

Local Railway Items from Ottawa Papers 1926

Friday 09/02/1926 Ottawa Citizen Maniwaki

Will protest rerouting Gatineau line.

Reports have it that Railway will be sent via Meach lake and district instead of present route

Dam will necessitate moving of railway

Property owners alarmed that change will cause depreciated values.

Owners of property, especially summer residents along the Gatineau River between Chelsea and Farm Point, are alarmed at reports received that the railway and highway up the river may be rerouted via Meach Lake and district, and there is talk, if this turns out to be the case of obtaining a restraining injunction.

Some thousands of summer cottagers and owners of property in that district who have built comfortable homes there are certain that such a move will depreciate the values of their properties. The road and railway would be some miles from their homes.

Officials of the International Paper Company which is building the huge dam at Chelsea which will result in the formation of a large lake and necessitate the moving of the railway and road, are non-committal when questioned on the subject and state that only preliminary surveys have been made.

Some hundred yards.

It is learnt from an authoritative source, however, that the new railway line which will be paralleled by the new highway, will only be some few hundred yards from the old line.

The diversion of the railway and highway will take place somewhere near Chelsea and will rejoin the old route somewhere above Cascades. The old line will be fifteen feet under water at Kirk's Ferry and about 21 feet under at cascades.

A large corps of surveyors and engineers, under direction of major Walter Blue, Montreal, and Mr. J. A. Strumberg, Ottawa, are presently working the district ascertaining the exact route and also the exact shores of the new lake to be formed.

Meanwhile former residents of the flooded area are making arrangements to build summer homes along the shores of the new lake.

Start a new colony.

The little colony of cottagers who formerly lived on Chelsea Island, have already started a new colony at Tenaga on the top of a high hill, which will form a shore of the lake. Here cottages, tennis courts and bowling greens have already been built and will be ready for use this spring.

Mr. Hector Carruthers, secretary of the Ottawa Board of Trade, who had a cottage near Cascades, is in a peculiar situation.

A little lake formed in a wide reach of the Gatineau is at present about a mile and an half from his cottage.

When the water is raised by the completion of the dam the lake will be right at his doorstep, and Mr. Carruthers will be able to "park" his motor boat, about 22 feet from his cottage.

"For years", he told The Citizen, "my wife has been wishing that the lake was a mile and a half nearer. It is a straight case of the mountain coming to Mohammed."

Sixteen are injured in head-on collision

One man thought seriously hurt - others receive but bruises

Perth Ont. Feb 26 Sixteen people were slightly injured, one seriously, when a C.P.R train crashed head-on into a waiting freight train at Glen Bay (sic) three miles from here this afternoon. Albert Labelle of Montreal, who is not expected to recover, is in hospital there.

An open switch threw the passenger train into a siding where the freight was standing at the station at Glen Bay (sic). The engine crew, Walter Norris and A. Bourne, Toronto leaped to safety when they saw the crash coming and escaped with bruises. Norris is the most seriously injured of the two and is in hospital here.

One of the Toronto people who were slightly bruised was Mrs. J.W. Hobday of the Bernardo Homes, 538 Jarvis street, Toronto. The passengers included the Ottawa professional hockey team and a number of the players received bruises. They are Frank Ahearn, manager; G. Boucher, E. Campbell, P.

Green, Alex Smith and Alex Connell. Others who received minor injuries were: W.O. Sobel, Philadelphia; W.O.L. Hazel, Montreal; Mrs B.G. Cullen, Florence, Italy; Mrs. T.G. Potter, Montreal; Sister St. Stephen, Montreal; S.S. Etienne, Montreal; Miss H. Page, Ottawa and Miss A. Dodds, Hamilton.

The train was the fast Canadian Pacific passenger No. 20 ("The Canadian") bound from Chicago to Montreal. It is due in Montreal about seven o'clock to-night.

Wednesday 24/03/1926 Ottawa Journal Hull Electric

Open warfare exists between the Hull Electric Company and the Green Bus Line. Immediately following upon the Hull Electric Company's announcement of a reduction of 10 cents in the fare from Aylmer to Ottawa, the Green Bus Line, its greatest competitor, announced a reduction in its rates.

