

Local Railway Items from Ottawa Papers - 1910

10/01/1910 Ottawa Journal Alexandria Chateau Laurier

Work on the construction of the Chateau Laurier will be shut down at the end of the week or thereabouts and will not be resumed until April. This was the information given out today at the office of the Geo. Fuller Company, the contractors in charge of the building. This is the result of the Dominion Bridge Company being unable to supply steel.

11/01/1910 Ottawa Journal Alexandria Union Station

The new power and heating plant at the Grand Trunk station, which has been in the course of construction for several months, is nearly completed. Fifty men have been employed on the building which is 100 by 65 feet square. Machinery of the latest pattern will be installed in the building.

13/01/1910 Chesterville Record Winchester

The CPR double track between Smiths Falls and Montreal is now in general use. Parts of the system were used by freight trains during the summer but commencing on Wednesday last the passengers began using the double line, and now the whole system of double tracking between Smiths Falls and Montreal is in operation.

04/02/1910 Ottawa Journal L'Orignal

Night train is cancelled.

Mr. Wm. MacKenzie of the Canadian Northern arrived in the city yesterday with Mr. D.D. Mann. Discussing the C.N.R. entrance to the Capital, he stated that something must be done at once. The present terminus at this end of the line was merely a make-shift, he stated, and owing to its out of the way situation is a great drawback to traffic. Mr. MacKenzie declared that the Railway Commission, in refusing the road admission to the city beyond Hurdman's Bridge had placed the Canadian Northern in a most embarrassing position.

"Something must be done very soon," declared Mr. MacKenzie, "for the present Ottawa terminal is of little value. It was, of course, an experiment and we have found that a change must be made."

Asked regarding a report that the Canadian Northern had given up the night service between Ottawa and Quebec because of the location of the Ottawa and Montreal depots, Mr. MacKenzie stated that this was quite true. The new extensions of the line enabled a night passenger service to be arranged to the convenience of the travelling public generally and especially the citizens of Quebec and Ottawa. From the first the trains had been run under a disadvantage. As in Ottawa, the Montreal depot is in an isolated locality.

The handicaps were too great and the experiment thus proved a failure.

"With a new road," stated Mr. MacKenzie this morning, "these obstacles are hard to get over; it would not be so difficult with an old established corporation in more affluent circumstances." Then he smiled.

04/02/1910 Ottawa Journal L'Orignal

May not use new station.

That the Canadian Northern Railway does not contemplate bringing their trains into the Central station until the latter is completed and perhaps not then, was the intimation given by Mr. D.D. Mann when in the city yesterday. Just at present and until the C.N.R. transcontinental line is completed it is not considered the C.N.R. would be warranted in paying the heavy charges demanded by the other railways to enter the Central Depot. The present traffic is slight and not much is expected of the line to Ottawa until connection is made with the West.

In fact it was vaguely intimated that the C.N.R. might not attempt at any time to enter Central depot, but may likely build a suitable depot of their own.

Mr. Mann stated that it was not proposed to use the high plateau of land south of Gladstone avenue for railway purposes. It will be kept for residential purposes. Mr. Mann left for Toronto in his special car last night travelling over the C.P.R. line.

09/02/1910 Ottawa Journal Alexandria Union station

The new Grand Trunk station is rapidly nearing completion and the conglomeration of steel and stone and timber that occupied the site a few months ago is slowly but surely being worked into a graceful building which, when completed, promises to be one of the most attractive railway stations in Canada. The contractors will begin the work of plastering in the building in a few days. Other interior work has been going on for some time.

09/02/1910 Ottawa Journal Alexandria Chateau Laurier

It was thought some time ago that the Geo. A. Fuller Company, the contractors in charge of the Chateau Laurier would be forced to discontinue the steel construction work because of the belief that a steady supply of steel was not to be obtained from the Dominion Bridge Co. at Montreal.

The difficulty has been averted and it is probable that the steel work will be finished by spring. Fifty men are now employed and the contractors have on hand 200 tons or more of the material and there are prospects for a steady supply.

12/02/1910 Ottawa Journal L'Orignal Hurdman

Mr. D.D. Mann is not worrying a great deal over the obstacle that has been placed in the way of the C.N.R. through the refusal of the Railway Commission to allow the road to come any further into the city than Hurdman's Bridge. There are other cities in the Dominion that are occupying the attention of himself and his partner, Mr. Mackenzie, and he declares that it has always been his policy when a snag is struck in place to concentrate forces in the other channels where there is easy sailing. More.

24/02/1910 Chesterville Record Prescott Prescott

The cars of oriental raw silk worth a million and a half dollars were ferried across the St. Lawrence from Prescott to Ogdensburg yesterday. A force of customs inspectors were in waiting and as soon as the cars passed an engine coupled on and pulled out for New York.

