

Local Railway Items from Area Papers - 1901

04/01/1901 Eastern Ontario Review Canada Atlantic Alexandria

New Stage Line

Mr. John Morrow, C.A.R. agent has succeeded in establishing a regular stage line from Alexandria to Green Valley to connect with all C.P.R. trains.

04/01/1901 Ottawa Citizen Ottawa Electric

There was a partial tie up of the Rideau Street line of the street railway last night caused by a car jumping the track. As car No. 64 was speeding northwards down the Nicholas Street hill, the motorman seemed to lose control and on reaching the curve was going too fast to turn. The car went straight ahead, jumping the track, stopping within two feet of the sidewalk in front of Bourque's store. The auxiliary car and gang were summoned and had a big contract getting the car back on the track.

08/01/1901 Ottawa Citizen Chaudiere McKay Milling

One of the capital's oldest manufacturing concerns, the McKay Milling Company, is about to go out of business. After the April fire which gutted the buildings and destroyed the plant and stock therein the company sold the mill site and water power at the Chaudiere to Mr. J.R. Booth. A good figure was obtained and the directors thought it was advisable to wind up the affairs of the company rather than seek another site and start anew at present.

The McKay Milling Company was founded over 60 years ago in the days of Bytown by the late Hon. Thomas McKay.--

It is understood Mr. J.R. Booth will establish either a pulp or a grist mill on the site secured from the McKay Milling Company. As there are 3,000 horsepower available and only 500 horsepower would be necessary to run a grist mill, it is altogether the new industry will take the form of a large pulp mill. The fact that Mr. Booth has large limits and is buying and cutting pulp wood bears this out.

10/01/1901 Ottawa Journal Brockville Brockville

Visit of Lord and Lady Minto to Brockville.

11/01/1901 Renfrew Mercury Kingston (CP)

Owing to increased traffic over the line of the K. & P.R. railroad, especially on market days, the company has found it necessary to post notices on the cars warning passengers that each one is entitled to seat space sufficient for one person only. Baggage, parcels, baskets, that cannot be placed under the seat or in the passenger's portion of the parcel bracket, must not be taken into the coaches, as obstruction of the aisles will not be permitted. Baggage, etc., which cannot be stored away as stated, must be placed in the Baggage car; if found in the coaches it will be removed. - Kingston Whig.

11/01/1901 Renfrew Mercury Canada Atlantic Galetta

The Canada Atlantic Railway propose to obtain authority to construct a branch from Galetta, in Fitzroy township, northerly across the Ottawa river to a point on the Pontiac and Pacific Junction Railway between Quyon and Shawville, in Pontiac county; also to make an extension of the line in question to Arnprior. The company also wants authority enabling it to build bridges, tramways, vessels, wharves, warehouses and docks, and to develop electric energy by the use of water power.

11/01/1901 Ottawa Journal Renfrew Elgin Street

Military train arrived at Elgin Street at 12 20 noon and the official reception took place at the Drill Hall.

Brown as Indians, broad shouldered, healthy, bright eyed and happy looking, the "D" Battery men arrived at the Elgin street depot to-day at twelve twenty, noon. Major Hurdman and Lieut E.W.B. Morrison, were both looking splendid. There was not that regard for dress which marked their appearance when they left Ottawa last year, but there were indications of fitness for duty and present in the minds of all spectators was the good record of the men of "D" battery.

All wore wide sombrero hats. Some of the gunners had their hats turned up on one side, and on the turn was a St. Andrews cross of red and blue, the colors of the battery. All wore khaki uniforms, some with great coats, some without.

--
Detachments from the Guards, Rifles Dragoons and second Field Battery attended and lined up on Elgin street near the tracks.

12/01/1901 Ottawa Journal Maniwaki

The Canada Gazette today contains a notice of application by the Gatineau Valley Railway to change its name to Ottawa, Gatineau and Western Railway, with the power, among other things, to acquire or amalgamate with the Pontiac and Pacific Railway, the Hull Electric Railway, the Ottawa and New York Railway, the Ottawa Interprovincial Bridge Company, the Ottawa Electric Railway Co., the Kingston and Pembroke Railway; to acquire and dispose of mines and timber lands etc., and to acquire and dispose of water power for electric purposes.

It is understood that while the above would represent a very daring scheme, one of the points the Gatineau Company will be most interested in carrying will be the right to acquire or amalgamate with the Hull and Aylmer Electric co. If the Pontiac and Pacific trains could travel over the Hull and Aylmer Co.'s rails a very large amount of difficult and costly track laying would be avoided, between Deschene and Hull.

Mr. P.W. Resseman, Superintendent of the Gatineau Valley, was asked as to the details of the scheme of Mr. Beemer. He did not make any statement.

17/01/1901 The Record, Chesterville New York Central

The O&NY, having completed their line to Ottawa and established car shops there, ask for payment of the promised bonus of \$75,000.

18/01/1901 Eastern Ontario Review Prescott Ottawa

To Connect Stations

Now that the new Union depot on Broad Street, Ottawa, is about completed, the C.P.R., it is understood, is arranging for the construction of its line across the city connecting the western division with the short line to Montreal. It is announced the company intends to apply to the new city council for certain crossing privileges in the construction of the road, but the officials decline to make public at this juncture, any details regarding the proposed scheme.

The C.P.R. has secured options on a large amount of property which was provided for alternative routes if such prove necessary, but the one which is most favored, and which it is likely the city council will be asked to sanction, is that running parallel, for the greater part of the way, with the Canada Atlantic Railway. The necessary options for a line in these directions were secured some time ago and there are many reasons why it should prove acceptable.

25/01/1901 Eastern Ontario Review Montreal and Ottawa

Two C.P.R. inspectors made an official visit over the short line this week. They found everything O.K. in this section.

28/01/1901 Ottawa Journal Pontiac & Pacific Junction

Passengers from Aylmer who board a train without a ticket are charged an extra 25 cents. The reason for this is the large number of people boarding at Aylmer without a ticket and who argue about the fare until their destination is reached. People boarding at flag stops are not charged anything extra while those boarding at other stations without tickets are charged an extra 10 cents.

28/01/1901 Eastern Ontario Review Montreal and Ottawa Vankleek Hill

The Strike of C.P.R. Trackmen

The strike of C.P.R. trackmen continues. The company claims that some of the men are returning and the leaders of the strikers deny this. As far as this district is concerned the majority of the men are out. The section between here and Rigaud has been patrolled for the past week by Messrs. Wm. McInnes, Chas McInnes and R.D. McLaurin.

On Monday night Mr. C.W. Spencer went over the line in a special train and urged the men to return to work. Some of them promised to do so. On Tuesday we learn that some of them kept their word. The gang at Rigaud was reported on duty also a few other men. The Vankleek Hill gang is still out this (Wednesday) morning.

In connection with the C.P.R. strike in this section a good story is told at the expense of one of the men at St. Eugene.

Mr. C.W. Spwncer, the superintendent of the Eastern division was persuading this man to return to work. He hesitated long and then replied. "I would for go to work me but I'm afraid for my life."

Mr. Spencer replied "Well my man. What good is your life to you if you are starving?"

Quick as a flask the workman replied "Dats all very well but for what good my life for me when I am dead." The superintendent gave him up.

30/01/1901 Ottawa Journal Chaudiere Bridge Street chaudiere

CAR has until Feb. 4 to sign an agreement with the city about the crossing on Bridge Street. Booth's request for perpetual rights refused.

31/01/1901 The Record, Chesterville Montreal and Ottawa Pendleton

Plantagenet Jan. 24. A fire occurred at Pendleton station on the CPR last night, burning the store house owned by Henry Moffatt and the Canada Hay Company in the first owned; Mr. Dwyer of Ottawa had between 3,000 and 4,000 bushels of grain ready for shipment and in the second were about 12 tons of hay, all of which was consumed. A car loaded with hay for Mr. Way of Rockland was also burned. It is stated that the loss is partially covered by insurance.

02/02/1901 Ottawa Journal Hull Electric Aylmer, Queens Park

Annual meeting of Hull Electric. Has been a good year in spite of the problems caused by the fire in April.

The car service between Ottawa and Hull was totally destroyed by the great fire of late April so that during the first month or two after the fire the Brigham Ferry was quite an important connection before it was stopped for some weeks last summer. The car service between Ottawa and Hull was not restored until near the close of the year 1900, although there was a local service between Booth's mill and Hull. People visiting Aylmer and Queen's Park and those forming almost the entire traffic of the Pontiac railway in both directions were obliged to walk a portion of the way between Hull and Ottawa for nearly eight months.

05/02/1901 Ottawa Citizen Carleton Place Ottawa, Broad Street

The official staff of the C.P.R. moved yesterday from the temporary quarters in the Trust building to the new Union station, on Broad street, which has just been completed.

The new depot is a handsome structure in pressed brick and contains an adequate accommodation for the incoming traffic of the road. The first floor contains waiting rooms, ticket offices, baggage rooms and restaurants while upstairs the general offices of the company will be located. The yard accommodation has also been considerably increased so as to ?? A larger number of trains to run into the new depot. The building is heated by steam and lighted by electricity and was built by Messrs. Lyons & White.

05/02/1901 Ottawa Citizen Prescott Chaudiere

Scene at C.P.R. and C.A.R. crossings. Illegible - see Ottawa Journal.

This morning Mayor Morris and Ald. H.J. Davidson, Storey and Hopewell met at the city hall and along with Engineer Kerr, went to the Canadian Pacific Railway crossing on Wellington Street, where they put down timbers on the railway track, thus blocking the track.

Mayor to Engineer: "As mayor of the city, and in pursuance of the resolution of the council last evening, I order you to block and barricade this railway track."

"Very good, sir" responded the engineer, and he set the men to work.

While the work was being done, Constable Sullivan of the Canadian Pacific Railway appeared on the scene and was followed by a crowd of about thirty Canadian Pacific firemen, brakemen, engine drivers, laborers and other classes of employees. They came and looked on quietly while the work was being done. Inspector Vizard of the City Police was there in charge of his posse. He was instructed by His Worship to put three men on the crossing and to instruct them to arrest at once any one who attempted in any way to interfere with the crossing or the blockade.

At the bridge

Before going to the Wellington street crossing the mayor and his party went to the bridge across the aqueduct at the Canadian Pacific depot and blocked both ends by stringing barbed wire across. Constables Cassidy and Ross were left in charge with instructions to allow no one to pass. This bridge remains closed. When these two matters had been attended to the mayor's satisfaction the party proceeded to the Canada Atlantic crossing on Bridge Street where they put down a similar blockade to that put on the Canadian Pacific Railway.

An injunction

While this was going on Mr. D'Arcy Scott, solicitor for the Canadian Pacific, arrived on the scene with an injunction which he had previously served on the city clerk John Henderson at city hall. The injunction was granted by Judge Mosgrove and reads as follows: "This court doth order that the defendants, and their agents and servants be and they are hereby restrained from barricading or destroying the plaintiff's railway at or near Wellington Street, as approved by the Railway Committee of the Privy Council, dated Jan 31, 1900 in the City of Ottawa, or otherwise interfering with the traffic of the said railway until Thursday 7th Feb. or until motion then made to continue this injunction shall have been heard and determined:

This injunction was made on solicitor Scott's injunction and the judge gives order that further affidavit can be made.

Tore down the barricade.

When this injunction was served, the Canadian Pacific employees began to tear down what the city had been doing.

Mr. D'Arcy Scott along with Mr. Fred White, Chief Clerk in the superintendent's office served the injunction on the Mayor at the Bridge Street crossing at the same time a messenger arrived from City hall to warn the mayor that an injunction had been served there also. The mayor and Ald. R.J. Davidson decided that they would have to consult the solicitor before offering resistance to the word of the injunction.

In the meantime, Mr. Scott and Mr. Fred White returned to the Wellington Street crossing where Mr. H.B. Spencer, Superintendent of the Canadian Pacific Railway was awaiting them with a number of employees around him. Mr. Scott went to constables McGuire, Hamilton and Bush who had been left in charge and asked them what they would do. He said they might as well agree to let them tear up the barricade.

"You know that you are not physically able to resist this crowd."

"No" answered Constable McGuire, "Nor do we intend to. But we will carry out our orders and arrest the man who gives the order to tear up that block."

Messrs. Spencer, Scott and White held a consultation as to who should be arrested and they decided that Mr. White should give the order.

Mr. White walked over to the men who were standing around with crowbars ready to do the work, and just as he was about to speak, Mr. Spencer turned around and called to a man named Cassidy: "Cassidy, tear up the block." Mr. White gave the order at the same moment, so McGuire and the other constables decided that they would take both Messrs. Spencer and White to the police station and let them settle the matter.

Messrs. Spencer, White and D'Arcy Scott agreed to this and got into the cab along with the police constables and all drove to the station.

On the way they met the mayor and Ald. Davidson. The mayor asked the constables if they were taking the men down to the station.

The constables replied "Yes".

"That is right," said the mayor, "Do your duty."

The Canadian Pacific Railway men were taken to the station and Chief Powell was called from his house.

The Chief came down and after a consultation with the Canadian Pacific Railway people decided to let them go. The Chief says that they are not arrested but may be summoned if he finds on consulting the magistrate that it is necessary.

His worship the mayor is considerably incensed over the Chief's action. He claims that the Canadian Pacific Railway representatives were arrested and that the policemen had followed out his instructions by asking or taking the men to the station.

