

Local Railway Items from Area Papers - 1926

06/01/1926 Ottawa Journal Thurso and Nation Valley Thurso

Work was commenced last year at Thurso, and the first contract was the construction of a lumber railway into the Heart of the Singer limits to bring out the timber. At present there are 35 miles of railway ready to operate, all privately owned lines, handling nothing but wood for Singer company needs. During 1925 a modern saw mill was erected at Thurso, and it is now practically ready for operation. Plans have been approved, and work will be started at once on the main plant, The woodworking mill at Thurso.

The factory will be completed this year, and when it commences operation it will give steady employment to 800 skilled workman.

The Singer company has another important plant in Canada, located at St. Johns, Que., and with the new Thurso plant in operation, its operations in the Dominion will reach important dimensions.

13/01/1926 Kingston Daily British Whi Chalk River Renfrew

Backed Locomotive Out.

A Spark Ignited the C.P.R. Round House at Renfrew.

One side of the C.P.R. round house at Renfrew, was destroyed by a fire on Monday evening, when a quantity of oil, stored near the entrance, was ignited by a spark from an incoming locomotive. The round house is a frame structure, and was only saved by the prompt action of the employees, who, within a few minutes, had several lines of hose playing on the blaze. The extent of the damage has not been ascertained, but it would have been considerably greater if the locomotive, which caused the blaze, had not been promptly backed out.

14/01/1926 Ottawa Journal Chalk River Sand Point

Freight Derailed Passengers Late

The C.P.R. passenger train from Chalk River to Ottawa, due at Union Station at 6.25 o'clock last night was almost four hours late, due to the derailment of a freight train between Sand Point and Braeside, a few miles west of Arnprior. No persons were injured.

C.P.R. officials said that the derailment was caused by the breakage of a flange on a wheel of a box car, causing it and another to leave the tracks

The train was east-bound and was followed by the passenger train to Ottawa. This train was held at Sand Point station until a wrecking crew from Smiths Falls succeeded in clearing the line.

APPLE HILL FARMER IS KILLED BY TRAIN

James Colborne Struck by C.P.R. Flyer.

MONKLANDS, Ont, Jan. 21. Jas. Colborne, well-known farmer of the Apple Hill district, was instantly killed yesterday afternoon at a level crossing of the Canadian Pacific Railway about one and one half miles east of this village. He was hurled from a sleigh he was driving by the eastbound flyer for a distance of one hundred feet and was dead when members of th train crew reached him. He was in his 60th year.

It is believed that Mr. Colborne was sitting on the rear of the load of cordwood which he was delivering to Monklands, as the team of horses escaped injury, although the load was scattered. The train was in charge of Engineer Thomas Martin and Conductor J. Phillips, of Smiths Falls, and at tho point of the accident generally travels at between 50 and 55 miles an hour, according to Supt Crabb of the C.P.R. Coroner Munro, of Maxville, has opened an inquest into the occurrence.

The late Mr. Colborne is survived by a family of ten children. He was born at Riceville, Ont, and lived there until about ten years ago.

22/01/1926 Ottawa Journal Smiths Falls Richmond

Freight train kills old man near Richmond

Huddled figure near rail is mistaken for a bundle of rags.

While walking the tracks from Ottawa to Westport, Joseph Stevenson, aged about 80 years, formerly rooming at the home of Mrs. H. Schnider, 166 Bessemer Street, was struck by a Canadian National freight train two miles west of Richmond at 3.45 o'clock yesterday afternoon. He died in the train caboose about 15 minutes after the accident, his skull having been fractured.

Stevenson, was sitting on the north side of the tracks, about 14 in from the left rail. Apparently he had become exhausted after his long walk, and was snatching a few minutes rest. So huddled up was he that Frank Hunter, 554 O'Connor Street, engineer of the train, seeing him at the side of the tracks, thought it was merely a bundle of rags which might have been abandoned by a tramp. He watched the object, but saw no signs of any movement from it.

Hit by projection.

When the train was within a few yards of the object, Mr. Hunter made it out to be a man, and applied the brakes. However, the train was then too close, and Stevenson was struck by a projection on the side of the engine as it drove past.

Members of the train crew, headed by conductor B. S. W. Finkle, 47 Third Avenue, rushed to the men's assistance, and carried him to the caboose. They endeavoured to render first aid, but the skull was fractured, and Stevenson died within a few minutes.

The body was placed on the train to Richmond, where the station agent and others about the station failed to identify him, whereon he was brought on to Ottawa on the train, arriving here at 5.40 o'clock. He was removed to Hulse Brothers Funeral Home on MacLeod Street.

Follow up clue.

Up to the time he was taken to the funeral home, the identity of the victim was unknown. However, here a search of his clothing revealed a spectacle case, with the name Joseph Stevenson, and that of T.T.Beattie, Optician, Ottawa, in it. He had a watch also, but no money in his pockets.

T. T. Beattie, druggist, 462 Bronson Avenue, was questioned by Hulse Brothers, and identified the man as Joseph Stevenson when informed that only the thumb and the first finger were on the right hand, the rest missing. Coroner J.E. Craig opened the preliminary inquest at Hulse Brothers undertaking parlour this morning, and adjourned it to Thursday, January 28th, at the courthouse.

RETIRED FARMER MEETS DEATH ON RAILWAY TRACKS

Joseph Stevenson, Aged 75, of Kars, Killed by Fast Freight Near Richmond While Sitting On Tie.

BRAKES APPLIED SOON AS MAN WAS NOTICED

Was Too Late, However, To Stop Train.

Inquest Opens In City Today. Joseph Stevenson, aged 75 years, former well known farmer of Kars, but having of late years, resided with friends or relatives in Ottawa, was almost instantly killed, when he was struck by a Canadian National fast freight three miles west of Richmond yesterday afternoon. Mr. Stevenson had been in the city on Monday receiving medical treatment, and went to visit his sister at Westport. He apparently had been walking the tracks back to Ottawa when he was struck.

The unfortunate man, who for some years farmed at Kars, sold his property there, and frequently visited his sister, Mrs. Joseph Hicks, at Westport, but had resided mostly with friends or relatives in the city. On Monday, after paying a visit to his sister, he came to Ottawa for medical treatment, and then returned to Westport. When he left his sister's home is not known.

The freight train was coming from Belleville to Ottawa, and was due here at 4.45 o'clock. It was in charge of Conductor W. Finkle and Engineer Hunter, both of Ottawa.

Sitting On Track.

Mr. Stevenson was sitting on the end of a tie, outside of the track, and when Engineer Hunter first saw him, he could not determine if the object was a man or an obstruction of some other nature. As his engine approached the man, he then became aware that a human being was sitting on the end of one of the ties. He immediately applied the emergency brakes, but the engine, travelling at about twenty-five miles an hour, could not be stopped before striking the man.

When the locomotive was brought to a standstill, only a short distance from where it had hit Mr. Stevenson, the conductor and engineer jumped down and went to the unfortunate man, who had been thrown some distance by the impact. He was unconscious, and bleeding profusely from a deep wound in the forehead. He was taken aboard the freight train and passed away while being brought to Ottawa.

Mr. E. Landon, chief dispatcher of the Canadian National, to whom a report of the accident was made, expressed the opinion that Mr. Stevenson had been probably struck by one of the driving rods of the engine which would be on a level with the unfortunate man's head while he was sitting on the end of the tie. Apparently Mr. Stevenson, while walking the tracks, had become exhausted, and sat down to rest, but his failure to hear the engine approaching is beyond the comprehension of the conductor and engineer.

The arrangements for the funeral have been taken in charge by his sister at Westport, and burial will be made on Saturday at Kars.

No one to blame crossing fatality

Apple Hill farmer had not noticed fast train.

A verdict of accidental death, with no blame attachable to any person, was returned by the coroner's jury which yesterday afternoon investigated the death of James Colborne, farmer, of Apple Hill. Colborne was killed on January 20 when he was struck by the C.P.R. Chicago - Montreal flyer as he was driving a sleigh across the tracks, a few miles to the west of Apple Hill. Dr. J. H. Munro, coroner, of Maxville, conducted the inquest.

Among the witnesses called were engineer J. Martin, Montreal, and fireman J. McCreary, Smiths Falls, crew of the locomotive which struck the sleigh, and William Barclay, a farmer, and neighbour of Colborne, who also saw the man approaching the tracks.

Fireman McCreary testified that he saw the man driving onto the path of the flyer, which was travelling between 50 and 60 miles an hour. The victim was sitting on the front truck of the sleigh, with his back to the train, and apparently was quite unaware of its approach. The brakes were applied at once, and the whistle was blown. The heavy train was brought to a stop within a distance of 12 telegraph poles, but not before it crashed into the sleigh, killing the driver instantly, and hurting him over 100 ft.

Barclay verified the evidence. Colborne had his back to the train. The dead man was very hard of hearing, and apparently did not know of the train's approach until it was right up on him. The horses escaped without injury.

Will protest rerouting Gatineau line.

Reports have it that Railway will be sent via Meach lake and district instead of present route

Dam will necessitate moving of railway

Property woners alarmed that change will cause depreciated values.