04/03/1910 Renfrew Mercury Renfrew Admaston

The G.T.R. station is a busy place these days: lumber, ties, telephone poles and pulp wood are being hauled to the station daily, by several men from the Shamrock side of the township.

09/03/1910 Ottawa Journal Winchester Smiths Falls

Smiths Falls. It has been rumored for some time that the C.P.R. train despatchers were to be removed from Smiths Falls and sent to either Ottawa or Montreal, but it is now definitely settled that they are to remain here. The line between Smiths Falls and Chalk River and the line from Ottawa to Brockville has been added to their territory which hitherto had only been the line between Smiths Falls and Montreal. The new order will go into effect on March 14th.

14/03/1910 Ottawa Journal L'Original Hurdman

The Evening Journal was informed this morning by an official of the C.N.R. that within two weeks, undoubtedly, the difficulties encountered by the road in securing an entrance to the city beyond Hurdman's Bridge would be adjusted. He declares that the C.N.R. has agreed to build an overhead bridge over the C.P.R. and Grand Trunk tracks to Ottawa East in order that the course of Hurdman's Road may be diverted. Thus the new road will have an open path to the Central Station without encountering any level crossings.

18/03/1910 Renfrew Mercury Chalk River Smiths Falls

It has been rumoured for some time that the C.P.R. despatchers were to be removed from Smiths Falls and sent to either Ottawa or Montreal, but it is now definitely settled that they are to remain in Smiths Falls. The line between Smiths Falls and Chalk River and the line from Ottawa to Brockville has been added to their territory, which hitherto has only been the line between Smiths Falls and Montr. The new order will go into effect on Monday. The change will add to the importance of Smiths Falls as a divisional point and finally settles the question of keeping it a despatching point. Since the Carleton Place men were moved over to Smiths Falls the division from Chalk River was extended to this point but the despatching has been done at Ottawa. Now it will be done here and the line from Ottawa to Brockville will also be handled here. Rideau Record.

28/03/1910 Ottawa Journal Alexandria Union station

The Grand Trunk Company is making rapid progress in the construction of the concrete wall on the left bank of the Rideau Canal. There are now over eighty men employed in the work and it is stated that more will be engaged if available. When complete the wall will be twelve hundred feet long being the entire distance between the bridges. Though the work was begun only on the 12th of February, already three hundred feet are finished; and if the weather continued favorable and sufficient labor can be engaged, Mr. Robinson hopes to complete the work before the first of May when the canal, it is expected, will be opened for navigation.

29/03/1910 Ottawa Journal L'Original

The Canadian Northern Railway suburban service will likely go into operation on or before the first of May. A daily train will run between the city and Hawkesbury, taking in Besserer's Grove and other stations on the route. Arrangements are being made today in Montreal for the service and a schedule is soon to be drawn up.

04/04/1910 Ottawa Journal Montreal and Ottawa Nepean Point

Report of the hearing on the complaint that the Maniwaki line commuters wanted trains to be run into Central Station over the Interprovincial Bridge. Suggested that C.P.R. could use the Hull Electric station.

--
"I agree with Mr. Murphy" stated Judge Mabee, who presided, "One day a car of passengers will be dumped off the bridge."
--

It was suggested by city solicitor McVeity that the C.P.R. be compelled to build a small station near Nepean Point --

12/04/1910 Ottawa Journal Prescott Ottawa West roundhouse

In one of the most spectacular fires seen in the vicinity of Ottawa for some time, a section of the C.P.R. roundhouse was destroyed at about half past three o'clock this morning and four big mogul engines were damaged beyond repair.

The first alarm was sounded from box 141 at the end of Wellington street at 3:40 and when deputy chief Stanford arrived he immediately sent in a second alarm on account of the great headway that the flames had made which made it appear as if the destruction of a nearby row of wooden houses was inevitable. Much difficulty

The firemen had great difficulty in getting their apparatus near the burning building on account of the fact that since the completion of the new viaduct there has been no provision whatever made for the entrance of a waggon of any description into the immediate vicinity of the shops.

--
On account of the strong wind that was blowing, and the tangle of scrap iron etc. which the roundhouse contained, the firemen experienced great difficulty in combatting the flames at first, but when the engine "Canada" was coupled to two lines of the hose the blaze was brought under control inside of thirty-five minutes.

Many spectators

The incessant whistling around emitted from the engines which were in the burning portion and the lurid flames, attracted many spectators to the spot, in spite of the early hour, and as the usual custom in such cases, a squad of policemen were sent up from the station.

Engines Nos. 42, 206, 274 and 1297 were completely wrecked and their loss will inconvenience the railroad as they were all in active service. More.