Commencing Thursday a single fare from Ottawa to Aylmer will be 15 cents; seven tickets for \$1, and 42 tickets for \$5, with a 10 cent fare from Ottawa to the Royal Ottawa Country Club, Chaudiere and Highlea Clubs.

The last of the old wood burners on the C.N.R. system, which went to the scrap heap under her own power recently. John R. McIntyre, who retired after 56 years' continuous service with the company was the first and last engineer to handle this pioneer of the steel.

This is accompanied by a picture of 2194.

Wednesday 07/04/1926 Ottawa Journal Carleton Place Britannia

As a result of the recent accident on the level crossing at Britannia village where a little girl was run down by a C.P.R. express and instantly killed.

Residents of the Britannia line have expressed strong objection to the rate of trains on the line and the existence of level crossings.

This objection was voiced last night at the meeting of the Westboro Ratepayers Association when the organization decided to bring the matter to the attention of the Board of Railway Commissioners and to ask that some action be taken.

It was the feeling of the meeting that level crossings on the tracks constitute a menace to public safety. Regarding the speed of trains, it was stated that locomotives should be held to a speed of 15 and not more than 20 miles per hour, while crossing through the populous section just west of Ottawa.

This was repeated verbatim in the April 8 edition.

Thursday 08/04/1926 Ottawa Citizen Hull Electric

International Paper purchases electric railway and power

Important transaction completed in Montreal yesterday by which Canadian Pacific Railway disposes of its rights in Hull and Gatineau with the exception of the Gatineau Valley Railway, for \$4,750,000. Papers being drawn up in Montreal today to complete deal.

Yesterday afternoon at Montreal, in the offices of the Canadian Pacific Railway Company was concluded one of the biggest and most important transactions in its application to Ottawa, Hull and district, in recent years, whereby the International Pulp and Paper Company of New York becomes the owner of the Hull Electric Railway Company, the Hull Electric Company, and a water power development at Paugan Falls in Low township up the Gatineau for \$4,750,000.

Negotiations for the purchase of the Hull Electric Company, and its ramifications, which is a subsidiary company of the C.P.R., had been in progress in Montreal for the past ten days. The C.P.R., in its offer of sale, asked for \$5,000,000, while the International Paper Company was only prepared to give \$4,250,000, but a compromise was reached yesterday afternoon at \$4,750,000, at which the deal went through, and the necessary papers are being drawn up today. An official announcement is expected to be forthcoming in Montreal this afternoon.

More.

The International Pulp and Paper Company, by the purchase of the Hull Electric Company, which is a subsidiary company of the C.P.R., will come into control not only of the power plant at Deschenes, and the rolling stock of the street railway, but will also acquire valuable power development owned by the C.P.R. at Paugan Falls, acquired in 1919, where over 65,000 horsepower can be developed by plans which the holding company had prepared two years ago, but which were not proceeded with.

Thursday 08/04/1926 Ottawa Journal Hull Electric

I.P.C. buying Hull Electric to clean up huge power plans.

Gigantic project crowned by deal for Hull Electric.

Exclusive announcement in the Journal this morning of the sale by the C.P.R. of the Hull Electric Railway, together with its power holdings on the Gatineau River, has served to renew interest in the vast enterprise planned for this district by the purchaser, the Canadian International Paper Company.

Friday 09/04/1926 Ottawa Journal Hull Electric

Sale of Electric line to OER would speed traffic conditions between two cities.

Would give continuous service to Golf and other Clubs.

Speculating on future of H.E.R.

Two matters of importance are now engrossing the attention of Canadian International Paper Co. officials. The first is the formal taking over of the Hull Electric Railway Co. and the Hull Electric Co. with the power rights of the latter at Paugan Falls; the second it so find a purchaser for the street and suburban railway end of the business. More.

Monday 19/04/1926 Ottawa Citizen Lachute

The erection of a modern school, to cost in the neighbourhood of \$25,000; a new Canadian Pacific Railway station, and the construction of a mission church are some of the improvements which it is expected will shortly follow in the wake of the construction of the International Paper Company's big pulp and paper mill in West Templeton.

