

Local Railway Items from Ottawa Papers - 1908

Thursday 02/01/1908 Chesterville Record Prescott Prescott

The first monthly payment to the employees engaged in the very extensive improvements being made by the Canadian Pacific Railway to their yards in Prescott has just been received by the employees for the month of November, amounting to about \$7,000. It is stated that the Canadian Pacific are to spend for the above improvements some \$150,000. They are to remodel their yard to accommodate the increasing business at this point, and are building a large car slip for the new car ferry, Charles Lyon, which is being completed by the Polson Iron Works, Toronto at a cost of \$250,000, and which it is expected will be in commission transferring cars to and from the New York Central, Canadian Pacific and Rutland Railroads at Prescott and Ogdensburg next month.

Friday 03/01/1908 Ottawa Journal Sussex Street St. Patrick street

August Waunk was killed this afternoon.

Car No. 58 was travelling towards the city when the St.L. & O. train hit it. More.

Thursday 09/01/1908 The Equity, Shawville Waltham

The new mail service by the mixed train began on New Year's Day, and so far as Shawville is concerned, necessitates a couple of extra trips per day to the station by the mail courier Mr. C. Caldwell, who has the contract. As the bus will be used to make these trips, the travelling public who visit Shawville by this train will now have nothing more to complain of on the score of accommodation, although the uncertainty connected with the arrival of this train, will make the work of meeting it twice every day a rather time consuming job.

Thursday 23/01/1908 Chesterville Record Kingston (CN) Lancaster

Tuesday morning about three o'clock two tramps who had been all the previous evening loitering about Lancaster station begging for help to get to Toronto obtained entrance to the GT ticket office here, annexed the contents of the till to the extent of about thirty dollars and made off with it.

03/02/1908 Ottawa Journal Ottawa Electric

Fire Destroys Electric Car

Mysterious Affair on Holland Avenue

Loss \$3000, Covered by Insurance

Supt Hutcheson thinks some tramps got in and lighted matches.

Car No. 202 of the Ottawa Electric Railway Company was destroyed by a fire of mysterious origin at 2 o'clock this morning while standing on the siding at Holland avenue.

The car is one of the big ones used on the Britannia run and was in use yesterday up to noon on snow cleaning operations. It was then run along the track past the turn from Holland avenue to Britannia and locked. About two o'clock this morning "trouble" appeared on the line and it was known that the trolley wires were short-circuited somewhere. Cars were sent in all directions and at 2:15 the blazing car was seen on Holland avenue. It was then almost totally destroyed and nothing could be done to save it. The loss will be \$3000, fully covered by insurance.

The only explanation Superintendent Hutcheson could offer was that some tramp or other person sought shelter in the car and lighted matches.

Monday 10/02/1908 Ottawa Journal Waltham Deschenes

The Pontiac mixed train, due at Ottawa at seven o'clock Saturday night and which was considerably delayed by the storm, met with an accident near Deschenes at one o'clock yesterday morning, by which several freight cars were derailed and the track blocked for several hours. Showing up near the switch at the east side of the Hull Electric Company's barns, the train had scarcely passed the siding when the freight cars following the engine jumped the track and scattered their contents, which was mostly lath and cordwood, over the roadbed. Fortunately the engine and coaches in which a number of passengers were travelling remained on the track and no one was injured. Word was sent in for the wrecking train but the latter was also unlucky, for when but a short distance from the scene, it became stalled through the accumulation of snow on the tracks, and it was only after considerable delay that it forced its way through and the work of clearing of the debris was commenced.

Thursday 13/02/1908 The Equity, Shawville Waltham Deschenes

A broken rail was responsible for an accident to the Pontiac mixed train which was due to arrive at Ottawa at 6 o'clock on Saturday evening. While rounding a curve near Deschene a rail broke after the engine and tender had passed over it and four freight cars and one passenger car were derailed. The cars rolled into the ditch and remained there until Monday morning when they were replaced on the tracks by the wrecking train which was despatched from Ottawa. No one was injured as there were few passengers in the coach. They received a severe shaking up as the passenger coach was thrown into the ditch as well as the other cars. The track was blocked in consequence of the wreck and the express on Monday morning went to Ottawa from Deschene on the Hull Electric tracks.

Thursday 13/02/1908 Ottawa Journal Alexandria Ottawa Union

With drawing.

The above shows what the G.T.R. now proposes for the big hotel and Central depot promised the city in return for fixed assessments for fifteen and twenty years respectively. The buildings are both considerably reduced in size from what was proposed to council first and promised by the G.T.R. authorities. More.

Friday 14/02/1908 Renfrew Mercury Chalk River Renfrew

The C.P.R. freight officials expect to move into their new quarters in the new freight shed this week. It is getting the finishing touches from the hands of Mr. Jennings' staff.

Monday 17/02/1908 Ottawa Journal Alexandria Hawthorne

See account in accident file.

Friday 28/02/1908 Ottawa Journal Chalk River Payne

A broken rail caused a run off and partial wreck this morning at Eganville Junction four miles west of Renfrew on the Canadian Pacific Railroad. The accident happened at 6.58 to train No. 96, known as the "Winnipeg" coming to Ottawa from the west in charge of Engineer B. Chapman of Ottawa and Conductor Ledkea of North Bay. --only injury was burns to the cook. More.

The baggage car slid down the embankment and is standing on end and the mail car, dining car and sleeper were turned over on their side. The other four coaches simply left the track and are resting on the ties. -- The engine, No. 1113 was not damaged much. More.

Friday 06/03/1908 Renfrew Mercury Locksley Pembroke

Conductor Roberts of the G.T.R. had a narrow escape from death last week. He was boarding his train which was moving out of Pembroke when he collided on the step with another person hurriedly leaving the train. The result was that Conductor Roberts was thrown underneath the car and only rare good fortune saved him from being caught by the wheels. Several cuts on the face are his only injury.

Monday 09/03/1908 Ottawa Journal Ottawa Electric

There will be several miles of new track laid by the Ottawa Electric Railway company the coming summer on the line to the Experimental Farm and George street loop. There is now only one thing standing in the way of the extension to the Farm and that is the Grand Trunk bridge on Preston street. An order for raising the bridge to permit of the passage of trolley cars below, and this order will have to be made by the Railway Commission. More.