Owners of property, especially summer residents along the gatineau River between Chelsea and Farm Point, are alarmed at reports received that the railway and highway up the river may be rerouted via Meach Lake and district, and there is talk, if this turns out to be the case of obtaining a restraining injunction.

Some thousands of summer cottagers and owners of property in that district who have built comfortable homes there are certain that such a move will depreciate the values of their properties. The road and railway would be some miles from their homes.

Officials of the International Paper Company which is building the huge dam at Chelsea which will result in the formation of a large lake and necessitate the moving of the railway and road, are non-committal when questioned on the subject and state that only preliminary surveys have been made.

Some hundred yards.

It is learnt from an authoritative source, however, that the new railway line which will be paralleled by the new highway, will only be some few hundred yards from the old line.

The diversion of the railway and highway will take place somewhere near Chelsea and will rejoin the old route somewhere above Cascades. The old line will be fifteen feet under water at Kirk's Ferry and about 21 feet under at cascades.

A large corps of surveyors and engineers, under direction of major Walter Blue, Montreal, and Mr. J. A. Strumberg, Ottawa, are presently working the district ascertaining the exact route and also the exact shores of the new lake to be formed.

Meanwhile former residents of the flooded area are making arrangements to build summer homes along the shores of the new lake.

Start a new colony.

The little colony of cottagers who formerly lived on Chelsea Island, have already started a new colony at Tenaga on the top of a high hill, which will form a shore of the lake. Here cottages, tennis courts and bowling greens have already been built and will be ready for use this spring.

Mr. Hector Carruthers, secretary of the Ottawa Board of Trade, who had a cottage near Cascades, is in a peculiar situation.

A little lake formed in a wide reach of the Gatineau is at present about a mile and an half from his cottage.

When the water is raised by the completion of the dam the lake will be right at his doorstep, and Mr. Carruthers will be able to "park" his motor boat, about 22 feet from his cottage.

"For years", he told The Citizen, "my wife has been wisjng that the lake was a mile and a half nearer. It is a straight case of the mountain coming to Mohammed."

Every Precaution Is Being Taken Protect Big Gold Shipments

Heavily Armed Guard of New York Central, Mounties and City Police on Hand When Seven Millions Worth of Bullion Despatched to J. P. Morgan and Co. FIFTY MILLIONS TO BE SENT OVER LINE

Utmost Secrecy Taken at This End to Prevent News Going Ahead to Gotham.

While bandits are daily making bigger and bigger hauls in the most barefaced fashion in New York and other large American centers, \$7,000,000 in gold bars was taken through the streets of Ottawa on Monday, loaded aboard a New York Central train and shipped to New York.

The money was from the Finance Department, consigned to J. P. Morgan and Company, New York.

That guardians of the golden hoard were not without apprehension of an attack was evident from the close way in which the bullion was guarded. Eight operatives of the New York Central Railway police, literally armed to the teeth with riot guns, sawed off shotguns and automatic revolvers. were on hand to guard the gold on its journey and a convoy of officer of the Royal Canadian Mounted Police, together with Ottawa city detectives, were in the offing at all time during the transporting of the gold from the Finance Department.

The gold, which is understood to be the first of a series of shipments to total \$50,000,000 being shipped to -New York In connection with refunding operation incidental to the taking up of maturing government loans, was taken from the vault in the East Block yesterday morning, packed in heavy boxes, triply padlocked.

Boxes Too Heavy To Lift

Too heavy for men to lift, the boxes were skidded onto trucks and taken to the station, the heavily armed convoy of officers accompanying it all the way.

At the East Block and at the station the bars were taken out of the boxes and checked.

Two special coaches were on hand to receive the shipment and it was loaded into four specially constructed bullion vaults in the coaches, which are so made to provide living quarters for the guardians in the same car.

At 4.25 p.m. the train left for New York via Tupper Lake and. Utica.

Local police, while etating that precautions in such cases are undoubtedly necessary, aay it would be impossible for anything short of a fully equipped regiment of men to have made a getaway with any of the gold if they did get it.

The bars weigh about 15 to 20 pounds each, according to rough estimates, and the boxes in which they are packed. are estimated to weigh around 600 or 700 pounds.

What the guardians of the treasure were particularly anxious about waa that no news of the shipment should reach New York ahead of the train, as that would be the most likely place for a serious attack if any was to be attempted.

In New York, with heavy and speedy trucks and an unlimited number of bandits on hand, robbers might conceivably make. a raid on a large scale, seize the gold, load it into trucks and by scattering in different directions get away with it, although their eventual capture would be absolutely certain, according to on of the New York Central operatives.

The railway coaches in which the gold was loaded are of steel, bullet proof construction and are provided with loopholes through which the gold guardlans could ward off any attack made during the journey.

At the New York end, the trsm wa met by armored cars, each provided with a big staff of trained riflemen, and carried to the depository of the Morgan company.

NO IDENTIFICATION OF MAN KILLED BY TRAIN

Body Still Lies at Morgue in Hull.

The body of the man who was killed on the Maniwaki-Ottawa CP, R. line, about one mile west of Beemer Station, Hull, on Saturday evening, still lies unidentified at Gauthler's morgue in Hull.

This morning Mr. A. G. Legault. of Hull, viewed the body and he considered that it was that of an oldish man whom he had noticed many times during the last few days walking on and near the railway tracks In the vicinity of the spot where he met death.

Engineer G. B. Parker, of 67 Rochester avenue, Ottawa, was driving the freight train from Maniwaki on Saturday evening, as he passed a crossing near the Hull Cement Works he noticed what appeared to be a dog fall in front of his engine. On arriving at Hull Station he and Fireman Eugene Brousseau, of Byron street, Ottawa, went forward to investigate and found a cap and one mitt on the cow catcher of the engine. They immediately walked back to the spot where Mr. Parker had noticed what he thought to be a dog on the tracks. They found the badly mangled form of a man, with part of the face and one leg completely severed.

Will Hold No Inquest.

They immediately returned to the station and reported the matter. Coroner Isabelle, of Hull, was summoned and a light engine was used to convey him to the scene of the tragedy. He viewed the body and had it transferred to Gauthler's morgue, deciding that no inquest was necessary. It is surmised that the body is that of a tramp who was walking along the road and fell over into the tracks either through fatigue or in a state of collapse, was caught by the cow catcher and carried many feet to the junction of tracks close to the cement works, where most of the mutilated corpse was found.

Street Car Stops being Changed

New White Posts are being Painted Now

"Staggered" street car stops on the Ottawa Electric Railway will be put into operation very shortly, as the work of changing the stop signs on telegraph posts and electric light standards is about complete.

Under the new system the number of street car stops will be reduced about 17 per cent., and should materially sopeed up the service, according to company officials. It was advocated by the Ottawa Traffic Committee and adopted by Board of Control and Council.

Cars will stop only under the new plan, which means that people living on certain streets will have to walk a block.

BRITANNIA CHILD MEETS DEATH ON RAILWAY TRACKS

Four-Year-Old Daughter of Mr. And Mrs. James Foley Instantly Killed By Brockville-Ottawa Train.

Struck at the Britannia crossing by the Brockville-Ottawa C.P.R. passenger train shortly after four o'clock yesterday afternoon Phyllis Catherine Foley, aged four years, daughter of Mr. and Mrs. James Foley of Britannia Village, was instantly killed. The lifeless body was picked up and placed on the train and conveyed to the city and later removed to Burney & Son's undertaking parlors, where an Inquest was opened last night.

The child met her death, it is thought, while on her way to a store to buy some candy. Her mother had given her five cents, and she is believed to have been crossing the railway tracks at Main street from the Foley home situated to the north of the railway to a store on the south side. There were no eye-witnesses of the accident.

Mr. Foley, who is a laborer, was on his way home from work and was walking along Main street from the O.E.R. stop when he noticed the eastbound passenger train come to a stop after it had gone over the crossing and then back up. He then noticed that there was something wrong and going down the track saw what he was told was the body of a child being rolled up in canvas after it had been lifted from between the rails underneath one of the coaches. He did not know at the time that the body was that of his child. He later found her coat and toque alongside the track, and only then knew that it was his child that had been killed. He.

Foley said that there was an electric bell at the crossing and that he heard it ringing as the train passed.

The train was bound from Smiths Falls in charge of Conductor Michael O'Connell, 64 Spruce street, and Engineer Maurice O'Connell, 166 Bayswater avenue. The child, according to the crew, ran right in front of, the train as it was going over the crossing.

Inquest Is Opened.

After the train was brought to a stop the body of the child was placed on board, after which it proceeded to Union Station, where it was met by Burney & Son's car and removed to the undertaking parlors on Somerset street. There Coroner T. J. Scobie opened an inquest and after taking the father's evidence, and going through the opening formalities the session was adjourned until next Monday night at the courthouse.

In addition to what he saw of the accident, Mr. Foley identified the remains as those of his daughter. The body was so badly mutilated that Mr. Foley was not asked to view it but made the identification through a ring which the child wore and which was removed from her finger during the inquest.

Hull Electric

Open warfare exists between the Hull Electric Company and the Green Bus Line. Immediately following upon the Hull Electric Company's announcement of a reduction of 10 cents in the fare from Aylmer to Ottawa, the Green Bus Line, its greatest competitor, announced a reduction in its rates.

