad from the business. He suggested that those doubting the sentiments of the public might make the question an issue.

**IN THE JANUARY CAMPAIGN**

As an Ottawa Ward man, of course, Ald. Bingham had a word to say in favor of maintaining the Sussex Street station. He disputed statements that business had left the railway, declaring that there was now ten times as much done on Dalhousie and twenty times as much on Cumberland street as twenty years ago. Ald. Larose alone refrained from giving the committee the benefits of his views.

The Chairman turned the attack by producing a lawyer's letter, being an opinion obtained by the City Solicitor from A.J. Christie Q.C., to the effect that the city had a good case to take into court.

"Yes, a good one for the lawyers," someone dryly remarked, and when the suggestion was made that the opinion of the most eminent counsel should be obtained, it was silenced by the same skeptic, who gave it as his opinion that "these lawyers are all in the same boat."

In the meantime the CPR's letter will come before the Council without official comment from the Finance Committee.

**Tuesday**      **16/10/1888**      **Ottawa Citizen**      **Sussex Street**      **Sussex Street**

Discussion in Council on CPR letter. Agreed to have the lawyers make up a case for forcing CPR to provide service.

**Thursday**      **16/10/1888**      **Ottawa Journal**      **Pontiac & Pacific Junction**

The Pontiac and Pacific Junction Railway company have made arrangements with the Crossen Car Company of Coburg for the purchase of seven new passenger cars which will be added to their service between Ottawa and Coulange.

**Tuesday**      **16/10/1888**      **Ottawa Journal**      **Maniwaki**

After many years waiting, the people of the Gatineau now have good reason to believe that the much talked of Gatineau Valley Railway will be constructed next summer. Fifty-six carloads of rails are now piled up at the Hull depot and ties sufficient to construct fifty miles of the line are stored at the Peche. A gentleman interested in the scheme informed a Journal reporter this morning that there are now at Hull sufficient rails to construct the first fifty miles and that large shipments including the balance required will be shipped to Hull during the coming winter. Early next spring the work of grading the line will be started from the Peche and Hull simultaneously and that distance twenty miles completed within as short a time as possible. Construction trains will be placed on the work and it is expected that before the end of next summer the line will be fully equipped and in running order to North Wakefield from which point the work of construction will be pushed with all dispatch to the River Desert, the northern terminus of the proposed line which is exactly 100 miles from Hull.

Mr. H.J. Beemer, the president of the company, while in England arranged for the shipment of all the rails required for the construction and upon his return to Canada will make arrangements during the coming winter for the purchase of construction equipment and supplies and get everything in readiness for the commencement of work next spring.

**Thursday**      **18/10/1888**      **Ottawa Journal**      **Chaudiere**      **Chaudiere**

The Canada Atlantic Railway Company have a large gang of workmen engaged on building a cribwork on the embankment facing Britannia terrace, on which it is proposed to lay another siding track for lumber cars. The space between the tracks has been planked for a distance of one thousand feet from the end of the track on Bridge street, making room for the loading of some forty cars in one train.

**Saturday**      **18/10/1888**      **Ottawa Free Press**      **Chaudiere**      **Chaudiere**

The C.A.R. are further extending their platform for the lumber business so as to enable them more rapidly to ship.

**Friday**      **19/10/1888**      **Renfrew Mercury**      **Belleville**      **Perth**

It seems that the C.P.R. car shops at Perth will hereafter be used only for repairing purposes. No more cars will be built there after the present series are finished.

**Friday**      **19/10/1888**      **Renfrew Mercury**      **Westport**

The first run off on the Brockville and Westport railway occurred on Friday near Phillippsville, when a car loaded with cattle left the track and rolled down a steep embankment. Three of the cows were instantly killed and four of the others had to be killed.

**Friday**      **19/10/1888**      **Renfrew Mercury**      **Kingston (CP)**      **Kingston**

The Kingston car works are completing an order for 200 cars for the C.P.R., 100 cars for the K. & P.R. railway and a \$3,000 snow plough for the Manitoba and North-western Railway. Two hundred men are employed.