Here the matter rests and the question is was H.B. Spencer and Fred White arrested or were they not? At any rate the barricade is gone from the Canadian Pacific tracks. It was only forty minutes there. The work was completed at 11.39 and at 12.10 the track was again cleared and is clear yet.

The Bridge Street crossing

The Canada Atlantic crossing was blocked up to the time of going to press but Messrs. Chrysler and Bethune, acting for the railway company, this morning issued a writ for a similar injunction to that of the Canadian Pacific Railway. They expect to get the injunction and serve it this afternoon, when they will likewise tear up the barricading.

There are two policemen on that crossing to guard the city's rights as well and some one else may have to go to the police station this afternoon. The Railway Company claim that they will operate their crossing the same as usual after five o'clock to-night.

How the trouble began

The trouble between the city and the Canadian Pacific and Canada Atlantic Railways came to crisis today. The city council demanded last night that the railway companies' tracks on Wellington and Bridge sts. should be blockaded as the companies had not signed the agreements prepared by the city, which they had agreed to do when they got permission to lay the crossings. The companies were allowed to lay the tracks across city streets, subject to an agreement to be submitted by the city.

Ten days ago they were given notice that if they did not sign the agreements within ten day's time the city would tear up or blockade the tracks. In the meantime the Canadian Pacific Company got an interim order from the Railway Committee of the Privy Council allowing them to use the tracks across the streets. The Canada Atlantic got a similar order some time ago. Today the city practically tells the Railway Committee of the Privy Council that the Corporation of Ottawa is going to man the streets and say whether and on what terms railway tracks shall be laid across city streets.

The mayor, before acting this morning wrote the following letter to the City Solicitor:-

"In view of the decision of the council last night in the matter of the CPR crossing on Richmond Road and the Canada Atlantic Railway crossing on Bridge Street, and the bridge over the aqueduct, is there in your opinion any reason why the same should not be acted on forthwith." sgd W. D. Morris.

Mr. McVeity replied distinctly "No"

sgd Taylor McVeity, City Solicitor.

His worship called on the chief of police after Messrs. H.B. Spencer and White had been allowed to go and asked the chief whether or nor they had been arrested. The chief, the mayor says, admitted to him that Messrs. Spencer and White had been arrested and were allowed to go on their own recognizance.

SAYS THAT THE POLICE FAILED

the mayor says that in the case of the Canadian Pacific Railway the police failed to do their duty properly. He has since ordered that in the case of the Canada Atlantic Railway the police shall stand by the crossing and protect it in the city's interests at all hazards using force if necessary to resist any attempt to tear up the barricade and to arrest all persons interfering in any way.

The battle is ended

Hostilities between railways and the city cease.

There was a cessation of the hostilities between the city and the railway companies yesterday afternoon.

The cases will now go to the courts and will be fought out there.

At three o'clock there was a conference in the mayor's office as to what should be done. His worship had with him the city solicitor, Ald Hopewell, Ellis, R.J. Davidson and Ald. Taggart.

Summary of previous account.

The mayor told reporters that the Corporation would take every legitimate means to oppose what he terms the aggression of the Canadian Pacific Railway.

They also decided to tear away entirely the bridge build by the Canadian Pacific Railway across the aqueduct for the use of their employees. Men were put to work and during the afternoon the bridge disappeared. The material was piled on the city line alongside the aqueduct.

The Canada Atlantic crossing

Summary

During the afternoon the mayor was served with an injunction from the Canada Atlantic. The injunction was almost exactly like the one issued by the Canadian Pacific railway. The mayor asked the city solicitor what should be done in the case of the Canada Atlantic crossing in the face of the injunction. The solicitor told him that they would have to call off the police, as with the injunction, an order from the court, they could not possibly enforce the blockade of the crossing. It would be contempt of court to do so. The mayor accepted this advice and called off the police. Last night the company removed the blockade and operated the line. This injunction will also be argued on Thursday next and after that both cases will likely get a hearing before the Railway Committee of the Privy Council.

Dalkeith

The C.A.R. is disposing of a few cars of ice at the station here. The ice, which is of a fine quality was cut on the St. Lawrence near Valleyfield.

Discussion about the rights of the railway to cross. CPR had only recently gone to the Privy Council Railway Committee.

The CPR seems to be all right as regards the stone arch carrying the tracks over the waterworks viaduct.

The company asked civic consent as to an extension. The civic case was submitted to a sub-committee of aldermen and the city engineer. That sub-committee made an agreement with the CPR and the members say the agreement was properly carried out by the CPR.

Neglect by the sub-committee to formally report the agreement to last year's council appears to have caused the agreement to be omitted from civic records. The absence of record is full justification for the move of Mayor Morris to emphasize the supposed civic right; but now that the members of the aldermanic sub-committee admit the correctness of the CPR contention, there ought certainly to be no more troubling of the railway in the matter.

But the other cases, big and little, the level crossing question and the case of the footbridge over the aqueduct should be fought through every available court in the empire if need be. Don't let us tolerate either rebuff or compromise until the exact civic status as regards railway arrogance and unscrupulousness.

Waterworks committee recommends to council that the Mayor's action in ordering the removal of the stone arch bridge over the aqueduct be sustained.

City will ask the Railway Committee for a viaduct over Wellington Street.

Case against the Mayor postponed until Saturday.

New Pullman Car

Elegant Palace car Placed in Commission by C.A.R. for New York Route

A veritable travelling palace is the Pullman drawing room and buffet car Marie which has just been placed on the Canada Atlantic Railways Ottawa and Montreal service.

The new car made its first trip yesterday and was examined and admired by many as it stood at the Central depot. The car, which was turned out at the Pullman company works, Buffalo, is pronounced by experts a splendid specimen of modern car architecture the exterior finish differs considerably from that of the average railway carriage, and it gives an impression of strength and neatness as well as beauty.

The car is a 6-wheel one with a length over platforms of 75 ft. The length of the body is 69 feet 4 inches. The details of workmanship after the latest fashion.

The favorable impression formed by an exterior view is strengthened when the visitor steps within. No well-appointed home, arranged by artistic and lavish hands, ever presented a more welcome sight to the traveler. The interior is finished in vermilion wood imported from Brazil for the purpose. This wood is a new factor in car construction, and it lends itself readily to the production of an artistic appearance. The ceiling, which is over 9 feet high, is tinted in a light green color with empire decorations. Axminster carpets, of a field green color, and empire pattern, overlay the floor, adding to the harmony of the color scheme. There is a total seating capacity of 34, and the car is furnished with special ventilated armchairs, both fixed and loose. These are upholstered in green shaded plush.

The interior is illuminated by gas and can be heated either with steam coils or independent heaters. The car is fitted with double plate glass windows and ventilators. The whole appearance of the interior is bright, cheerful and airy. Kitchen and buffet, smoking room and toilet rooms are all included and the comfort of the traveler is served as well as his convenience.

A companion car, the Ruth, has also been placed on the line. These cars will run on the fast service between Ottawa and Montreal, connecting with New York and Boston.

Mr. W.N. Wainwright, assistant general manager of the G. T. R., who left on the train in his private car, was one of the many who examined the latest addition to the C. A. R's rolling stock.

C.P.R. Settlers Trains

the C.P.R. will run special settlers trains to Manitoba and the North West during March and April. Special trains will leave Carleton Junction every Tuesday at 9 p.m. Special sleeping cars will be attached and berths will be free. Any C.P.R. agent will be pleased to furnish inquirers with settlers guide or other information. This was also run in subsequent editions.

Case against Mayor dismissed. Evidence went to show that the company had been notified before the tracks were blocked so that there could not have been any malice in this matter.

Railway injunction is being argued in the High Court which decided against the city.

Bridge street crossing unlike the CPR Case. Booth wanted it put in in a hurry across the only street between Ottawa and Hull. This was merely a steam tramway extension for lumber, Booth wanted to make money quickly. The only issue was that city was prepared to give an agreement for ten years while the railway wanted in perpetuity. Cannot understand the railway logic.

21/02/1901 The Record, Chesterville Prescott Ottawa

Mayor Morris of Ottawa has been discharged by the magistrate at Ottawa on the charge of willfully and maliciously barricading the track at the Richmond Street crossing.

21/02/1901 Merrickville Star Belleville Perth

A broken wheel on a freight train on the C.P.R. two miles west of Perth, about midnight Monday, wrecked several freight cars and delayed the west bound express

26/02/1901 Ottawa Citizen Montreal and Ottawa Interprovincial Bridge

The new Interprovincial bridge was inspected yesterday afternoon by City Engineer Kerr and the members of the railway and lighting committee. The structure was found to be satisfactory and conforming with the plans and specifications. A start was made from the Central depot and the bridge with the approaches on both the Ottawa and the Hull sides was carefully gone over. The work being regarded as complying with the by law, the city engineer will issue his certificate. As soon as the certificates are received from the Dominion and provincial inspectors the bridge will be thrown open for public traffic, probably at the end of the present week. The bonus of \$150,000 will be paid very shortly.

Besides the city engineer, Ald. Masson, Davidson, Taggart, Poulin, Hopewell, Hill and Messrs. H.J. Beemer and Guy Dunne [sic] were present.

28/02/1901 Ottawa Journal Prescott Wellington Street

The level crossing over Wellington Street which was objected to by the city council was torn up this morning by order of Mayor Morris.

This was because the injunction restraining the city from interfering with the crossing was dissolved in Toronto yesterday.

More. Mentions the Montreal and Ottawa Railway. City argued that this was the fourth crossing at rail level and the locality is made dangerous. Not necessary for business but as a convenience for shunting trains.

The order of the railway committee does not authorize the crossing but defines the mode and manner of crossing and provides safeguards against injury to the public.

As a result of the judgment His Worship the Mayor tore up the rails across Richmond Road crossing and placed a constable there to prevent the company from laying them down again.

Arrived at the scene his worship and the engineer set the men to work to tear up the rails. They had been at work about half an hour when Mr. D'Arcy Scott, solicitor for the railway company drove up in a cab and handed the mayor an envelope. At the same time he stated that the envelope contained an undertaking from the company not to use the tracks.

The mayor looked at the envelope and then at Mr. Scott and said:

"Yes. Oh, all right. I will give this to the city solicitor. In the meantime I will make doubly sure by taking these tracks off the street."

"Well", replied Mr. Scott "if you wish to take a dignified stand on this matter you will not cause any damage to the company's property."

"Oh. We won't incur any damage," replied the mayor. "We will simply remove the rails. I don't intend to take any advice from you on this occasion." replied the mayor as Mr. Scott turned away.

Wording of the undertaking.

His worship took no notice whatever of the document, but quietly smoked his cigar and watched the work of tearing up the tracks proceed.

To the police he gave orders that on no account should they allow the tracks to be re-laid.

01/03/1901 Ottawa Citizen Prescott Chaudiere

New C.P.R. crossing has been torn up. Illegible.

01/03/1901 Brockville Recorder Westport

Col. W.H. Cole is now receiver of the BW&SSM Railway

04/03/1901 Ottawa Citizen Britannia Power Canal Metropolitan Electric

Mr. C. Jenkins, the well known Petrolia oil man, and vice-president of the Metropolitan Electric company of Ottawa, is in the city and on Saturday accompanied President Thomas Lindsay to Britannia to inspect the work. Mr. Jenkins was highly pleased with the progress of the work, and is very sanguine as to the company's future. The existence of such a water power so close to Ottawa is an invaluable asset to the city and he thought it would be an invaluable factor in attracting new industries here. While not a civil engineer, he believed there is about twenty thousand horse power, outside of what the company is now developing, and as the city demands it the additional power can be developed. The existence of the power so close to Ottawa is bound to make the Capital prominent as a manufacturing city.

Mr. Jenkins stated that the erection of the power house is practically all there is to be done as the canal is almost finished. The company is now considering the purchase of the machinery for the power house, the tenders being all in. The machinery will cost between \$200,000 and \$300,000, and as it will be of the most modern type, and there will be no trouble with anchor ice, electric light of the highest quality will soon be a cheap commodity in Ottawa.

05/03/1901 Ottawa Citizen Montreal and Ottawa Interprovincial Bridge

The Interprovincial bridge will likely be thrown open for public traffic today, although the formal opening will be deferred until later on. Mr. Dunne [sic] chief engineer of the bridge works, stated today that the bridge will be opened immediately after the city engineer gives a certificate approving of the work, and such will be sent to city council by Mr. Kerr tonight. The certificates of the Dominion, Ontario and Quebec governments have already been received. The structure is fully completed and only needs opening to ensure a full traffic.

Mr. Collingwood Schreiber C.E., to whom was referred the dispute as to the height of the fence between the railway tracks and the roadway, has decided to approve of the work in its present form instead of ordering a fifteen fence as suggested by the city engineer. The four foot fence at present provided is the same height as on the Victoria bridge at Montreal.

06/03/1901 Kemptville Telegram Brockville Smiths Falls

The jury at the inquest on Robert Cassell, killed by being struck by a C. P. R. train at Smiths Falls. brought in the following verdict : That Robt. Cassell met his death by being struck by a C. P. R. train coming from Brockville, and that the snow banks in close proximity to the crossing where said accident occurred contributed to death of said Robert Caasel. We are of opinion that said banks were largely caused by snow thrown on street by C. P. R. employees and recommend that gates be placed on all railway crossings in the town of Smiths Falls.