--

The new C.P.R. station has already been located about a mile and a half from the old station called Talon, and it will be called the Gatineau station.

A small office is at present doing duty for a station and the Fraser brace Company has built a Y from its site, which joins the main line and is of standard gauge build, to its construction works. This will permit of the company shipping in its raw material from any point and routing its finished products to either Ottawa or Montreal.

Monday 17/05/1926 Ottawa Citizen Montreal and Ottawa Prince of Wales Bridge

New railway bridge above the Chaudiere

A new steel bridge above the Chaudiere Falls is contemplated by the Canadian Pacific Railway to replace the present structure known as the Prince of Wales' bridge, connecting Ottawa West and Wet Hull. It is expected the new bridge will be erected this summer. The present structure was built in 188- and is still perfectly safe, but a new bridge is necessary to carry the heavier power engines in use. This will do away with the necessity of changing engines and bringing the trains over the bridge with lighter engines.

Urges New Station for Through Traffic

Noulan Cauchon Favours Tunnel Under Ottawa River.

Report of a speech by Noulan Cauchon.

Tuesday 01/06/1926 Ottawa Journal Maniwaki

Numerous double trackings near the Gatineau River banks and a large station yard at Cascades, Que., are the big new works for the Ottawa, Northern and Western Railway, and its lessee, the Canadian Pacific Railway, on the Maniwaki subdivision, Quebec division, in Hull Township, according to plans of the line files at the Registry office in Hull today.

The plans have been approved by the Board of Railway Commissioners and constitute the first definite outline of the re-routing of the C.P.R. in the Gatineau Valley as a result of the flooding of big areas, and other works, to be done by the International Paper Company at its Gatineau holdings.

Plans show that the new route starts about a mile north of Chelsea, Que., at mile 8.21. It runs from there to 14.6 mileage, but from mileage 12.65 to mileage 13.26, it follows the old line of the railway. There are stations indicated at mileage 9 (Tenaga) and at 10 (Kirk's Ferry), with double tracks and sidings at various points. There is a long piece of double track between Kirk's Ferry and Tenaga.

It is indicated that at no point will the new railway line run more than 750 feet west of the present route of the line. At some points the old and the new routes almost converge and at others they are wide apart. The greatest difference in position is shown between Tenaga and Lacharite.

According to the plans extensive yards will be situated between the Cascades station and the river, overlapping the present line of the railway there.

Saturday 12/06/1926 Ottawa Journal Renfrew Ottawa Car

Includes a picture.

Railway gasoline coach built in Ottawa impresses on trial trip.

Ottawa Car Company product is something new in railway equipment - has many improvements.

Something new in railway equipment is a big gasoline motor coach built by the Ottawa Car Manufacturing Company Limited and turned over this week to the Canada and Gulf Terminal Railway Company, for whom it was constructed, for use on the line out of Mont Joli, Que.

This coach is luxuriously appointed and a neat compact train in itself. It has a capacity for 50 passengers in its main sections and self locking seats for six passengers in the baggage compartment. In the main section of the car leather upholstered seats of the spring type ensure the maximum of travelling comfort.

The interior of the car contains a wide central aisle, and the whole is trimmed in dark bronze metal. The finish, including all doors sash and moulding, is of mahogany, stained to a dark rich finish. A feature of the big coach is the hot water heating system.

The coach has a six cylinder engine valve in head, double-duty type, bore 6-7 inch, 190 h.p. with four valves per cylinder. The engine at the front of this car is so mounted as to be removable as a unit. The coach is fitted with Westinghouse air brakes. It has one four-wheel truck under each end of the car, like parts of which are interchangeable. The whole coach weighs 59,000 pounds and has a length overall of 55 feet.

The crew consists of an operator and a conductor. There are five gears, of which Nos. 3, 4 and 5 are equally efficient. Any one of these may be used indefinitely if extreme conditions make this necessary. The speed of the car is 58 miles per hour.

On Tuesday there was a trial run to Renfrew and back, and the car was delivered on Wednesday morning to the owners and proceeded immediately to Mont Joli. It is specially designed for trailer operations when required, and is expected to be a great asset to its owners.