**Friday 19/10/1888 Renfrew Mercury Chalk River Arnprior**

The centre pier of the C.P.R. iron bridge at Arnprior has recently been rebuilt with solid masonry.

**Wednesday 24/10/1888 Ottawa Journal Canada Atlantic Elgin Street**

The Canada Atlantic railway company have nearly completed their new coal sheds at the Elgin street depot. They will have a capacity of 22,000 tons of coal.

**Wednesday 24/10/1888 Ottawa Citizen Chaudiere Chaudiere**

The Canada Atlantic extension has given no end of satisfaction to the lumbermen. There are now three yards along the line, the object being to enable the company to take the green lumber from the mills, convey it to these yards about a mile and a half distant where it is piled up to dry for shipment direct to its destination in the States. Carting and extra handling is done away with and in addition the lumber is piled outside the city limits in open piling grounds where it dries much quicker than in the damp atmosphere of the Chaudiere. During the last week 942 carloads of lumber were taken from the end of the extension to the track at Crown acre and piled in these new grounds.

**Thursday 25/10/1888 The Equity, Shawville Pontiac and Renfrew**

The Iron Mines branch railway is progressing rapidly towards completion. The grading and trestle work will be finished this week. As soon as this is done a new roasting furnace will be erected and those already built will be thoroughly repaired, so that when the road is ready for traffic, mining will be resumed with renewed vigor.

**Thursday 25/10/1888 Ottawa Free Press Chaudiere Chaudiere**

During the past ten days the Canada Atlantic Railway has carried nearly 1,200 carloads of lumber from their Chaudiere extension to the piling grounds west of Pooley's bridge. The extra ground there proves an great boon to Chaudiere lumbermen who were cramped for room at their yards.

**Friday 26/10/1888 Renfrew Mercury Belleville Perth**

An order for 100 stock cars has been received at the Perth car works. The Courier says that this disposes of the rumor that the car shops were to be used simply for repairing.

**Friday 26/10/1888 Ottawa Citizen Maniwaki Hull**

Sixteen more carloads of rails arrived in Hull yesterday to be used in the construction of the Gatineau Valley Railway.

**Friday 26/10/1888 Ottawa Journal Maniwaki Hull**

Sixteen more car loads of rails arrived at the Hull depot yesterday for the Gatineau Valley railway company.

**Saturday 27/10/1888 Ottawa Free Press Chaudiere Chaudiere**

The amount of carloads taken daily from the Canada Atlantic is somewhat surprising. Yesterday nearly one hundred carloads were drawn to the piling grounds west of Pooley's bridge.

**Saturday 27/10/1888 Ottawa Free Press Prescott Chaudiere**

The new C.P.R. siding has been finished to the Barnes & Co. shook factory.

**Monday 29/10/1888 Ottawa Free Press Chaudiere Chaudiere**

The Canada Atlantic Railway carried away about seventy-five carloads of lumber from their Chaudiere extension Saturday last.

**Tuesday 30/10/1888 Ottawa Citizen Pontiac & Pacific Junction**

A serious accident occurred on the Pontiac Pacific Junction Railway on Saturday afternoon. It seems that a farmer living on the line allowed one of his gates to remain open and a number of horses strayed upon the track. An up train coming quickly around a curve ran down five of the animals, the locomotive and tender being thrown from the track. Fireman Edward Langborn was badly scalded but is doing well. The other hands escaped by jumping.

**Wednesday 31/10/1888 Ottawa Journal Pontiac & Pacific Junction**

P.P.J. bonds - long article on the court case.

**Thursday 01/11/1888 The Equity, Shawville Pontiac & Pacific Junction**

The Pontiac and Pacific Junction Railway Company have made arrangements with the Crossen Car company of Coburg for the purchase of seven new passenger cars, which will be added to the service between Ottawa and Coulonge.

Bad accident on the P. & P. J. R. Illegible.