07/03/1901 Ottawa Journal Prescott Wellington Street

At Privy Council Railway Committee Company scores a point. Authorized to cross Wellington Street but to put up gates.

08/03/1901 Ottawa Journal Prescott Wellington Street

500 navvies to relay the rails. Mayor has ordered all policemen to be armed and to remain near the centre of the city so as to easily be within call.

08/03/1901 Ottawa Journal Prescott Wellington Street

Armed policemen guard the crossing - eight of the biggest men on the force are being housed close by and meals provided. Twenty special constables sworn in. Mayor will call out the militia if he can.

Should the railway company attempt to relay the rails the fire bell will ring and a fireman will turn on water. Fireman with a key and hose stationed at the location.

Mayor believes that the Privy Council Railway Committee only has the power to specify the mode of crossing not to authorize the crossing. CPR will install rails when the gates arrive.

09/03/1901 Eastern Ontario Review Canada Atlantic

New Railway to Montreal

Surveyors are at work on a short line between Ottawa and Montreal for the Canada Atlantic Railway. It is claimed that it will be the shortest line between the capital and the metropolis and that when the line is built it will be an easy thing for trains to cover the distance in one and a half hours.

When the new line is built the Canada Atlantic fast trains will not run to Coteau. They will leave the central depot as usual, but will branch off from the present line after leaving Ottawa and will run direct to Vaudreuil and thence into the city of Montreal

- Ottawa Journal

A straight line between Ottawa and Montreal passes right through Vankleek Hill. If the road strikes Vaudreuil it will pass about six miles south of Vankleek Hill.

11/03/1901 Ottawa Journal Prescott Wellington Street

This defence is expensive. City's armed force at Wellington Street will be reduced to twelve men. The excitement is cooling off. In the meantime the CPR are not spending a cent but are playing a waiting game.

13/03/1901 Ottawa Journal Prescott Wellington Street

CPR advised the city that they believe they have the right to cross. City informed the CPR they are in error and will resist until the matter is settled in the courts.

14/03/1901 Ottawa Journal Prescott Wellington Street

CPR intends to get even with the city by diverting traffic through Smiths Falls.

15/03/1901 Renfrew Mercury Prescott Wellington street

Ottawa and the C.P.R. are at loggerheads over the laying of a level crossing on Wellington street. Mayor Morris, who is a fighter from head to foot, has a force of special police guarding the crossing to prevent the railway people putting down the rails. Popular sympathy is very much with the Mayor at present; but the C.P.R. is playing a waiting game, and the guard is costing the city from \$30 to \$50 a day. --

15/03/1901 Ottawa Journal Winchester St. Polycarpe

ACCIDENT AT ST. POLYCARPE

There was a railway accident at St. Polycarpe Junction this morning and it was rumored in the city that Engineer Lumaden was badly injured by being pinned down by the engine, which left the rails and turned over on its side. No confirmation of the rumor could be obtained from the local Canadian Pacific Railway officials, as the accident occurred on the Ontario and Quebec division. According to the rumor the engine had to be jacked up in order to get Lumadsen from beneath it. All the passengers escaped without injury.

15/03/1901 Renfrew Mercury Locksley Pembroke

Yesterday afternoon Mayor Millar received a telephone message from Mr. W.D. Cunneynworth, agent of the Canada Atlantic Railway, that a young woman had given birth to a child on the Madawaska train due here at 5:30 p.m., and that she was without money or friends in Pembroke. The Mayor at once informed Dr. Joseph, who, along with the Mayor, awaited the arrival of the train, which did not come in until a few minutes before six. The woman and child were removed to a temporary bed which had been prepared in the ladies waiting room, and the Mayor afterwards had them conveyed to Mrs. O'Briens at "The Castle", who agreed to take charge of them at the Corporation's expense. The unfortunate girl, for she is said yet to be sixteen, is a pole, and comes from near Killaloe and her name is Mary Planke. She got on the train at Wilno, and had only twenty-five cents in possession. When at Golden Lake she was taken sick, and Conductor Martin got an Indian woman, Mrs. Machell, to come to the assistance of the unfortunate girl, who kindly came on with her to Pembroke.

ENGINEER WILL DIE

Montreal, March 15th.- the Canadian Pacific Express, No. 5, which left Montreal for Toronto at 9 o'clock last night was wrecked by running over an open switch at St. Polycarpe Junction, and engineer Lumadsen of this city, who is now in the General Hospital here, was so badly injured internally that he will die, probably within forty-eight hours. The express messenger was slightly scalded but all others, including the passengers, escaped. The engine, baggage car and mail and express cars left the track, tore up the track rails and knocked down several telegraph poles.

After this damage had been done the engine and cars were in the ditch, where they still lie, blocking the track. It is not expected that the line will be clear before morning and until then all trains to and from Toronto will go and come via Ottawa.

The railway officials have given out a statement in which they state that the responsibility of the wreck cannot yet to be determined as they can form any idea of the loss of the wires and repaired as established

The rest is illegible.

C.P.R. TRAIN WRECKED

Toronto Express Ran Into Open Switch Engineer Badly Injured.

West bound passenger train No. 5. which left Windsor Statlon at 9 o'clock Thursday night was derailed two hours later at St. Polycarpe Junction by running into an open switch. The locomotive and tender, baggage. second-class and day cars left the track and George Lumsden, the engineer in charge, sustained severe internal injuries. He is now in the General Hospital here. The passengers were badly shaken up by the cars running into the telegraph poles, but all were able to continue their journey to Toronto on the train that was quickly made up. The line was blocked until 5.15 o'clock yesterday afternoon.

Mr. Thomas Tait, manager of the Eastern lines of the Canadian Pacific Railway, yesterday gave out the following statement regarding the accident:

"On account of an open switch, the engine, tender, baggage car. second class car, and first-class car of No. 5 Toronto train were thrown off the track at St. Polycarpe. The accident occurred at 11 o'clock last night, and the passengere were naturally a good deal frightened and shaken up, but unhurt. The only man who was hurt was Engineer Lumsden.

"For a while, he himself, did not seem to know it, and stoutly protested that there was nothing wrong with him, but later on he was found to have some internal injury, which, however, was at the time declared not to be dangerous. He was taken to Montreal, and is now in the General Hospital. A wrecking train was sent out from here, and a new train was made up, so that all the passengers have left for their destination. The wrecked train still obstructs the track, and for the present we reach Toronto by the way of Ottawa. How the work of clearing the track is progressing we do not know, because the cars, in leaving the track, knocked down the telegraph poles, and the wires are useless."

Mrs. Lumsden came from Smith's Falls yesterday to visit her husband, and was at his bedside last night, as were several officials of the company. The hospital attendants say that Lumden's condition is precarious.

Chelsea

The biggest landslide in the history of the Ottawa and Gatineau Railway occurred last Thursday night about a mile and a half this side of Chelsea. The whole side of a cliff, 188 feet in width, slid down on to the railway tracks and covered them over to a great height. A gang of 100 men under Roadmaster J. Brennan started work yesterday clearing the tracks. They worked all day and just as they had made a clean passage for the trains about 4 o'clock in the afternoon, another landslide took place. The men are at work again today. Trains in the meantime work to both sides and passengers are transferred across.

Pontiac & Pacific Junction

Hull Beemer

About May 1st work will be started on the new Hull station of the P and P.J. railway. It will be situated near Chaudiere street at the junction of the two lines. From the new station over the Interprovincial bridge to the Central depot the trains will traverse the one line.

Plans for the new station are now being prepared. It will be a two story structure, built of brick or stone at a cost of about \$4,000.

As soon as the weather permits work will be resumed on the extension of the P. & P. J. railway from Aylmer to Hull. The tracks have been laid as far as Deschenes and the grading has been completed to a point within half a mile of Hull city limits,

It is expected that trains will be running over the Interprovincial bridge direct from Aylmer by July 1st. At present a temporary station is being used in Hull for the accommodation of parties travelling on the O. & G.V. Railway.

05/04/1901 Almonte Gazette Chalk River Almonte

Terrible accident

In the CPR yard here on Monday afternoon (1/4) last the section men were engaged in leveling the siding between the Church Street crossing and the Elmsdale Flannel Mills. The front section of a freight train was on the same siding and was shunting. The Freight engine and a few cars were backing down to be coupled to the rear section at the same time that the afternoon express for Winnipeg came thundering along. Mr. William J Code, section foreman, was busy putting a spike on the siding, and seems to have forgotten the fact that the freight train was on the track on which he was at work. As the express went whizzing past the freight backed slowly in the same direction. Mr. Code kept working away, unconscious of impending danger. The brakeman of the freight shouted to him repeatedly to get out of the way, but the noise of the trains prevented his being heard and the end of the car struck Mr. Code turning him partially around and he fell prostrate across the rails face downward. The rest of the story can be imagined. The ponderous wheels passed over the unfortunate man, virtually bisecting his body about the waist. A car and a half passed over him. When the train was stopped he was taken out dead. He probably never knew what happened him. The shocking scene was witnessed by one of his fellows at work, Mr. Tom Walker, and by one or two others. The body was removed to the side of the track. Doctors were soon in attendance and the coroner Dr. Burns, on learning the facts decided that an inquest was unnecessary. The body was taken to Mr. Donaldson's undertaking establishment where it was dressed and taken to the house of deceased next morning and on Tuesday afternoon the funeral took place by CPR to Franktown his old home. A large number of friends were present to show their sympathy.

Landslide at Hudson.

A small landslide caused by the spring floods at Hudson on the C.P.R short line blockaded the tracks Thursday evening (11/4) for a couple of hours. The material was easily removed and outside of the delay to the local, passenger train traffic was unimpeded.

The C.P.R, short line to Ottawa was practically tied up on Monday (8/4) last owing to the track being under several feet of water at Cobb's lake. The fast trains in the morning were several hours late. In the afternoon they were cancelled altogether. The service between Montreal and Plantagenet was kept running by the crew of the mixed train.

The Canadian Pacific fast train from Ottawa was over two hours late in arriving at Windsor station Montreal. The reason was that the flyer had run for about two miles and a half on tracks submerged under two and sometimes four feet of water. This flooded section is near Pendleton station, about thirty miles this side of the Capital. The train which left Ottawa at 9.05 a.m. and is due in Montreal at 11.20 did not reach Windsor station until 12.55 this afternoon as it took about an hour to cover the lake like expanse of country. In places the water was almost deep enough over the tracks to touch the car steps. Fences along the track were completely submerged, and the water was within six feet of the telegraph lines. People in the district are making their way about in boats and some farm houses are completely isolated. Owing to the good condition of the road the trains continue to run over the tracks at a very moderate rate of speed, but if the water rises much more they will have to be discontinued. It is believed that the high water mark has been about reached, as the snow is nearly all melted.

12/04/1901 Eastern Ontario Review Canada Atlantic

Mr. E.J. Chamberlain, general manager of the Canada Atlantic Railway was in Montreal Friday (5/4) and expressed himself very plainly on the elevator question. He states that the contract his company has in connection with Coreau and ?? between than point and Montreal had expired after running three years. They now have to make other arrangements and unless something can be done in Montreal the company will have to go elsewhere.

15/04/1901 Ottawa Citizen Montreal and Ottawa Interprovincial Bridge

The first runaway took place on the new Interprovincial bridge yesterday afternoon between three and four o'clock. An approaching train, which no one expected, frightened a horse driven by Mr. Lahaise, a furniture dealer, Rideau street. The horse became uncontrollable and dashed across the bridge at terrific speed. Mr. and Mrs. Lahaise jumped from the rig, the latter suffering a severe shaking and being stunned for a while.

The horse was stopped on the Hull side by dashing into a buggy occupied by Mr. and Mrs. James Codd who were out enjoying a drive. Mr. Lahaise's rig escaped without damage while the wheel and back axle of Mr. Codd's buggy were badly twisted.

There were a great many pedestrians on the bridge at the time and there was a lively scurrying for safety.

The incident serves to emphasize the danger which exists by not having the foot walk fenced off in some way from the vehicular roadway.

17/04/1901 Ottawa Journal Prescott Chaudiere

Establishment of the principle that the aqueduct and banks are purely civic property and that upon any future widening of the aqueduct the CPR shall lengthen its bridges at its own cost, is important. More.

A good story was told by a travelling man last week that illustrates the speed of the local trains of the CPR - says the exchange. The train had been slower than usual that day and the passengers were thoroughly disgusted. Among them was a nervous woman and a boy. During the trip the conductor came around and the lady presented him with a full ticket and a half fare for the boy. The conductor looked at the boy a moment and then said "Isn't that boy more than twelve years old?" Quick as a flash the lady replied: "He wasn't when he left Perth, but I think he will be a voter before we reach Montreal." The conductor accepted the half fare ticket and moved on.

O&NY may change hands.
The rumor of the entrance to Ottawa of the Vanderbilt system of railways by the acquisition of the Ottawa and New York line has been strengthened within the last few days.
Mr. Calloway, President of the New York Central railway, Dr. W. Stewart Webb, Chairman of the directorate and Mr. Clements, president of the Rutland Railway were in Ottawa last week having come over the Ottawa and New York line on a tour of inspection
They traveled in a special train. The railway magnates expressed themselves as favourably impressed with the line and their minute inspection is construed as an indication of the probable acquisition of the road.
The Ottawa and New York connects with the New York Central at Tupper Lake and the Rutland Road at Moira. The Vanderbilt interests are acquiring control of all line in northern New York along with their principal connections, and it is said to be their intention of coming into the Capital over the Ottawa and New York, which provides the shortest distance between this city and the metropolis. The fact of the line being only 130 miles in length leads to the conclusion that it can never be operated on a very successful financial basis unless absorbed by some regulate railway system or else further extended in New York state. The Vanderbilt's are said not to be particularly favourable to construction of any additional lines in the northern part of the state and their purchase of the road at any time will not occasion any surprise. Messrs. Calloway, Webb and Clements carefully examined the bridge at Cornwall and their thorough inspection of the line may be taken as portending some important move in the not far distant future.