The company has the rails on hand and will go ahead as soon as the weather permits. More

The railway company has just received the last of an order of twelve closed cars which will be available for summer use in times of great crushes but will have the equipment of open cars as last year.

15/03/1908 Eganville Leader Eganville Eganville

Owing to the damage by fire to the engine cab the night previous, the local C.P.R. train did not make the trip to Renfrew on Saturday morning. The fire occurred at 10:30 p.m. when the caretaker of the round-house, Mr. J. Walsh, was attending the coaches some distance away. When he returned he discovered the engine cab on fire, and is at a loss to explain how it started as he had taken the usual precautions before leaving his charge to perform other duties. A train crew came up from Carleton Place on Saturday to take the damaged engine to the shops there for repair.

Thursday 26/03/1908 The Equity, Shawville Waltham Shawville

A petition is in circulation this week requesting the Can. P. Railway Co. to afford the shipping interests better accommodation here by the construction of standard stock yards.--

Thursday 26/03/1908 Ottawa Journal Brockville Brockville

D. McNicholl, First vice-president of the C.P.R. accompanied by Mr. J.W. Leonard assistant general manager, paid a visit to Brockville yesterday afternoon and for three hours thoroughly inspected the company's premises.

One of the big features considered by Mr. McNicholl was the deepening of the tunnel through the town to the water front, and improvements to the wharf and buildings, which, he promised, would receive immediate consideration.

An old building north of the town, formerly used as a freight shed, he recommended, be removed.

Monday 30/03/1908 Ottawa Journal Hull Electric

Although apparently no nearer to securing a double track privilege over Main street, Hull, or a loop through the residential portion of that city, the Hull Electric Railway is doing what it can to improve the service and overcome as far as possible the delays now caused at the corner of Albert st., and Laurier ave. The company has spent nearly \$100,000 since last season in putting in a sub station in Hull. There is a guarantee of much better power than has been available heretofore.

Five new semiconvertible cars have been added to the rolling stock of the road. They are each 40 feet long with short longitudinal seats in the ends and cross seats in

Thursday 02/04/1908 Chesterville Record Chalk River Carleton Place

Carleton is to cease as a terminal of the Canadian Pacific Railway. After May 1, all train crews running out of Carleton Place will run from Smiths Falls through to Chalk River direct. The reason given by the company is "economy".

What effect will this have upon the busy town of Carleton Place is problematic, but directly it will mean the removal of some 250 trainmen, about half of whom were married.

They will remove to either Smiths Falls, 17 miles south or to Chalk River. The change has been under consideration for some time, but nothing in the way of definite action has been taken until now.

Thursday 02/04/1908 Chesterville Record Prescott Ottawa

The big trestle at the south east entrance to the city (is this on the approach to the Rideau River?) is to be all filled with earth and concrete supports, while the remainder of the big trestle on the Hull side of the Ottawa River at the Interprovincial Bridge is to be filled in. This will give employment to several score men and will take about six weeks. This work is to be done as a precautionary measure.

Thursday 02/04/1908 Chesterville Record Prescott Prescott

At Prescott the entire railway yard is being changed involving the expenditure of some \$200,000. A new brick station is to be built and the foundation is already under way. It will be a handsome and up-to-date structure. The sidings will hereafter accommodate some three times as many cars as formerly, but the whole yards are not to be taken up in tracks. A small pond has been filled in to give more room and it is proposed to store 150,000 tons of coal. Altogether 250,000 tons of coal will be handled during the months of navigation on the St. Lawrence River there from April 1st and this means practically 2,000 tons a day. All of which is

Friday 03/04/1908 Renfrew Mercury Chalk River Renfrew

The annual distribution of seeds from the floral department of the Canadian Pacific is now taking place. More.

Friday 03/04/1908 Renfrew Mercury Chalk River Renfrew

The old C.P.R. freight shed on the east side of the tracks has been sold to Mr. Jacob Harris, who this week has men employed dismantling it.

Thursday 09/04/1908 Chesterville Record Winchester Smiths Falls

Among the proposed extensions which the CP company have under consideration for Smiths Falls is the enlargement of the yard at an expenditure of about \$60,000, the construction of many additional tracks and the erection of a car shop and a large stores building. This work, it is understood, will be carried out this summer.

The new CPR coaling plant which has been in course of erection here for some months, was completed last week. It contains the most modern appliances for handling coal and is considered the best on the whole CPR system. A new coal dump has also recently been put in and this, at present, contains 50,000 tons. The chute is a massive looking structure seventy feet high and is in the form of two towers connected with a bridge overhead. In each tower are two "pockets" and a big dial on the front of each registers the quantity of coal taken out each time so the engineer has only to pull down a big spout and he knows exactly how much he has in

Friday 10/04/1908 Renfrew Mercury Chalk River Renfrew

Last week the Mercury noted that Mr. Jacob Harris had purchased the old C.P.R. freight shed and was busily engaged in dismantling it. However, before he had far advanced in this work he sold it to the Jamieson Meat Co., who will remove it to their abattoir.

Thursday 16/04/1908 Chesterville Record Brockville Brockville

Orders were received at Brockville last week that the CPR pilot engine was to be removed from that yard to Carleton Place. The company will do the shunting with their freight locomotives. The crew of the pilot will be given position on the main line should they decide to accept.

Friday 17/04/1908 Renfrew Mercury North Lanark

North Lanark Railway Company.

The bill which Mr. T.W. McGarry, M.P.P., has introduced into the legislature to extend the time for building the above road for five years longer, gives the following description of the course of this line, which was to be operated by either steam or electricity.

From a point at or near lot number thirteen or lot number fourteen in the second concession of the Township of Blythfield in the County of Renfrew, thence passing through the Township of Bagot in the County of Renfrew, through the Townships of Darling and Pakenham in the County of Lanark, and through the Township of McNab in the County of Renfrew, to a point at or near the village of Braeside, on the Ottawa river; thence continuing through the said Township of McNab to a point at or near the Town of Amprior; thence continuing through the said Township of McNab, and through the Township of Fitzroy in the County of Carleton to a point at or near the Village of Fitzroy Harbour on the Ottawa River; thence continuing through the said Township of Fitzroy and through the Townships of Torbolton, March, Nepean and Gloucester in the County of Carleton, to the City of Ottawa.