**01/11/1888 Brockville Recorder Kingston (CN) Brockville**

GTR Work on Manitoba Siding

The work on the GTR double track between Brockville and Lansdowne is expected to be completed before the end of next week. The contractors, who have also the contract for lowering certain grades on the old road bed, have already begun that work, and the new track from the Manitoba siding to the Lyn crossing is now being used for general purposes. The grade in the heavy rock cutting this side of the Lyn station is now reduced. The contractors have a very large force of men at work and expect to push it through rapidly.

**Friday 02/11/1888 Ottawa Journal Chaudiere Chaudiere**

The Canada Atlantic Railway have now nearly completed their coal sheds at the Union depot which when completed will have a capacity of 25,000 tons.

**Friday 02/11/1888 Ottawa Free Press Carleton Place Ottawa, Broad Street**

At the C.P.R. station this afternoon a very interesting and curious trial was made of a new track weighing machine.

**Friday 02/11/1888 Ottawa Free Press Canada Atlantic Elgin Street**

The yard room at the Canada Atlantic railway station has become so limited owing to the rush of business that two extra long sidings are now being put down.

**Friday 02/11/1888 Ottawa Free Press Ottawa City Passenger**

A horse attached to a street railway car raised a grand rumpus on Sparks street about noon today, and blocked the line for about a quarter of an hour. The animal turned rusty and refused to move, kicking and rearing whenever urged on. A second car with passengers came up behind and had to wait. Finally the animal was conciliated and condescended to go off at a good round pace.

**Friday 02/11/1888 Ottawa Free Press Chaudiere Chaudiere**

The C.A.R. extension at the Chaudiere will be finished in two week's time when the filling up will be finished. Some fifty carloads of lumber is the daily average now taken by the C.A.R. from the Flats to the piling grounds.

**Monday 05/11/1888 Ottawa Free Press Ottawa City Passenger**

A smash up occurred on Sussex street about two o'clock Saturday afternoon, when one of John Graham, the New Edinburgh gardener's heavy carts collided with a Canadian's light side bar buggy. A small boy was driving Mr. Graham's horse at the time, and was unable to manage it while crossing the street car tracks, which account for the collision.

**Friday 05/11/1888 Ottawa Free Press Tramway E.B. Eddy**

The Eddy Manufacturing company of Hull is building a large shed on the edge of the Ottawa river at the Hull ferry landing which will be used as a coal depot for the new engines and for boats and vessels calling.

**06/11/1888 Athens Reporter Westport**

Telegraph Reaches Westport

The B&W telegraph line reached here this week. It is understood that the line will not be extended further at present.

**Tuesday 06/11/1888 Ottawa Free Press Ottawa City Passenger**

The street car track was once again the cause of a waggon coming to grief. The waggon was an express, the property of Mr. G. Gratton, and was drawing ashes with which to cover his yard, when crossing the track at Sapper's bridge, the wheel was wrenched off, and the whole load dumped on the roadway. Several more fine new streetcars similar to the one recently placed on the line will be added to the rolling stock of the Street Railway company next season. They will be constructed at Toronto.

**Wednesday 07/11/1888 Ottawa Free Press Chaudiere Bridge Street chaudiere**

In backing some freight cars on the Canada Atlantic extension Monday a G.T.R. car was pushed over the tracks on to Bridge street. While endeavoring to raise it on the rails, the wheels in the rear came off, having become fast in the mud of immediately on the other side of the crossing.

**08/11/1888 Athens Reporter Westport**

Ballasting Work Reaches Farmersville Brockville Recorder

The work of ballasting the B&W has reached as far as the station at Farmersville.

**Thursday 08/11/1888 Ottawa Free Press Ottawa City Passenger**

Yesterday a horse belonging to Felix Belanger made a bolt from Sussex street and got into a collision with a street car. The result was a general smash up to the detriment of Mr. Boulanger's cart.

**Monday 12/11/1888 Ottawa Journal Chaudiere Chaudiere**

The Canada Atlantic Railway company have a number of workmen engaged in building a small station house at Crown Acre facing Bridge street. This station will be used only as a freight depot.