Testing the Bridge
The new Interprovincial Bridge Structure stands the trial
With four heavy locomotives and ten flat cars loaded with stone and steel rails resting on the long span, the new Interprovincial bridge only gave a couple of inches.
A large crowd was present to witness the test and great interest was displayed regarding the testing of the new structure.
Engineer G.C. Dunn states that he was highly pleased with the manner in which the bridge stood the trial while the deafening screams from the whistles of the locomotives indicated the delight of the railway men.
The first train will arrive from the Gatineau district at the Central Depot on Monday. This will be a passenger train and for the present the freights will come to Union Depot as formerly.

New bridge is opened
First regular train from the Gatineau Valley arrived at the Central Depot this morning.
The first regular train of the Ottawa, Northern and Western Railway, formerly the Gatineau Valley Railway, passed over the new Interprovincial Bridge and arrived at the Central Station this morning. The trip from Hull station was made in 9 minutes and the train arrived in Ottawa at 9.30 a.m. Among those who boarded the train at Hull were Messrs. P.W. Resseman, general superintendent; Guy C. Dunn, chief engineer; J.R. Brennan, road master; H.R. Lyons, accountant; A. Henderson, Superintendent of construction; A.W.H. Stimpson, assistant engineer; Major S.M. Rogers; Ald. Desjardins; W.A. Clark; C. Olmstead; W.R. Taylor, secretary-treasurer for the Hull Electric company; and the press representatives. The crew who had charge of the train were Messrs. H.T. Hoolihan, conductor; Wm. McFall, engineer; T. Hollihan, baggageman; R. Morrison, fireman; John Gravel and T. Charand, brakemen.
Traffic on this train was heavy, seventy-eight tickets being sold between Gracefield and Ottawa. The first ticket sold from Hull to Ottawa was purchased by Mr. John Lauzon, of Ste. Hyacinthe Street, Hull.
Each passenger on board was presented with a neat souvenir badge bearing the inscription "First regular train over the Interprovincial Bridge, Ottawa, Northern and Western Railway. Souvenir. April 22, 1901." The cars have been overhauled and repainted deep green colour and present a handsome appearance.
The entrance to the bridge at Nepean Point was thronged with enthusiastic spectators as was also the platform at the Central Depot. where congratulations were extended to the officials of the road.

More about commuter ticket rates from the Gatineau.

Short cut of 8 miles.
The CAR is going to shorten its line to Montreal by eight miles. Mr. H.J Chamberlain, general manager of the CAR, told a Journal reporter today that the company was satisfied with the survey of the proposed cut made a few weeks ago and as soon as the ground is in condition to permit a detailed survey; the work will be done and the permanent location for the road will be made. The cut will be from St. Justine to Vaudreuil, thus reducing the distance from twenty-seven miles to nineteen miles. By Coteau the distance is twenty-seven miles.
This cut will give the CAR the shortest distance to Montreal. Distance by CAR is 116 miles, by CPR 112 miles, by this cut it will be 108. Through farming country, no villages.

The Interprovincial bridge was opened for railway traffic yesterday morning when the first train of the Ottawa, Northern and Western railway, formerly the Ottawa and Gatineau, crossed to the Central depot. The handsome engineering structure was decorated with flags as was also the locomotive and cars of the train, which was the regular morning express from up the Gatineau.
At the Hull station a large number of passengers got on, Mr. John Lauzon being the first to purchase a ticket for a passage over the new bridge. Several of the Ottawa and Hull aldermen and the officials of the railway were on board. The distance between stations was covered in just seven minutes, the train arriving sharp on time. Conductor Hoolihan was in charge and the engineer was Mr. W. McFall.
As the train entered on the bridge Mrs. Noel Valiquette, of the Cottage Hotel, smashed a bottle of wine on the locomotive. A big crowd stood on the Dufferin bridge and watched the inauguration of traffic on the line. There was no formality. A souvenir of the trip in the form of a badge was presented to all of the passengers and guests.
All passenger trains on the line will hereafter run into the Central instead of the Union depot. The train from the Gatineau will arrive at 9.35 a.m. and leave at 5 p.m.

On Thursday last the new interporvincial bridge at Ottawa was tested with four heavy locomotives and ten flat cars loaded with steel rails and stone. This immense weight was allowed to stand on the long centre span whichw as only depressed a couple of inches. The test was considered highly satisfactory. Gatineau passenger trains will run into the central depot over the bridge this week.

KILLED ON THE TRACK.

The Mangled Remains of Wm. Hopklns Found on the C.P.R. Track at Arnprior, Mr. William Hopkins a former resident of Smith's Falls met a shocking death near Arnprior on Friday. About 7 oclock that morning his mangled remains were found on the C. P. R. track. . The Watchman in the account of the accident says, "The body was lying on its back on the south side of the track, the wheels of the train having completely severed the legs from the trunk at the hips. The left arm was broken and an ugly wound was visible in the side. The face was not disfigured in the least, Lying near by was a silver watch, badly dinged, which had stopped sharp at four o'clock, a pair of spectacles, door key, a small brown colored purse, and several silver coins of small denomination. The body had been respectably dressed. The pants were of brown tweed, laced boots grey woollen socks, black vest, white shirt. Nothing was found in the pockets which would give any clue to his identity. The unfortunate man was probably between fifty and fifty-five years of age, face clean shaven and thin grey hair. Coroner Cranston after viewing the remains had them conveyed to the morgue of Messrs Stafford & Son. The man was afterwards identified as William Hopkins who just prior to his death had lived in Carleton Place having removed from Smiths Falls to that place but a few weeks ago. When here he resided with his wife, who did laundry work, over Swaynes barber shop, It is not known under what circumstances he met death, but it was undoubtedly accidental. He had been seen around Arnprior the day before. The County Crown attorney was advised in the matter.

First anniversary of the great conflagration. Outlines improvements to C.P.R. and includes a line drawing of the new station. Perhaps there is no section of the "flats" that shows more marked improvement than that occupied by the C.P.R. station and yards. The old wooden station has been replaced by an structure that is a credit to the city, and the yards and the freight sheds are incomparably ahead of those which existed before the fire. It was shortly after two o'clock in the afternoon that the C.P.R. depot caught fire. Flying embers from the McKay mill were hurled by the wind scattering the blaze in every direction and the wooden station was not long in burning to the ground. The C.P.R. lost no time in replacing that which was destroyed and today the new station is a source of pride ?? First building to be erected was the freight sheds. More conveniently located, more modern in size and equipment the company is now in much better position to handle its constantly growing business. In connection with the sheds a neat office building was erected. The station, built on a site nearer Albert street is a handsome building and fitted up to meet the requirements of the western part of the city for many years. The yard room as a result of changing the sites of the sheds and station has been largely increased, and everything presents a tidy, complete and business like aspect. What ever the loss may have been to the C.P.R. by the fire it was a gain to the city.

Will build new station. CAR will open an office at Rochester Street crossing. On Saturday Ald. Plouffe had an interview with General Manager A.J. Chamberlain of the CAR and secured his sanction to the construction of a fully equipped station at the Rochester Street crossing. The public will be able to buy tickets at the new station for all points on the line. This will be a decided accommodation for the ratepayers of Dalhousie ward as heretofore they had to come all the way to Central station when they wished to travel by CAR.

The Electric Railway Company are at work in the village (Hintonburg) welding the rails. They intend going as far as Holland avenue with the work.

The CPR has consented to pay the family of George Lumsden of Smiths Falls, the engineer, who died as a result of an accident to the Montreal express, on March 15, at Ste. Polycarpe, the sum of \$3,000 divided as follows: The widow \$500, eldest child \$600, second child \$850, youngest child \$1,050.

To Shorten Line The C.A.R. will shorten its road between Ottawa and Montreal by eight miles this summer. The survey which was made some time ago has been accepted and a more detailed survey preparatory to the commencement of the work will be made very shortly. The cut will be from St. Justine across to Vaudreuil, removing an angle in the road and reducing the distance between Ottawa and the metropolis from 116 to 108 miles. The saving in distance will enable the trains to make the trip in less than two hours.

Will pay \$3,000 The C.P.R. has consented to pay the family of George Lumsden, of Smiths Falls, the engineer who died as a result of an accident on the Montreal express of which he was engineer, on March 15th, at St. Polycarpe, the sum of \$3,000 divided as follows. The widow \$500, eldest child 600, second child \$350, youngest child \$1,050.

In the railway committee yesterday the preamble to grant a charter to the Pontiac Colonization line was defeated by a large majority on a standing vote. The discussion on the bill was interesting and at times it grew very warm. The committee room was crowded with supporters and opponents of the bill. The Pontiac delegation, while disappointed at the turn of events, expressed the intention to return again and press the claims of the proposed road. Mr. F.H. Chrysler, representing the promoters of the bill, said it was proposed to build the road from a point on Chats Lake near Portage du Fort thence to Bryson, crossing the Coulonge north of the High Falls. It was planned to run along the Coulonge valley on the west side, crossing the headwaters of the Ottawa river above Great Victoria Lake. The road would proceed northwards from that point to James Bay. The projected road, Mr. Chrysler said, would run nearly parallel to the Gatineau railway, the distance varying from 45 to 70 miles. Reference was made to the fact that extensive lumber, pulp and mineral resources would be developed if the new road were built. Mr. Simpson, the originator of the scheme, the speaker stated, had arranged with a wealthy English syndicate to develop the great water power of the Chats. The new road was intended to bring the raw materials of the north to the falls for manufacturing purposes.. Mr. Chrysler said he understood that Mr. Beemer of the Ottawa and Gatineau and Pontiac and Pacific Junction railways strongly opposed the granting of a charter to the promoted company. If the latter wanted to demonstrate that the whole county of Pontiac belonged to his railways then he should produce the title deeds. Mr. Murray, member for Pontiac, strongly advocated construction of the road. The lack of railways, he stated, is a heavy handicap on the county's progress. Mr. Murray remarked that the recent census showed only an increase of nine in population. The speaker asked for support for the bill on its merits. Opposition was given by Mr. H.H. McGivern on behalf of the Gatineau and P. & P. J. railway. The delay so far as the extension of the Beemer lines, Mr. McGivern stated, was due to the difficulty of securing an entrance into Ottawa. Inside six weeks, however, this would be remedied. He referred to the fact that \$5,000,000 had been spent on the Beemer lines. Mr. McGivern claimed that the proposed line was unnecessary inasmuch as it would run parallel to the Gatineau railway. Already 60 mile of the latter had been built and 25 were under contract. If the charter were granted to the proposed company the financing of the Beemer line would be interfered with. Mr. Beemer followed with similar arguments. He claimed that the 800 miles of railway he had built through Quebec, has proved that he is a builder and not a trader in charters. Mr. N.A. Belcourt stated that Ottawa is largely interested in the scheme to develop the James Bay territory by railway connections. While not opposing the interests of Pontiac county, Mr. Belcourt felt it would be unwise to grant the proposed charter. The Gatineau Valley road was already built part of the way and it would be in the best interests of Ottawa and Pontiac county to have this road extended instead of granting a new charter to another road. Mr. Rosamond, M.P. spoke briefly in favor of the granting of a charter. He thought Pontiac interests should be considered as well as those of Ottawa. Rev. Father Kiernan also advocated the claims of Pontiac county to the new road. Two members of the Pontiac deputation were J. Stewart, mayor of Clarendon; E. Graham, A.W. McKechnie, A. Grant, E. Morris, E. Mathew, H. Richards, A. McLeod and T. Smiley, Bristol; From Quyon the following were present Rev. Father Kiernan, H. Mulligan, Mayor Meredith and R. Walsh. Others in the deputation were D. Kennedy, South Onslow, J. McFarlane, Campbell's Bay, W.G. LeRoy, County Clerk, Bryson, Chas. Taylor, Bristol.

11/05/1901 *Ottawa Citizen**Hull Electric**Interprovincial Bridge*

It has been definitely decided that an electric car service will be provided over the Interprovincial bridge from the Central depot to Hull this summer. Ottawans will thus be able to take cars at the Central depot and go, probably without change, direct to Aylmer. One of the head men of the Ottawa, Northern and Western railway said yesterday said that there certainly will be an electric car service on the bridge this year, but the point which appears not to have been settled as yet is as to whether the Hull Electric company or the O., N. & W. railway will run the cars over the bridge. If any difficulty arises in the present negotiations through which the Hull Electric company is seeking entrance to the city, the railway company will provide electric cars of its own to Hull and there connect with the line for Aylmer. Negotiations are now in progress between the two companies and the fact that trolley poles are being put up leads to the conclusion that an agreement will be reached. As to the exact status of the case and the proposed terms the authorities are somewhat reticent. The railway company has to build an extension from Deschenes into Hull in connection with the P. & P. J. branch and it is understood that an agreement is being considered whereby the P. & P. J. will run over the Hull Electric tracks from Tetreauville into Hull and in return the electric road will run over the Interprovincial bridge into the Central depot. The P. & P. J. railway has recently entered into an arrangement to use a part of the C.P.R. tracks in Hull.