21/04/1910 Ottawa Journal Montreal and Ottawa

The Board of Railway Commissioners this afternoon passed an order that all Gatineau passenger trains shall arrive and depart from Sappers Bridge during the months of May to October. The order goes into effect on the first of next month.

21/04/1910 Ottawa Journal Hull Electric Aylmer, Queens Park

Hull Electric Railway Advertisement. Commencing Saturday April 23rd and until further notice cars will run regularly to Queen's Park.

21/04/1910 Chesterville Record Prescott Ottawa West

The CPR roundhouse and three or four engines at Ottawa were damaged by fire.

25/04/1910 Ottawa Journal L'Original

Canadian Northern is after varsity oval.

Railway is anxious to secure it for station site.

Present site is unsuitable and the C.N.R. desires to be independent of other lines in this respect. More.

29/04/1910 Renfrew Mercury Eganville Eganville

The C.P.R. has complied with one of the orders of the Railway Commissioners in respect to the demands made by the municipality of Eganville, namely the planking of its track along John street as far as the trestle, and persons driving can now cross the track easily at any point on that street. As yet work has not been started on the erection of the new station which must be completed next month. Eganville Star-Enterprise.

06/05/1910 Ottawa Journal Ottawa Terminal

C.P.R.'s big under Ottawa plans.

Want to build a tunnel under Wellington street. Close Rideau Canal from Deep Cut to locks. Includes map. More.

12/05/1910 The Equity, Shawville Waltham Shawville

The C.P.R. are contemplating several important changes in the plan of the railway yard in this village, with a view to facilitate the handling of traffic. The chief changes will consist of the construction of another siding on the south side of the main line, which will extend some distance west of the crossing at Centre street; also the removal or rebuilding of the station on a site about 40 yards east of the present location. The station will be on the main line which will do away with the platform between the tracks at present. The big Crawford storehouse is to be removed to the north side of the yard. A plan of the proposed changes was laid before the members of Council for approval on Thursday last by an official of the company. --

18/05/1910 Ottawa Journal Hull Electric

City Engineer Farley of Hull has received a communication from the Hull Electric Railway Company stating that they will commence operations on the construction of the electric railway extension out the Chelsea road immediately. The new track will run about a mile through Wrightville and will be much appreciated by those residents of that vicinity.

21/05/1910 Ottawa Journal New York Central Cornwall

Wm. McGregor meets Death. Well Known O&NY Conductor.

William McGregor, 406 Nelson street, conductor on the O.N.Y. Railway was killed suddenly in Cornwall at 12:30 o'clock yesterday, while switching cars. The exact cause of the accident is unknown. He was seen going between two cars to couple them. When the cars moved off he was seen lying a short distance from the track, dead.

More - inquest, death instantaneous, cause unknown, internal injuries. Picture.

25/05/1910 Ottawa Journal Alexandria

Mr. C.M. Hays, president of the Grand Trunk, today gave emphatic denial to the report that the company would double track the road between Montreal and Ottawa. He said that this move had not been discussed and furthermore that traffic did not warrant it.

26/05/1910 Chesterville Record New York Central Cornwall

William McGregor of Ottawa, a conductor on the Ontario (sic) and New York Railway, was killed instantly at Cornwall on Friday. He was uncoupling a car when he lost his footing and fell between the axle boxes and the ties. His leg was broken and thigh crushed, and his head and arms lacerated. Death was instantaneous. Dr. Hamilton the local coroner, decided that an inquest was unnecessary. McGregor was a native of Vermont but had resided in Ottawa for several years. He was about 48 years old and leaves a wife and four children in Ottawa.

02/06/1910 Chesterville Record Morrisburg and Ottawa Electric

The Ottawa Citizen says: Winchester Springs, including buildings and 40 acres of land have been purchased by Mr. James E. Wilson. These springs were first made famous by Dr. Anderson, who bought them and erected buildings. For some years, it was a favorite resort, as many as 200 people congregating there at one time. But it was twelve miles from the nearest railway at Morrisburg and when other springs were discovered with railway facilities very close Winchester Springs became a back number. However, the Morrisburg and Ottawa Electric Railway is to pass through and this is expected to revive the old time popularity of the place which is 32 miles from Ottawa. The sale was negotiated by Mr. J. McFarlane.

03/06/1910 Renfrew Mercury Tramway Alfred

Description of a visit to the Alfred Peat plant.--

A carrier conveys the peat as it is dug from a trench to a hopper. A 600 foot circular track in the middle of the bog furnishes a right of way for 8 peat carriers, each of which holds 7 tons of peat. As each car passes by the pulper, the ground peat is dropped from the hopper of the latter into it. A 34 horse power engine, which burns about 4 tons of peat fuel per day, and thus costs practically nothing to operate, furnished motive power for both hopper and cable cars. The next process is to convey the peat in the carriers to what is known as a field press. This spreads it along the ground in long parallel rows and it is then shaped into bricks by means of a three-knived instrument turned over by boys and left to dry in the sun and air for three or four weeks when it is stored in the peat shed ready for transportation.