22/04/1908 Athens Reporter Westport

On Monday afternoon the coach and two cars of the BW&NW RR were derailed between here and Westport and the line blocked for a few hours. Fortunately no serious damage was done.

Wednesday 06/05/1908 Ottawa Journal Chalk River Smiths Falls

The long-talked-of C.P.R. change making Smiths Falls, instead of Carleton Place, the terminal of the Chalk River division, has at last gone into effect, and as a result, Smiths Falls has had this week a very valuable addition to its population. Fifteen crews, or in all about eighty men have arrived here since Saturday, and it is said there are more to follow. As they are nearly all married men with families they are welcomed as a most desirable class of citizen.

As yet there are no houses to accommodate them and for the present their families will not be brought here but a big building boom is now on and by autumn it is expected there will be enough residences for all.

The C.P.R. has made this change solely on account of economy. Heretofore all the trains ran only to Carleton Place, where they were made up again for Chalk River or Ottawa, now they will run direct to these points from here.

Thursday 07/05/1908 Chesterville Record Winchester Winchester

Two Italians working on the CPR construction were seriously and probably fatally injured at Winchester one night last week. About one hundred navies were returning to Chesterville on a string of nine hand-cars. They had gone but a short distance when the front car jumped the rails. Two of the men fell on the track and three cars passed over them.

Thursday 14/05/1908 The Equity, Shawville Pontiac Central

The Railway Committee of the House of Commons on Wednesday last passed the bill of the Pontiac Central railway, which authorizes the construction of a line of railway from some point near Bryson or Portage du Fort to the town of Brockville, passing through the counties of Renfrew, Lanark and Leeds, and also running in a northerly direction (whether running up the valley of the Coulonge or Black River, does not appear from notice of application published some time ago) along the valley of the Nottaway River to the East Main River, in this province. The project outlined above seems to be of a rather mysterious character, as the promoters - whoever they are - have said very little about it, and, so far as we know, have not been soliciting any bonuses from the municipalities through which they intimate it is to run. Perhaps this will form a later stage of development. In the meantime, people (especially along the southern end of the route) will be interested to know just what the railway means, and what is the extent and character of the business it has in view. The men behind the scheme should let the public into the secret.

Thursday 14/05/1908 Chesterville Record New York Central Berwick

Austin Galvin left for Cornwall where he has secured a position in the ONY station.

Thursday 14/05/1908 Chesterville Record New York Central Ottawa

Adolphe Trudeau, an employe of the New York and Ottawa Railway and a resident of Santa Clara, NY dropped dead at the Central Station, Ottawa at four o'clock yesterday afternoon. Coroner Craig states that his death was due to heart failure. Trudeau, who is a man about 55 years of age, has been a head blacksmith on the railway for about 15 years and was a trusted and much respected official. Considerable difficulty was experienced in identifying the dead man as few people in Ottawa knew him. At first he was thought to be an Ottawa man but investigation proved that it was a case of mistaken identity. Some papers found on the deceased were afterwards instrumental in ascertaining his name. His friends were at once communicated with and his foreman will come to Ottawa and take the body home. Trudeau was hurrying to catch the New York and Ottawa train when he dropped and died.

Thursday 14/05/1908 Chesterville Record Chalk River Carleton Place

A CPR change of great importance went into effect one day last week when the crews of the northern division, or that portion of the line between Chalk River and Carleton Place were transferred from Carleton Place to Smiths Falls.

This means that hereafter Smiths Falls is to be the terminal point, and men on that division who formerly resided at the "junction" town will of necessity have to make their headquarters there. Already fifteen crews have transferred and as this represents eight men, the greater part of whom are married and have families, it will mean a very valuable addition to the population of Smiths Falls. As yet there are not enough available houses there to accommodate the increase, and the men will not be able to move their families until autumn. A number of good dwellings will be rushed up this summer. This move was decided by the CPR on the ground of economy. With Carleton Place and Smiths Falls both divisional points, extra crews were required to transfer freight between these two places though the distance is only twenty miles. Now the run will be a direct one from Smiths Falls to Chalk River, which is only about one hundred and thirty miles.

Friday 15/05/1908 Ottawa Journal Alexandria Ottawa Union

New Central station plans submitted by G.T.R. Pictures etc. More.

Wednesday 20/05/1908 Ottawa Journal L'Orignal Rockland

The work on the Canadian Northern Railway is virtually at a standstill at the present time. The chief engineer was here this week looking over the line, and it is learned that within the coming week it will be definitely known whether they are going ahead with the line this summer or not.

Wednesday 20/05/1908 Ottawa Journal Hull Electric

The proposition of the Hull Electric Railway to the council of that city was accepted at a meeting last night subject to a few changes. More

The proposed belt line, as previously reported, will not be constructed along Chamberlin street, but rather by way of Reboul. More. It has been the custom through the need for increased facilities for freight cars consigned to any of the large companies in that city to be conveyed by way of Main street to their destination. This work was generally done at night, when the passenger service was suspended but at times the cars were transported during the day. The objections were not only based on the ground that the operations were the source of considerable noise, during the night, but it was thought by many that the street car service was necessarily delayed at times by these trains. Now, one of the stipulations of the city in the negotiations between it and the Hull Electric railway company, is that should an agreement be reached as to the improvements contemplated, that in future, no more freight cars be hauled over Main street. To this the company has agreed and the removal of a source of annoyance seems assured.

In future freight will be conveyed by way of the Belt line on other streets, the construction of which is contained in the terms submitted.

Friday 22/05/1908 Renfrew Mercury Eganville Eganville

From the Eganville Star-Enterprise. Messrs. Reinke & Boland this week shipped a carload of door and window frames to Algonquin Park. This is a portion of a contract received from them for the new hotel at that place and is probably the first carload of material of this nature ever shipped out of town.

Thursday 26/05/1908 Ottawa Journal Ottawa Electric
Rear end collision between open car 260 and the Duke of Cornwall and York. Details.