Commencing Thursday a single fare from Ottawa to Aylmer will be 15 cents; seven tickets for \$1, and 42 tickets for \$5, with a 10 cent fare from Ottawa to the Royal Ottawa Country Club, Chaudiere and Highlea Clubs.

The Hull Electric cut will not go into effect till Friday.

Little girl's death purely accidental

Child could not see train for snow drifts.

A verdict of accidental death was returned last evening by a coroner's jury sitting at the courthouse regarding the death of five-year-old Phyllis Foley, daughter of Mr. and Mrs. James Foley, Main Street Britannia, who on Monday, March 22, was struck by C.P.R. train 562, Brockville to Ottawa, at the level crossing at Britannia Village.

Witnesses, in addition to the fireman and engineer, included, Michael O'Connell, 64 Spruce Street, conductor; William McPherson, 4 Spruce Street, Brakeman; Peter Boucher, 17 Osgoode Street, baggage man; William Nesbitt, grocery store proprietor near the crossing, and Dr. G. M. Pennock.

Edward J. Walker, assistant superintendent of the Smiths Falls division of the C.P.R. gave general information respecting the crossing, including a description of the condition of the electric bell which was stated to be in good order at the time. The engine whistle and bell were also in operation as the train approached the crossing.

The speed of the train was given as 40 to 45 miles per hour, a very ordinary speed for this crossing where there is no speed limit. While it was shown that an adult has a view west from this crossing for almost half a mile, Mr. Nesbitt stated that a child was not to be able to see very far on account of snow drifts. Some discussion rose regarding the question of cleaning the snow away from crossings, Mr. Walker stating that the railway was responsible for the roadway and footpaths.

The child was last seen by Mr. Nesbitt walking down onto the tracks from the drift, apparently about to cross the tracks. The train came along at the same moment and the child disappeared.

It was pointed out that this is the first accident of this character in 16 years at this crossing; the accident at that time being the death of a man and a horse there when struck by a train.

Ottawa Journal

Carleton Place

Britannia

As a result of the recent accident on the level crossing at Britannia village where a little girl was run down by a C.P.R. express and instantly killed. Residents of the Britannia line have expressed strong objection to the rate of trains on the line and the existence of level crossings.

This objection was voiced last night at the meeting of the Westboro Ratepayers Association when the organization decided to bring the matter to the attention of the Board of Railway Commissioners and to ask that some action be taken.

It was the feeling of the meeting that level crossings on the tracks constitute a menace to public safety. Regarding the speed of trains, it was stated that locomotives should be held to a speed of 15 and not more than 20 miles per hour, while crossing through the populous section just west of Ottawa.

This was repeated verbatim in the April 8 edition.

International Paper purchases electric railway and power

Important transaction completed in Montreal yesterday by which Canadian Pacific Railway disposes of its rights in Hull and gatineau with the exception of the Gatineau Valley Railway, for \$4,750,000. Papers being drawn up in Montreal today to complete deal.

Yesterday afternoon at Montreal, in the offices of the Canadian Pacific Railway Company was concluded one of the biggest and most important transactions in its application to Ottawa, Hull and disctric, in recent years, whereby the International Pulp and Paper Company of New York becomes the owner of the Hull Electric Railway Company, the Hull Electric Company, and a water power development at Paugan Falls in Low township up the Gatineau for \$4,750,000. Negotiations for the purchase of the Hull Electric Company, and its ramifications, which is a subsidiary company of the C.P.R., had been in progress in Montreal for the past ten days. The C.P.R., in ist offer of sale, asked for \$5,000,000, while the International Paper Company was only prepared to give \$4,250,000, but a compromise was reached yesterday afternoon at \$4,750,000, at which the deal went through, and the necessary papers are being drwan up today. An official announcement is expected to be forthcoming in Montreal this afternoon.

More.

The International Pulp and Paper Company, by the purchase of the Hull Electric Company, which is a subsidiary company of the C.P.R., will coe into control not only of the power plant at deschenes, and the rolling stock of the street railway, but will also acquire valuable power development owned by the C.P.R. at paugan Falls, acquired in 1919, where over 65,000 horsepower can be developed by plans which the hlding company had prepared two years ago, but which were not proceeded with.

I.P.C. buying Hull Electric to clean up huge power plans.

Gigantic project crowned by deal for Hull Electric.

Exclusive announcement in the Journal this morning of the sale by the C.P.R. of the Hull Electric Railway, together with its power holdings on the Gatineau River, has served to renew interest in the vast enterprise planned for this district by the purchaser, the Canadian International Paper Company. More.

Sale of Electric line to OER would speed traffic conditions between two cities.

Would give continuous service to Golf and other Clubs.

Speculating on future of H.E.R.

Two matters of importance are now engrossing the attention of Canadian International Paper Co. officials. The first is the formal taking over of the Hull Electric Railway Co. and the Hull Electric Co. with the power rights of the latter at Paugan Falls; the second it so find a purchaser for the street and suburban railway end of the business. More.

The erection of a modern school, to cost in the neighbourhood of \$25,000; a new Canadian Pacific Railway station, and the construction of a mission church are some of the improvements which it is expected will shortly follow in the wake of the construction of the International Paper Company's big pulp and paper mill in West Templeton.

--

The new C.P.R. station has already been located about a mile and a half from the old station called Talon, and it will be called the Gatineau station.

A small office is at present doing duty for a station and the Fraser Brace Company has built a Y from its site, which joins the main line and is of standard gauge build, to its construction works. This will permit of the company shipping in its raw material from any point and routing its finished products to either Ottawa or Montreal.

Cyrville Child Fatally Injured By C.N.R. Train

Eastview Priest makes Futile Effort to Warn Girl of Danger

Gazes Horror Stricken at Approaching Train

Yvonne Julien so frightened she could not step across rail to safety.

The third child in the Ottawa District to die a tragic death in 24 hours, Yvonne Julien, 9 - year - old daughter of J. A. Julien, a porter in the Post Office Department, Ottawa, was instantly killed yesterday afternoon when struck by a C. N. R. Montreal - Ottawa train at a level crossing at Cyrville.

The crossing at which the accident occurred is in the village of Cyrville, where the Cyrville Road crosses the C. N. R. tracks. After being struck by the train, the child was carried a distance estimated at 90 feet. When picked up, there was a trace of life in the hopelessly smashed body, but it vanished almost immediately before medical aid could be summoned.

Priest saw accident.

The accident happened at 4.16 o'clock, when the child was returning from school to her home on the Cyrville Road. An eye-witness was Rev. Father Henri Lemmens, of Our Lady of Lourdes Parish, Eastview, who had been making calls in the Cyrville district, and was walking west along the Cyrville road approaching the C. N. R. crossing, which is a little west of a small flag station maintained by the C.N.R. at this point.

According to Rev. Father Lemmens, before he reached the tracks his attention was drawn to the crossing by the warning whistle of the train. As he looked at the crossing, he saw the child standing in the centre of the tracks, gazing apparently in spell bound terror at the approaching train. He commenced to run and endeavoured to attract the attention of the child by shouting, but the little girl apparently was unaware of her danger or else was paralyzed by fear, and before he could reach the crossing, the train in the shrieking tumult of wheels locked in emergency and swept past. It carried the child along on the pilot of the engine until as it came to a jerking halt, it tossed her to the side of the right of way.

Pick up little body.

Rev. Father Lemmens reached the little form at about the same time as did the engineer Thomas J. Lynch, of 65 Rosemere Avenue, Ottawa, and with the assistance of others, the child was placed on the train. The train was then backed up to the small station, a distance of a few hundred yards, but although there had been some sign of life when she was first picked up, life had very apparently departed by the time the train reached the small station. The badly broken remains were then placed in the building to await the arrival of the coroner John E. Craig, of Ottawa, who was notified along with Gautier and Co., undertakers. The train officials having done everything possible then returned to the train and it proceeded to Ottawa where it arrived at 4.42, 12 minutes behind its scheduled time, 4.30. The conductor on the train was Jay Williams, of Montreal.

Coroner Craig, County Chief of Police Ernest Read, Chief of Police Richard Manion, of Eastview, arrived soon after the accident and after particulars had to be noted.

Coroner J. E. Craig formally opened an inquest at Gauthier's undertaking parlours, St. Patrick Street, at 10 o'clock this morning, but evidence will be taken only at 8 o'clock on Monday evening next.

Child paid no heed.

In his report concerning the accident, Mr. Lynch, the engineer, stated that while approaching the crossing at Cyrville, he saw a child come into the track from the left. The bell was ringing and whistle blowing, but the child paid no heed and continued to stand between the tracks. He immediately applied the automatic brake valve in emergency position, and the train stopped about five poles past the crossing. The train, he stated, was travelling at about 35 miles per hour at the time. Mr. Lynch also noted the efforts of the priest to attract the child away from the track, but she paid no heed.

Death accidental.

A verdict of accidental death attaching no blame for the tragedy was returned by a coroner's jury last night in the Court House investigating the death of 9-year-old Yvette Julien, daughter of Mr. and Mrs. J. A. Julien, of Cyrville, who was killed by a C. N. R. train at a grade crossing at Cyrville, April 21.