Alfred Peat Bog

The new Government peat bog at Alfred is to be operated for about 3 months more during which time several thousand tons of peat will be produced. Part of this will be transported for use in the peat gas producer plant in the city and part will be sold to the neighborhood for local use. Mr. Anrep, the Swedish expert, who is in charge of the plant, will continue his investigation into the resources of the Dominion of Canada after the plant closes down for the season.

11/06/1901 Athens Reporter Westport

A public meeting of the Liberals of Brockville Riding will be held at Neilson's Grove, Lyn Station, Thursday, June 13. Addresses will be delivered by Hon G.W. Ross, Premier of Ontario, Andrew Pattulo, MPP, North Oxford, Geo. P. Graham, MPP. Chair will be taken at 2pm. Everybody in the Grand Old Riding of Brockville is invited to attend.

Special arrangements have been made with the B&W Railway, on which line return tickets will be sold at single first class fare for round trip from all stations. Parties purchasing tickets to Lyn Junction will have the privilege of using the same tickets on regular train to come as far as Brockville, returning to Lyn Junction on the special train, leaving Brockville at 1:30 pm; returning will leave Lyn Junction at 5pm. Fare from Brockville for round trip 15 cents.

The regular afternoon B&W train leaving Brockville at 4pm will be held at Lyn Junction till 4:50 pm. Parties from the vicinity of Gananoque, Lansdowne and Mallorytown are advised to take the regular GTR express arriving at Lyn at 2:29 pm. The GTR mixed will leave Lyn at 5:15 pm.

The steamer Victoria will carry passengers from Gananoque and intermediate points to Brockville, and returning will leave Mathen's Wharf at 5:25 and the upper CPR pier at 5:30 after the arrival of the B&W special from Lyn.

The 41st Regiment Band will furnish music for the occasion. J.A. Mackenzie, President, M.C. Franklin, Secretary. "God Save the King".

The car overhauled and furnished by W.C. Fredenberg and painted by Mr. G.F. Reynolds makes a fine addition to the rolling stock of the B&W Railway. Mr. E.A. Geiger, Superintendent, was out on Friday inspecting it and was well pleased with the alterations. The engine No. 2 that was lately come down to Carleton Place being fitted out with air brakes etc. has been again put on the railway. Over \$1,000 in repairs have been spent on her.

14/06/1901 Ottawa Journal Maniwaki Engineer McFall

A rather out of the way accident occurred to the Gatineau Valley train last night. Fortunately for the passengers the trouble came just as the train was pulling out of Hull station. The train had not made more than 150 yards when the axle of the rear truck of the tender broke. As soon as engineer W.A. McFall felt the crash he applied the brakes and brought the train to a stop in about 40 feet. Though the train was so promptly stopped the truck was torn from the tender and scattered in various sized pieces around the track. The passengers, however, did not feel more than a jarring. They crowded around the disabled tender congratulating each other that the accident had not occurred while the train was at full speed. Had it done so a very serious wreck would have resulted. The break occurred on one arm of the "Y" in the Hull yard. As a result the train was able to proceed without waiting for the track to be cleared. The delay was only for 20 minutes, a very short time everything considered. Conductor Hoolihan took prompt action. The passengers think they were very lucky.

19/06/1901 Ottawa Citizen Hammond Rockland

Joseph Dumont, an employee at the Stewart quarries, was pinned between two cars at the C.A.R. siding at the quarries yesterday afternoon and was instantly killed. The couplings crushed the body of the poor unfortunate man to a jelly. It seemed he was crossing the tracks when the cars came together. No one witnessed the accident.

19/06/1901 Ottawa Journal Hull Electric

The Hull-Aylmer electric cars will shortly be running into Ottawa over the Interprovincial bridge. A significant indication of this was given today in the fact that some of the cars running through Hull had painted on them the words Aylmer, Hull and Ottawa. Preparations are now being made for the cars to run in over the bridge and it is expected that by the first of next month they will be in direct communication with Ottawa.

E.A. Geiger, Superintendent of the Brockville and Westport Railway returned Saturday night from Pennsylvania where he purchased a first class coach for use on that line. The new coach will be here in a few days and will likely be used for the first time on Dominion Day.

KEMPTVILLE GETS IT.

THE TELEGRAM has much pleasure in announcing that one mile of sample good roads to be constructed by the good roads train for instruction purposes will be between Kemptville and Kemptville Junction. There is probably not a worse piece of road in the whole county nor one where the Good Roads Committee will have a better opportunity of affording instructions. The TELEGRAM takes special pride in this matter as it has for the last two months been advocating this matter and the influence it brought to bear in no small degree influenced the decision. Not only did the council of Kemptville call a special meeting, but in accordance with The TELEGRAM'S suggestion the Reeve of Kemptville and councillor Anderson visited, the Oxford council and prevailed upon them to make the necessary provisions made and the strong plea put in the hands of the county councillors of this district were responsible for the result obtained. The TELEGRAM is glad to see this result obtained and hope that it may be but the beginning of better things in the way of good roads for this locality.

We have nothing but good to result from such efforts as those of our esteemed fellow townsmen County Councillor Anderson and our neighbor, Mr. Hughes. When Mr. W. H. Anderson was elected to the Counties Council this year many of our country friends had serious doubts as to the advisability of electing a town man in place at a farmer who would be likely to know and do more in the interest of the country. But with characteristic energy Mr. Anderson has not only succeeded in obtaining a new sidewalk for the bridge approaches but also the one mile of "Good Road" where it was so sadly needed between this village and the Junction. In these matters we are indebted as well to Mr. Hughes, who has spared no effort in the interest of this district.

Between this town and Becketts Landing there is a piece of road which I might well receive the joint attention of the townships council and that of our village.

The Good roads train

The Good Roads train promptly started work on Monday and Tuesday of this week. Mr. J.G. Devitt, of Greenwood, the expert who is in charge of the construction of concrete culverts, has been at work for over a week. He has already completed all the pipes that are required for the Gananogue section.

The train will visit the following places where specimen good roads will be built: Gananogue, Lansdowne, Iroquois, Alexandria, Plantagenet, Newington, Bells Corners, Carp, Eganville, Pembroke, Almonte, Kemptville and the train will then return to Hamilton.

12/07/1901 *Ottawa Journal* *Hull Electric* *Interprovincial Bridge*

The Hull Aylmer cars have permission to run over the Interprovincial Bridge and it will only be a matter of a day or two until they are running to the landing between the Sappers and Dufferin bridges. The Hull company and the ON&W are negotiating about the railway interests of the Electric Company with the object in view of the latter turning over to the steam railway all of its electric railway privileges. It is expected that the deal will be consummated, but in the meantime the Hull company is paying a price for the privilege of crossing the bridge.

The Pontiac division of the ON&W gets the privilege of using the Hull Electric Company's tracks from Hull to Aylmer and therefore the Pontiac trains, which have had to depend upon the Hull Electric cars for train connections with the Capital will in future run right through to the city.

It is not expected that the running of steam cars over the Hull Electric Company's tracks will have any bad effect upon the road bed as it is one of the finest in America and heavy rails are used on it.

The Pontiac trains will not interfere with the electric cars between Aylmer and Ottawa. All that remains to be done is to arrange the timetable for the two companies. The agreement between the two companies will be drawn up today,

18/07/1901 *The Record, Chesterville* *Canada Atlantic*

Engine 618 of the Canada Atlantic Railway made a fast run Wednesday. The test was made from mile-post 20 to mile post 10 and the ten miles were covered in seven minutes and 31 seconds. The fastest mile was 39 3-5 seconds which is at the rate of 92 3/4 miles per hour, and the average for the ten miles was 83 miles per hour.

NB. The CAR measured mileages from the US border so it may be that this was carried out on the GTR main line east of Coteau.

GOOD ROADS TRAIN. Started Last Week at Gananoque - \$6,000 Worth of Machinery will be Supplied and Numerous Points will be Visited. The Good Roads train about which so much has been heard, started from Hamilton on Monday and made its first stop at Gananoque, in Leeds county. J. G. Devitt of Greenwood, the expert, who is in charge of the construction of the concrete culverts, began work about a week ago. He has already completed all the pipes that are required for the Gananoque section. H. B. Cowan of the Ottawa Valley Journal, who is in entire charge of the arrangements being made for the management of the train, and Major Sheppard of Queenston, who will have complete control of the machinery and men being furnished by the Sawyer & Massey Co. of Hamilton, returned last Saturday from a visit to the first stretches that will be touched by the good roads train. Mr. Cowan also completed all the final arrangements with the four railway companies which are assisting the enterprise by transporting the machinery and experts in charge free. The Sawyer & Massey Co. of Hamilton is treating the Good Roads Association in a most liberal and generous manner. Instead of only supplying between \$2,000 and \$3,000 of machinery for the train, the firm is now giving implements valued at about \$6,000. The extra machinery being supplied includes a 10-ton steam roller, valued at about \$2,000, a traction engine which will be used whenever possible to work the road grader instead of using horses, and a sprinkling waggon. It does not cost half as much to use a traction engine for working a road grader as it does to pay for three or four teams of horses. Another advantage is that a great deal more work can be done. Of course there are some cases where a traction engine cannot be used in this way but as a general rule its use is feasible. The "good roads train" hoped to demonstrate this fact.

ROUTE OF THE TRAIN The route of the good roads train will be as follows: From Hamilton the train proceeded direct to Gananoque, a point in Leeds county, near the St. Lawrence river, in which vicinity two sample stretches of road will be built. The first stretch is to the north of the town and is very uneven and hilly. On its completion the machinery will be taken into the town, where a rousing good roads convention will be held. The second stretch, which is near Lansdowne, will next be treated and a small meeting be held at that point. From Lansdowne the train will go to Iroquois, where a stretch will be built, leading directly into the village. Both the above points are on the line of the Grand Trunk Railway. The next point after Iroquois will be a stretch of road leading into the Canada Atlantic station at Alexandria, in Glengarry county. From this point the train will run up to Ottawa over the C.A.R. line and back to Plantagenet, in the United Counties of Prescott and Russell, over the C.P.R. lines, where the road between the station and the village will be improved. This stretch is a very bad one and promises to make a splendid object lesson. Returning to Ottawa the train will proceed over the O. & N. Y. tracks to Newington, and afterwards back again to Ottawa. The C.A.R. line between Ottawa and Pembroke will then be used. The first stop will be at Bells Corners, in Carleton county, the second at Carp, also in Carleton county, and the third at Eganville, in South Renfrew. From Eganville an advance will be made to Pembroke, where a very bad stretch in Pembroke township leading into the town of Pembroke will be handled. The C.P.R. lines will here be taken by the train, which will run down to Almonte, in Lanark county, where a stretch a short piece out of the town will be handled. From Almonte the train will proceed by way of Ottawa to Kemptville, where the road leading from the station to the town has been selected for a demonstration. This piece of road is known all over eastern Ontario, particularly by commercial travellers, for its bad qualities. It will be the last point at which work will be done. The train will return from there to Hamilton by way of Prescott.

WILL DO GREAT GOOD. There can be no doubt but that the object lessons which will be given by the train in the matter of building permanent roads in bad places will do more to advance the cause of good roads than probably almost anything else could. The trouble at present is that many farmers think that they know all there is to know about building good roads. They think that road machinery is not at all necessary, and therefore refuse to allow their township or county councils to purchase any. Many sections now have road graders, but the number of rural municipalities in Eastern Ontario which have stone crushers could easily be counted on a man's fingers. The "Good Roads Train" will go into many of these sections and will demonstrate just what improved machinery and experts can do in the way of building good roads. The number of different implements [sic] that are required will be shown, while a demonstration of the work of each will be given. The cost of the machinery, the length of time it takes to build a stretch of road, and the cost of building each stretch will be shown.

A VALUABLE FEATURE. One of the most valuable features of the whole enterprise will be the demonstration that will be given in each locality to show how concrete culverts are constructed. In almost every township in Eastern Ontario nothing but wooden culverts are in use. Timber has been becoming scarcer every year until now the cost of building these culverts in most cases is heavy. Their worst feature, however, is the fact that they do not as a rule, last more than five or six years before they need some repairs, after which they have to be repaired more or less almost yearly. The average township spends several hundred dollars yearly simply making these repairs. The concrete culverts which the Good Roads Train will show how to make, do not cost any, or at the most, very little more than wooden culverts do, while they are practically indestructible. After they have been in the ground some time they become as hard as rock. Mr. Devitt, the expert, who, as already stated, has commenced to construct these culverts, has completed three concrete culverts at Gananoque. Two of these were 15 inch pipe and 25 feet long, while the third was 24 inch pipe and 22 1-2 feet long. For their construction he used about six barrels of cement which has been given the Good Roads Association free by the Canadian Portland Cement Co. of Deseronto. The actual cost of them culverts, had they been constructed by an ordinary laborer, as they can be, would have been about \$24. Three wooden culverts of the same size [sic] would cost almost, if not quite as much, and in some localities, even more.