**Thursday 13/11/1888 Ottawa Free Press Prescott Chaudiere**

The C.P.R. are presently putting down a new siding to the shook factory. Messrs. Barnes & Co's. concern is much improved by the introduction of the incandescent electric light.

**Wednesday 14/11/1888 Ottawa Journal Canada Atlantic Elgin Street**

The C.A.R. have completed the erection of the new coal sheds at the Elgin street depot. As soon as the sidings leading to the sheds are completed they will be ready to receive winter supplies of coal.

**Friday 16/11/1888 Ottawa Free Press Chaudiere Chaudiere**

A neatly painted caboose has at length been constructed at the Chaudiere end of Pooley's bridge for the gateman at the Queen street crossing of the Canada Atlantic extension. A miniature coal stove and comfortable fittings in the interior will prove a boon to the official in charge during the winter months.

**Friday 16/11/1888 Ottawa Free Press Canada Atlantic Elgin Street**

The Canada Atlantic railway will begin to receive the winter supply of coal in their new sheds by the end of this week. The new sheds are almost complete, with the exception of the sidings, which will be in working operation shortly.

**Saturday 17/11/1888 Ottawa Free Press Sussex Street Sussex Street**

Yesterday afternoon a party of loafers made the old St.L. & O.R.R. ground the scene of a dog fight and for a time two dogs tore and bit at each other for the sport of the worst brutes than themselves. --

**Monday 19/11/1888 Ottawa Free Press Ottawa City Passenger**

The city street cars experienced their first snow season difficulties this morning, when the 8 o'clock car got off the rails near the corner of Rideau and Sussex streets and was some minutes before it could be got on again.

**Monday 19/11/1888 Ottawa Citizen Ottawa City Passenger**

The condition of the streets along the track of the street railway is in many places, notably on Sparks Street, disgraceful in the extreme. It would not be tolerated in any other city than Ottawa.

**Monday 19/11/1888 Ottawa Free Press Chaudiere Chaudiere**

The construction caboose of the Canada Atlantic was run in on the new Chaudiere extension yesterday morning and a gang of navvies were immediately set to work laying in a new switch. Some thirty cars were ready for shipment hence the need for putting the men to work yesterday in order to get them off early this morning.

**Tuesday 20/11/1888 Ottawa Journal Ottawa Terminal**

Messrs. Piney, Christie & Christie, solicitors, give notice of application to the Dominion Parliament at the next session for the incorporation of the Ottawa Terminal Railway & Bridge Co. This is nothing less than a scheme to build a large union depot in Centre Town into which all railways running into Ottawa will converge.

A Palatial Depot

It is proposed to erect a palatial depot in the vacant lot at the east side of the canal, adjoining the government military stores and fronting on Sapper's Bridge. The company also propose to build a railway along the east bank of the canal from Deep Cut. This line, it is proposed, will then extend underneath the bridge and on a high level to Sterling's Wharf thence directly across the Ottawa River to market square, Hull where it is also contemplated the Canadian Pacific, Gatineau Valley and Pontiac and Pacific Junction Railways will erect another depot. More.

**Wednesday 21/11/1888 Ottawa Citizen Ottawa Terminal**

General speculation was indulged in in the city yesterday as to the meaning of the notice printed in the Citizen yesterday morning, that application would be made to Parliament next session for incorporation of "The Ottawa Terminal Railway and Bridge Company", for the construction of a line of railway in the cities of Ottawa and Hull, from a point on the east bank of the Rideau canal at the boundary between original lots G and F in concession D, and thence along and within four hundred feet of the canal, passing under Sappers and Dufferin bridges and along the shore of the Ottawa river to the neighborhood of Stirling's Brewery, thence by a bridge to Albert street in Hull, and along Albert street to the neighborhood of Court House Reserve. Power is also asked to build a passenger bridge in connection with the other.

More - heading off of the Rockcliffe railway bridge scheme - lumbermen can get great piling grounds at the Deep Cut.

A contemporary idea of a central passenger depot on the site of the strongly fortified plot adjoining the militia stores, furnished occasion for no little merriment.