Thomas Lynch, 465 Rosemere avenue, the engineer of the train, said he first noticed the child stepping on the crossing when he was 300 feet away. He blew the whistle and when the child did not make a move he put on the emergency brakes. The child had plenty of time to get across, he declared.

Coroner John E. Craig, M. D., presided.

ONE MAN KILLED AND ANOTHER BADLY HURT

SMITHS FALLS. May 4. J. F. King, aged 65 years, dairy inspector, of Avonmore, was instantly killed, and Duncan McDermott, also of Avonmore, was seriously injured when the automobile in which they were driving was struck on a level crossing by a C.P.R. freight train about three miles east of Finch this morning. Mr. McDermott was rushed to hospital at Smiths Falls suffering from a broken leg, internal injuries and concussions.

The auto was hurled 75 feet from Lafleur's crossing, and when recovered was a complete wreck. Mr. King, who owns the auto, was driving, and the side curtains were up thus obstructing a clear view on either side of the crossing. The car was seen to drive onto the crossing by the train crew, but before the engine could be brought to a stop it had struck the car. The smash was witnessed by a number of farmers who ran to the aid of the two men. Mr. King, however, was dead when picked up, and his body was taken to Avonmore. Mr. McDermott was unconscious, and was rushed to the hospital, in Smiths Falls where he is in a serious condition.

An inquest will be held on Mr. King's body by Dr. Pollard of Moose Creek..

MAN KILLED BY TRAIN AT CORNWALL CROSSING

Wm. Tanney Failed To Notice Second Train.

CORNWALL, Ont. May 13. William Tanney, a native of Iroquois, aged between sixty-five and seventy, an inmate of the House of Refuge, located just north of the Canadian National station here, was instantly killed this evening at 7 o'clock when he was struck by the Moccasin train from Montreal. The old man, who had been in the House of Refuge for the past three years, had strayed away from the institution after tea and went over toward the track, having a great curiosity for trains. At the time of the accident an eastbound freight train had just pulled out of the Cornwall station, and the supposition is that he did not see the Moccasin approaching and stepped in front of it. An inquest will be held.

New railway bridge above the Chaudiere

A new steel bridge above the Chaudiere Falls is contemplated by the Canadian Pacific Railway to replace the present structure known as the Prince of Wales' bridge, connecting Ottawa West and West Hull. It is expected the new bridge will be erected this summer. The present structure was built in 188- and is still perfectly safe, but a new bridge is necessary to carry the heavier power engines in use. This will do away with the necessity of changing engines and bringing the trains over the bridge with lighter engines.

BOY LOSES LEG "HOOKING" RIDE ON FREIGHT CAR

Slips Off! Udder .uic Right Leg Is Mutilated By Box Cat Wheel.

Harold Pratt, six-year-old son of Mr. and Mrs. T. H. Pratt, 33 Lett street, had his right leg so severely crushed by a Canadian National Railway shunting train near his home at 4.45 o'clock yesterday afternoon that amputation of the leg was found necessary to save the boy's life. The accident happened when the boy slipped while trying to alight from a train on which he had been "swiping a ride." according to the train crew.

He is now in Water Utrtxt Hospital, and Dr. E. Bourque, 212 Bronson avenue, who attended him, states that his life is not in danger, unless unforeseen complications set in.

At the hospital today it was stated that the boy's condition was fair and that he had spent a restless night.

Slips off ladder

It was while the train was crossing on the Booth mills spur line at Ottawa Street, between lloyd and Lett streets, that the accident occurred. Harold Pratt and several other boys were playing on a number of large iron pipes in a field through which the tracks run, and when the train, consisting of an engine and several freight car, passed, going out from the mills towards the southwest, Harold, with other boys, ran along the side of the train, endeavoring to climb on the side ladders of the cars.

As there is a very heavy grade at that place, the train was going at between two and three miles an hour, according to members of the crew. The boy succeeded in climbing to a ladder and rode on it for some little distance. As he was endeavouring to descend, he slipped and his right leg, falling across the track, was crushed beneath the wheels of the car.

Conductor W. J. Bottomley, 69 Rosedale avenue, who was in charge of the train, saw the boy fall, and hearing his cry signalled the train to a stop and rushed down to the boy's assistance. He carried him to the home of Garnet R. Cowan, 91 Lloyd street, in a semi-conscious condition and suffering greatly.

SAFETY FIRST DISPLAY OF NEW YORK CENTRAL

Movies Aid Campaign for Safer Level Crossings.

In connection with the special drive to reduce - the frequency of accidents at railroad crossings which begins tomorrow under the auspices of the safety section of the American Railway Association and is to continue until October 1st. two special cars of the New York Central Railway arrived in Ottawa today and are giving four displays. Two of these were riven this morning at 10.30 and 12 noon, and the others are scheduled for 4.30 and 8.30. The cars are in charge of Mr. Roy Newcomb, general safety agent, and a number of motion pictures are being shown. One of the pictures is called "Gambling With Death." Employees of the road are taking advantage of the opportunity and there is a steady stream of visitors to the cars.

01/06/1926 *Ottawa Journal* *Maniwaki*

Numerous double trackings near the Gatineau River banks and a large station yard at Cascades, Que., are the big new works for the Ottawa, Northern and Western Railway, and its lessee, the Canadian Pacific Railway, on the Maniwaki subdivision, Quebec division, in Hull Township, according to plans of the line files at the Registry office in Hull today.

The plans have been approved by the Board of Railway Commissioners and constitute the first definite outline of the re-routing of the C.P.R. in the Gatineau Valley as a result of the flooding of big areas, and other works, to be done by the International Paper Company at its Gatineau holdings.

Plans show that the new route starts about a mile north of Chelsea, Que., at mile 8.21. It runs from there to 14.6 mileage, but from mileage 12.65 to mileage 13.26, it follows the old line of the railway. There are stations indicated at mileage 9 (Tenaga) and at 10 (Kirk's Ferry), with double tracks and sidings at various points. There is a long piece of double track between Kirk's Ferry and Tenaga.

It is indicated that at no point will the new railway line run more than 750 feet west of the present route of the line. At some points the old and the new routes almost converge and at others they are wide apart. The greatest difference in position is shown between Tenaga and Lacharite.

According to the plans extensive yards will be situated between the Cascades station and the river, overlapping the present line of the railway there.

Railway gasoline coach built in Ottawa impresses on trial trip.

Ottawa Car Company product is something new in railway equipment - has many improvements.

Something new in railway equipment is a big gasoline motor coach built by the Ottawa Car Manufacturing Company Limited and turned over this week to the Canada and Gulf Terminal Railway Company, for whom it was constructed, for use on the line out of Mont Joli, Que.

This coach is luxuriously appointed and a neat compact train in itself. It has a capacity for 50 passengers in its main sections and self locking seats for six passengers in the baggage compartment. In the main section of the car leather upholstered seats of the spring type ensure the maximum of travelling comfort. The interior of the car contains a wide central aisle, and the whole is trimmed in dark bronze metal. The finish, including all doors sash and moulding, is of mahogany, stained to a dark rich finish. A feature of the big coach is the hot water heating system.

The coach has a six cylinder enginevalve in head, double-duty type, bore 6-7 inch, 190 h.p. with four valves per cylinder. The engine at the front of this car is so mounted as to be removable as a unit. The coach is fitted with Westinghouse air brakes. It has one four-wheel truck under each end of the car, like parts of which are interchangeable. The whole coach weighs 59,000 pounds and has a length overall of 55 feet.

The crew consists of an operator and a conductor. There are five gears, of which Nos. 3, 4 and 5 are equally efficient. Any one of these may be used indefinitely if extreme conditions make this necessary. The speed of the car is 58 miles per hour.

On Tuesday there was a trial run to Renfrew and back, and the car was delivered on Wednesday morning to the owners and proceeded immediately to Mont Joli. It is specially designed for trailer operations when required, and is expected to be a great asset to its owners.

Accout of a crossing accident at Lancaster in which one man was killed and one injured.

TEAM BALKED AT CROSSING GATINEAU RY.

Engineer Throws on Emergency Brakes and Stops train within Few Feet of Stalled Dairy Wagon.

PASSENGERS ARE GIVEN THRILL THIS MORNING

Prompt Action of Mr. George Holly Highly Praised by Those on Train.

Passengers on the Gatineau train coming in to their homes or work this morning were given a thrill when, shortly after the train had left Beemer station, in Hull, after an uneventful trip and with a big load of passengers aboard, the emergency brakes went on with such suddenness as to almost throw passengers from their seats.

The train, under the urge of the clamping on of the brakes, came to a standstill within a few feet of a crossing, upon which passengers rushing to the doors and windows of the train to find out what had happened, discovered white-faced driver of a Producer's Dairy wagon fighting a team of refractory horses, with their noses a few feet from the engine tender.

Passengers declare that the prompt action of the engineer of the train, Mr. George Holly, 346 Cambridge street, prevented an accident in which Edgar Blais, milk driver, 27 St. Henri street, Hull, might have lost his life, or at least suffered serious injury, together with the horses and rig.