The peat pulper is moved along every three or four hours. The press three times a day and the tracks along which the cable pulls the peat carriers are moved about twice a month when the exhaustion of one part of the bog renders it necessary.--

08/06/1910 Ottawa Journal Ottawa Terminal

Mr. McNicoll explains tunnel scheme. CPR - article.

10/06/1910 Renfrew Mercury Chalk River Snake River

The Canadian Pacific Railway, in pursuance of their policy of improving the main line, are preparing to replace the bridge over the Snake River this summer. The raising of the road bed has left the existing bridge below the level and it has been decided to put in a new steel structure. During the past week carpenters have been at work building supports to carry a temporary bridge while the new one is being built. A spur will be put down by the river at once and a pile driver put to work to make a foundation for the concrete abutments for the bridge. There is an all summer piece of work at this one point and when the Snake river has been rebridged the old structure over the Muskrat river at Graham's station will also be replaced by a new steel bridge. Cobden Sun.

10/06/1910 Eganville Leader Eganville Eganville

A Central Station Wanted

While Messrs. Reinke and Boland have begun their preliminary work on their contract to build the new C.P.R. station here, the Council is making a final effort to have the site changed to a more central location. There is no denying the fact that the citizens as a whole are not enamored of the idea of the new station being erected on a bush lot to the west of the village, and, with the removal of the humble ticket office to the new building, the last condition of the community, for travelling convenience, will be worse than the first. Reeve Lawson left for Montreal on Saturday for the purpose of consulting the C.P.R. officials and to propose to them the building of the new train station on a site near their trestle on John Street.

10/06/1910 Ottawa Journal Maniwaki Central Depot

Union Depot likely to be used.

It is extremely unlikely that any Gatineau trains will run into the Central depot this summer. The appeal of the C.P.R. from the order of the Railway Board has yet to be heard by the Supreme Court, and no decision has yet been reached by the Privy Council on the appeal referred to it. The Supreme Court hearing will probably be heard next week, but if it is against the C.P.R. there is some talk that it may be taken before the Privy Council.

This will disappoint many Ottawans who had figured on going up the Gatineau this year. The fact that the Central Depot is not to be used is likely to result in a number of people summering elsewhere on account of the inconvenience of the present depot.

16/06/1910 Ottawa Journal Ottawa Terminal

Mr. McNicoll explains the CPR plan to use the Rideau Canal. Article.

Eganville's station troubles.

The C.P.R. has awarded to Reinke & Boland the contract for the erection of a new station at Eganville, to be completed by August 1st. The station is to be some distance out of the village: and according to the Star-Enterprise Reeve Lawson has visited Superintendent Murphy to urge that it be built in a central position: as the council would rather help pay for such a site rather than expend money in building out to where the new station will be. Mr. Murphy's argument that the line is not a paying one was met by Mr. Lawson with the reply that the service given is not such a one as to make it so, the line being in poor condition and the schedule one which offers little or no competition with the G.T.R. so far at least as passenger traffic is concerned. While Mr. Murphy seemed desirous to do the right thing by the town, he expressed a fear that the cost of the filling which would be required for the site mentioned, would be too great and held out little encouragement for any change in the plans adopted. However, an engineer is to visit Eganville again today (Thursday) and everything will probably depend upon his report.

22/06/1910 *Ottawa Journal**Maniwaki**Central Depot*

Union Depot this summer.

The Gatineau trains will continue to run into Union station this summer, at any rate pending the hearing of the C.P.R. appeal case before the Supreme Court. This is the net result of the answer given by Judge Mabee of the Board of Railway Commissioners to Mr. Taylor McVeity, City Solicitor, who asked if the order of the Board could be stayed on an appeal case. Judge Mabee said it did not, but in this case the Supreme Court had made no decision. An early hearing will be given regarding the question of the statement of the case to be laid before the Supreme Court.

24/06/1910 *Renfrew Mercury**Ottawa, Rideau Valley and Brockville Ottawa*

At a meeting of the directors held here today, it was decided to go ahead at once with the construction of the Ottawa, Rideau Valley and Brockville Railway. The line will run from Brockville to Ottawa by way of Algonquin, North Augusta, Merrickville, Burrits Rapids and Manotick. The line will probably be controlled by the Grand Trunk or some other of the big lines. The survey work will start at once, and it is the intention to make a beginning on the construction of the line this fall. It is hoped to have trains running next summer. The company also has the right to operate boats on the St. Lawrence, and an effort will probably be made to divert much tourist traffic to Ottawa.