Wednesday 27/05/1908 Ottawa Journal L'Orignal Rockland
The C.N. Railway Company, who were pile driving on Mill street at the creek, have finished their work there and are moving the piledriver up Beckett's Creek, where some trestle work is being done. No definite word has yet been received as to whether the company will actively resume operations during the summer season.

Tuesday 23/06/1908 Ottawa Journal New York Central Cornwall Bridge
Cornwall Canal burst.
150 feet of the bank torn away. Pier of bridge so undermined that it collapsed and 200 feet of bridge fell. Huge mass of tangled iron.
One of the worst breaks that ever took place in the Cornwall Canal, and certainly the most disastrous occurred this morning at the O. & N.Y. Ry. bridge just above lock 18.

About 4.55 this morning the lockman noticed a leak in the bank about 50 feet west of the bridge. At that time the water was pouring out of a hole about three feet in diameter, but in half an hour the whole bank for a distance of 150 feet or more, and 35 feet deep, had been torn through and through this channel the water was pouring down out of the canal into the river, which at this point is over 25 feet lower than the canal level.
As the level, which is one and a half miles in length, gradually emptied itself, the water from the lower level forced the gates open and flowed back into the upper level. Just about 6 a.m. the pier of the railway drawbridge, which crosses the canal at this point, was so undermined by the water that it collapsed into the gap in the bank with the bridge, which is about 300 feet long. Luckily, as there are no night trains on the O. & N.Y. Ry. the swing bridge is left open all night and there is no night watchman.

The pier is totally demolished and the bridge is a mass of tangled iron.

As soon as the Lockman discovered the leak, Lockmaster Eamer phoned news of the impending danger up and down the line, and this no doubt prevented the damage to the canal being greater.

More.

The break not only ties up traffic on the Cornwall canal for several weeks, breaks the O. & N.Y. international traffic, but also interferes with the power plant of the St. Lawrence Power as the level from which it is supplied has been lowered.

The Cornwall street railway is also out of business this morning as they were using water power from the canal. Their auxilliary will soon be going however.

More

The O. & N.Y. are unfortunate in their bridges. At the time of its construction nine years ago, two spans fell into the south channel, causing the death of fourteen

Thursday 25/06/1908 Ottawa Journal Ottawa Electric Experimental Farm
The management of the Ottawa Electric Railway expects to be able to announce within a week by what route, if at all, the company will build to the Experimental Farm as this matter is now under the serious consideration of the directors. It is certain that the company will not take any steps to have the Grand Trunk bridge on Preston street removed or contribute to the cost of such removal if possible and the alternative route appears to be by Holland avenue, which would be much prettier as it would pass through some of the show places of the farm. One of the difficulties in using the Holland avenue route is that the company would probably have to purchase additional rails as it would not use the high 6-inch rails within the farm. The rails used would be the same weight, but would not expose so much surface to the rays of the sun.

Thursday 25/06/1908 Chesterville Record New York Central Cornwall
The most disastrous break in the history of the Cornwall Canal occurred Tuesday morning when a leak in the bank, 50 feet above the Ottawa and New York railway bridge, and 100 yards above lock 18, rapidly grew into a big break, and carried the canal bank for a distance of 150 or 160 feet into the river 25 feet below. The rush of the water through this gap undermined the centre pier of the railway swing bridge and it collapsed into a heap. The bridge dropped onto it, and was reduced to a tangled mess of girders and rails. At 4.45 this morning just as the steamship "Samuel Marshall" had passed up, lockman Gleason noticed the water in the river disturbed, and investigation revealed a two foot stream pouring through the bank at the bridge. The lockman took immediate action to save the bank by having the water shut off above, and run out below, but the leak grew rapidly and in a short time the bank gave way from the top to bottom, the heavy stone rip rapping being swept out into the river. The pier and bridge fell at 6.10 a.m. the fall being witnessed by the lockman, and others who hurried to the scene. At seven a.m. the level was almost dry. It will probably take several weeks to repair the canal bank and restore navigation.

Mr. Weller, superintendent of the Welland Canal, has been ordered to Cornwall to take charge of the work. The rebuilding of the swing bridge, one of the largest on the continent, will take considerable time. It was 200 feet long and stood about 35 feet above the canal the main railway bridge being 65 feet above the river level. As there are no night trains on the Ottawa and New York Railway, the bridge was left open and there was no man in charge at the time of the mishap.

Thursday 25/06/1908 Chesterville Record New York Central Berwick
A cow was killed on the O&NY track north of the village by the Friday morning express. This should be a lesson to the farmers along the railway. The company have a lot of trouble in some places with cattle on the track and the farmers should not expect the train to stop for cattle. It is surprising more cattle are not caught.

Thursday 25/06/1908 Ottawa Journal New York Central Cornwall Canal
Work of repairing the Cornwall Canal begins.
The work of repairing, or rather overcoming the break in the Cornwall Canal at Cornwall was commenced in earnest this morning when over 200 men began work. A trench is being dug in the bottom of the canal above the break to lock 18 and in this will be raised a coffer dam which will serve the south bank of the canal until the permanent repairs are made.

The New York Central Railway's engineers are taking levels and other measurements with the view of starting the initial steps of rebuilding the wrecked bridge.

Active operations will begin tomorrow.

It is understood that the wrecked bridge will be cur up or fused by electricity, an abundance of power for which will be supplied by the St. Lawrence Power

Friday 02/07/1908 Renfrew Mercury Renfrew Renfrew
The G.T.R. has men at work putting in another siding between Renfrew and Renfrew Junction.

03/07/1908 Cornwall Freeholder New York Central Crysler
A serious accident occurred last Saturday evening at the O.&N.Y. station to Fred Prescod of Russell, formerly of Cornwall. He jumped from a passenger train, which was passing Crysler, and landed on the steps of the platform. He was found unconscious with one leg broken.

Friday 03/07/1908 Ottawa Citizen Ottawa Electric Albert street barn
New car barns.

Ottawa Electric will build a new addition.