St. Henri St. Crossing.
The place where the near-accident took place is the St. Henri street crossing, where a serious accident occurred some years ago, resulting in the death of two boys and the maiming of a third, when two C.P.R. engines travelling light struck a Ford truck loaded with youngsters.

The Gatineau suburban train, in charge of Conductor Houlihan, Ottawa, en route from Alcove to the city, where it was due at 8.30, was approaching the crossing, after the engineer having "sounded" for the approach and was within about forty feet of it, travelling fortunately at about only twelve miles an hour, when Engineer Holly, leaning out of the cab, saw a Producer's Dairy wagon, drawn by a team of horses, just getting on to the tracks.

Sounding a warning screech from the locomotive whistle, the engineer called to his fireman, clamped on the emergency brakes and brought the heavy train to a grinding stop, just in time to avoid hitting the team.

Horses Stopped on Tracks.

When Mr. Blais saw the train he attempted to back up, but the horses became refractory, possibly due to the whistle of the train, and swung around on the tracks with the wagon and a collision seemed imminent. When the engine came to a stop the driver succeeded in getting clear, after which the train proceeded on to the Union station, the passengers loud in their praise of the smart work on the part of Engineer Holly, who had averted what might have been a very serious accident. "We were travelling about ten or twelve miles an hour. We can't be any faster over those crossings," said engineer George Holly, "and I had sounded my whistle for the crossing, when, about forty or fifty feet away, as we rounded the curve, I saw the team and dairy wagon debouching on the tracks. The driver tried to back up, apparently, but the horses were giving him trouble and I clamped on the emergency and brought the train to a stop within a few feet of the outfit, which just succeeded in getting clear when we were a few feet from him."

21/06/1926 *Ottawa Journal**Lachute***Boy Throws Stone Passenger Is Hit**

Charged with throwing a stone through the window of the Montreal C.P.R. train, and injuring Mrs. T. Fournier, of Masson, Que., an 11-year-old boy, of Gatineau Point, was placed under arrest today by C.P.R. constable J. A. Joanis. He will appear before Judge Roland Millar in Hull Court tomorrow.

13/07/1926 *Ottawa Journal**Waltham***BOOTH EMPLOYEE IS CUT IN TWO BY C.P.R. TRAIN**

Israel Robillard. Aged 59, 95 Boulevard St. Joseph, Hull, an employe of the J. R. Booth Company, was instantly killed yesterday afternoon at 5 o'clock, when the engine of the C. P. R. Ottawa-Waltham train. No. 381, ran over him at the intersection of the C. P. R. tracks and the Aylmer Road.

The body was completely severed, the trunk being found between the tracks and the lower part to the right. An inquest will likely be opened at Gauthier's Undertaking Parlors, Hull, this evening by Dr. Joseph Isabelle, Hull district coroner, who was called to Notre Dame de Laus yesterday afternoon to investigate the death of Mathias Morin.

Police are of the opinion that Robillard may have noticed the train approaching and tried to hurry across the tracks ahead of it. In doing so he was evidently caught by the train and carried about ten feet when he fell on the track, being cut in two. That such is the case is born out by the position of the body when picked up. Robillard is known to have been somewhat deaf.

Owing to the time of the accident, and the general traffic on the Aylmer road there was a lengthy line of cars stopped shortly after.

The body was removed to Gauthier's Undertaking Parlors where it will remain until the opening of the inquest this evening by Dr. Joseph Isabelle.

Mr. Robillard is survived by his widow and two small children.

13/07/1926 *Ottawa Citizen**Waltham***Believe shortcut was fatal for Hull man**

Israel Robillard, returning home from work at Booth plant, is victim of horrible accident.

Israel Robillard, employee of the J. R. Booth Company, married, residing at 95 Boulevard St Joseph, Hull, was instantly killed, and his body was most horribly mutilated, when he was struck on the Pontiac crossing on the Aylmer road yesterday afternoon by the outgoing C. P. R. Pontiac train from Hull.

There were no eyewitnesses to the accident as far as can be learned, but it is believed that the unfortunate man was taking a shortcut to his home, and was walking on the tracks near the crossing when the train appeared. Why he did not see it or hear it approaching, nobody knows, but the locomotive struck him squarely and he was thrown under the wheels, the greater part of the train passing over the body before it was brought to a standstill.

Neither member of the train crew, the engineer, Mr. Joseph Gilchrist, 25 Grant street, or the firemen, Mr. Thomas Davidson, saw the man on the tracks. They realized, however, that they had struck something, and after the train had been pulled up and the Conductor A. E. Wright walked back, the severed body of the unfortunate man was discovered within 15 feet of the crossing.

Gauthier's ambulance was summoned and the remains, on the order of Coroner Dr. Joseph Isabelle, were removed to Gauthier's undertaking parlours, Hull, where an inquest will be opened this evening.

Mr. Goulet, foreman for the J. R. Booth company under whom Mr. Robillard was employed, stated that the latter had asked permission to go home early and had left about five o'clock. The accident happened 20 minutes later.

The late Mr. Robillard was married and leaves beside his grief-stricken widow, two small children.

The engineer of the train stated that when approaching the crossing he had sounded the whistle on the locomotive, the bell was ringing, and in addition, an automatic bell at the crossing was sounding a warning of the approaching train. How, under these circumstances, Robillard failed to know of its approach is mystifying the authorities.

14/07/1926 *Ottawa Journal**Thurso and Nation Valley**Thurso***Mill at Thurso is opened today by Sir Douglas**

The new lumber mills, railway and timber limits of the Singer Manufacturing Company at Thurso, Que., are being inspected today by Sir Douglas Alexander, president of the Singer Manufacturing Company. Sir Douglas formally opened the new mill, which constitutes the first stage in what is expected to be a huge development at Thurso.

Sir Douglas spent the day inspecting the works and will leave Thurso this evening.

Although head of one of the largest corporations having headquarters in the United States, Sir Douglas is a Canadian, having spent the early part of his life in Hamilton. He is a graduate of Osgoode Hall and was knighted in recognition of the services of his company, and his own personal services, during the Great War.

The experiment was very successful, the conductor and engineer carrying on an uninterrupted conversation while a mile apart.

20/07/1926 *Ottawa Citizen**Waltham*

NO BLAME FIXED ON ANYONE FOR DEATH HULL MAN

Coroner's Jury Finds Late Israel Robillard, Who Was Struck By C.P.R. Train, Died Accidentally.

At the inquest conducted last night at Gauthier's undertaking parlors, Hull, by Coroner Dr. Joseph enquiring into the death of Israel Robillard, aged 69 years, an employe of J. R. Booth Company, formerly residing at 95 Boulevard St. Joseph, and who was instantly killed on July 12 by the C. P. R. Ottawa-Waltham train No. 381 at the intersection of the C. P. R. tracks and Aylmer road, the jury rendered a verdict of accidental death. In making their verdict, the jury exonerated the train crew of any responsibility.

The train crew and several eye witnesses were called upon to testify. The first witness was Joseph Gilchrist, the engineer, of 25 Grant street, Ottawa. He testified that there was no bell at the intersection. but that a clear view of any on-coming trains could be had from the crossing. The train, he maintained, which was coming from Hull West station, was travelling at about 10 miles an hour. As the crossing was reached the bell was operated and the whistle blown. The first intimation he had of the accident was when he heard a strange noise and when the train was stopped at 140 feet from the crossing a man was seen under the wheels.

The next one to testify was Thomas E. Davis, the fireman, of 469 Parkdale avenue, who had been on the run for four years. He stated that he was not in a position to see anyone near the crossing at the time, as he was busy firing to meet the extra pressure required for the up grade.

In his evidence, Mr. A. E. Wright, the conductor, of 181 Cameron street, stated that the train was not exceeding 10 miles per hour on the heavy grade at the time of the accident. Proof of the slow rate of speed was amply demonstrated, he stated, in the train stopping up within 140 feet. As he was occupied with his duties, he was unable to see what was going on outside.

Other witnesses gave evidence to the effect that the train travelled slowly, the bell rang, and the whistle blew just before reaching the crossing.

DRIVER KILLED WHEN HIS CAR HIT BY TRAIN

Alexander Krantzberg Meets Instant Death at Railway Crossing Near Bell's Corners. Gas Tank Explodes,

REPORT WHISTLE AND BELL BOTH SOUNDING

Inquest Opened. Deceased Had Been In This Country Only Three Months.

When the auto which he was driving was struck by C.N.R. Pembroke-Ottawa train No. 120 at the railway crossing on the Richmond road near Bell's Corners yesterday morning, Alexander Krantzberg, aged 30 years, of 253 York street, was instantly killed.

Following the collision the motor car took fire and before the body had been extricated from the wreckage it was badly burned. Mr. Krantzberg was a clothing peddler, and about ten o'clock left Ottawa in a Ford sedan en route for points west of the city. The smash occurred at the C.N.R. crossing just west of the Bell's Corners station, and about half a mile north of Bell's Corners village. Approaching the crossing, the motor car driven by Krantzberg was travelling about twenty miles per hour, and the train, which was on its way to Ottawa, had a speed of about 25 miles per hour. In addition to the locomotive the train was made up of three passenger coaches and a baggage car. Mr. R. K. Fair, 17 Robinson avenue, was engineer on the train and Mr. Seaton conductor.