Would also make a link with the PPJ and Gatineau Valley Railways

More.

**Friday 23/11/1888 Ottawa Journal Canada Atlantic Elgin Street**

The Canada Atlantic Railway Co. have received several large shipments of coal which they have stored in their new coal sheds. Heretofore all coal shipped to the city on the C.A.R. had to remain in the cars until removed by the dealer who owned it.

**Friday 23/11/1888 Ottawa Free Press Canada Atlantic locomotive**

Two new locomotives and a couple that have been in the workshops for repairs will be added to the rolling stock of the C.A.R. next month.

**Friday 23/11/1888 Ottawa Free Press Chaudiere Chaudiere**

The workmen engaged in filling in the C.A.R. extension will finish up their work tomorrow and be withdrawn to other sections of the line.

**Friday 23/11/1888 Renfrew Mercury Chalk River Carleton Place**

Fifteen employees of the C.P.R. shops at Carleton Place were discharged a week or so ago, - the Company, however, promising to give them first chance when the needs of the service demand more help. Altogether, the Central Canadian says, one thousand men have been dismissed.

**Monday 26/11/1888 Ottawa Free Press Chaudiere Chaudiere**

The last load of ballast arrived at the Chaudiere extension Saturday afternoon. It was no sooner scattered than a force of carpenters were put on to work on the plank walk which completes the extension so far.

There is no danger of any more freight cars being shunted over the side walk on Bridge street as the C.A.R. have recently erected five butters to prevent it. Passengers going that way daily accordingly feel somewhat relieved from accidents.

**Wednesday 28/11/1888 Ottawa Journal Canada Atlantic Elgin Street**

The C.A.R. are putting down new siding tracks for the accommodation of cars laden with coal at the Elgin street depot.

**Friday 30/11/1888 Ottawa Free Press Ottawa City Passenger**

Another wheel of an express wagon came to grief on the street car track on Sussex street this morning.

**Friday 30/11/1888 Renfrew Mercury Westport**

A trestle on the Brockville and Westport Railway fell last week, causing considerable damage. It was propped ready for filling in, and it is supposed that mischievous boys removed the supports and the strain caused a large section to give way.

**01/12/1888 Canada Lumberman Canada Atlantic**

The Canada Atlantic railway seems to be carrying far more lumber from Ottawa this year than any other road. As many as one hundred cars in a day have been shipped by this line.

**Saturday 01/12/1888 Ottawa Journal Sussex Street Sussex Street**

The following appears in the Canada Gazette today:

"The St. Lawrence and Ottawa Railway Company will apply to the Parliament of Canada, at the next session. For an Act directing the proceeds of the sale of certain of its lands to be applied in improving its property or redeeming its bonds and authorizing it to change the position of one of the termini in the City of Ottawa and for other purposes."

The latter clause is taken to mean, by those who claim to know, as a clincher, to establish the C.P.R. right to close the Lower town depot.

**Saturday 01/12/1888 Ottawa Free Press Chaudiere Chaudiere**

A number of Canada Atlantic railway cars are at present being laden with grain at the Chaudiere for transport for McKay & Co.

**01/12/1888 Canada Lumberman Canada Atlantic Chaudiere**

An exchange, speaking on lumbering in the Ottawa Valley, says that although the present yards are overcrowded, it will not be long be for long, as the Canada Atlantic Railway and the firms of J.R. Booth and Perley & Pattee have workmen engaged in laying tracks in the new yards of the latter, on the line of that road, a little over a mile from the mills. This railway has been extended almost into the heart of the lumber district, the station being but a few hundred yards from the two firms above mentioned, Bronson & Weston Lumber Co., and Pierce & Co., as well as Barnes & Co's box shook factory. Therefore a great saving is expected, as the lumber is taken almost directly from the saw to the yards by rail, much cheaper than by ordinary wagons, and when dry, it can be shipped directly to his destination, and another advantage, the ground being high and open, it is expected that the lumber will season quicker than in the overcrowded vicinity of the mills. But for this extension most of the mills would have been obliged to shut down long ago for want of piling room.