25/06/1910 *Ottawa Journal**Alexandria**Union Station*

At the present rate of progress the concrete work on Chateau Laurier will be completed about the third week in August, thus closing in the building. The rough work on the flooring is done and the finishing touches, the tessellated paving etc. will be begun as soon as the walls are completed. Similar progress is being made on the new station. The finishing work on the walls and ceilings will be begun presently and will be rushed through very rapidly. Very satisfactory work is being done on the lower tunnel, which will be 7 x 8 feet and 238 feet long. The lower tunnel will be used for the transmission of electric and steam power to the Chateau from the power house at the south of the station. This tunnel will be 28 feet below the surface of Rideau street. At present there are 30 men working in the tunnel, drilling and blasting in the bedrock. The management hope to finish the rough work on both the power tunnel and the passenger tunnel before October. The finishing work will be carried on and probably completed before Christmas. The passenger tunnel will be the other tunnel. It will be about the same length and will be 8 x 11. It will be ornately finished.

28/06/1910 *Ottawa Journal**Maniwaki**Union Station*

Judge Cassels of the Exchequer Court today dismissed the application for an order to compel the C.P.R. to obey the order of the Board of Railway Commissioners to run the Gatineau trains into the Central instead of the Union stations.

Judge Cassels said he could not interfere in a case which was pending before the Supreme Court. If a certificate was produced showing that the Supreme Court had dismissed the case, he would be in a position to deal with it.

28/06/1910 *Rideau Record**Westport*

page 5 - Bought the B. & W.R.R.

The Canadian Northern now owns the Brockville and Westport

It is announced from Brockville that the Canadian Northern Railway Company has secured possession of the Brockville and Westport the little forty-mile road that connects these two towns. The proposed route of the Mackenzie & Mann system between Toronto and Ottawa, according to the survey will tap the B.W.&N.W. Railway at Newboro five miles this side of Westport. and by securing control of the piece of railway property the C. N. R. will have access to Brockville and the St. Lawrence.

05/07/1910 *Ottawa Journal**Chalk River**Braeside*

Million dollar fire in Gillies Lumber Yard. Sparks from shunting engine started fire. More.

Five miles of private railway through the yard. C.P.R. engine was in the yard.

05/07/1910 *Ottawa Journal**Ottawa Terminal*

Plan to divert canal practicable. Article.

06/07/1910 *Ottawa Journal**Maniwaki**Central Depot*

The Railway Commission is now in a position to decide whether the C.P.R. has the right to appeal to the Supreme Court on the decision of the Board that the C.P.R. run their trains from the Gatineau Valley into Central station.

The argument of Mr. Chrysler for the C.P.R. was followed by City Solicitor McVeity, who argued that there was no ground for appeal; that it was a question of facts and not jurisdiction.

It had been proved, he held, that the C.P.R. were not affording the necessary facilities at the Union station and that it was an unsuitable place for the Gatineau trains to enter.

Mr. O'Meara, for the Gatineau Railway, pointed out that only a question of jurisdiction could be taken to the Supreme Court, not facts, and if this question were taken to the courts it would be thrown out because the matter had been settled in a previous case. The hearing is proceeding.

07/07/1910 *The Equity, Shawville**Waltham**Shawville*

Evidences up at the railway yard show that the company now propose to move the station and freight shed to a site within a few yards of the crossing at Centre street, which is not according to the plan of the proposed changes submitted to the council when the privilege was sought to construct another siding across the said street. With station so close to roadway it seems probable that the public will suffer inconvenience from a frequent blockade of cars, and the 5 minute limit may be repeated more frequently during the day than most people who have much driving to do will care to see.

07/07/1910 *Chesterville Record**Chalk River**Arnprior*

\$1,000,000 fire at Arnprior.

Arnprior July 4. Fire broke out at 7 o'clock tonight in the yards of the Gillies Lumber Co. destroying 60,000,000 feet of lumber valued at \$1,000,000. Help was summoned from Ottawa, Renfrew, Almonte and Carleton Place, the brigade of the latter town being the first to arrive doing yeoman work with the local fire fighters in quenching the flames. The lumber yards are three miles from the town close to the CPR. Nothing is known as to the origin of the outbreak. Mr. Durenyle, a book-keeper, was badly burned.

CPR proposal would be better if city owned the tracks - Mayor. Article.

09/07/1910 Ottawa Journal Ottawa Terminal

Independent proposal to build a station in the bay of the Ottawa river at the foot of Bank street. Access fro C.P.R. would be easy, but a Y bridge would be needed to connect to the Central Depot and Interprovincial bridge. Article.

12/07/1910 Ottawa Journal Ottawa Terminal

Discussion on Union station issue. Article.

12/07/1910 Ottawa Journal Prescott Wellington St. Viaduct

C.P.R. puts on its plate.

Advertising pays, at least the C.P.R. is clearly of this opinion.