Car Takes Fire.

The force of the collision caused the gasoline tank of the auto to explode. This caused the remains of the car, which with the body of Mr. Krantzberg was hurled into the ditch, to take fire. The train was brought to a stop in about 400 feet following the accident, and passengers and train crew hurried back to the wrecked auto, and although the fire was speedily extinguished the clothing was burned from the body which was also badly scorched. Mr. Krantzberg was dead and a large wound on his head indicated that he had been killed instantly and did not die from the burns which followed. Part of the auto was carried on the front of the locomotive.

Whistle and Bell Sounded.

Matthias Boisvenue, who had been working for W. H. Faulkner, had just passed over the railway crossing a few minutes before and met the motor car. He said that he heard the bell of the engine ringing and the whistle blowing for the crossing.

"When I noticed the speed with which the ill-fated motor car was approaching the railway crossing, with a train about to pass," said Mr. Boisvenue, "the thought struck me that it was travelling too fast for safety. I turned around just in time to see the smash and to witness the small auto being hurled off the road by the passing train." Mr. Boisvenue was one of the first ones to reach the unfortunate man after the car had been struck.

The body of Krantzberg was placed on board the train and was brought to the city and removed to Burney & Son's undertaking parlor. Coroner J. E. Craig, M.D., opened an inquest yesterday afternoon and after the usual formalities adjourned the hearing until Monday evening next at the courthouse,

There is no automatic warning bell on this crossing, but the view is clear from both sides. Mr. Boisvenue was only thirty or forty feet from the crossing when the accident took place.

Canadian National Railway officials are at a loss to understand how the motorist failed to be acquainted of the train's approach. The train crew stated that the whistle had been blown for the crossing and in fact was still blowing when the automobile was struck.

03/08/1926 *Ottawa Journal**Ottawa Electric**Cascades*

Meeting of Hull West council

The council was consulted by a representative of the Canadian International Paper Company, with regard to the moving of the CPR tracks in the neighbourhood of Cascades. The removal of the tracks will straighten out a tortuous curve, as well as materially shorten the line. But as the moving of the tracks will necessitate moving the power transmission line towers as well as the Bell Telephone Line and also affects the highway crossing the council deemed it best to postpone a definite decision until a more complete investigation of the matter has been affected [sic], and until the opinion of the residents of Hull West in the neighborhood of Cascades had been ascertained.

It was thought, however, by many, that the request of the company will be granted as soon as the investigation has been completed.

07/08/1926 *Ottawa Journal**Ottawa Electric*

Accident to streetcar 804.

No blame attached for fatal accident

Verdict given on death of Alexander Krantzberg.

A verdict of accidental death with no blame attached to anyone, last night was returned by a coroner's jury at the courthouse which inquired into the death of the late Alexander Krantzberg, aged 30 years, of 253 York Street, who was killed when a Pembroke-Ottawa C.N.R. train struck his motor car on a level crossing on the Richmond Road, near Bells Corners, on the morning of August 2nd.

The evidence produced by various witnesses showed that the motor car had been struck at the crossing, part of it had been carried some distance, and the remains of it took fire. Members of the train crew all testified that the engine bell had been ringing and the whistle had been blowing when the train approached the crossing and before the smash took place.

Among the witnesses were engineer J. G. Loney, fireman P. H. Garvey, conductor A. A. Seaton, and Mr. Matthias Boisvenue, who witnessed the accident. Dr. J. E. Craig, coroner, presided. Mr. J. A. Ritchie, K.C., acted for the crown and Mr. J. J. O'Meara, of the firm of O'Meara and McHugh, appeared for the relatives of the deceased.

17/08/1926 *Ottawa Journal**Brockville**water*

Supplement on centenary of Ottawa. Article on construction of the Brockville and Ottawa.

On a day early in January, 1959, it was announced that the first passenger train was ready to move over the rails from Brockville to Perth...The party left Brockville in two miniature passenger coaches hauled by a wood-burning locomotive, puny in comparison with its successors, at nine o'clock upon a January morning, so bitterly cold that four hours earlier the thermometer is reputed to have stood at 40 degrees below zero. All went well until Smiths Falls was reached, the trip being made at an easy rate over a road in first class condition except for a few miles south of that town which were yet to be ballasted. Then the trouble began

Snow Blocks Trains

The line between Smiths Falls and Perth had not been run over for a few days and snow which had fallen in the interval had become part and parcel of the rails under the influence of a slight rain which, with the frost, had converted it into ice. When the little train attempted to proceed after having left Smiths Falls at eleven o'clock, the wheels revolved but would not grip. After several attempts had been made, each attended by complete failure, an order was made to back up to the station in order that the excursionists might dine while another locomotive was despatched over the line to give battle to the ice and snow itself. Dinner over, another start was made with little improvement. The cow catcher of the forward engine simply caught the snow from the centre of the track and deposited it upon the rails making progress impossible. For a second time a backing up was carried out and another locomotive was employed to precede the passenger train. At this stage of the proceedings, some of the passengers, despairing of ever reaching Perth, decided to abandon the excursion. The remainder, continued in the coaches and on the third attempt had the satisfaction of making considerable progress before it became necessary to search the ditches alongside the track for water to supply the locomotive. This experiment was repeated, slow but steady advance being made until at a point about a mile and a half from Perth, the second car suddenly came to a dead stop. A coupling had given way. No emergency equipment being carried, away went the locomotive and the other car, leaving a number of thoroughly disgusted passengers behind until it could return with a rope to hitch to the car. At length Perth was reached at 6.45 p.m. It had taken nine and three-quarter hours to make the passage of 40 miles.

After another meal the crowd returned to the station, the hour of departure having been fixed at 8 o'clock. But in the shunting operations one of the cars left the rails and about three hours were spent in replacing it. Finally at 11 o'clock, the welcome cry of "all aboard" was heard and the wearied excursionists reached their homes in Brockville at 3.30 a.m., never, it may be reasonably expected, to forget their first trip over the B. & O.

17/08/1926 *Ottawa Journal**Canada Central*

Supplement on the Centenary of Ottawa.

Long article on the construction of the Canada Central Railway.

The first locomotives:

W.F.H. Bolckow,

John G. Richardson.

H. Abbot

were built at Taunton, Mass., which had already turned out locomotives for the B&O.

In July 1870, B&O and Canada Central suffered heavy loss through the destruction of their plant at Brockville including the roundhouse, and workshops as well as one locomotive, two passenger cars and seven boxcars, all intended for use on the Canada Central, as well as one sleeping car half completed.

In October 1870, taxes having been remitted, they were rebuilt in Brockville and continued in use there until their final removal to Carleton Place.

Coal tender leaves rails, delaying train

When the coal tender jumped the tracks a short distance east of Rock Lake, Algonquin Park, yesterday, shortly before noon, the Canadian National passenger train from Scotia to Ottawa was delayed for one hour 20 minutes. Heavy work on the part of the engineer prevented more cars from leaving the rails.

The derailment occurred while the train was crossing a high embankment. As soon as the tender left the tracks the engineer brought the train to a stop, but not before the tender had plowed along the road bed for several score feet tearing up sleepers and digging deep into the bed.

All the passengers of the train gathered along the embankment and watched the efforts of the train crew to get the tender back on the rails. This they succeeded in doing by the use of "frogs" under the train power, and without the assistance of any wrecking crew.

Fire which broke out in the sheds to the rear of the CPR station, Aylmer, shortly after noon for a while threatened a large section of Front street. One residence and adjacent sheds were completely demolished and nearby residences suffered damages from sparks and smoke. The damage at 2 o'clock was close to \$13,000, the fire then being under control.

Sparks from a passing engine are thought to have been responsible for the fire which began in the sheds to the rear of the home of Roland Cardinal, Front street. More.

03/09/1926 *Chronicle Telegraph, Queb* *Maniwaki* *Gracefield*

Fire of which the origin has not yet been determined completely razed the Canadian Pacific Railway station at this small town in the Gatineau Hills here earlier today. No estimate of the damages is available.

06/09/1926 *Ottawa Journal* *Lachute* *Chaudiere bridge*

Extensive alterations being made by the CPR to the Prince of Wales bridge will improve passenger service greatly at that point.

On August 1 the work of removing the old steel and replacing it with heavier steel was begun. It is now well under way, but so extensive is the work that it will not be completed before March 1927.

When the work is completed the bridge will be available to heavy traffic and the transfer engine will be withdrawn.

Despite the alterations, traffic is kept moving across the bridge with little delay.

The Dominion Bridge Company has the contract.

07/09/1926 *Ottawa Journal* *Smiths Falls* *Chaffey's Locks*

Several hundred passenger, most of whom were sleeping, received a shaking up this morning at 5.05 am when Canadian National train No. 8 from Toronto ran into a fall of rock which had slid onto the track at Chaffey's Locks.

The train was making around 30 miles an hour at the time and, due to the darkness, the obstacle on the track could not be seen until the engineer was upon it.

The pony trucks of the engine went off the track and the pilot was severely damaged, a new engine having to be sent out from Ottawa to bring the train in.