**Monday 03/12/1888 Ottawa Journal Buckingham**

It is expected the branch train from the main North Shore line up to the village will stop running in a week or so. It would have ceased already but that Mr. A.D. Cameron has a thousand cords of wood or so to move.

**Monday 03/12/1888 Ottawa Journal Pontiac & Pacific Junction**

A new post office called Maryland has been opened in the township of Bristol on the line of the P. & P.J.R. Jno. R. Bell, Postmaster.

**Monday 03/12/1888 Ottawa Free Press Canada Atlantic Chaudiere Junction**

The Canada Atlantic Junction at the Chaudiere, which is capable of holding 200 cars, is almost filled. A lively winter is anticipated in shipping. A large quantity of lumber will be exported and grain and potatoes brought in. Mr. Shaughnessy's present office is shortly to be replaced by a larger one in order to give better accommodation.

**Monday 03/12/1888 Ottawa Free Press Chaudiere Chaudiere**

The C.A.R. gatekeeper at Pooley's bridge, Chaudiere, has been given comfortable quarters for the winter, a neat and comfortable cabin having been erected for his use.

**Monday 03/12/1888 Ottawa Citizen Sussex Street Sussex Street**

Hon. R.W. Scott, the local solicitor for the C.P.R. told the reporter of an evening contemporary that he had advised the company to sell the Lower Town station. The burden of municipal taxes upon their property was an onerous one for a large railway corporation. He thought Ottawa was behind other Canadian cities in aiding railway construction. If the city had any enterprise it would buy the property, and hold it to be offered to the Ottawa and Vaudreuil or some other railway, which would make its terminus in Lower Town. As for the city's contribution towards purchasing the ground for the Lower Town terminus, Mr. Scott said the city gave the free use of McTaggart Street for a railway track, but the land for the station was purchased by the company from individuals or the crown.

**Monday 03/12/1888 Ottawa Free Press Ottawa City Passenger**

Owing to the business of the Street Railway company being slack at present the company is running one car less. It is remarked that on account of this reduction cars will pass a given point every half an hour instead of every quarter of an hour as heretofore.

**04/12/1888 Athens Reporter Westport**

Name Change - Farmersville to Athens

At the Counties' Council last week, Deputy Reeve Berney presented the petition praying for the incorporation of our village and for the change of name to Athens. The document was signed by 68 freeholders and 61 householders. Mr. Geo Nash's census report was read, showing a present population of 912. The boundaries of the new municipality were shown on a plan drawn by B.J. Saunders, C. E. Exclusive of streets, the territory embraces 480 acres. A by-law giving effect to the prayer of the petition was introduced.

Conductor Flegg Marries Tressa Allen

The popular B&W conductor Bob Flegg was married in New York on Wednesday to Miss Tressa Eva Allen, and took the train the next day for Westport, and passed up the line again on Thursday. They received a great ovation at every station.

**Tuesday 04/12/1888 Ottawa Free Press Canada Atlantic locomotive**

J.R. Booth's locomotive is being renewed in the Canada Atlantic shop.

**Wednesday 05/12/1888 Ottawa Free Press Canada Atlantic Elgin Street**

Shortly after six o'clock this morning one of the men at work on the engine shed at the C.A.R. found it to be on fire and an alarm was instantly sounded from box 134 at the depot. The brigade made quick time and guided by the terrific row being made by all the whistles of all the engines being blown at once, soon made their way to the spot. The heavy streams poured into the flames soon quenched them, and a few minutes comparatively served to subdue what promised to be a serious fire. The loss was about \$250, which was covered by insurance.

**06/12/1888 Brockville Recorder New York, St. Lawrence and Ottawa New York, St. Lawrence and**

New York, St Lawrence & Ottawa

Brockville to Ottawa. On Saturday by special invitation, a number of gentlemen met in the office of the BW&SSM Railway Co to have an informal discussion respecting a projected railway from Brockville to Ottawa, for which a charter exists under the name of the New York, St Lawrence and Ottawa railway. The persons incorporated by the act are R.G. Hervey, Robert Bowie, W.B. Smellie, G. H. Weatherhead and H.T. Fitzsimmons, and the act authorizes the construction of a road from Ottawa to Brockville or to a point between Brockville and Westport on the line of the BW&SSM.