Meeting of Hull West council

The council was consulted by a representative of the Canadian International Paper Company, with regard to the moving of the CPR tracks in the neighbourhood of Cascades. The removal of the tracks will straighten out a tortuous curve, as well as materially shorten the line. But as the moving of the tracks will necessitate moving the power transmission line towers as well as the Bell Telephone Line and also affects the highway crossing the council deemed it best to postpone a definite decision until a more complete investigation of the matter has been affected (sic), and until the opinion of the residents of Hull West in the neighborhood of Cascades had been ascertained.

It was thought, however, by many, that the request of the company will be granted as soon as the investigation has been completed.

Supplement on the Centenary of Ottawa.

Long article on the construction of the Canada Central Railway.

The first locomotives:

W.F.H. Bolckow,

John G. Richardson.

H. Abbot

were built at Taunton, Mass., which had already turned out locomotives for the B&O.

In July 1870, B&O and Canada Central suffered heavy loss through the destruction of their plant at Brockville including the roundhouse, and workshops as well as one locomotive, two passenger cars and seven boxcars, all intended for use on the Canada Central, as well as one sleeping car half completed.

In October 1870, taxes having been remitted, they were rebuilt in Brockville and continued in use there until their final removal to Carleton Place.

Tuesday 17/08/1926 Ottawa Journal Brockville water

Supplement on centenary of Ottawa. Article on construction of the Brockville and Ottawa.

On a day early in January, 1959, it was announced that the first passenger train was ready to move over the rails from Brockville to Perth...The party left Brockville in two miniature passenger coaches hauled by a wood-burning locomotive, puny in comparison with its successors, at nine o'clock upon a January morning, so bitterly cold that four hours earlier the thermometer is reputed to have stood at 40 degrees below zero. All went well until Smiths Falls was reached, the trip being made at an easy rate over a road in first class condition except for a few miles south of that town which were yet to be ballasted. Then the trouble began

Snow Blocks Trains

The line between Smiths Falls and Perth had not been run over for a few days and snow which had fallen in the interval had become part and parcel of the rails under the influence of a slight rain which, with the frost, had converted it into ice. When the little train attempted to proceed after having left Smiths Falls at eleven o'clock, the wheels revolved but would not grip. After several attempts had been made, each attended by complete failure, an order was made to back up to the station in order that the excursionists might dine while another locomotive was despatched over the line to give battle to the ice and snow itself. Dinner over, another start was made with little improvement. The cow catcher of the forward engine simply caught the snow from the centre of the track and deposited it upon the rails making progress impossible. For a second time a backing up was carried out and another locomotive was employed to precede the passenger train. At this stage of the proceedings, some of the passengers, despairing of ever reaching Perth, decided to abandon the excursion. The remainder, continued in the coaches and on the third attempt had the satisfaction of making considerable progress before it became necessary to search the ditches alongside the track for water to supply the locomotive. This experiment was repeated, slow but steady advance being made until at a point about a mile and a half from Perth, the second car suddenly came to a dead stop. A coupling had given way. No emergency equipment being carried, away went the locomotive and the other car, leaving a number of thoroughly disgusted passengers behind until it could return with a rope to hitch to the car. At length Perth was reached at 6.45 p.m. It had taken nine and three-quarter hours to make the passage of 40 miles.

After another meal the crowd returned to the station, the hour of departure having been fixed at 8 o'clock. But in the shunting operations one of the cars left the rails and about three hours were spent in replacing it. Finally at 11 o'clock, the welcome cry of "all aboard" was heard and the wearied excursionists reached their homes in Brockville at 3.30 a.m., never, it may be reasonably expected, to forget their first trip over the B. & O.

Wednesday 01/09/1926 Ottawa Journal Renfrew

Coal tender leaves rails, delaying train

When the coal tender jumped the tracks a short distance east of Rock Lake, Algonquin Park, yesterday, shortly before noon, the Canadian National passenger train from Scotia to Ottawa was delayed for one hour 20 minutes. Heady work on the part of the engineer prevented more car from leaving the rails.

The derailment occurred while the train was crossing a high embankment. As soon as the tender left the tracks the engineer brought the train to a stop, but not before the tender had plowed along the road bed for several score feet tearing up sleepers and digging deep into the bed.