GOOD ROADS TRAIN MOVING,

As will be seen in another column the good roads train has already started on its journey. The original programme would have brought the train here next week but at the suggestion of some of the most interested parties Kemptville was placed last on the list. While those who have to travel from town towards the junction will no doubt be disappointed at the delay we believe it will be the best thing in the end and will save our municipalities considerable expense. The farmers now are in the midst of haying and are unable to procure sufficient help. The greater portion of the labor in connection with the building of this mile of road will be contributed free by the farmers, if they can possibly find the time away from their farm work. If the train struck here next week as originally intended it would be impossible to get help. Everyone is head over ears in work at home and there is neither time nor men to spare. Later in season when the rush of work is over there will be no difficulty in this respect and instead of having to pay big prices for labor we will get it for nothing and get it cheerfully. Everyone is deeply interested in this good move and no doubt the scene of the work will be visited by hundreds of farmers interested in the experiment. Just now they have not the time even for that. Taking it altogether we think it is best for all parties interested (except the travellers and bussmen) that the work be deterred for a little. The sample road was built at Gananoque last week and we understand the one difficulty met with was the scarcity of labor.

First Run to Aylmer.

The New Service Inaugurated Yesterday

A Merry party Taken from New Ottawa Terminus over Interprovincial Bridge

A jolly party went out to Aylmer yesterday evening as the guests of Mr. H.J. Beemer and his officials on the first car of the Hull Electric Company to carry a load of passengers over the Interprovincial Bridge. The car left Dufferin Bridge at 8.15 arriving at Queen's Park Aylmer about 9.06, the trip being made in 40 minutes; this time, however, will probably be reduced as there was no attempt at making a record. Those on board the car were: Mayor Morris, Messrs. H.J. Beemer P.W. Resseman, general superintendent, Ottawa Northern and Western and Pontiac and Pacific Junction Railways; Guy C. Dunn, chief engineer; Thos. Heeneey, paymaster; J. Hoolihan, superintendent of construction; Ald. Desjardins; Ald. Hopewell; Ald. Champagne; Ald. Hill; Ald. Hayley; Ald. Storey; Ald. Stroud; Ald. Ellis; Ald. Askwith; Ald. Jas. Davidson; Ald. Enright; W.R. Taylor, secretary-treasurer, Hull Electric Co.; J.M. Lavoie; D.K. Baille; E.A. Oliver; Geo. Lizotte; G.F. McDonald; Ald. Grant; ex-Ald. Butler; A.E. Bradbury; E. Miles; Rev. J.F. Gorman; Geo. Duncan; ex-Ald. D'Arcy Scott; Francis Loyer; P. Drapeau; O.A. Boucher, St. John, Que. and representatives of the city press. The car was in charge of Motorman Geo. McConnell and Conductor Wm. Latimer. After reaching the park a visit was made to the new club-house of the Victoria Yacht Club. This handsome structure was greatly admired.

Boarding the car again, the party returned as far as Hotel Victoria where they all registered, headed by His Worship Mayor Morris.

The return trip was a merry one. Some one called on the mayor for a song, but His Worship could not be induced to sing. Someone in the back of the car shouted, "We'll have a duet by the Mayor and D'Arcy Scott," this seemed to catch the crowd and the uproar was deafening. An attempt was made to produce a song from several of the Aldermen but the efforts were in vain. The Rev. Mr. Gorman was finally induced to sing. He received a vigorous applause. Various choruses were heartily joined in by all, in which the sonorous voice of Ald. Champagne predominated. When the middle of the Interprovincial bridge was reached the car was stopped, and Ald. Davidson announced that it would be a fitting occasion for a speech from Mr. Beemer, whose name had become famous in the erection of this great structure. It took some persuasion to get Mr. Beemer to his feet, but he finally got up and said, "Gentlemen, what do you want me to do; jump off the bridge? (laughter) Well, I'll make a speech. Give us more light on this bridge." The speech as brief, but as the city was so well represented, it seemed to be directly to the point.

Mayor Morris then spoke briefly. He said he was delighted to have had the honour to be a guest on this occasion, and extended his thanks to Mr. Beemer and his officials, and also to the Hull Electric Co. He commended them for their enterprise and said that they had done much towards the advancement of the city's interest. Ald. Champagne followed in a similar strain, and said he would heartily support any efforts made by the city council towards having the bridge properly lighted, as it was undoubtedly a great boon to Ottawa and a credit to those who had erected it.

After three cheers for Mr. Beemer had been given, the National Anthem was sung, and the car proceeded on its way, arriving in the city about 11.15.

Initial run to Aylmer.

Much of this is illegible.

26/07/1901 *Ottawa Journal**Hull Electric*

Fare to Aylmer.

"When is a streetcar not a streetcar?"

"When it is a railroad car, answered an official of the Pontiac Pacific Railway Company.

Since the Hull-Aylmer cars have been running into the city people have been protesting about paying a 15 cent fare from Ottawa to Aylmer.

A prominent official of the Pontiac railway said today; "Our charter gives us the right to operate steam and electric cars, and that is what we are doing. We are not running street cars. We have leased the Hull Electric Company cars, which come into our control as soon as they arrive upon the Interprovincial Bridge.

"We are responsible for the payment of the men. The Pontiac Company does not run streetcars, it runs electric railroad cars over a bridge and not on any city streets."

"There is a clause in the agreement with the city by which the Pontiac company is bound to allow electric street cars to come in free of charge. These are our electric cars when on the bridge and we are not charging tolls.

"We are dealing with the tickets on these cars just as we deal with the tickets on our other cars. If you go from Ottawa to Gracefield on a return ticket you get a cut rate. If you buy single fare tickets each way it will cost you more. We are selling ten tickets for a dollar, good to go or come between Ottawa and Aylmer. One ticket costs fifteen cents or a return ticket costs twenty-five cents. The fare is five cents to Hull."

"Why do you sell a single ticket for fifteen cents? asks the reporter.

"We want to sell tickets in strips," was the answer. "We believe the majority of people will buy them that way, and that therefore the fare to Aylmer will only be ten cents to most people. It is a mistake to say we are charging tolls on the bridge. We are treating these tickets as we do all other tickets and that we have a perfect right to do."

The conductors on the cars will sell tickets singly or in strips, and a ticket office is to be put up at the landing place near Sapper's Bridge.

Last night a great many people took the trip to Aylmer and they protested against paying fifteen cents for single tickets but they had to do so. They were under the impression that the fare was ten cents and that the extra five cents was a toll collected for the bridge company.

More - agreement between city and company.

27/07/1901 *Ottawa Citizen**Montreal and Ottawa**Interprovincial Bridge*

The City of Ottawa by virtue of an agreement entered into on Dec. 14, 1893, signed on behalf of the Pontiac and Pacific Junction Railway by Mr. H.G. Beemer and H.L. Maltby, secured control of the tram and streetcar franchises over the Interprovincial bridge. The consideration therefore was a bonus of \$130,000.

The railway authorities have undertaken to ignore the city's vested rights in this respect and have entered into an agreement with the Hull Electric Railway to allow that company to use the bridge without any reference to the city whatever.

Sets out the clauses--

If the above means anything it is that the city controls the terms on which the bridge highway shall be used by street cars and any arrangements must be submitted to the city and ratified by a by law. The railway company now endeavors to explain its position by stating that the Hull Electric cars, while on the bridge, are P. & P. J. cars and not street or tram cars. That question may be a nice one for the courts, but if they are P. & P. J. cars they should run on P. & P. J. tracks and not on the bridge highway which is specifically mentioned in the agreement as being under the control of the city.

When Mr. Maltby evolved his ingenious argument that the Hull electric company's trolleys by a Jekyll - Hyde transition become P. & P. J. cars the moment they touch the bridge he overlooked the large and extremely ugly advertising sign which, for some reason is allowed to disfigure the eastern end of Sappers Bridge explicitly contradicting Mr. Maltby.

The principle involved in the enforcement of the agreement may be a matter of the utmost importance in the future as the population of both cities increases. The time to settle the question is now, and the question is: Which controls the franchise rights for street railways to use the bridge, the city of Ottawa or the railway company?

According to the experience of a Citizen reporter the P. & P. J. railway issues tickets which it won't accept on its own cars - that is supposing Mr. Maltby's statement to be correct.

If you see a big sign at the end of Sappers Bridge saying, "This way to the Hull electric railway," and you see a trolley car marked "Hull electric railway," pointing towards Hull. You must understand that the car is not Hull electric car. It isn't 'cause Mr. Maltby told us so.

30/07/1901 Ottawa Journal Hull Electric

A letter was received by Hull city council from Alexander Fraser of the Hull-Aylmer Electric Railway stating that to increase the efficiency of the car services, several sidings each 200 feet long would be built in Hull, one on Laurier Avenue back of the church, one on Main Street near the Court House, one on Main Street opposite the Marston block, and one on Brewery Street, opposite Dr. Graham's residence. The council was not willing that these sidings should be built. Lawyers will study the agreement etc.

The idea of some of the aldermen seems to be to have the company lay double tracks in Hull on the ground that this would be less cumbersome than any other method.

It was decided that a committee should look over Chaudiere Street to see if the proposal is feasible to open it up to the proposed new railway station to be built by the Pontiac and Pacific Junction Railway.

01/08/1901 The Equity, Shawville Hull Electric

A thorough [sic] service is now established over the electric railway between Hull and Central Depot, Ottawa, via the interprovincial bridge so that Pontiacers journeying to the capital will have no changing of cars from Aylmer till they reach the heart of the city. It is stated some difficulty with the Hull council has to be overcome before the steam cars will be allowed to run over the electric company's rails through Hull to the bridge.

08/08/1901 Kemptville Telegram Ottawa and Prescott Kemptville

Fifty Years Ago.

A meeting was held in Kemptville Dec. 10, 1850, to consider the propriety of taking stock in the Bytown & Prescott Railroad, and to adopt measures to procure the establishment of a station at Kemptville. Robert Kernahan was chairman and R. Leslie secretary. A resolution was passed to open forthwith books for the purpose of receiving the names of subscribers for stock, upon condition that a station be established at the village. Stock to the amount of £3,500 was taken in a few days.

This will remind a good many people in and about Kemptville that they are stock holders in the Bytown & Prescott Railway. It was expected at the time that the enterprise would be a good dividend payer but so far the local certificate holders have received no return for their money.

08/08/1901 Ottawa Citizen Montreal and Ottawa Interprovincial Bridge

Mayor Morris has had several conferences with Mr. H.J. Beemer regarding the naming of the beautiful new bridge from Hull to Nepean Point which he constructed. The mayor has been urging Mr. Beemer to call the new structure Alexandra bridge in honour of the present Queen-Empress, and that it be officially opened and christened by the Duke of York. The mayor points out that the Victoria bridge at Montreal was opened by the Prince of Wales, our present King, and was named after his mother, our late beloved Queen. The mayor thinks that there could be no more fitting opportunity than to have the son of our present Queen-Empress dedicate and formally open the beautiful new bridge which now joins the cities of Ottawa and Hull. The whole function could be performed from parliament hill in rear of the library by the touching of an electric button by the Duke and instantly the name would appear in colored electric lights on the bridge from the Hull to the Ottawa side. If desirable, Mr. Beemer himself or some member of the reception committee could touch another button and a blazing motto of Welcome to the Duke and Duchess would appear. The mayor believes that the suggestion will be seriously considered by Mr. Beemer and probably carried out.

13 Sheep Killed

Mr. Wm. LeRoy, of Barb, suffered a very heavy loss on Wednesday evening of this week. The Canadian Pacific 5.23 train dashed into a large flock of his sheep killing thirteen and mangling a number of others so badly that they had to be killed. The loss is a very heavy one as they were all pedigreed sheep. Through an oversight the gate from the sheep pasture leading over the track was left open and the sheep wandered on to the track.

09/08/1901 Eastern Ontario Review Belleville Smiths Falls

Alleged Train Wrecking

Smiths Falls, Aug 7. What appears to have been an attempt at train wrecking was made here yesterday morning about one o'clock. The Montreal express was coming in preceded by an engine running light, when just as the latter reached the edge of town an explosion occurred, raising up the front of the light engine and tearing off one of the driving wheels, but otherwise doing very little damage. A short time ago heavy pieces of iron were placed on the track near the same place. The air is full of surmises, but it has not yet been discovered who committed the outrage. It is hoped that the perpetrators may speedily be discovered and justly dealt with.

09/08/1901 Ottawa Journal Renfrew Renfrew

The westbound local on the CAR due here at 6.20 ran into the east bound way freight last night by taking the switch instead of the main line. The switch board was properly set but in some way the switch was wrong or else sprung by the weight of the train. The engines and tender, along with two or three cars were smashed somewhat but all the passengers and employees escaped with a severe shaking up. The wreck is now cleared away and the line is again fit for traffic.

09/08/1901 Ottawa Journal Montreal and Ottawa Interprovincial Bridge

Mr. Warren Y. Soper today made a suggestion, which, if carried out, will provide a far finer entrance for the Royal party than has hitherto been contemplated. Mr. Soper thought that it was possible that the Royal party would come from Montreal on the North shore line. A switch would be laid from the CPR tracks to those of the Ottawa Northern. Then the Royal train would enter the city over the Interprovincial bridge and go along the canal bank to the Elgin street depot. If this is done the CAR will keep the tracks along the canal bank clear of other trains, in order that the magnificent view that this entrance affords will be clear for the Royal visitors.

This suggestion, it is said, will in all likelihood be adopted.