There were present the following: R.G. Hervey, J.F. Wood MP, R Bowie, W.H. Cole, G.H. Weatherhead, H.T. Fitzsimmons, Brockville; O. Bush, reeve of Oxford and warden of Leeds and Grenville; R. J. Jelly, reeve, T. Smith and D.W. Ross, deputy Reeves of Elizabethtown; D.J. Hall, reeve of Merrickville; G. Keating, reeve of Kemptville; H. Hughes, reeve of Kemptville; H. Hughes, reeve of South Gower; John Ferguson, reeve of Wolford; John Chapman, reeve of Augusta, and J.J. Bell of the Recorder and N.B. Colcock of the Times...

**Thursday 06/12/1888 Ottawa Citizen Canada Atlantic Elgin Street roundhouse**

A fire broke out in the boiler house of the Canada Atlantic Railway yesterday morning a few minutes after six o'clock. The engineer in charge did a smart piece of work by tying down the steam whistle, which by its continuous blowing woke up all that neighborhood and brought many employees to the scene. The brigade was quickly in attendance and the flames were soon extinguished. The damage is estimated at \$200, but might have been \$50,000, as very valuable machinery, and new locomotives were contained in the burning building. The loss is covered by insurance.

**Thursday 12/12/1888 The Equity, Shawville Pontiac & Pacific Junction**

A second class car was destroyed by fire Wednesday evening while the train was standing on the track at Fort Coulonge. Fortunately it was not the car belonging to the new train put on last season.

**Wednesday 12/12/1888 Ottawa Free Press Sussex Street Sussex Street**

The disused railway cars on the St. Lawrence & Ottawa railway north of the Rideau river, have been hacked up by disorderly characters who were in the habit of frequenting that locality at nights during the summer.

**Wednesday 12/12/1888 Ottawa Free Press Canada Atlantic Elgin Street**

The boiler house of the Canada Atlantic railway company which was destroyed by fire a short time ago is now built up again.

**13/12/1888 Brockville Recorder Kingston (CN) Brockville**

GTR Double Track Brockville to Lyn

Messrs John Ryan & Co expect to complete their work on the GTR double-track between Brockville and Lyn today and the line will be open for traffic between this town and Gananoque. The work on the double track between Brockville and Cornwall is now in progress and with that portion already completed between that town and Montreal it is confidently expected that by next fall the double track will be in operation from Montreal as far west as Belleville. The work of double tracking is also in progress eastward from Toronto but these are not expected to be completed next year.

**Friday 14/12/1888 Ottawa Citizen Ottawa Terminal**

Article about the advantages of Central depot.

Good railway access, no streets to cross. Visitors Entrance to Ottawa.

B&W Market Train Early last week the back country was placarded with the announcement that on Saturday last, the Brockville and Westport Railway would carry passengers to Brockville and return for one half fare, and carry all kinds of market truck free, while the town authorities would provide free cartage to and from the train for all goods or merchandise going or coming into town. The Recorder says in Saturday's issue that there were about 200 passengers on the train and 4 carts of produce. The Times puts the number of passengers at 150 but says nothing about the loads of truck for the market. The passenger coach on the B&W will seat 50 and there were not more than 15 persons in the 2nd class car when the train left here.

Regarding the market truck there was one small package (probably 10 lbs) of butter taken on here, and that by a lady who obtained the lot from her daughter for home consumption. About one fourth of the passengers on that train were from this vicinity and 75 would be a good round figure to place the number of passengers at. There was only one lady from Athens who availed herself of the opportunity of half fare and free transportation of goods and from the size of the parcel and the quality of the goods she brought home the total value would not exceed five dollars.