On the Wellington Street viaduct, the recent overhead bridge constructed across Wellington street car tracks there is a plate which bears the following inscription:

BUILT

BY

C.P.R.

1909

That plate, made of polished brass, is firmly implanted in the masonry at both ends of the approaches. It would seem as if the C.P.R. had overstepped itself in claiming the credit for erecting this bridge.

To make a long story short, the viaduct, after considerable negotiations, was erected at the joint expense of the Corporation of Ottawa, C.P.R., G.T.R., and the County of Carleton.

City Engineer Kerr was surprised when he heard that the C.P.R. had placed the plates in position, and stated that they had no right to put the brass inscriptions in place.

"It certainly did not come within their rights to do so," he stated to the Journal, "but as the plates are upon the concrete work which was erected by the C.P.R. it is doubtful if we have any say in the matter.

Mayor Hopewell also though the brass plates a peculiar piece of business, but could not say what steps the city would take.

According to the interview which Mr. H.B. Spencer, local superintendent granted to the Journal, the plates, presumably, were put in place by the Engineer's Department of Montreal, the construction of the bridge coming under that department of the road.

"I don't know who really put the plates in position," stated Mr. Spencer, "but I didn't give any instructions as to the inscriptions."

12/07/1910 Ottawa Journal New York Central

About 4 p.m. yesterday, a freight on the O. and N.Y. jumped the track, about 11 miles south of Cornwall, tearing up rails and ties for 500 or 600 feet and blocking traffic.

The engine and tender along with seven cars, loaded with wood and coal were derailed. The crew jumped and escaped with a shaking up. Gangs of men were rushed to the spot and built a siding round the wreck, having the line ready for business this morning.

14/07/1910 Athens Reporter Westport

The B&W Rwy was purchased by Canadian Northern Rwy.

15/07/1910 Brockville Recorder Westport

An Important Railway Meeting Was Held Here Directors of the Brockville, Westport and Northwestern resigned - Canadian Northern Railway Representatives Take Their Place

At the meeting held yesterday of the directors of the Brockville, Westport and Northwestern Railway at the office of Bueli and Botsford, Messrs. E. R. Thomas, J. T. Lewis A. P. Van Tuyl, all of New York, resigned from the board, and in their place were elected: D. B. Hanna, third Vice President and General Manager of the C.N.R.; F. H. Phippen, K.C. Ruel, J.D. Martin and R. C. Vaughan.

These gentlemen together with Messrs. W.H. Comstock, Jas Cumming, R. Bowie, W.C. Fredenburg and W.S. Buell now constitute the directorate.

Among the other business transacted was the passing of a resolution expressing the regret of the Canadian members of the directorate at the severance of the association with the New York gentlemen now retiring. The resolution said, "We have always found them not only men of integrity, but genial companions, and has always been a source of pleasure."

Several of the New York gentlemen expressed their intention of continuing their visits to Brockville despite the fact that they have disposed of their interests in the railway.

Proposed diversion of the canal by way of Dows Lake and the Chaudiere - scheme of N. Cauchon. Includes map which is printed upside down. Article.

19/07/1910 Ottawa Journal Sussex Street

C.P.R. buys land to extend freight yards. Sussex Dalhousie area - article.

19/07/1910 Ottawa Journal Hammond Rockland

Rockland. An attempt to wreck the G.T.R. pay car, due here last night, was made between 6 and 7 o'clock last night. It happened about three miles from the village. At a concession crossing some miscreant tore up the crossing in broad daylight and laid planks across the rails.

When about 3 miles out as stated, the engineer of the pay car engine noticed an obstruction on the track and rapidly threw on the brakes. The pay car was going slow at the time and nothing serious happened. The engineer noticed the obstruction in time to prevent the car leaving the wheels.

Strange to say the pulling up of the crossing and the laying of the planks across the rails occurred immediately after the passenger train for Ottawa arrived at 6 o'clock. The pay car arrived an hour later. The people here feel that it is unfortunate that this attempt at wrecking should occur on the eve of the strike. Citizens generally indignantly repudiate the thought that railway employees had anything to do with it, but they think that some miscreant took advantage of the occasion to do his work and throw suspicion on the railway men.

20/07/1910 Brockville Recorder Kingston (CN)

GTR Men On Strike At 9.30 on Monday night all the conductors, trainmen and baggage men on the GTR, went on strike for higher wages. Trains were all delivered at the terminals, and then the men departed.

21/07/1910 Chesterville Record New York Central Crysler

Mr. Sandy McMillan, an operator at the depot of the O&NY at Crysler was drowned on Saturday evening last. It seems that he ran down from the station to the river and immediately went into the water and must have taken cramps. Sandy was 18 years of age and made his home with Alex Hector McLean. Last year he attended school at Morewood where he is well known.