More

A delay occurred of about an hour and finally the engine was enabled to proceed very slowly as far as Smiths Falls where a new engine, No. 5105 from Ottawa, which had been wired for, was hooked on and the train made fast time into the city arriving at 10.30 standard time.

Reporter learned some railway ethics.

Reminiscence of 1897 C.P.R. wreck near Gatineau Point.

In the year 1897, in the fall, two C.P.R. freight trains collided a couple of miles east of Gatineau Point. The smash occurred just after daylight and as what was going to happen became evident in plenty of time, the engine crews were able to jump and save their lives. The engines were pretty badly telescoped and a number of freight cars smashed.

Like other bad news, news of the collision spread quickly through the city. A reporter on one of the city papers was one of the first from Ottawa to get on the scene.

He at once tackled one of the engineers. To every question he asked as to how and why there came the answer, "I don't know".

They knew nothing.

The reporter then tried the other engineer with the same set of results. He knew nothing. Next the reporter tackled the firemen. They also knew nothing.

Then the reporter went back to the first engineer. "Look here", he said, "I am representing the -- newspaper. When you refuse to talk to me, you refuse information to the --. So you had better cut out the fooling and tell me how the thing happened or I will have to report to the --."

"H.B." was there.

The engineer turned his back on the reporter. Then over his shoulder he shot out, "You blanked blank, don't you see H.B. Spencer over there. Do you want to get me fired."

"Oh", said the reporter, "I'm sorry I hadn't seen him." Then he hustled over to "H.B." and got his story - or at least such facts as the general superintendent wanted to give.

LUTHERAN MISSIONARY FELL UNDER A TRAIN

Rev. J. Koehle, 27, Killed Chalk River.

PEMBROKE, Oct. 2. Rev. J. Koehle, aged 27 years, Lutheran missionary of Waterloo, met instant death this morning at Chalk River when his foot slipped while he was boarding a train for Pembroke. The unfortunate man fell under the wheels of a coach as the train was moving away from the station, and was crushed to death.

Rev. Mr. Koehle had been conducting mission work between Massey and Pembroke, and had been in Chalk River for a few days. He was proceeding to Pembroke to fill an engagement there when he met his death. It is understood he was to be married in two weeks' time.

Dr. O. E. Joseph, coroner, of Pembroke, was notified and decided that death was accidental. The body will be removed to Waterloo on Monday for burial.

FATHER AND THREE CHILDREN KILLED AT CROSSING, FREIGHT TRAIN CRASHES INTO AUTO

Distressing Accident at C.P.R. Level Crossing at Cobden. Fourth Child Escapes with Slight Injuries. Family Was Returning from Church Service When Accident Happened.

RENFREW, Nov. 14. Garfield Humphries, farmer, aged 37, his two children, Edgar aged eight, and Nina aged six, were instantly killed when the Durant car in which they were driving was struck by a C.P.R. freight train travelling east from Chalk River to Smith Falls, at 12.15 noon today, at a level crossing on the main street, Cobden. Another son, George, aged four, died a few hours later, while Mabel, aged seven, is seriously injured.

Mr. Humphries with his children was returning to the farm home in Bromley township, which is the old Humphries' homestead, after attending the morning service in the United Church, Cobden, when the accident happened.

The crossing has always been considered a dangerous one as the view is obstructed from the south approach to it by an elevator, and this is the direction in which the doomed car was travelling. There were several eye-witnesses to the tragedy. Engineer Hamilton says he blew tor the crossing but it is believed that Humphries did not hear the whistle as there were several other cars coming behind which caused considerable noise. He also had the side-curtains up. Mr. A. E. Yates, who conducts a grocery business just at the crossing, was one eyewitness and says he believes Mr. Humphries never heard the whistle. The car was struck in the center and hurled with all its occupants a distance of about 125 feet. Mr. Yates rushed to the scene of the accident and called for medical aid immediately. Miss Stella Ross, R.N, was the first on the scene, shortly followed by Dr. Ritchie, Cobden, and Dr. C. W. Ferrill, Cobden. Mr. Humphries, Edgar and Nina were pronounced dead, and Dr. G. E. Josephs, of Pembroke, the coroner, was sent for. The two other children, George and Mabel, were carried to the Yates home. Dr. Ritchie said that everything had been done for little George that was humanly possible, but he could not see that he would live through the night. The unfortunate child suffered concussion of the brain. He died at seven o'clock, his mother being at the bedside.

Injuries to Young Girl.

Little seven year old Mabel, would recover, the doctor believed. She had slight internal injuries, a broken shoulder and was suffering from shock.

The mother, when told of the dreadful accident which had befallen her loved ones, bore up wonderfully. She had stayed at home to prepare the dinner and look after the twin babies, the only surviving children. When Coroner Josephs arrived he viewed the bodies and ordered their removal to the Fraser undertaking parlors.

Hold Inquest Today.

The Inquest will be held tomorrow morning in Cobden at ten o'clock. The Durant car in which they were driving was a total wreck. The top was completely demolished. No trace of a windshield could be found.

The side curtains were torn from their place and hanging. Both front and back seats were almost in ribbons. The steering wheel was broken. The engine occupied most of the front seat. A sandal of little Nina was hanging to the spoke of one of the wheels. The automobile evidently was one purchased this year as only about six thousand miles showed on the speedometer.

A deep cut in the temple was the only mark on the deceased man, although it is believed the steering wheel stabbed him in the chest and this caused his death. One arm was broken.

Widespread Sorrow.

Little Nina had bled freely from the nose and mouth, while Edgar was badly cut about the head. When Citizen reporter arrived about an hour following the accident, hundreds weve gathered about the scene of the tragedy. The whole town was in a state of sorrow. Grief was expressed on every hand as the Humphries' family were held in very high esteem.

Conductor Rose, of Smiths Falls, was in charge of the train, Number 74. Engineer Hamilton was at the throttle of Engine Number 2602. The train stopped for about an hour. The crew will return to Cobden tomorrow for the inquest.

Samuel McLaren and Miss Vide Guest were driving their cars just behind the ill-fated one, and thought that Mr. Humphries was driving about 15 miles an hour when the accident happened.

Garfield Humphries is a son of John Humphries, of Renfrew, and took over the farm seven years ago when his father retired and moved into Renfrew. His mother is dead. The funeral will be held Tuesday. The wide-spread sorrow was expressed in prayer tonight in various pulpits in Renfrew and Cobden.

16/11/1926 Athens Reporter Westport

Posing as hoboes yesterday, Provincial Constable S.J. Elliott and Constable J.M. Henderson, of the local police department, arrested George Thompson in "The Jungle" and took him to jail. The Jungle is the area about two miles west of town, just west of the trestles on the unused portion of the Brockville and Westport subdivision of the Canadian National Railways. Thompson is reported to have a record of considerable length in several places where he is wanted on theft charges. Thompson demonstrated his marksmanship, using a .32 calibre revolver with which he was armed. Thompson evidently smelled a rat as he and the disguised officers were sitting down to an afternoon meal in true tramps style. He was about to make his departure but the officers pinned his arms behind him. Nevertheless, he managed to get his gun from his pocket and had drawn a bead on Constable Henderson when the officers, using wrestling tricks that would make Zybsco envious, removed the gun from him

20/11/1926 Ottawa Journal New York Central Hurdman

Pranks of boys caused engine to leave rails. On Sunday last boys placed obstructions on tracks of CNR & NYC at Hurdman. Early Monday a NYC engine the first to pass over one of the yard lines, struck a switch "at half cock", in the parlance of the railroad men, and was derailed, resulting in serious interference with traffic, considerably damaging the locomotive, as well as giving the engineer and fireman a narrow escape.

23/11/1926 Ottawa Journal Waltham Deschenes

Large paper mill costing in the vicinity of \$4,000,000, on the Fraser property, between Deschene and Aylmer, is now considered a certainty.

24/11/1926 Ottawa Journal Waltham Aylmer

The Canadian Pacific Railway station at Aylmer was destroyed by fire breaking out shortly after one o'clock this morning, with a loss estimated at \$7,000 or more. The waiting room and office were burned practically to the ground but excellent work on the part of Fire Chied Telespore Lortie and his volunteer fire brigade saved the freight sheds at the north of the waiting room from the flames. Damage in the freight sheds was confined wholly to loss due to water. More.

Records of the Board of Railway Commission are being searched today on behalf of the City Engineer's Department to learn if permission has been granted the Canadian National Railways to extend their track facing on Isabella Street. (illegible) The existing railway siding on Isabella street was laid years ago and apparently without any opposition from the city. The company now proposes to extend it from O'Connor street to Bank, a distance of about 400 feet, crossing no street intersections, and has not consulted the city officials concerning it as it is the opinion of the railway officials that the extension is exclusively on private land. More.

Special train for Prince George left Vancouver over CPR. Proceeding to Ottawa then to St. John NB to sail on Dec 7. This caught up the regular CPR transcontinental train and then a private car was added to it.

Visit of Prince George will be private arriving 0845 Sat morning and depart Monday afternoon.

Prince George slept in private car Killarney at the station.

Nickel plant to be re-opened in near future.