The Ottawa Electric Railway is arranging for the construction of an extra car barn adjoining its present one on Albert Street. The capacity of the latter is taxed and it is necessary to have the car storage in a fairly central locality. A site on Queen street was first intended to be utilized but before the board of control objections were urged by property owners in the vicinity. Some options were also secured for a location off Rideau street, but some of the owners held out for too high a price. As a consequence it is now intended to built on the lot adjoining the present sheds. It will necessitate the removal of a couple of small buildings.

Saturday 04/07/1908 Ottawa Citizen New York Central

Quick work at Cornwall.

Navigation may be resumed in about a week.--

Huge stairways have been built by the New York Central at the end of their track so that passengers can cross the break on foot or in carriages, the regular train service being kept up. The bridgemen of the eastern division arrived from Rochester, NY, yesterday, and will proceed at once with removing the wrecked span. A large force has already made good progress with the removal of the steel spans on the north side of the canal, which have to be taken down to admit of the passage of vessels through the new channel. It is the intention of the company to bring an old bridge from another part of the system and erect it temporarily over the canal, to be used until the completion of the repairs when a new structure will be built. It is expected that the temporary bridge will be ready for traffic in four weeks.

Monday 06/07/1908 Ottawa Citizen Ottawa Electric George street loop

The Ottawa Electric Railway began to use the new loop by way of George street. It branches off Sussex and goes down George and up Mosgrove street to Rideau, making a convenient turning point near the centre of the city. In the morning the Gladstone avenue cars will be rundown over the loop and in the afternoon and evening the Britannia extras. The new line will obviate the necessity of shunting at the Post Office.

Thursday 09/07/1908 Chesterville Record Sussex Street Hurdman

John B. Leary, a young Irishman, with no relatives in this country and employed as a telegraph operator on the CPR was drowned this morning. He was employed at the junction of the CPR and NY&O at the east end of the city, and this morning went to bathe in the Rideau River, nearby. He swam out into deep water and was seen to sink suddenly, having probably been seized with cramps. The body was recovered by CPR Engineer Wm. Dudley, but life was extinct.

Thursday 09/07/1908 Chesterville Record New York Central Berwick

The farmers of this community are busy hauling stone to the O&NY station, where they are loading cars. The stone is worth 60 cents a load.

Friday 10/07/1908 Ottawa Citizen New York Central

Opens today

Temporary channel at Cornwall completed. Rapids King will probably be the first boat through.

Saturday 11/07/1908 Ottawa Citizen New York Central

Cornwall 10th. Canal opened. First steamer up was Rapids King, the Dundurn came down at 10 o'clock and general navigation will be resumed at 10 p.m.

Monday 13/07/1908 Ottawa Citizen New York Central Embrun

A bridge on the Ottawa and New York Railway, two miles south of Embrun, about twenty-five miles from Ottawa was totally destroyed by fire Saturday night. It is said to have been set on fire by a spark from the engine of the special train returning to the city from Cornwall with the lacrosse excursionists on board. The bridge was about 100 feet long and 30 feet in height.

A gang of men were sent down from the city and started the work of construction early on Sunday. The officials reported last night that they expected that trains could come across by seven o'clock this morning, so that traffic would not be interrupted. The bridge was a wooden structure and will be replaced by an iron one.

14/07/1908 Globe and Mail Ottawa, Brockville and St. Lawrence Brockville

New Electric Railway.

Ottawa and Brockville May Soon Be Connected by Trolley Line.

That Ottawa and Brockville will soon be connected by an electric railway seems now assured. C.P. Stuart Morgan, of Bristol, England, a gentleman of influence and wealth, and heavily interested financially in the proposed new road was here yesterday inspecting waterfront properties for the purpose of locating a terminal, and left for Ottawa this morning impressed with the location of one spot in particular. The new route will cut off eighteen miles between here and the capital, and travel through a country not now accommodated by railways.

Tuesday 14/07/1908 Ottawa Citizen Ottawa Electric Experimental Farm

Ties are being delivered and construction work will soon commence on the extension of the Ottawa Electric railway to the experimental farm. The company has concluded an agreement with the government in regard to the matter. The route is to be from Holland avenue across the farm to the observatory, with a loop around the offices and farm buildings. The original idea was to build the line up Preston street and residents of that locality were very anxious that it should be done, but an obstacle in the way was the Preston street bridge of the G.T.R. which is too low for cars to go under and also occupies a part of the roadway. The company took the position that if an extension were desired the city had to provide the street and in consequence it declined to share in the cost of altering the grade. The Grand Trunk is understood to take the position that when the bridge was built it conformed to the requirements of the law. The city objected to bearing the whole cost, estimated at \$16,000, and so the subject was dropped. Since then a new application has been decided on asking the commission to order the work and apportion the cost between the city and the two railway companies. Meanwhile the street railway has concluded arrangements with the government for the route by way of Holland avenue and consequently the Preston street project has apparently fallen through.

Thursday 16/07/1908 Ottawa Citizen Ottawa Electric

To guard against the danger of car trollies slipping off the conducting wire at railway crossings the street railway is installing a new protective safety device. One of them was installed at the crossing near the water works early this week. It consists of a wire net in the shape of a trough inverted over the stretch of conducting wire that overhangs the crossings. The wire net is connected with the conducting wire and also carries the current. The overhanging edges of the net are intended to catch the trolley should it slip off sideways. If the trolley should leave the wire the edges of the net would catch it and it would then pick up electricity from the net. This would prevent interruption of the current. This is installed only on the line where the cars have to take the up grade. On the other side the cars are on the down grade and do not need it. The taking of these protective measures is the result of the serious accident that occurred a short time ago at the St. Patrick street crossing.

Thursday 16/07/1908 Chesterville Record New York Central Berwick

On Wednesday the O&NY stopped drawing stones to Cornwall, and so the farmers are anxiously awaiting to see if they want any more. They were paying 60 cents a load. This is the best value the people of Berwick ever had.

Thursday 16/07/1908 Ottawa Citizen Ottawa Electric

Collision between cars 256 and 246 on Sussex street opposite Government House Gate.