As was announced some time ago when the decision was agreed upon by the committee, the royal party, unless present plans are changed, will come to Ottawa by way of the North shore line of the C.P.R. and cross the Interprovincial bridge thence proceeding to Elgin street. When the matter of entrance was discussed the suggestion was made that the train be brought up the north shore, cross at the C.P.R. and be taken around by Chaudiere Junction to Elgin Street station. , but the C.A.R. officials who were present did not favor that route. The Interprovincial Bridge route was then unanimously agreed upon. It is said to have been originally suggested by Her Excellency on account of its picturesque ness.

Mr. W.Y. Soper, chairman of the transportation committee, is heartily in accord with the decision arrived at and arrangements are now being made to carry it into effect.

Painful Accident

Yesterday morning between 6 and 7 o'clock Mr. Hatch, sr., was thrown from his waggon and sustained a fracture of the ankle. Mr. Hatch and Wm. Creighton were going out of town with loads of flour when the former's team became frightened at a freight train near Murphys crossing. Mr. Hatch tried to drive past Creighton who was ahead and was thrown off his waggon into the ditch. His left ankle struck a stone and received a severe fracture. Dr. Jones was summoned and under his skillful treatment the patient is doing well. The horses were caught without trouble and no damage done except that the waggon was smashed and some flour strewn about the road.

Two Men Were Killed

The Orders Were Against What Was Done

A despatch from Montreal says: A fatal collision took place on the Grand Trunk railway at Thousand Island station, early this morning, between two freight trains. Charles Merron, an engineer, and E. Stone, a brakeman, were killed. The accident occurred at 2:45 o'clock this morning. An east-bound freight was backing over on the west-bound track, the semaphore and train order being both at danger, when a west-bound freight ran into the east-bound train, four cars from the engine, derailing the engine and seven loaded and three unloaded cars, killing the engineer and brakeman. The fireman escaped.

Additional Particulars.

Gananoque, Aug. 27.- At 2:50 o'clock this morning at the Thousand Island junction, on the G.T.R., a collision occurred between two freight trains. An east-bound freight on the down track was crossing to the up track to give a clear track to No. 8 train, the eastern flyer. When about half way on the crossover a freight was seen coming on the west-bound track, or up track. The night agent had the signal board against her, but this apparently was noticed by the engineer or crew on the west-bound freight train, as the morning was very foggy. The conductor of the east-bound freight signalled the approaching train, which was coming at a great rate of speed. The brakeman was also signalling the west-bound train. Neither of these signals were answered until the west-bound was about 100 feet away when engineer Merron applied the emergency brakes but it was too late. He crashed into the east-bound train, demolishing ten cars containing flour and merchandise. The merchandise was not very badly damaged. The flour was strewn all over the ground. It blocked the up and down tracks, also the Thousand Island railway track, which was quite close to the G.T.R. at this point.

The Thousand Island railway track was cleared at 7:30 o'clock. The rails were joined to the G.T.R. at each end of the wreck, to enable the trains to pass. Dr. Shaw, coroner, Lansdowne, held a postmortem examination at 11 a.m., when an adjournment was made until this evening.

Trainmen Killed

A Terrible Railway Accident Resulting in the Death of Engineer Meron and Brakeman Stone A Fast Train Signalled Would Not Stop Crashed Into A Train

The Body of Stone Was Found Near the Tender

The Engineer's Body

At One O'Clock the Corpse was Under the Engine - Wrecking Crews at Work - G.T.R. Tracks Were Completely Blocked - Inquest to be Held.

(Special to the News.)

Gananoque, Ont., Aug. 27. - This morning at 2:30 a fatal accident occurred at the Thousand Island junction, when two freight trains collided.

A freight train, which was just pulling into the station, on the down track, backed over the cross-over to get clear of No. 8 Eastern flyer, when about half way across, a fast train was seen coming into the station at a great rate of speed. The night operator had signal boards against the incoming train. The brakeman and conductor on down freight, both signalled her, but their signals were apparently unnoticed by her crew.

When within 60 feet, the emergency brake was applied, but too late, to check her great speed, and she crashed into the down train. Engineer Meron, and Brakesman Stone, were both killed. The body of the latter was found near the tender of the engine, while that of the former was found just where he sat on engine, which was lying on its side. He was apparently killed instantaneously, and at 1:15 his body was still under the engine. As the wrecking crews (three in number) had been unable to reach it owing to the debris, which blocked the way. The up and down breaks [sic] were completely blocked, as was the line of the T.I. Railway, which was first cleared, and the G.T. Railway joined rails with the west and east of the station to enable passenger trains to get through.

Coroner Shaw, Lansdowne, empanelled a jury at 11, which was adjourned until this evening.

The fireman saved himself by jumping.

Ten cars of merchandise and flour were scattered. The flour was a complete loss, but the merchandise was slightly damaged.

No blame is attached to the G.T.R. or any of its employees.

Trains were running again at 7:30.

The engineer was married about three years ago to Miss Mary Smiley, daughter of Mr. Samuel Smiley, 56 Rideau street, this city. Three short weeks ago Engineer Meron sent his wife to Kingston to visit her parents. To-day was the time that he was to return to Kingston to spend a couple of days with his wife and two small children, but, alas, instead of the joy of husband and family meeting, comes the cruel message to a loving wife that she is a widow. Mr. Meron was brought up at Trenton, being born about 28 years ago. He has been nine years in the service of the Grand Trunk Railway. Last October he was promoted to the position of driver. He leaves a young wife and two small children to mourn his loss. Mr. Samuel Smiley and a number of other railway men left for Gananoque Junction this afternoon to look after the remains of the unfortunate man.

Ottawa Citizen

New York Central

The Ottawa and New York train due at the Central Depot at 7 o'clock Wednesday evening did not arrive until 4 o'clock yesterday morning. The cause of the nine hour delay was the breaking of an axle under the engine. The trouble was located when the train was running at a high rate of speed this side of Russell station which it left seven minutes behind time. Brakes were applied and the train quickly brought to a standstill.

An examination of the tender showed that the axle had broken in the middle. The two wheels to which it was attached had left the track and run between the rails for a distance of half a mile. The tops of the spikes holding the rails had been cut off allowing the rails to become loosened. The train's escape from wreck was a close one, as the engine was in great danger of being thrown from the track.

A wrecking train was sent from Cornwall and the track fixed up. The escape from serious accident is attributed by the passengers to the excellent road bed and heavy rails and the good rolling stock.

12/09/1901 Ottawa Journal Ottawa Electric

The Royal trolley "The Duchess of Cornwall and York" was given a trial run through the city and out to Britannia-on-the-Bay yesterday. The luxurious electric car "The Duchess of Cornwall and York" has been provided by the Ottawa Electric Railway expressly for the use of their Royal Highnesses, the Duke and Duchess of York. The car is 50 feet in length, straight sides and vestibuled at both ends, full monitor roof of the Pullman pattern. The color is also Pullman standard with the British coat-of-arms conspicuous on both front and rear. The interior of the car is furnished in antique polished oak, the ceiling being covered with three ply birds eye maple veneer, and decorated. There are four large British plate mirrors set in frames, two at either end of the car. All trimmings, such as hat racks, books etc. are in solid bronze. The window curtains are of the latest design, and are very ornamental. The car is brilliantly illuminated by five clusters of incandescent electric lamps, twenty one in all. The floor is covered with a rich Royal Blue carpet. The car contains fourteen large easy chairs beautifully upholstered in olive green plush. The trucks are double and of the swing motion pattern with graduated springs. The electrical equipment is very complete and consists of four Westinghouse 40(?) h.p. motors. The car is also fitted with the Westinghouse automatic air brake, and is capable of attaining a speed of fifty miles an hour. This is the first electric tram car ever provided exclusively for the use of Royalty. The car was manufactured by the Ottawa Car Manufacturing Company.

12/09/1901 Ottawa Citizen Hull Electric

Collision between cars Nos. 10 and 12.

12/09/1901 Ottawa Citizen Hull Electric

A collision which might have been attended with serious loss of life occurred on the Hull-Aylmer Electric line at 10.05 last night. Car no. 12 leaving Aylmer at 9.35 in charge of Conductor A. Baker and Motorman T. Bouch dashed into car 10 which left Ottawa at 10.00 p.m. on Main Street, Hull near the Post Office. The car from Ottawa was in charge of Conductor H. Moor and Motorman G. Chartier. Both cars were running at about 15 miles per hour and the force caused the coaches, which were closed ones, to be smashed to kindling wood almost ?? Both motormen jumped and thus saved themselves. There were few passengers otherwise ?? would have been recorded.

Car no. 10 left Ottawa on schedule time and was to have crossed car 12 at Graham's corner switch. When car no. 12 got to Graham's corner switch the employee thought that they could get down to the ferry switch in Hull and thereby save time, and the collision was the result.

One woman who was a passenger on the Ottawa car had her arm badly cut by broken glass.

Almost illegible.

13/09/1901 Perth Courier Lanark County Electric

Narrow Escape.

A women named Quaddie, a few days ago had a miraculous escape from death in Eganville. She was seated in a wagon behind a team of horses, when the animals become frightened at an incoming train, made a circuit, upset the rig, and threw the occupant upon the track in front of the train. The engineer reversed the engine and the train was brought to a standstill within a foot of the woman's head. She was cut and brused by the overturn.

20/09/1901 Eastern Ontario Review Vankleek Vankleek Hill

C.A.R. Leaves the Track

Bad wreck on the Canada Atlantic Railway last Saturday - much damage done but no lives lost.

The Canada Atlantic mail train, due here at noon, was wrecked at Potter's brick yard on Saturday last on its way to Hawkesbury.

The train was taking two new engines down to Hawkesbury for the use of the Great Northern Railway. It is thought the weight of these engines running at a rapid rate of speed spread the rails and derailed the train.

The first part of the train, including one of the engines broke away from the wreck and did not leave the track, One engine, four freight cars, a baggage car and the passenger coach were wrecked. The engine and one freight car were turned entirely upside down and another freight car was thrown at right angles across the track. The road bed and track were completely destroyed for several rods.

There were only four passengers in the coach and they escaped without any injury as the coach did not topple over. A wrecking crew came down from Ottawa in the afternoon and after working all night and all day Sunday in the rain succeeded in clearing the track.

Passenger service was uninterrupted, the passengers being transferred from one train to the other around the wreck.

The loss to the company will be pretty heavy as many of the cars were badly damaged.

THE GOOD ROADS TRAIN.

It looks at present as if the Good Roads Train will not reach here until next Spring and the public will have to wade through the mire from Kemptville to the Junction road for another while. The train spent a week on the fair grounds at Ottawa giving exhibitions of the work it is intended to do. From there the official program would take it to Plantageut where there is a notoriously bad piece of road between the railway and the village. It then goes to Carp, Eganville, Pembroke and Almonte. Then comes our turn. The Association still hope that with an open Fall they may be able to complete their undertaking this Fall but unless they have fewer mishaps and delays than heretofore they will scarcely accomplish this. They have determined, however, to complete all their undertakings to the letter, and if it is impossible to do all this year the balance will be done in the Spring. With this in view arrangements have been made with the Sawyer-Massey Co. to leave the machinery in this section of the country all winter. This arrangement is a good one. If the Association were compelled to visit all the points this year it would have to cut down the amount of work to be done each place and there would be such a rush and hurry with it that would make it unsatisfactory both to the Association and the people interested. We have done our part of the work and have had the material on the ground for some time and it is a matter of regret that we should be made to suffer another six months on account of the delays that have occurred elsewhere. It is a satisfaction, however, to know that when the work is done it will be permanent and satisfactory. The Cornwall, Iroquois and Morrisburg papers all commend very highly the work done at Iroquois and it is evident that the people there are well pleased with the piece of road built. It is to be hoped that the expectations of the promoters will be realized and the work completed this Fall, but if it is not we will only have to possess ourselves with patience and await our turn. We have suffered so long with this stretch of road that we can bear with it yet a little while. The delay is not the fault of anyone who has been pushing the scheme here nor is it the fault of the road makers. It is simply due to the fact that in many places the people awaited the arrival of the train before making the necessary preparation for the work.

The Cornwall, Iroquois and Morrisburg papers all commend very highly on the work done at Iroquois and it is evident that the people there are well pleased with the piece of road built. It is to be hoped that the expectations of the promoters will be realized and the work completed this Fall, but if it is not we will only have to possess ourselves with patience and await our turn. We have suffered so long with this stretch of road that we can bear with it yet a little while. The delay is not the fault of anyone who has been pushing the scheme here nor is it the fault of the road makers. It is simply due to the fact that in many places the people awaited the arrival of the train before making the necessary preparation for the work.

Caption to line drawing (not a photograph)

The above photograph was taken during the progress of the work in the town of Gananoque, and shows Road Commissioner A.W. Campbell, C.E., at work operating the grader. It is estimated that by the use of a traction engine instead of horses, three times as much work can be done at about one-third the cost. Every township has a traction engine which, with a little fitting up, could be used for this work and at a time of year when these engines are not in demand. This cut is the property of the Good Roads Association

28/10/1901 **Ottawa Journal** **Hull Electric** **Aylmer**

A very serious accident was narrowly averted on Saturday morning on the Hull Electric Railway. At the foot of Main Street, a car slipped over the frosty rails. The leaves formed a pasty mass with the frost, and the brakes, although tightened as much as possible, could not hold the car, and it ran into a coal car and derailed it. The passenger car was slightly damaged and one of the employees, in jumping, twisted his ankle. No other injury was sustained by any one.