All the passenger of the train gathered along the embankment and watched the efforts of the train crew to get the tender back on the rails. This they succeeded in doing by the use of "frogs" under the train power, and without the assistance of any wrecking crew.

03/09/1926 Chronicle Telegraph, Maniwaki Gracefield

Fire of which the origin has not yet been determined completely razed the Canadian Pacific Railway station at this small town in the Gatineau Hills here earlier today. No estimate of the damages is available.

Friday 03/09/1926 Ottawa Journal Waltham Aylmer

Fire which broke out in the sheds to the rear of the CPR station, Aylmer, shortly after noon for a while threatened a large section of Front street. One residence and adjacent sheds were completely demolished and nearby residences suffered damages from sparks and smoke. The damage at 2 o'clock was close to \$13,000, the fire then being under control.

Sparks from a passing engine are thought to have been responsible for the fire which began in the sheds to the rear of the home of Roland Cardinal, Front street.

More.

Monday 06/09/1926 Ottawa Journal Lachute Chaudiere bridge

Extensive alterations being made by the CPR to the Prince of Wales bridge will improve passenger service greatly at that point.

On August 1 the work of removing the old steel and replacing it with heavier steel was begun. It is now well under way, but so extensive is the work that it will not be completed before March 1927.

When the work is completed the bridge will be available to heavy traffic and the transfer engine will be withdrawn.

Despite the alterations, traffic is kept moving across the bridge with little delay.

The Dominion Bridge Company has the contract.

Tuesday 07/09/1926 Ottawa Journal Smiths Falls Chaffey's Locks

Several hundred passengers, most of whom were sleeping, received a shaking up this morning at 5.05 am when Canadian National train No. 8 from Toronto ran into a fall of rock which had slid onto the track at Chaffey's Locks.

The train was making around 30 miles an hour at the time and, due to the darkness, the obstacle on the track could not be seen until the engineer was upon it. The pony trucks of the engine went off the track and the pilot was severely damaged, a new engine having to be sent out from Ottawa to bring the train in.

More

A delay occurred of about an hour and finally the engine was enabled to proceed very slowly as far as Smiths Falls where a new engine, No. 5105 from

Friday 01/10/1926 Ottawa Citizen Lachute Gatineau Point

Reporter learned some railway ethics.

Reminiscence of 1897 C.P.R. wreck near Gatineau Point.

In the year 1897, in the fall, two C.P.R. freight trains collided a couple of miles east of Gatineau Point. The smash occurred just after daylight and as what was going to happen became evident in plenty of time, the engine crews were able to jump and save their lives. The engines were pretty badly telescoped and a number of freight cars smashed.

Like other bad news, news of the collision spread quickly through the city. A reporter on one of the city papers was one of the first from Ottawa to get on the scene.

He at once tackled one of the engineers. To every question he asked as to how and why there came the answer, "I don't know".

They knew nothing.

The reporter then tried the other engineer with the same set of results. He knew nothing. Next the reporter tackled the firemen. They also knew nothing.

Then the reporter went back to the first engineer. "Look here", he said, "I am representing the -- newspaper. When you refuse to talk to me, you refuse information to the --. So you had better cut out the fooling and tell me how the thing happened or I will have to report to the --."

"H.B." was there.

The engineer turned his back on the reporter. Then over his shoulder he shot out, "You blanked blank, don't you see H.B. Spencer over there. Do you want to get me fired."

"Oh", said the reporter, "I'm sorry I hadn't seen him." Then he bustled over to "H.B." and got his story - or at least such facts as the general superintendent wanted to give.

Wednesday 27/10/1926 Ottawa Journal Beachburg Alice

Passengers on the No. 1 C.N.R. train were slightly shocked when three of the coaches were derailed near Alice, Ont., at an early hour this morning. No one was injured and the delay to the passengers lasted only ten minutes, those on the derailed cars being transferred to other coaches. The three cars were rerailed several hours later.

No. 1 leaves Ottawa for the west at 1.35 in the morning. It left as usual today and had reached Alice, 96 miles west of the city, when the accident happened. No cause for the derailment was given.