Wednesday 22/07/1908 Ottawa Citizen Other Morris & Ballantyne's

Total Loss by Brickyard Blaze Outside City

Fire broke out yesterday morning about one o'clock in Morris and Ballantyne's brickyard, Billings Bridge and did damage the extent of three thousand dollars. There is no insurance. The fire started in the engine house -- over one third of the yard was destroyed --repairs will be commenced -- yard will close for the rest of the season.-

Thursday 23/07/1908 Chesterville Record Winchester Kemptville

The new CPR double track between Smiths Falls and Kemptville was put in operation Monday. By the middle of August it is expected the line to Finch will be in use.

Saturday 25/07/1908 Ottawa Citizen Ottawa Electric Paye as you enter

Pay as you enter. New Street Car out for the First Time Yesterday.

One of two being built by the OER - was out to have its picture taken --

Saturday 25/07/1908 Ottawa Citizen New York Central
-- The New York Central is making good progress with the erection of the trestle work for for the temporary bridge across the canal.

Wednesday 29/07/1908 Ottawa Citizen Ottawa Electric Coburg barns
The Ottawa Electric Railway has concluded the purchase of the property on Coburg street where the new car barns are to be located. It is intended to go ahead at once with the building.

Wednesday 29/07/1908 Ottawa Citizen L'Orignal Greens Creek
Work has been begun again on the construction of the Canadian Northern railway. Thomas and Petrie are at work with a gang of men in the stone cuts below Greens Creek which is about six miles from the city. They expect to have the stone work done up as far as Greens Creek this week and will then begin back at St. Joseph's village levelling the way through the rocks there.

Thursday 06/08/1908 Ottawa Citizen Hull Electric
Car No. 24 killed a trespasser between Dufferin and Interprovincial bridges.

Monday 17/08/1908 Ottawa Citizen Ottawa Electric
Passenger put off car No. 253.

Wednesday 19/08/1908 Ottawa Citizen Maniwaki Tenaga
At Tenaga on the Gatineau Valley Railway, the tank for filling the boilers of engines, which has always rather marred the scenic effect of the spot is to be taken away. A dam is being built across the creek, which runs into the river, and pipes running from this dam will supply the engines in future.

Thursday 20/08/1908 Ottawa Citizen Ottawa Electric Coburg barns
The contract for building the new car barns of the Ottawa electric railway on Coburg street has been awarded to Holbrook & Sutherland who will do the job on a percentage basis rather than by bulk tender. The building will have a frontage of 66 and a depth of 225 feet and will accommodate about fifty cars. Operations will go ahead without delay.

Friday 21/08/1908 Cornwall Freeholder New York Central Cornwall
New Bridge Across the Cornwall Canal Completed - The temporary swing bridge of the Ottawa & New York Railway across the Cornwall Canal was placed in position on Friday afternoon, and on Monday evening the wrecking outfit passed over, followed by the regular train. Notices have been issued by the various railways interested that through train service was resumed on Monday, so that in future tickets may be sold at all points in Canada via this route. In their notices the railways express their gratification at the prompt manner in which the break to the canal was dealt with, so that traffic could be resumed with the minimum of delay.

Saturday 22/08/1908 Ottawa Citizen Ottawa Electric Pay as you enter cars
The Ottawa Electric railway is putting into commission today a couple of new cars of the "pay-as-you-enter" type. They are large, roomy and solidly constructed having been manufactured by the Ottawa Car company. The rear vestibule is spacious and there the passenger pays as he boards -- more.

Wednesday 26/08/1908 Ottawa Citizen Ottawa Electric Britannia station
The new station of the Ottawa electric railway company at the village of Britannia to take the place of the one destroyed by fire will be on the north side of the tracks instead of the south side where the old one stood. The people of Britannia have given to understand that a fine brick building is to be erected there for the use of the people and will be a vast improvement to the one which was destroyed. The present concrete platform on the north side of the tracks will be the platform for the new station. It is understood that the work will be begun very soon as the present condition is very dark at night and inconvenient.

Friday 28/08/1908 Renfrew Mercury Chalk River Renfrew
Mr. J.A. Jamieson is negotiating for a siding from his limeworks across the wood yard to Barr street, and then either through Mr. O'Brien's property or down the yet unopened streets there, to Hall street, joining the main C.P.R. track somewhere near the abattoir. If Mr. Jamieson succeeds in the negotiations it will be a saving on town streets. For much of his heavy hauling would reach the railway by siding instead of by waggon.
N.B. It is not clear whether this refers to Renfrew or Eganville.

Wednesday 02/09/1908 Ottawa Citizen New York Central Crysler
The Ottawa and New York railway station at Crysler on the line between Ottawa and Cornwall was completely destroyed by fire yesterday morning. The station, baggage room and warehouse containing the operator's equipment, tickets and a large quantity of goods in transit were wiped out by the blaze which started from some unknown cause about six o'clock in the morning. The loss amounts to about \$2,000.

Thursday 03/09/1908 Chesterville Record New York Central Crysler
The railway station at Crysler was destroyed by fire on Tuesday morning. A spark from the engine is supposed to be the cause.

04/09/1908 Cornwall Freeholder New York Central Crysler
O.&N.Y. DEPOT BURNED - About 6 o'clock on Tuesday morning the people of Crysler awakened to find the O.&N.Y. station was a mass of flames. While Arthur Curry was passing the station he noticed that the platform was on fire. He went to the rescue but as the fire was already in front of the door admittance to the building was impossible. He notified the station agent, John Cockburn, but in five minutes the building was in flames and nothing was saved. The people had just time to save two box cars, which were behind the station, on the tracks. There was a lot of freight in the building. The loss is estimated to be between \$5,000 and \$6,000. The origin of the fire is unknown, but it is supposed to have been from a red coal dropped by the freight engine which passed here about 1 o'clock Tuesday morning. The citizens of Crysler hope that the new station will be built on the north side of the river, as it is more convenient for them.

04/09/1908 Cornwall Freeholder Kingston (CN) Greenfield
A west bound freight train (Grand Trunk's Ottawa Division) derailed last Saturday 2 miles east of Greenfield. 9 cars left the track and tore up the rails. Repairs were made quickly and trains were running that night.