31/10/1901 **Ottawa Journal** **Pontiac & Pacific Junction** **Tetreauville**

Louis and Henri Simon, Italian navvies, are confined to the Water Street hospital as a result of a stabbing affray which occurred near Tetreauville yesterday afternoon. The men are brothers and were employed on the new railroad being built by Mr. Beemer connecting Ottawa with Aylmer.

The story of the injured men is that the foreman, Savaria Cavorato, had ordered them and another brother, John, off one car to another. They refused to go and attempted to defend themselves with a shovel. It is alleged that the foreman then hit John Simon with a shovel. This was provocation enough for a free fight in which John, Louis and Henri Simon and John Church are said to have attacked the foreman and his brother Louis Cavorato. It is then that Savaria Cavorato is said to have drawn a knife and stabbed Henri and Louis in the stomach.

The injured men were put on an electric car and brought to Ottawa where they were removed to the Water Street hospital. Louis Cavorato and John Simon were arrested and taken to the Hull gaol. Savaria Cavorato, who is said to have done the stabbing, has not been arrested.

When taken to the hospital it was found that one of the men had received a dangerous wound. The other is not serious.

New Railway. :

Surveyors are in the locality of Brocville laying out a route for a proposed new electrical railway between Toronto and Brockville. The new line will extend also to Ottawa and Cornwall. The line will shorten the distance between Toronto and Kingston by thirty-five miles. The company is asking for bonuses or exemption, and, as soon as the survey is completed, application will be made for a charter and work on the road will be commenced.

The B&W cheese train brought in 2,368 boxes of cheese yesterday.

11/11/1901 Ottawa Journal Carleton Place Ottawa, Broad Street

Would you like to see the interior of the cars the Duke and Duchess of York rode in through Canada, inspect the rich decorations specially designed and made for the eyes of the Royal party? Well on Thursday 21st and Friday 22nd of this month the cars will be in Ottawa and they will be "at your service" so to speak. The Canadian Pacific Railway, builders and owners of the cars have arranged to give the people of Ottawa the chance to see them.

The cars will be on exhibition at the Union Depot for the greater part of two days.

The cars will arrive at 2 o'clock Thursday November 21st and will be open to the public until 9.30 that evening and again the following day from 9 to 9.30 pm. A charge of 25 cents will be made for the "inspection". The money received from visitors will be sent by the CPR for the charities of Ottawa, likely the two orphans' homes.

It is likely a nice sum will be derived for a good object by the CPR's act.

12/11/1901 Athens Reporter Westport Delta

The first accident on the B&W Railway that has befallen an employee, attended by fatal results occurred this morning at Delta when James R. Smith, baggageman on the regular train and who also held the position of spare conductor was instantly killed.

The deceased resided in Brockville and left here yesterday on the afternoon train in the capacity of baggageman. He was returning this morning, in the same capacity, the train being in charge of Conductor Flegg and Engineer Graham. He had orders to bring in two cars of stock which were on the siding just east of Delta station. Smith uncoupled the engine from the main part of the train. After it had pulled ahead, he threw the switch for the siding. The engine was backed in and the unfortunate man made the coupling, attaching the locomotive to an empty box car, which was coupled to one of the stock cars. He then gave a signal to the engineer to go ahead, and when last seen alive was walking on the strip of land between the siding and the main line and whether the victim of the accident attempted to board the train and fell or slipped while walking quickly is not known but the latter is supposition by those who were present when the accident occurred.

At any rate, he fell head foremost between the first car of stock and the empty box car so that his body lay directly across the rails. The two stock cars passed over him cutting him in two and also amputating the right leg. Death was instantaneous. The body was picked up and brought on here where it was handed over to Sheridan & Buchanan.

Coroner Jackson was notified but after hearing the facts of the case, decided that it was an accident, and an investigation unnecessary.

The late James R. Smith was born in the township of Elizabethtown, in the vicinity of Greenbush, forty-seven years ago. He had been in the employ of the B&W since that road has been in operation. He had worked his way up until he had attained the position of conductor. Some years ago, while coupling cars at Athens, he lost three fingers and a portion of the right hand. He was a capable and obliging employee, was very popular with the patrons of the road, all of whom will deeply regret his death. The deceased leaves two daughters to mourn his loss. His wife died but a year ago. It is needless to say that the sympathy of the entire community goes out to them in their sad bereavement. The deceased conductor resided at the corner of Abbott and Maple streets. He was a member of the COF and IOOF. In politics he was a Conservative.

15/11/1901 Renfrew Mercury Kingston (CP)

Good bye to the "Kick and Push". -- Mr. C.W. Spencer is now General Manager of the K. & P.R. but that the active management will remain pretty much as it is for some little time at least.--

18/11/1901 Ottawa Journal Pontiac & Pacific Junction

First advertisement in Ottawa Journal - joint with ON&W advertising Thanksgiving Day fares.

22/11/1901 Ottawa Journal Carleton Place Ottawa, Broad Street

Beauties of Royal train. Full description.

22/11/1901 Renfrew Mercury Chalk River Almonte

A new railway station will be built at Almonte next summer. Superintendent H.B. Spencer of the C.P.R. was in town on Monday last and made the emphatic announcement that the much needed, long expected building will be erected without any greater delay. Mr. Spencer stated that the building will be built of stone, and constructed entirely after the plans of the stations at Armprior, Renfrew and Pembroke. It will cost in the neighbourhood of ten thousand dollars-- during his stay in town he arranged for an extension of the crossing siding to meet required siding accommodation. The siding will be lengthened by about 700 feet, to accommodate 20 or 25 more cars. This work will be started at once.

23/11/1901 Ottawa Citizen Kingston (CP)

Today (Nov 22) a steel bridge was placed in position over the Madawaska river. Replacing a wooden structure on the line of the K. & P. Surveyors who have returned from their long tramp between Sharbot Lake and Carleton Place spying out a route for the proposed K. & P. extension, are now at work on the plans.

25/11/1901 Ottawa Journal Canada Atlantic Central Depot

This morning the Ottawa and New York express due at the Central Station at 10.45 struck and seriously injured Telesphore Gravelle of Aylmer, a fireman on the Ottawa, Northern and Western Railway. The unfortunate man had put his engine into the round house and was walking towards the station between the rails and the main line. The engineer on the passenger train whistled three times and had slowed considerably when Gravelle was struck. The cow catcher knocked Gravelle down but clear of the rails. At St. Luke's hospital his injuries were found to consist of two scalp wounds on the back and the side of the head, an abrasion of the right shoulder and an injury to the left knee. There is the possibility of internal injuries but good hopes are entertained for his recovery.

28/11/1901 The Equity, Shawville Pontiac & Pacific Junction

In reference to the changes that are proposed in connection with the P. & P. J. railway service, we learn from the agent here, Mr. Crawford, that it is the intention of the company to run the passenger train on express time, leaving Waltham a little earlier in the morning in order to connect with the C.A.R. train for Montreal at 9 o'clock, which will enable passengers to reach that city in time for dinner. It is also proposed to put on a freight train three days in the week - Mondays, Wednesdays and Fridays - to facilitate traffic and avoid the tedious delays that the travelling public have had to endure by the existing service. The freight train will leave Ottawa in the morning and return in the afternoon. The proposed changes, when put into effect next week, will certainly be much appreciated by the people of this county and, we shall have no doubt, will serve to materially increase the business of the road.

Next thing we shall look for is a move onward to Pembroke. Two years ago Mr Beemer told The Equity that as soon as communication was established with Ottawa, the Pembroke extension would be taken in.

Advertisement shows PPJ trains running into Ottawa as well as ON&W trains.

On another page. The first through train from the Pontiac arrived at the Central Station this morning. This train will in future connect with the North Shore line of the Canadian Pacific at Hull station for Montreal, making a through service from Pontiac to Montreal. Souvenir badges were issued to all on board the train this morning.

Through passenger and freight service was instituted on the Pontiac and Pacific Junction branch of the Ottawa, Northern and Western Ry. yesterday. The first passenger train, which left Waltham at 6 o'clock, arrived at the Central station at 9.15. The distance, 82 miles, was completed in three hours and fifteen minutes, is considered good on a roadbed just completed in places. The train, which consisted of engine, baggage car and four coaches, was in charge of Joseph Murphy, engineer and S.R. Kenny, conductor. The train was well patronized. Amongst those on board were Hon. Geo. Bryson, Coulonge; S.A. Smith, David Gillies, J.T. Patterson, Campbell's Bay; H.S. Dowd, Quyon, and Mr. Leggo, Shawville. A number of the railway officials boarded the train at Aylmer, having made the trip from Ottawa on the first through freight which left the city at 7 o'clock. In the party were Mr. P.W. Resseman, general superintendent; Guy C. Dunne [sic], chief engineer; F.W. Martin, train dispatcher; J.B. Brennan, roadmaster; and Mr. Jordan, agent of the Hull Electric company. In the baggage car were 26 deer shot in the Coulonge district by Montreal hunters. They were transhipped at Hull for that city. A passenger service is to be maintained daily except Sunday, the train leaving the Central depot at 5.20 p.m. No freight will be carried on this train. A freight train will leave Ottawa every Monday, Wednesday and Friday morning at 7 o'clock, thus making three round trips a week.

Fifteen carloads of freight left Aylmer by the P. & P. J. train on Thursday evening, the delivering of which at the several stations along the line caused a delay of 2½ hours in its arrival here that evening.

The Pembroke Southern Railway is asking for an extension of their charter to run a road from Pembroke through to connect with the Pontiac and Pacific Junction Railway in or about Shawville or Portage du Fort, and Mr. John W. Munro, M.P.P., intends asking for a bonus from the government to build the road from Pembroke through Westmeath and part of Ross townships to connect with the Pontiac and Pacific, at the coming session of the Ontario Legislature -- Pembroke Observer.

A large addition has been made to the C.P.R. freight shed here. The old one had become entirely too small for the quantity of freight now arriving at this station.

Brakeman: Killed.

William Yelden Struck by West Bound Express in Smith's Falls C.P.R. Yard.

A fatal accident took place in the C. P. R. yard, Smith's Falls, last Wednesday night by which Mr. William Yelden lost his life. He was a brakeman on the C. P. R. and at midnight was helping to bring the engine for his train out from the round house. He was operating a switch to run the engine on to the right line and after turning it he is supposed to have stepped back on to the adjoining track until the engine passed the switch. Just then the west bound express came thundering down the main track on which he was standing and ran over him. It is supposed that on account of the escaping steam from his own engine he did not hear the other. Both his legs were cut off and his body was otherwise frightfully mangled. He was picked up by the engineer of the light engine and some others who were about and carried to the station but he died in a few minutes. He was a young man about forty years of age and leaves a wife but no family.

James Mooney, retired general superintendent of the Brockville and Westport Railway died today. He was born in Prescott 65 years ago. He came to Brockville in 1887 and accepted the position of superintendent of construction on the Brockville and Westport Railway, and it is in connection with that corporation that he is best known. On the completion of the road in 1888, Mr. Mooney became general superintendent, holding the position till February last, when, owing to ill health, he was obliged to resign. While in the employ of the B&W he practically built up the road, and helped make it a paying concern as well as established many of the regulations now governing it.

James Mooney Dead (ER) The above caption will carry deep regret in Brockville and in fact anywhere that the genial James Mooney was known for he was the possessor of a disposition which made him a very entertaining companion and was welcome in any society in which he cared to move. In late years impaired hearing perhaps gave many the opinion that he was somewhat eccentric but beneath his brusque manner there were those hospitable characters inherent in the Celtic race which go a long way in making the world better for the sojourn in it of such men as James Mooney. He was a familiar figure on the streets of Brockville for the past fourteen years and was a general favourite at all times, having the respect of all who knew him. He will be greatly missed for his venerable appearance and rich amount of humour always ensured him a hearty welcome in all circles.

The late James Mooney was a son of Patrick Mooney, pioneer resident of Prescott. He was born in that town sixty-five years ago and spent the greater part of his life there. He was a man of more than ordinary ability took a deep interest in the welfare of his native place and with well known energy which marked the later years of his life was involved in many movements for the betterment of the Fort Town. In this connection might be mentioned the Prescott Fair of which he was for many years a director and was mainly instrumental in placing it on a sound financial basis.

He was also in the contracting business and for a long time supplied fuel and timber to the old St Lawrence and Ottawa railroad. Afterwards he went south during the American war, and was for over twenty years a dealer in tobacco representing White Bros, one of the largest firms in the United States. He came to Brockville in 1887 and accepted a position as superintendent of construction on the Brockville and Westport Railway and it is in this connection with that corporation that he is best known. Upon the completion of the road in 1888 Mr. Mooney became general superintendent, holding that position until February last when, owing to ill health, he was obliged to resign. He had also held the positions of treasurer of the company, receiver, general freight agent, and at the time of his death was the general passenger agent. While in the employ of the B & W he practically built up the road and helped make it a paying concern as well as established many of the regulations now governing it.

The deceased was never married. He had three brothers now all dead.

His illness dates back several years, but it was only in the past year that it assumed an acute form and he spent most of the time at St. Vincent de Paul Hospital where he passed away this morning at 5:30. Death was due to paralysis.

The funeral will take place Thursday morning from the hospital to St Francis Xavier church. The remains will be interred at the new Catholic cemetery.