Old British American Nickel plant at Deschenes purchased by McCallum, Smith and Company from the Anglo-Canadian Mining and Refining Co. More

CHILD FATALLY HURT AS TRAIN RUNS OVER HIM

Six-Year-Old Henry Rockburn, 35 Adeline St, Falls Under Moving Box-Car at Le Breton Street Crossing.

Falling under a box car, when playing near the tracks while a train was passing over the C.N.R. crossing at LeBreton street, at four o'clock yesterday afternoon, Henry Rockburn, aged six years, son of Mr. and Mrs Joseph Rockburn, 35 Adeline street, received injuries from which he passed away a short time after at the Civic hospital.

The little lad had both his legs amputated above the knee, and the lower part of his body was terribly mutilated.

He was on his way home from school, and while a freight train was travelling slowly over the crossing he caught on to the side of one of the cars, and losing his footing slipped underneath. The first intimation that the crew of the train had that there was anything wrong was when yardman J. Edwards, who was riding on the caboose was attracted by the children screaming and noticed a cap on the road. He immediately had the air brakes applied and the train was brought to a stop in a few feet.

Boy Still Conscious.

The little boy, still conscious, was found by a member of the train crew under one of the cars only a short distance from the crossing. He immediately picked the little lad up and carried him in his arms to Mr. Joseph Valiquette's drug store at the corner of Bell street and Elizabeth streets. Dr. Lome Gardner and Dr. F. W. McKInnon were called and had the child removed to the Civic hospital where he was taken in Hulse Bros, ambulance.

Mr. Joseph Rockburn, father of the boy, happened to pass the scene of the accident on his way home from work and was told by some of the lad's playmates that his son had been injured. He was in time to accompany the boy to the hospital in the ambulance, and be with him until he died. Only a few minutes before he passed away the child asked for his father, and he was brought to him by the doctors.

The unfortunate boy was pupil of St. Agnes Separate school on Louisa street, and his class had been dismissed at 3.30 o'clock. He accompanied Gerald Gavreau, age 6 years, 430 Arlington avenue, to his home, from where he went to the railway crossing.

According to Mr. James Gauvreau, father of Gerald, his son was a short distance north of the railway crossing on LeBreton street, when he noticed the Rockburn boy catching on to something on the side of one of the cars and then slipping under the wheels, which passed over him.

Mr. Joseph Wilkes, 350 LeBreton, who resides right alongside of the crossing, said that he was sitting in a window at his home, and noticed the train passing, travelling in an easterly direction. "The locomotive bell was ringing and so was the bell at the crossing," he said He noticed that the train was travelling quite slowly. He said that a few minutes before he had chased some other small boys who were sliding on a small hill on the sidewalk leading down to the railway tracks, as one of them had fallen off his sleigh right between the rails.

Mr. Wilkes also said that on previous occasions he had seen little boys hanging onto steps on the corners of the cars, for the use of the train crews. The boys, according to Mr. Wilkes, would catch on to the steps at one side of the street, and on reaching the other side jump off and run back and hang on to another car. He thought that the Rockburn boy may have been doing this.

Mr. and Mrs. Nicholas Waselenuk, grocers at the corner of Elizabeth and LeBreton streets, immediately at the south of the track, noticed the train passing slowly. Their attention was attracted by children running and Mr. John Fullisa, 83 Willow street, who was also in the store, ran out and picked up a severed limb, asking Mrs. Waselenuk if she thought it belonged to one of her sons.

It was said by members of the Wilkes family that it was the last car of the train next to the caboose that the little lad fell under. They said that the rear trucks of this car and the front trucks of the caboose passed over him.

Railway's Report.

According to a report from the railway company, at four o'clock yesterday afternoon a yard engine, with Engineer Alex Campbell in charge, and drawing 12 cars, was proceeding east over the LeBreton street crossing travelling about ten miles per hour. Yardman J. Edwards, who was riding on the caboose at the end of the train, heard some boys shouting at the north side of the crossing, and realizing that something was wrong applied the brakes and stopped the train in sixty feet. The boy was found under one of the cars with both legs severed near the body. None of the crew saw the accident.

Mr. J. Valiquette, druggist, whose store the boy was carried to after the accident, told of the little lad remaining conscious and of being able to talk following the accident. He said that during the time the boy was in his store he had asked for a drink of water on several occasions and each time was given one. After the doctors' arrival they prescribed a stimulant for the lad's heart, but when they went to give it he closed his lips and would not take it until coaxed. The boy, according to Mr. Valiquette, didn't seem to be in pain, and evidently was numb from the shock and didn't realize the terrible injuries which he had suffered.

According to the police report, Dr. Cameron, admitting doctor at the Civic hospital, attributed the child's death to hemorrhage and shock.

Besides his parents the little boy leaves two brothers, James and Joseph, and three sisters, Mary, Margarey and Irene.

Coroner J. E. Craig, M.D., was notified of his death, and had the body removed to Hulse Bros, undertaking parlors on McLeod street, where last night he opened an inquest into the child's death. After the opening formalities the hearing was adjourned until Tuesday evening, December 14, at the police station.

No funeral arrangements have yet been made.

FREIGHT DERAILMENT.

The C. N. R. passenger train from Montreal scheduled to arrive at the Capital at 1.12 o'clock this morning, was upwards of two hours late due to the derailment of an extra freight some distance north of Coteau. The trucks of one of the freight cars left the tracks shortly after midnight near St. Justine. The chief dispatcher at once ordered the Montreal train to put up at Coteau until the track was cleared. The wrecking train was rushed from Coteau. Coteau is about 71 miles from the Capital.

The picture herewith depicts a freight train on the old St. Lawrence and Ottawa railway taken at Kemptville station in the seventies. The engine was a Taunton and came to Ottawa about 1870 and was named "Lady Lisgar." The old timers in the picture are: Geo. Brackenbury, the engineer in cab window; Gidd Fairbairn, fireman, standing between engine and tender; Conductor M. Mulvihill, standing beside the tender; next to him James Rosebrook, brakeman, and Tom Powell, brakeman, on top of first car. The St. L. and O. ran in the 70's wheat trains to Sussex street. The grain was brought to Prescott in sailing schooners and unloaded into the wheat house. It was then transferred to the cars and taken to the mills in Ottawa.

The grain cars were 28' x 9' and had 3 3-8" and 6" journals. Near the wheat house in Prescott was the crane by which much of the stone for the Parliament Buildings was unloaded from old sailing schooners in the 60's and loaded onto cars and brought to Sussex street. In the 70's the St. L. and O. operated the first sleeping cars to Ottawa. The names of some were the Ottawa, Pacific, Pembroke, St. Lawrence, and the Rideau. The Rideau was a first class car and could be used for a sleeper. It was lighted by wax candles, set in brass tubes, pushed up by a spring, the wick protruding through a hole in the top, and encased in cut glass globes. These cars were beautifully finished. Passengers could take through sleeper from Sussex street to Montreal or Toronto, the cars being transferred to the Grand Trunk at Prescott Junction. The St. L. and O. also operated a through baggage car from Sussex street to Montreal. Prescott Junction was about 1 1-2 miles north of the town, the Grand Trunk station was located there. The St. L. and O. ran what was known as the Branch train, making connections with all trains, and passenger steamers. The C.P.R. on Nov. 15, 1926, put parlor cars on Prescott trains, a recall of the 60's and the 70's when the old St. L. and O. operated parlor and sofa cars. This information is given through the courtesy of Mr. J. E. Dolman, of Elm street.

Franktown

A bloodless head-on collision in snow storm at Franktown, 1880

Engines damaged, but nobody hurt, due to headwork of engineer of standing train in backing up when he saw other train approaching.

On Feb. 3, 1880, there was a serious train collision at Franktown, on the old Canada Central Railway. The wreck occurred on a Tuesday evening. The following story of the smash will be read with interest. This story was written by a reader of the O. T. S. from documents in his possession. His story makes interesting reading.

The south bound train was late and the north bound train had orders to cross it at Franktown. The latter arrived safely through the blinding storm and was standing on the main line, when the south bound train was head rattling along at her usual flight.

Uneasy feeling.

There was a feeling of impending doom from the engine crew of the north bound train. This was in the days of hand brakes. Johnson Elliott, who was engineer on the north bound train, reversed his engine and started to back up. This little back-away by the engineer considerably modified the force of the collision.

When crash came.

"The engine truck of Elliott's engine left the track and ran under the end of the platform Elliott's engine continued to back up for a short piece after they struck.

"Elliott and his fireman jumped after they started back and when he saw the other train was not stopping.

"When the trains stopped the passengers on the north bound train discovered the stove pipes down and lamp chimneys broken. The front ends of both engines were pretty badly done up.

"Another engine was telegraphed for at Brockville, and another went from Carleton Place. At about 12 o'clock the passenger and mail on the north bound train will pulled back, the mail, baggage and passengers all being transferred.

Jumped in Snowbank.

"The express messenger of the north bound train was missing at first but turned up. He had jumped and was buried up in the snow bank.

"Nobody was injured in the slightest. Major Elliot of Perth was among the passengers. He was considerably upset at being deprived of the pleasure of hearing the renowned actress Miss Neilson, who played in Ottawa that night.