Thursday 10/09/1908 Ottawa Citizen Alexandria Central Depot
The contract for tearing down the old concrete and brick dwellings in the yards behind the Central station was awarded to Mr. J. Hudson of Ottawa and yesterday morning work was commenced. Superintendent Donaldson informed the Citizen definitely that it was the intention to erect new freight sheds about where the two old buildings have stood. He had no information as to when the work would be resumed on the baggage annex to the station, the foundation of which was laid by John Quinlan and company.

Thursday 10/09/1908 Ottawa Citizen Ottawa Electric Experimental farm

Unless the Ottawa Electric railway is given permission to build a loop at the south end of Elgin street it will revert to a bob tail service on that street. This was the statement made yesterday by one of the officials of the company.

Good progress is being made on the Holland avenue extension to the Experimental farm and it is expected that it will be completed by the first of November. The winter service will then go into effect and will consist of one car running between the farm and the corner of Holland avenue where the cars now turn to go to Britannia. For the summer there will be a regular service with cars running from Sparks street. If permission is secured for a loop at the end of Elgin street cars will run to the farm by way of Albert, Preston, Somerset and Holland avenue. There will be a loop at the farm end and so it is imperative that there be a loop at the other end of the line. It is also imperative for catching visitors to the city that the cars for the farm pass Sparks street. Therefore if the loop cannot be secured at the south end of Elgin street there will be two cars placed on the Elgin street line, one on each track, giving a service of about twelve minutes. The Albert street cars would then be sent around the George street loop and out to the farm. No application for the loop has yet been made to the city council as it will not be required until spring. The Albert street cars will then not go to the front of Union station, only to the corner of Briard street except in the case of specials and extra cars.

Friday 11/09/1908 Renfrew Mercury Kingston (CP) Wilbur

The Wilbur Iron Mine on the line of the Kingston and Pembroke Railway, has closed down and is again in the hands of its owner, Wm. Caldwell of Toronto. The company working it had been furnishing iron ore to the Lake Superior Steel Corporation, shipping the ore by way of Renfrew to Sault Ste. Marie. It has now gone into liquidation, Caldwell getting possession pending a settlement.

Thursday 17/09/1908 Ottawa Citizen L'Orignal
CNR entrance into Ottawa, would like to build across the Stewart property. --

Expect to have trains running here this fall -- the line is graded and track laying well advanced -- cannot afford to pay running rights from Hurdman's bridge.--

18/09/1908 Cornwall Freeholder New York Central Helena

The wooden trestle over a culvert at Helena, N.Y. was damaged by a fire Tuesday, but was quickly repaired and the O.&N.Y. trains were not delayed.

Friday 18/09/1908 Ottawa Citizen L'Orignal

The contractors who have the job of grading the Canadian Northern between Hawkesbury and Ottawa have received orders from the company to have their work completed by Oct. 15th. For some time past the company have been laying rails at the rate of a mile a day and this week is now about 40 miles from the city. The station at St. Joseph has been completed and Mr. A. Routcliffe, who has the contracts for building the stations, is making preparations for the rapid construction of the remaining buildings. S. Grant & Co. are working at the grading between Green's Creek and Ottawa. The trestle across Green's Creek is completed and the other trestle work is under way.

Friday 18/09/1908 Renfrew Mercury Chalk River Pembroke

The C.P.R. Company have started filling in the trestle in front of the Pembroke town hall, and expect to have the work completed this fall. The matter of the filling in of the trestle and approaches at streets has been of long standing between the company and the town.

Tuesday 22/09/1908 Ottawa Citizen Maniwaki Engineer McFall

C.P.R. engineer Wm. McFaul (sic) of Ottawa was injured last evening at Aylwin station on the Gatineau branch. Owing to a misplaced switch, it is said, the engine left the rails, and toppling over, pinned the engineer to the ground. An auxiliary was sent up from Ottawa to clear the line and Mr. McFaul was brought back to the city early this morning. Up to the time of going to press it was not known whether his injuries were serious.

Wednesday 23/09/1908 Ottawa Citizen Maniwaki Engineer McFall

C.P.R. Engineer McFaul (sic) of this city who was injured on Monday at Aylwin station on the Gatineau branch of the road, being pinned to ground under engine, is now confined to St. Luke's hospital. After the accident the injured man was attended to by Dr. J.F. Kidd, it being found necessary to amputate the right foot at the ankle. This was done before McFaul was taken to the hospital at which institution he was reported last night as resting quietly.

Tuesday 29/09/1908 Ottawa Citizen Alexandria Central Depot

The baggage annex for the new G.T.R. station will be completed this fall and will be occupied for station purposes and it is hoped to have the foundation for the hotel completed before the winter puts an end to building operations--
Annex will be completed this fall. The tracks will then be moved over, the annex used as a station and trains will start from there.
Hotel etc.--

Thursday 01/10/1908 Chesterville Record Buckingham Buckingham

The Canadian Pacific Railway freight shed office here was broken into last night. The company's safe was blown open and the contents taken. The thief or thieves got only about \$12.

Persons living in the vicinity of the office heard the report of the explosion about 1 a.m. but made no investigation and the robbery was not known until the agent arrived to open the office this morning. The company have been notified and the local police are looking into the matter.

Saturday 02/10/1908 Ottawa Citizen Hull Electric

It is doubtful if the double tracking of Hull streets by the Hull Electric company will be completed before winter. Every effort is being put forward to do so but unless weather conditions are very favorable it is hardly likely that success will attend the efforts of those interested. The mains being laid on the streets however will all be completed this week, while the removal of poles from the streets, which is going on will be finished during the next week. Then there will only remain the paving of the streets to do. More than ordinary difficulty is experienced in this as the street is a very busy one and has to be kept open to traffic, there being no parallel

Thursday 15/10/1908 Chesterville Record Ottawa Electric

An appeal will likely be taken by the OER against the verdict of \$5,500 given by the jury to Miss Lena Morin of Mechanicsville, who lost a limb as a result of the accident on the Britannia line on May 24. It is claimed that the verdict is an excessive one. It is pointed out that Miss Morin has not been incapacitated from resuming an office position, and that the amount of the verdict, if invested at 6%, would yield her each year practically as much as she was receiving from her former position.