21/07/1910 The Equity, Shawville Pontiac and Renfrew Bristol

The Bristol iron mines, which were abandoned about 20 years ago, because they could not be made a paying proposition by reason of the methods that were employed in mining the ore, and the long haul from the mine to Pennsylvania, may once more, in the not very distant future, become a hive of industry, and a boon to the lower end of the county. It has been established pretty fully on expert investigation made recently that a very large body of ore exists there. The erection of an electric smelter to be operated by power generated at the Chats falls, as is contemplated, will, it is said, furnish the new life which is needed to develop and place the industry on a successful basis.

21/07/1910 Chesterville Record Hammond

An attempt was made to wreck the pay car of the Grand Trunk Railway yesterday afternoon near mileage 13 on the Rockland Branch of the road. While proceeding along at a slow rate of speed the engine ran into a plank placed across the road. The engineer quickly reversed his engine, his alertness avoiding a serious accident. A little further on the trainmen sent out to look for further obstructions came across two other planks, also placed where the train, if going at any speed would have been ditched had it struck them...

23/07/1910 Brockville Recorder Kingston (CN)

GTR Men On Strike Brockville had a sensational evening on Friday, the first of its kind in that peaceful town. Since the strike of the GTR it has been the practice of about thirty or more persons to visit the station and watch the trains come in. No one really noticed Friday night that the crowd was larger than usual. The Moccasin, from Montreal came in, and there was no trouble, then the Toronto local arrived, and the non-union men in charge were in Yardmaster Hatton's office, when suddenly a stone crashed through the window. Then all fury broke loose. There was yelling, and cursing, and fighting, a truck was shoved against all the windows breaking them, then a hose was directed inside on the occupants, soaking them. The men were finally forced to come out of the building, as they were told if they didn't come out they would be burned out. As soon as they appeared they were set upon by the crowd. Engineer Szammer was hit in the head, and the blood began to run down his face. Constable Hourigan was beaten and Constable Dyer tripped and kicked. Everyone was fighting everyone else, friend and foe alike. The fire department was called and they added to the confusion. Word was sent to Prescott and Kingston to hold all trains, and about 2:30 am someone thought to call out the militia. They were on duty by 4:30 and in short time had the station building in their possession, and had cleared the yards. Mr. Wilcox, Mr. Manseau and Mr. Course were so badly beaten up they had to be taken to hospital. Three men were arrested for causing a riot.

27/07/1910 Ottawa Journal Maniwaki Burbidge

An Insane Man Tries to Wreck C.P.R. Train

Passengers from Maniwaki had a very narrow escape.

The passengers on the 7 o'clock train from Maniwaki to Ottawa yesterday morning had a narrow escape from death, and only the chance passing of John Barker, a sectionman on the C.P.R. saved the train from being hurled with its passengers into a treacherous ravine.

In Hull Court this morning before Recorder Desjardins, Louis Richard, a man without a home, said to be out of his mind, was charged with maliciously placing obstructions on the C.P.R. Gatineau line. The obstructions included two large planks, stakes, spikes and a ladder, making a most dangerous barricade.

James Barker was the principal witness against the accused. He swore that he saw Richard tampering with the switch about two and a half miles on this side of Burbidge station. At this point there is a big rock and a very sharp curve.

Barker was proceeding down the line on a hand car, and found the switch open, planks on the line and a log 12 feet long and six inches thick. There was also a 20 foot ladder which had been used by sectionmen for railway purposes.

Spikes had been placed in between the rails on end, in such a way as to wreck any train that passed over them. Nearby Barker says he met Richard whom he knew was not in the employ of the company. He asked him why he had placed obstructions on the line, to which he replied, "I don't want the ballast train to go up there, it has no business there. I want it to run along that way," meaning along the direction to which he had turned the switch.

Barker, as soon as he could, got the spikes out, and moved the ladder and planks, as the train for Ottawa was then due to arrive at that point. After seeing that everything was right, he took the man on his hand car up to Burbidge station, and telegraphed Superintendent Spencer of the C.P.R. asking what he should do with him. He was ordered to take him to Maniwaki and hand him over to Bailiff Nault.

Detective Lowe of the C.P.R. was sent up from Ottawa and accompanied the prisoner down to Hull where he arrived this morning.

Bailiff Nault told the Journal that he remembered meeting the accused in the beginning of June sitting on the side of the road eating a piece of bread. He spoke to him and his replies convinced him that Richard was insane. Richard told him that he belonged to St. Thomas and that he broke the record on the I.C.R. when he was an engineer on that road. He informed the bailiff that he had a brother in St. Raphael, Que., whose name was George Richard.

Richard has been employed in the lumber camps in the district all winter. Richard appeared in court in his shirt sleeves and did not seem to realize the seriousness of his crime. After he had listened to the evidence he was asked if he had anything to say, and he replied in French that he had nothing, and plead guilty.