The people of the country are not to be beguiled with any claptrap by the Brockville papers that they can save an awful lot of money by paying even half fare to Brockville to purchase their goods. The merchants of the villages along the line of railway are selling goods at figures that will keep the trade at home, despite all the frantic efforts of the Brockville papers to the contrary.

Tuesday 18/12/1888 Ottawa Free Press Ottawa City Passenger

The Street Car company sent out their horses this morning with the calks unfit for the roadway. With many difficulties two cars reached the incline on Rideau street but here they stopped; and finally the horses had to be taken out.

Wednesday 19/12/1888 Ottawa Journal Pontiac & Pacific Junction

Mr. Prince, general manager of the Pontiac and Pacific Junction railway, speaking to a Journal reporter this morning, said that the work of construction has been completed and the track laid to Black River near the point where it was proposed to cross the Ottawa. He was not sure that trains would run to Pembroke. It is possible the line may be run on the Quebec side of the Ottawa to the Sault, which of course is the ultimate terminus of the line. Mr. Beemer is still in France.

At a meeting of the County Council of the County of Pontiac yesterday, Messrs. John Bryson M.P. and W.J. Poupore M.P.P. stated that Messrs. Church, Chapleau and Beemer had refused to release the county from the railway bonds of \$100,000. The bonds are still in possession of the Provincial Secretary of the Province of Quebec. Messrs. Bryson and Poupore offered to get subsidies from the government of \$200,000 for the company if the company would release the county. The bonds are for twenty years bearing interest at 6 per cent.

Friday 20/12/1888 Ottawa Journal Chaudiere Chaudiere

The C.A.R. have purchased sixteen lots of land back of Mount Sherwood along the line of their Chaudiere Extension. The additional property acquired will be utilized for spurs to Messrs. J.R. Booth and Perley and Pattee's new lumber yards.

Proposal to build a Union depot between Elgin and Bank.

Friday 21/12/1888 Ottawa Journal Carleton Place Union Depot chaudiere

A fire occurred last night in a shed belonging to the C.P.R. company at the union station used for drying sand and heating oil. It was extinguished with little difficulty by the brigade. The loss will be about \$300. The fire is supposed to have occurred from a defective chimney.

Friday 21/12/1888 Ottawa Free Press Canada Atlantic Chaudiere

In addition to the Chaudiere extension of the Canada Atlantic railway, a few more branches of the line will be laid at the back of Mount Sherwood on the opening up of spring. The additional property consists of sixteen lots lately purchased and will be constructed for the purpose of reaching Perley & Pattee's and J.R. Booth's lumber yards.

Friday 21/12/1888 Ottawa Free Press Chaudiere Chaudiere

Flagmen are placed at each of the crossings of the Chaudiere extension of the C.A.R. but with the exception of the one at Queen street west gates, no shelter is provided for them. Some of the men suffered severely from exposure during the blizzard this morning.

Thursday 27/12/1888 Ottawa Citizen Canada Atlantic

When the Canada Atlantic application for permission to close a number of Stewarton Streets so that a shunting ground may be established there comes up before Judge Rose this morning it will be sturdily opposed by a deputation representing the property owners.

More - whistle noise - Marcus Smith said it was in the best interest of the railway company to locate their shunting grounds across the Rideau.

More.

Friday December 28 - C.A.R. withdraws application to close Stewarton streets.

Friday 28/12/1888 Renfrew Mercury Kingston (CP)

The German Iron Syndicate have instructed Capt. H.D. Moore to have a line of railway surveyed from the Kingston and Pembroke Railway at Calabogie five or six miles into the township of Darling, at Craig's, where they have secured an extensive iron claim from Messrs. Robinson of Ottawa, and Yuill, Darling. A line is also to be surveyed into the Davies & McMartin iron mining property, in Bedford, by order of the same company. Perth Courier.

Saturday 29/12/1888 Ottawa Journal Chaudiere

Some of the leading lumbermen are discussing the project of piling their lumber outside the city limits, the C.A.R. Co. having offered to haul it in green state at a special rate per thousand feet.