Some time ago the court gave a verdict of \$1,500 in favor of Mrs O'Leary whose husband was killed by walking in front of a Somerset Street car. The verdict was

Wednesday 21/10/1908 Ottawa Citizen L'Orignal Greens Creek

The cement work for the big trestle across Green's creek in connection with the Canadian Northern railway will be ready for the iron work in two weeks. This trestle will be about 300 feet long.

Friday 23/10/1908 Ottawa Citizen Hull Electric

The work of double tracking Main street, Hull, by the Hull Electric railway company will be completed on Monday next. The temporary track will then be taken away but the north pavement will not be improved again before the winter is over.

Thursday 29/10/1908 Ottawa Citizen Maniwaki Engineer McFall

Engineer Wm. A. McFall who had his foot amputated in a run off on the Gatineau branch, C.P.R. on Sept 21st., has so far recovered as to be able to leave the hospital.

Thursday 05/11/1908 Chesterville Record New York Central Crysler
A serious accident happened here on Monday afternoon when one of the O&NY trains ran into Mr. Racine's outfit which he has for carrying passengers. As the northbound train was starting from the station it struck the bus which was caught in the switch, breaking it to pieces and also breaking the horse's legs. The horse had to be killed.

06/11/1908 Cornwall Freeholder New York Central Crysler
WANT STATION NEAR TOWN - H. Bingham and Joseph Quenneville of Crysler, Robert Stevens of Finch and Louis A. Landry of Cambridge are asking the Railway Commissioners for an order directing the Ottawa & New York Railway to rebuild their station at Crysler. It was destroyed by fire a few weeks ago. The company is willing to rebuild it on the same site, but different residents want it erected 1,500 feet further north, which would be nearer to the village.

Thursday 12/11/1908 Ottawa Citizen L'Orignal
The work of making the rock cuts on the Canadian Northern railway between St. Joseph and Ottawa has been completed. The grading has been completed to this side of Greene's (sic) creek, all ready to lay the rails. The company will not go any farther until some arrangement is made with regard to the entrance into Ottawa.

Friday 13/11/1908 Ottawa Citizen Ottawa Electric Experimental farm
The Ottawa Electric railway has completed its extension to the Experimental farm and is operating a limited service for a few days pending the inauguration of the regular schedule. It has not yet been decided what cars will run to the new terminus but it is not unlikely that those going around the George street loop will go there. More.

Thursday 19/11/1908 Ottawa Citizen Renfrew Ottawa East
Wreck - see accident file.

Friday 27/11/1908 Renfrew Mercury Chalk River Carleton Place
An hydraulic hoist with cylinder of ten inches diameter has just been finished at the C.P.R. shops at Carleton Place, supplanting the one of seven inch calibre, and capable of lifting the heaviest locomotives on the line.

04/12/1908 Cornwall Freeholder New York Central Crysler
A number of citizens of Crysler went to Ottawa last Wednesday to wait on the Railway Commission in regard to which side of the river the new O.&N.Y. station will be built. The right place for the station is on the north side. Reported on a different page - Mr. Gays of the O.&N.Y. was in town (Crysler) with his surveyor last Saturday.

Friday 04/12/1908 Ottawa Citizen Chalk River Pembroke
Stopped watch causes Pembroke fatal wreck. See accident file.

Tuesday 08/12/1908 Ottawa Citizen Ottawa Electric
Accident involving car No. 44.

Thursday 10/12/1908 Chesterville Record New York Central Crysler
Mr. Gays of the O&NY was in town with his surveyor last Saturday. A number of citizens of Crysler went to Ottawa last Wednesday to wait on the Railway Commission in regard to which side of the river the new O&NY station will be built. The right place for the station is on the north side.

Thursday 10/12/1908 Chesterville Record New York Central Crysler
A short time ago we mentioned that a deputation waited upon the Railway Commission at Ottawa re. the building of the O&NY station at Crysler, on the north side of the river. The case came up again before the commission on 3rd. inst. The only witnesses at any of the hearings outside of professional evidence were Messrs. H. Bingham and J. Quenville for the north side and W.E. Crain and J. Clouthier for the south side of the river. After hearing the evidence advanced by both parties, Judge Maybee said that from their own engineer's report the commissioners found that if the change in site was made a fill, at a cost of \$1,200 would be necessary, and that while he favoured the location of the station on the north side of the river, yet he did not find the evidences of such a proposterous nature to warrant the commission making an order to compel the company to be at such an outlay, to further accommodate the 170 petitioners and others asking for the change. The commission was willing to lay the matter over until the January session, which was agreed to, but later the petitioners withdrew the case, and thus the matter stands. The company may build where they choose.

Thursday 10/12/1908 Chesterville Record New York Central Russell
Last Monday evening a large number of the prominent Masons of the city of Ottawa, accompanied by Dr. S.S. Davidson D.D.G.M. upon his official visit to Russell Masonic Lodge. Although the roads in the vicinity of Russell were in a poor condition for travelling, the members of the lodge turned out in force to greet their visitors. One of the most pleasant features of the evening, which added materially to the solemnity of the ceremonies was the work of the choir under the direction of Very Wor. Bro Arthur Dorey. Upon the conclusion of the business of the hall, the brethren repaired to the dining room of Gornley's hotel, where a banquet awaited them. Through the kindness of the officials of the Ottawa and New York Railway, a special train was placed at the disposal of the Ottawa brethren to convey them home immediately after the close of the festivities.

11/12/1908 Cornwall Freeholder New York Central Crysler
The O.&N.Y. plans to rebuild the Crysler station north of the South Nation River.

Friday 25/12/1908 Renfrew Mercury Prescott Prescott
A large sum of money has been spent by the C.P.R. in yard improvements at Prescott. The capacity of the yard is doubled, and the coal plant, with accommodation for 100,000 tons, is said to be the finest between Montreal and Port Arthur.

25/12/1908 Cornwall Freeholder Kingston (CN) Lancaster
On Monday last, an engineer for the Grand Trunk Railway experienced a tragic accident. Running westbound, he leaned out the window of the engine after passing Lancaster for unknown reasons. A second engineer whom was driving the locomotive at the time suddenly noticed that the worker had disappeared. He alerted the crew and stopped the train. The missing man was found behind the train on the Raisin River bridge, unconscious with a terrible head wound. He died the next day without regaining consciousness."