He was committed to the assizes. He will be examined for insanity.

28/07/1910 Chesterville Record Carleton Place Carleton Place

Was locked in a car.

Ovid Joinette of Ottawa has issued a writ of damages against the CPR and Stephen J. McGonigle, a conductor on the road, for damages through the loss of plaintiff's foot under peculiar circumstances. Last 24th of May Joinette claims while on his way from Ottawa to Carleton Place he was assaulted by the conductor and locked in a car. When he neared Carleton Place he was so afraid that he was to be assaulted again that he jumped off the train and had his foot so injured that it had to be amputated. The conductor claims that the plaintiff refused to pay his fare and was therefore placed in custody.

29/07/1910 Renfrew Mercury Eganville Eganville

The efforts of the cillage council to have the C.P.R. Co. to build its new station on a more central site have evidently failed, for Messrs. Reinke & Boland, local contractors, have commenced the erection of the new building near the site of the old freight station. Two propositions were before the Company and the Council for a central site. One was to procure land from Mrs. Bonfield on the north side of the trestle on John street. Surveyors examined this site and their report to their superiors was that the cost of grading and preparing the ground would be \$22,500. The Company had no thoughts of expending this sum. Another site was available on the south side of John street; the grading at this was estimated at \$3,100, but this proposed expenditure did not meet with the approval of the governing heads. On Tuesday evening two employees of the Company visited Eganville to consult with Messrs. Reinke & Boland and arrange for the immediate construction of the new station. Eganville Leader.

Local officials not yet notified that strike is at an end. Men have reported for duty but are told they will be called when wanted. Employees held meeting but declined to give out statement.

The Grand Trunk trains arriving and leaving Ottawa are still being managed by strike breakers and officials of the company, despite the fact that a settlement of the strike was announced Tuesday evening. (2 August)

No information has yet been received at the local superintendent's office regarding the settlement of the strike, or of the manner in which men are to be taken back to work. Not a man has been taken back on the Ottawa division, although all have reported that they are ready for work. At the trainmaster's office, the men have left their names being told they would be called when wanted.

Supt. Donaldson is in Toronto attending a conference of the superintendents and officials of the road, and will return to the city tomorrow, when some announcement is expected.

It was reported at the Grand Trunk office that no freight was being moved on the Ottawa division, and one of the officials stated that matters seemed to be worse than when the strike was on. An air of uncertainty prevails and the staff are hourly expecting orders. The passenger service is being operated as usual, the crews being those who have been in charge since the strike was declared.---

Local strikers back on G.T.R to first open branch lines

Instructions received by local authorities for engagement of as many men as are needed. No Ottawa men used violence and all eligible for positions again.

Montreal men will start on suburban service today. Vice-president Murdock says all will go back.

Acting on instructions from General Superintendent of Transportation Brownlee, of Toronto, the local officials of the Grand Trunk, last night placed twenty of the local strikers back at work, sending them out to open up the branch lines on the Ottawa division. Instructions are to take on others as soon as places are found for them.

This was the first official word received by the local officials that the strike was officially off, and that the men were to be taken back. Mr. Brownlee's communication only ordered that the men resume work as soon as possible, and that as many men be taken back as were needed.

As Supt. Donaldson was absent from the city last night, none of the old conductors or trainmen were sent out on the run to Montreal, but it is expected that during the course of today or tomorrow a rearrangement of the runs will be completed, and that the majority will be taken on then.

It was learned that there are no complaints against any of the men on the Ottawa division as regards the use of violence, so that all who went on strike will be eligible for positions again. No instructions have been received locally as to the disposition made of the pension question.

All the late strikers have reported they are ready for work, and there was a large number of them at the Central depot last night to see those of their members who were taken on to man the trains again. All expressed pleasure that there was at last "something doing" in the way of resuming work, after a wait of two days after the strike was first officially declared off.

Renfrew

Mr. J. R. Booth did the unusual thing by his men who were thrown out of work by the GTR strike. He gave them full pay, just as if they had been working for him, at a cost to himself of \$12,000. The men gathered and gave him a mighty shout of thanks. He told them that he thought he could afford the loss better than they could. 'J. R.' as he is familiarly called, was always noted for giving worthwhile men a helping hand. This time he has widened the bounds of his practical sympathy.

Today two heavily loaded coal cars broke away from a string of cars being pushed into the GTR coal chutes. They crashed through the east end of the building and fell to the ground below, a distance of sixty feet. Several piles were torn away, besides a large portion of the structure entailing a loss of upwards of \$2,000. The main line was blocked with coal and debris. A yard man standing on one of the cars, giving signals to the engineer narrowly escaped being caught in the wreck. He saved his life by jumping.
